

# Voice of the Press

## Canada, The Empire and The World at Large

**CANADA.**  
**Waterproof Books.**  
One of the newest inventions in waterproof books, which may be perused while lying comfortably in the bathtub. But there is no guarantee that their contents may not make dry reading.—Kingston Whig-Standard.

**Rather Doubtful Business.**  
Reports that over 800 men have left the highway camps, mostly with the avowed purpose of taking part in the harvest are somewhat disquieting. It simply means that there will be that many more men trying to beat their ways on the trains. The appalling loss of life owing to the number travelling in that way is causing the authorities some concern and every effort is being made to discourage the practice, though with little luck it must be confessed.—North Bay Nugget.

**Playing Stock Market.**  
A mathematics professor in New York has worked it out that the odds against the average man who plays the stock market are 12 to 1. Surprisingly, many reading that will take it as an inducement to get in the game.—Hamilton Spectator.

**Canada's Hospitals.**  
How well equipped the great majority of Canadian hospitals are is proved by the fact that out of the 892 given as the total, no fewer than 418 maintain their own X-ray departments, while 324 have their own clinical laboratories and 218 their physical therapy departments.—Brockville Recorder and Times.

**Dangerous Drivers.**  
A person driving at 45 miles an hour on an open highway, and particularly where traffic is not heavy is doing no damage. There are many cars today which go 45 without effort. It is the stupid driver who insists on getting ahead through traffic who causes other drivers to become nervous; he is the one who will pass another car near the top of a hill and who is certain to pick a turn in the road for another exhibition of how he can pass the car ahead. Such a driver is a nuisance.—Stratford Beacon-Herald.

**Britain's Telephones.**  
While the number of telephone subscribers in the world as a whole declined by 2,000,000 last year, in Great Britain, as a result of a campaign carried on by the Postmaster-General, under whose direction telephones came, the number on the list has been increased by 65,000.—Sault Star.

**Scrubbing Best Exercise.**  
The fair, fat and forty will prefer not to believe Miss Zeina O'Neil, a talented lady who teaches half of Hollywood how to preserve its charm of figure by means of systematic dancing, when she asserts that the best form of physical exercise for women eager for health and straight lines is scrubbing floors in the manner that prevailed before long-handled mops hit us women of their knees.—Kingston Whig-Standard.

**Before and After.**  
Race horses, we read, do not eat the day before a race. We have known some folks that did not eat for several days after a race.—Regina Leader Post.

**A Serious Prince.**  
At thirty-nine the Prince of Wales is still a young man and he says physically fit. In recent years he has become a serious Prince. None of his future subjects displays a more lively sense of duty or brings more earnestness and devotion to his task. The United Kingdom, Canada and the other portions of the world-wide Empire over which under Providence, he will one day rule are fortunate in possessing such an heir to the throne.—The Mail and Empire.

**Wheat Prices.**  
With the United States determined to control production, no matter what other countries may do, the time seems to be approaching when the world's wheat bin will not be overflowing, and when there will be more demand for it. That time may not be here—and there is no real reason for the skyrocketing of wheat prices—it appears to be on its way, with prospects for reasonable wheat prices more bright than at any time during the past three years.—Ottawa Journal.

**Wheat Acreage Reduction.**  
The West, we believe, as a whole will have a high of relief if the whole proposal of artificial reduction blows up. There is no evidence that in the next few years grasshoppers, cutworms, drought, rust, hail, root rot or other adversities are going to cease taking toll of Western Canadian acreages. The only possible advantage of a restriction program would be to put certain acreages now sown in wheat to other use, particularly in those districts where there have been crop failures for four or five years or so.—Saskatoon Star-Prophetic.

**Canada's Day.**  
They called it "Canada's Day" today in London, when the £15,000,000 tour

per cent. Canadian loan went "out of the window" with a rush—was immediately over-subscribed. The enthusiasm of the British press at Canada's return to the London market after 29 years of absence, is quite remarkable. The success of the offering proves the high standing of Canadian credit, the supremacy of London as the financial centre, and the success of the Ottawa Conference policies of Imperial preference in trade now implemented by Imperial financial co-operation.—Montreal Star.

