**...SMILES...**

Grocer—"Would you like some wax beans?"  
 Sweet June Bride—"Go away with your imitations. I want real ones."  
 Doctor—"Medicine won't help you any. What you need is a complete rest and change of living. Get away to some quiet country place for a month. Go to bed early, eat simple foods, drink plenty of good rich milk, and smoke just one good cigar a day."  
 A month later the patient walked into the doctor's office. He looked like a new man and the gratified doctor told him so.  
 Patient—"Yes, doctor, your advice certainly did the business. I went to bed early and did all the things you told me. But, say, doctor, that one cigar a day almost killed me at first. It's no joke starting to smoke at my age."

Moral—Treat 'Em Rough!  
 To get my way I oft proceed  
 By weeping in your presence,  
 Or wheedling you till you concede  
 Reluctant acquiescence;  
 I feel elated when I win,  
 But afterwards—it's funny—  
 I wish you hadn't given in.  
 You ought to boss me, Honey.

Stray Thoughts Caused by the Hot Weather  
 When a girl goes shopping for a husband, she doesn't always find a bargain. After a woman lives with a man for ten years, he's about as hard to figure out as a three-piece jig saw puzzle. Instead of trying to patch up a quarrel some couples don't seem to give a rip. A girl can love every hair on a girl's head and yet, at times, feel like pulling every one of them out. If a girl could read her boy friend like a book, she probably couldn't resist reading the last chapter to see if she marries him. Love flies out the window when too many bills come in the door. Probably the reason so many women put their husbands on a pedestal is because they expect them to be a bust. About the only time some girls will meet a boy half way is when they want a kiss. In life many are called but few are chosen, but in a girl's life many call but few propose. A woman's intuition tells a girl when the boy friend is falling for her, is the same instinct that tells a fisherman when he has a nibble.

Gertrude—"So you are not going to get married again?"  
 Robert—"No. I've become a pack rat."  
 Taking a slanting survey of the new early fall millinery, we suspect the man of the modern house never is bothered with the question: "Is my hat on straight?"  
 Old Aunt (despondently)—"Well, I will not be a nuisance to you much longer."  
 Nephew (reassuringly)—"Don't talk like that, aunt; you know you will."

If there were more words of praise to the home, and less censure and criticism, there would be fewer cases for the divorce courts. How long is it since YOU complimented YOUR wife?

Many persons like to talk about their operations, but a Scotchman isn't satisfied unless he can get a lecture out of it.  
 The Best Bet  
 We pitted once the working girl outside the social ban;  
 But new she is the only maid who hands herself a man.  
 When a boy suddenly stops loving her, a girl is as helpless to do anything about it as she is when the car she is driving stops dead in the traffic.

**U.S. to Study Elm Disease**  
 East Orange, N.J.—Steps to block the ravages of the Dutch elm disease in this locality were taken when the city commission granted permission for the establishment of a government bureau here to study the cure and prevention of the sickness which has already destroyed several scores of elms in the Orange and Maplewood.

Dr. Curtis May, head of the experimental station at Wooster, O., and Dr. O. N. Liming, chief scout, will be in charge of the bureau and will study elms in a radius of forty miles. Eleven trees in Harrison Street, between Central and McKinley Avenues, show signs of being affected with the disease, according to August Herman, secretary of the East Orange Shade Tree Commission. Some of them are more than 100 years old. Since there are about 975 elm trees along East Orange highways, tests and discussion of possible replanting will begin at once.

Dynamite is being used to kill crocodiles, which are causing heavy losses among the stock of Bulawayo farmers.

**BUSINESS AND PLEASURE IN HAPPY COMBINATION**  
**55th CONSECUTIVE YEAR**

Keep up with this ever-changing civilization. Come to the Canadian National Exhibition this year and broaden your knowledge of things worth while. Stroll through the great permanent edifices, famous for their architectural magnificence, and enjoy the marvellous displays from home and foreign lands. Visit the Motor Show and inspect the advance models for 1934. Admire the exquisite aristocracy at the Horse Show in the New Million Dollar Horse Palace. Examine the ancient and modern masterpieces in the two Art Galleries. Thrill at the music of the Band of His Majesty's Scots Guards and thirty other bands. See the gorgeous, glamorous, glittering pageant "Montezuma" where the Spaniards discover and besiege the ancient empire of the Aztecs. Stand along the lawns that slope gently to Lake Ontario's shores and watch the world's championship Marathon swims. Experience the thrill of a lifetime at the world's professional championship sculling races and other international competitions afloat and ashore. Be one of the thousands of happy, carefree people on a mile-long midway.

**News Flashes From Germany**

**Cheaper Living Causes Exodus**  
 Berlin has 328,330 more women than men, according to the census that has just been taken. The total population of the capital in Germany is now 4,262,050. This compares with 3,931,071 eight years ago, when the last national count took place. In the last 2 1/2 months, it is estimated, Berlin has lost in all 21,607 inhabitants. Most of these left because business has been bad. In consequence of the general economic conditions. Others may have gone because of political changes. Many are expected to return as soon as business conditions improve. The exodus so far has been chiefly to country districts, where living is cheaper than in the towns.

**Munich Plans Wagner Honor**  
 Munich is the original home of several of Wagner's chief works, and has ever since been second only to Bayreuth as a center of Wagner production. This year is the great composer's semi-centenary, and the city is making a completely new departure by linking up this year's festival with the historic association of Wagner and the Bavarian King, Ludwig II. In the "Nibelungensaal" of the Munich residence (the palace of the former Bavarian kings), an exhibition will be held of Wagner relics. Alongside personal possessions of the composer, for example, will be placed extracts from his letters and records of opinions expressed by him, and in this way it is hoped to make the exhibition a vivid picture of his life and the growth of his work. An exceptionally interesting item will be supplied by pictures of various scenes. Concerts are to be held at Neuschwanstein, one of the famous castles erected by King Ludwig II. This castle, owing to its unique situation among wooded hills and lakes, and the splendid vista which it commands of bare rocks peaks toward the south, possesses natural attractions almost without parallel. It contains a hall which is a close imitation of the famous "Sangersaal" in the Wartburg at Eisenach (the celebrated scene of "Tannhauser"). This hall is to be used for the first time on the occasion of these festival concerts, which will be conducted by Elmendorf, Mennerich, Rauehelsen and Zwiesler.

**Tree-Grafting Extraordinary**  
 On a small farm near Tegernsee, in Upper Bavaria, there is a pear tree which is a source of justifiable pride to its owner, a simple and unassuming Bavarian peasant. The tree is over 100 years old and is a recognized landmark throughout the district. Its age and size, however, are only minor characteristics; it is its extraordinary form which puts it in a class by itself. Many years ago, by some strange chance, a fir seed from a neighboring wood was blown against the pear tree by a high wind and was caught in one of its forks. It germinated, and out of the pear tree grew a fir tree, which has now reached the height of 21 feet. Both trees are in good condition.

**Tourists Love Old Munich**  
 The annual tourist season in Munich is well under way. Visitors are flocking into the city from half a dozen different directions, and a complete change is making itself manifest in the aspect and atmosphere of parks, streets and squares, hotels, restaurants and cafes. Only those who have spent at least one season in Munich are in a position to realize the contrast created by a process which every year converts for its "Memlichkeit" or atmosphere of easy-going carelessness, and which, like Bruges, can still boast "many a street whence busy life has fled," into a surging international tourist center.

This transformation is now taking place. There is a quicker "tempo" in the streets; an ever-increasing number of obvious strangers, keen and

**