**Summer Exams.**  
The practice of requiring pupils to write on departmental papers in the sweltering heat has been receiving some very severe criticism. Just what is to be gained by setting these examinations during the warmest weather of the summer is not apparent to the public. After all, the criticism that has been hurled at the practice from all over the province, surely the education department will find some other plan before another year goes by.—Brantford Expositor.

**THE EMPIRE.**  
**Scotland Leading Way.**  
For England and Wales the Minister of Health has launched a campaign to wipe out the slums in five years. In Scotland the Department of Health is at present working on a three-year program which is operating with great success. Scotland has outstripped England and Wales in slum clearance.—Glasgow Herald.

**Attempting a Miracle.**  
President Roosevelt, it is stated, has determined to cleanse the United States of its gunmen and gangsters, if it can be done he will do it. It is a great tribute to his personality that the American people are already looking to him to perform the miracle. We call it a miracle because to destroy the American gangster, as opposed to merely driving him underground for a spell, calls for nothing short of a comprehensive remodelling of the American police and judicial systems. To take these out of politics means fundamentally changing the constitution of every State in the Union.—Evening News.

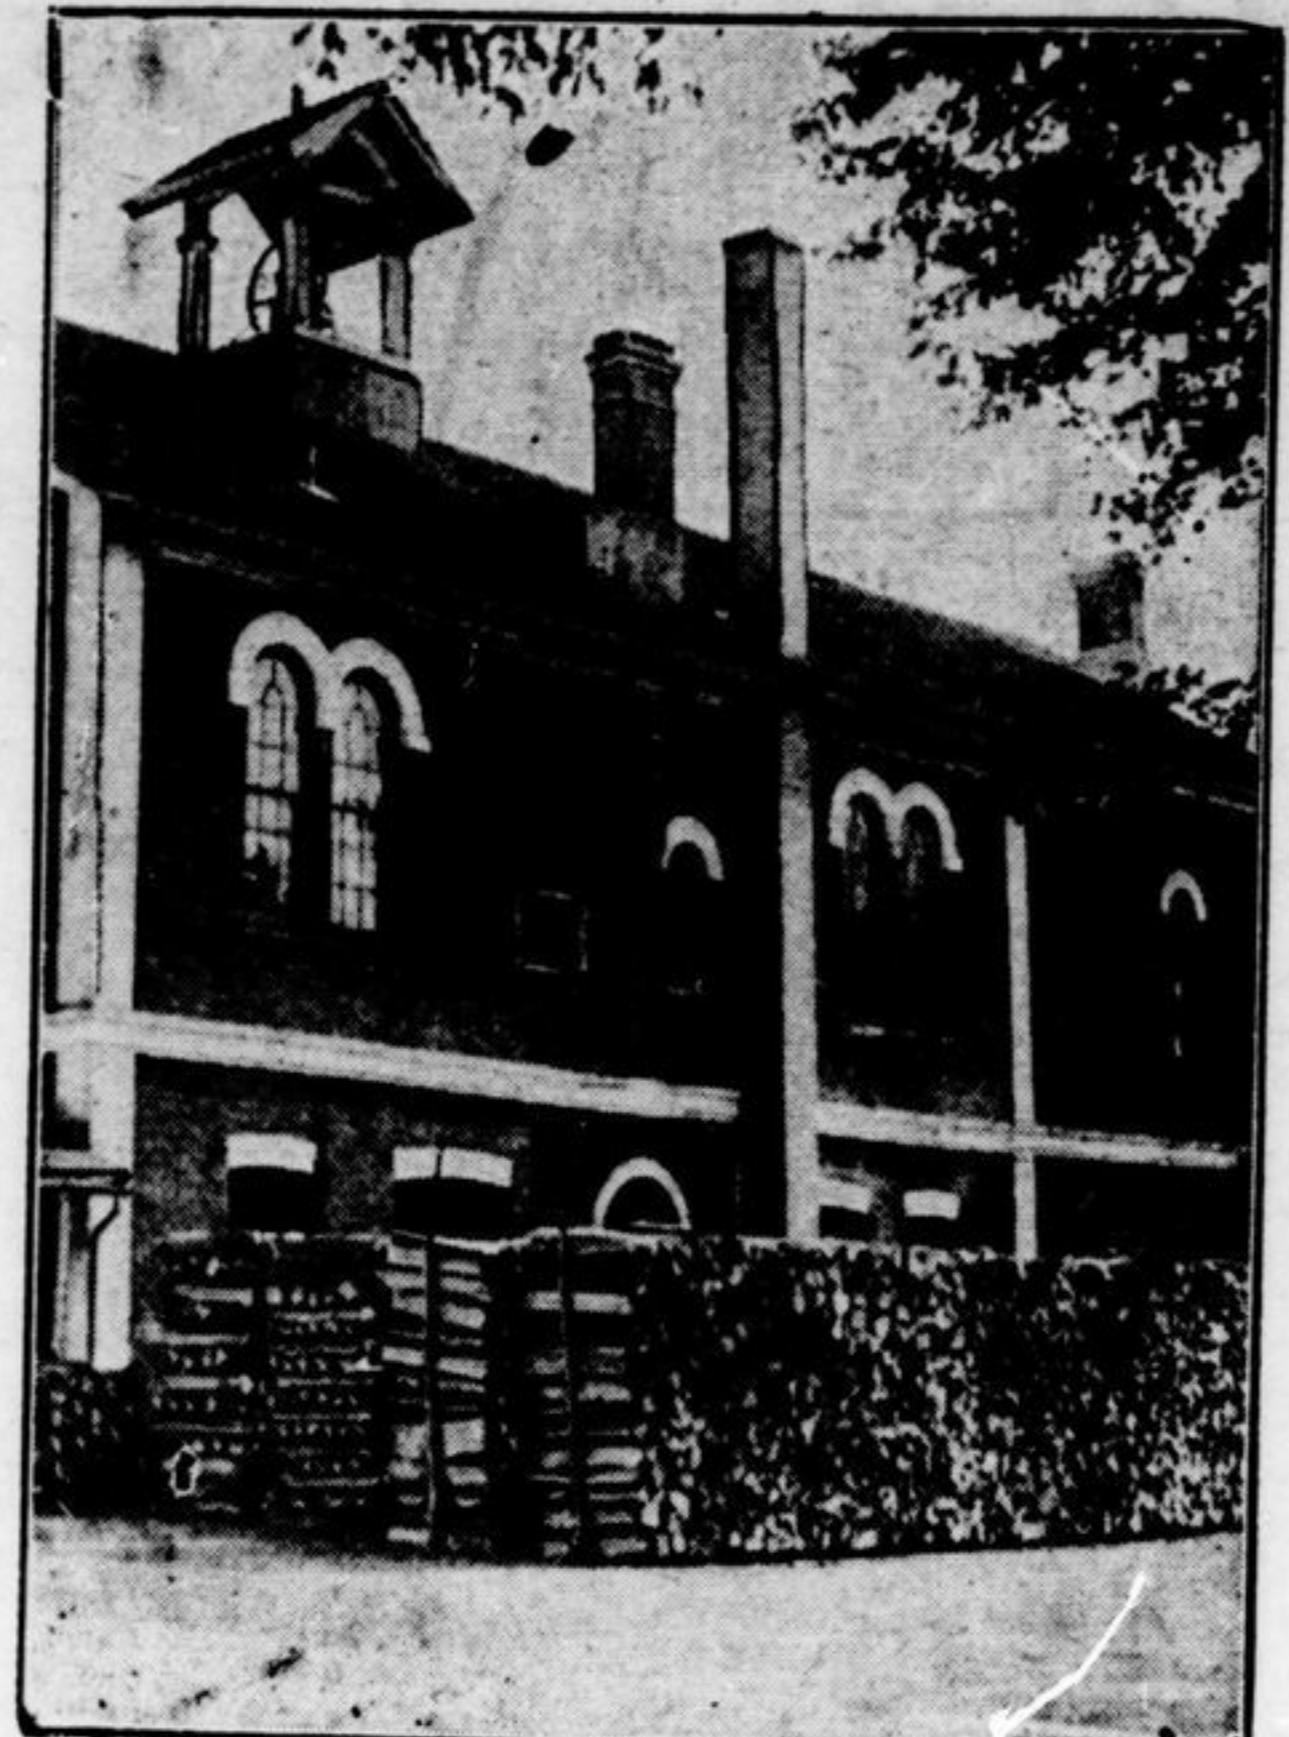

**Australia's Destiny.**  
Actually there are immense stretches in Northern Australia of what might be fertile grazing land, large areas where pig-raising and bacon resources waiting to be developed. Who is to do the developing—the Australians or somebody else? That is the main question. Reversing the flow of population into her swollen cities if she is not prepared to relax her immigration laws; putting the vast areas for which she is trustee to more profitable employment—are not these the only ways by which the Dominion can ultimately justify her "White Australia" policy?—Manchester Guardian.

**Encouraging Air-Mindedness.**  
The rate of increase in the number of privately-owned airplanes in this country has shown a heavy falling-off in recent years, and this makes it important to reconsider any restrictions that may discourage the private owner. It is certainly desirable for Britain to maintain the high standard of safety in air travel which she has justly won, but it is surely unnecessary to discourage youthful zeal and to cripple British constructors by a too rigorous insistence on observing formalities. It is generally admitted that a little more air-mindedness would do this country any harm. But how can aviation develop with natural spontaneity if bureaucracy persists in clipping its wings?—London Morning Post.

**Safety First.**  
Most industrial accidents are due to preventable causes. That is the definite conclusion of the Home Office. It does not follow that anyone was culpable. Blame may not fairly lie against the machine or the man if preventive measures were not taken; not these alone were not foreseen. Machines obviously have their perils, but it is not true that if machinery is protected accidents will not occur. Experience is constantly showing the need for protections that have been overlooked or thought unnecessary or that may be required in one place although not necessary in another. Nevertheless there are many accidents not reasonably attributable to the machine even though they were caused by the use of a machine; and many more have no connection whatever with machinery. Human failures are a prolific cause of injury; it is not uncommon for workmen to be at fault.—London Times.

**Macon May Make Flight to Spain**  
Madrid.—The United States dirigible Macon may make a trans-Atlantic flight within the next year, the newspaper El Debate reports. The U.S. Consul at Seville invited authorities when the new airport would be ready to receive dirigibles and was told that it would be a year before the hangar is completed.

## "Saw and You Eat"

This pile of wood outside the town hall of Lindsay, Ont., is 150 cords and is for transients to saw before they can get a meal. If you saw enough you get paid for it.

### Tourist's Car Stripped Of All Accessories

Aurora.—Stripping a parked car of a new set of tires, all its instruments and movable accessories, thieves, believed responsible for a long series of thefts, made a getaway with their loot here. The owner of the car was Frederick Perry, Michigan tourist, who had left his car parked on Spruce St. The car was found after the theft several blocks away. Constable Flurry stated that he expected to make an arrest soon in the case.

### McGill University Subscribes to Many Journals

Montreal.—McGill University is one of the largest subscribers of periodicals in the world. Statistics compiled show that the university regularly receives some 3,500 magazines. Some 2,000 of these are subscribed for in the regular way. Another total of 850 are presentation subscriptions, while 565 are on the exchange list with other institutions. The entire collection has been rated one of the best in the world by visiting librarians.

### Proposal to ban Unattended Dogs

Orillia, Ont.—Any dog running at large in the township between sunrise and sunset may be destroyed on sight, according to the terms of a by-law to be considered by Town Council at its next meeting. The by-law also stipulates that all dogs must either be tied or housed after night fall.

### World Police in Chicago

Chicago.—Police commissioners and chiefs from 14 foreign countries and 22 of the larger cities in the United States, in addition to representatives from the United States Department of Justice, are in Chicago attending a three-day international conference on police methods.

### Last U.S. Delegate to London Leaves

London.—James M. Cox sailed unexpectedly for New York on the liner Europa on August 2. He was the last American delegate to the World Economic Conference planned to remain in London. Mr. Cox had planned to remain until at least mid-August.

### Prince Does His Bit To Improve Business

London.—After the Prince of Wales golfed at La Touquet in black and white plus fours and a salmon pink sleeveless jumper, an airplane loaded with salmon pink jumpers left that night from London to Paris, they were sold within a week. When he put on a Fair Isle sweater, knitted for him in the Shetlands, and played in it at St. Andrew's, the style for Fair Isle sweaters became so prevalent that the Shetland weaving trade jumped a million a year. When he witnessed the international polo at Meadowbrook wearing a hat with a drooping brim, men's hats ceased like magic to be narrow brimmed and rolling, and from San Francisco to Vienna have been worn turned down ever since.

### Lord Wakefield Donates Plane to Mollisons

New York.—Plans of James and Amy Mollison are still indefinite, but Mrs. Mollison indicates she may remain in this country for a while to "have a good time," while her husband returns to England for a plane promised them by Lord Wakefield. The Mollisons were given an official city reception here, with the customary parade, shower of ticker tape and presentation of medals at city hall. The flyers were guests of the Advertising Club at luncheon with James Mollison.

### French Aviatrix Claims New Mark

Orly, France.—Helene Boucher, 23-year-old aviatrix, claimed a world altitude record for women on Aug. 2 with an unofficial height of 6,000 metres (19,680 feet). Miss Boucher reached her height after an hour and 50 minutes of spiraling upward. She claimed to have bettered by 500 metres the record of Ruth Nichols, United States.

### University of Toronto Registration Statistics

Out of a total provincial registration at Toronto University, Toronto, Ont., in 1932 of 7,367, there were 3651 students from the City of Toronto, almost half. York sent the largest number among the counties, Westwood second, Wellington third and Simcoe fourth.

### Mollison's Decorated by New York Mayor

Mayor John P. O'Brien of New York plus a medal on Amy Johnson Mollison, seen with her husband, Capt. Mollison, as reception committee greets them on New York city hall steps.

## Centenarian Does Own Shopping

### Has Ninety Descendants; Her Sister Had One Hundred and Ninety

Mrs. Sarah Musgrave, of Auburn, near Sydney, Australia, is 102 years old, but is still young and feminine enough to like shopping, travelling by train to Sydney to do it despite her years. Like most centenarians she thinks things have changed. For example when she was a girl she remembers working at a window ten hours a day during a drought in order to draw water for starving cattle. Then when the drought broke the floods looked very good. In Alberta, because of light rainfall they looked only fair, and similarly in the "dried-out" region of Saskatchewan. From Moose Jaw to Regina, and right through to Winnipeg, the fields looked exceptionally fine, Mr. Sutherland terming them as "the finest I ever saw." This area is practically all wheat, and should provide a bumper crop if drought and grasshoppers don't do too much damage. Speaking of grasshoppers, this western plague was encountered in North Dakota, and continued as far west as Winnipeg. They appeared to be doing considerable damage in places. In some spots they were so thick that they plugged the radiator front, and overheated the motor, causing some discomfort to the tourists. This trouble was partly eliminated by rigging up a screen of fine wire in front of the radiator, which caught many of the pests. In the United States the main impression was the confidence of the citizens in the future. They appeared to have much faith in their president, and were extremely optimistic as to the return of general prosperity. The same held true in the Canadian west to a great extent, the people showing similar confidence that they would come through in good shape within a period of time. One thing noticeable particularly was the neat and tidy appearance of the western cities. Their business streets are wide and their residential sections are clean, neat and generally smart, despite the lack of shade trees.

## U. S. Commodity Prices Increase During July

Washington.—Wholesale commodity prices for the United States reported to the Bureau of Labor Statistics continued their steady rise during the week ended July 22, the index figure for that week standing at 69.7, as compared with 68.9 for the week ended July 15, an increase of approximately 1.2 per cent. The week's figures bring the increase for the last five weeks to more than five per cent. The index figure for the week ended June 24 was 65.1.

## Discovers Solution For Unemployment

Chicago.—As the police tell the story, George Graves almost solved the problem of joblessness. Asked the detective bureau why he allegedly married three women without getting any divorces, he was quoted as saying: "I was out of a job and after I left the first one it occurred to me that I had better marry the others so I would be sure of a place to eat and sleep." Wife No. 1 caused his arrest.

## Rescue 75 Years Ago Recalled by Simcoe's Council

Simcoe.—Simcoe Town Council last week remembered a deed of 75 years ago, and at a special meeting passed a resolution to commemorate the heroism of the late Gilbert Wells, well-known Simcoe man of an earlier day, who, on July 24, 1858, saved the lives of two boys who were drowning in the River Tyne. A copy of the resolution was forwarded to a sister residing in Simcoe.

## Financial Post on Advertising

"Those business men who have not been advertising in the last few years are coming in again," says the Financial Post. "They find that they have to do so to get the business and that they have to advertise much more than they otherwise would to regain the ground lost as a result of their silence. Every business depression of the past has underlined this lesson, but a lot of business men have to learn it anew each time."

## Strong Man Gives Blood to Patients 302 Times

Atlantic City.—"Spike" Howard, professional strong man and wrestler, claims to be the champion blood donor. He said when he gave a pint of blood last week for a woman patient in City Hospital, it was the 302nd time he had done this. He would accept no pay. After a brief rest on a cot he walked out of the hospital.

## Women Beat Husbands On Gun Club Range

When the women's revolver team of the Westfield (Mass.) Rod and Gun Club met their husbands in a match at the local range, the score was: Women—959, Men—957.

## Outlook Optimistic In Western Canada

### Woodstock Resident Reports After Trip in West

Woodstock.—According to Colin E. Sutherland, who returned to his home here last week after an extended trip to the Rocky Mountains, Western Canada is noticeably optimistic. "With prospects of a generally fair crop, in some places an exceptionally fine one, conditions in both the United States and the Canadian West are 'looking up'," declared Mr. Sutherland. Speaking of the crop situation, Mr. Sutherland stated that throughout the U.S. Midwest, particularly in North Dakota, the crops, mostly mixed farming, looked very good. In Alberta, because of light rainfall they looked only fair, and similarly in the "dried-out" region of Saskatchewan. From Moose Jaw to Regina, and right through to Winnipeg, the fields looked exceptionally fine, Mr. Sutherland terming them as "the finest I ever saw." This area is practically all wheat, and should provide a bumper crop if drought and grasshoppers don't do too much damage. Speaking of grasshoppers, this western plague was encountered in North Dakota, and continued as far west as Winnipeg. They appeared to be doing considerable damage in places. In some spots they were so thick that they plugged the radiator front, and overheated the motor, causing some discomfort to the tourists. This trouble was partly eliminated by rigging up a screen of fine wire in front of the radiator, which caught many of the pests.

## Number On Relief Down 25 Per Cent.

Toronto.—There has been a reduction during May and June in the number of persons in Ontario receiving direct relief of approximately 25 per cent, according to a report issued by J. A. Ellis, director of the Bureau of Municipal Affairs. The total number of heads of families and single men on relief on July 1 of this year was 382,000. During the first eight months of the 1932-33 fiscal year, the total had reached 506,000. In 1929-31, it was 600,000 and in 1931-32 it was 523,000. The total paid for direct and indirect unemployment relief in Ontario during the past three years is \$77,800,000, the report reveals.

## Big Improvement in Unemployment Situation in Ontario

Toronto.—There has been a reduction during May and June in the number of persons in Ontario receiving direct relief of approximately 25 per cent, according to a report issued by J. A. Ellis, director of the Bureau of Municipal Affairs. The total number of heads of families and single men on relief on July 1 of this year was 382,000. During the first eight months of the 1932-33 fiscal year, the total had reached 506,000. In 1929-31, it was 600,000 and in 1931-32 it was 523,000. The total paid for direct and indirect unemployment relief in Ontario during the past three years is \$77,800,000, the report reveals.

## Budget Promulgated for Virgin Islands

St. Thomas, Virgin Islands.—Failure of the Virgin Islands Legislature to approve a budget for the scale year beginning July 1 has forced Gov. Frank M. Pearson to promulgate a provisional budget. His budget, drawn up under special presidential authorization, will remain in effect until the Legislature acts. Enthusiasm was aroused among the unemployed here by reports that \$125,000 had been granted the Virgin Islands from federal relief funds for public works projects. The money will help to relieve distressing unemployment conditions here.

## Aviator Foresees 500 M.P.H. Speed

Desenzano, Italy.—The Air Ministry has promoted Warrant Officer Francesco Agello to the rank of second Lieutenant in recognition of his world airplane speed record of 426 1/2 miles an hour set in his "Red Bullet" monoplane on April 19. Agello hopes to better that record in a new mystery ship. Air Minister Italo Balbo has predicted the airman soon will achieve speeds in excess of 600 miles, and Agello hopes before much longer to push the mark well up to 500.

Raw Fish Blamed In Case of Typhoid

Vancouver.—Fish from waters passing through an area in which typhoid exists may carry the germs to humans unless the fish are cooked, states Dr. J. W. McIntosh, Medical Health Officer. "Our department, after careful investigation of a recent typhoid case, has concluded it developed from germs in fish taken from the Fraser river and eaten in the raw state," he said. "Our department, after careful investigation of a recent typhoid case, has concluded it developed from germs in fish taken from the Fraser river and eaten in the raw state," he said.

## Newspaper Quotations

According to the census register prepared by the Dominion Press Clipping Bureau, in the quarter ending June 30 the first twelve newspapers were:

1. Ottawa Journal	1,965
2. Toronto Globe	1,682
3. Toronto Mail and Empire	1,569
4. Windsor Star	1,196
5. Montreal Star	1,186
6. Toronto Telegram	1,114
7. St. Thomas Times Journal	1,095
8. Winnipeg Free Press	1,054
9. Stratford Beacon Herald	978
10. Toronto Star	969
11. Vancouver Province	779
12. London Free Press	746

For the year ending June 30 the three first were: Ottawa Journal, 17,817; Toronto Globe, 7,692; Toronto Mail and Empire, 7,586.

## Says Birds and Bees Tell of Early Fall

R. B. Houston, fifth line, Caledon West, prophesies an early fall. He bases his prediction on a study of birds and bees. "The second hatch of swallows are full feathered now, a very unusual condition at this time of year. They generally do not feather until the last of August. The bees too, are preparing for winter," said Mr. Houston.

## Great Britain "Empire Conscious"

### 24 New Records in Quantities of Products from Overseas

London.—That the United Kingdom market has become increasingly "Empire conscious" is disclosed by the report for 1932 of the Empire Marketing Board. Twenty-four new records in the quantities of products from the overseas Empire were established during the year. Eggs from Australia rose from 3,000,000 dozen in 1921 to 15,900,000 dozen in 1932. Tobacco from Canada increased from 5,000,000 pounds to nearly 11,000,000 pounds while tobacco from Nyasaland and from Southern Rhodesia reached new highs at 15,964,000 and 19,452,000 pounds, respectively. Bananas from the British West Indies rose from just under 7,000,000 bunches in 1921 to more than 10,500,000 bunches in 1932. Pears from New Zealand, totaling 40,000 hundredweights, more than doubled, while other records included wheat from Australia and Canada, wheat flour from Australia, frozen lamb from New Zealand, and canned pineapple from British Malaya, the imports of which increased by 50 per cent to nearly 1,000,000 hundredweights. Two-thirds of the new records beat marks established the year before. The wheat record for Canada, nearly 47,000,000 hundredweights, has never been exceeded by any other country except by the United States in the war years of 1916 and 1917. Although there was no individual sugar record, the total sugar imports from all Empire countries amounting to more than 14,900,000 hundredweights, was the largest ever recorded.

## Oldest Rock Writing in Northwest Found

Bend, Ore.—In an isolated area of Lake County, Ore., on the meander line of an ancient lake so inaccessible that it hardly can be reached on foot or horseback, have been discovered the oldest writings known in the Pacific Northwest. It is announced by Dr. L. S. Cressman, State University ethnologist. So important is the discovery that Dr. Cressman is organizing a field party to return to the area and make a careful study of the writings. The rock writings are of the type known to students of ancient tribes as petroglyphs. Once deeply engraved a huge lake cliff overlooking a huge lake, these rock writings have been obliterated in places by centuries of weathering.

## Stray Thoughts Caused Her Weather

When a girl goes shopping, she doesn't always get what she needs for ten years, he's always to figure out as a three-legged puzzle. Instead of trying to quarrel some couple don't give a rip. A girl can love on a girl's head and yet, at the like pulling every one of these a girl could read her boy friend book, she probably couldn't see him. The last chapter to see if she likes him. Love flies out the window too many folks come in. Probably the reason so many put their husbands on a pedestal is because they expect them to meet the only time some of them about a boy half way when it's a kid. In life many are called are chosen, but in a girl's life it's not just a word. A woman's intuition that tells a girl when a friend is falling for her, is instinct that tells a fisherman he has a nibble.

## ...SMILE

Greener—"Would you like beans?" Sweet June Bride—"Go on your imitations. I want red."

Doctor—"Medicine won't do. What you need is a cot and change of living. Get some quiet country place for me to bed early, eat simple food plenty of good rich food, a month later the patient is a new man and the grateful told him so."

Fatient—"Yes, doctor, you certainly did the business. I bed early and did all the things you told me. But, say doctor, I told you I had almost killed me, it's no joke starting to smile again."

Metal—"Treat 'em right. To get my way I offer peace. By sweeping in your presence or sneaking you fill you in. Reluctant acquiescence; I feel elated when I win. But afterwards—it's funny, I wish you hadn't given in. You ought to boss me, Ho."

Stray Thoughts Caused Her Weather. When a girl goes shopping, she doesn't always get what she needs for ten years, he's always to figure out as a three-legged puzzle. Instead of trying to quarrel some couple don't give a rip. A woman's intuition that tells a girl when a friend is falling for her, is instinct that tells a fisherman he has a nibble.

Stray Thoughts Caused Her Weather. When a girl goes shopping, she doesn't always get what she needs for ten years, he's always to figure out as a three-legged puzzle. Instead of trying to quarrel some couple don't give a rip. A girl can love on a girl's head and yet, at the like pulling every one of these a girl could read her boy friend book, she probably couldn't see him. The last chapter to see if she likes him. Love flies out the window too many folks come in. Probably the reason so many put their husbands on a pedestal is because they expect them to meet the only time some of them about a boy half way when it's a kid. In life many are called are chosen, but in a girl's life it's not just a word. A woman's intuition that tells a girl when a friend is falling for her, is instinct that tells a fisherman he has a nibble.
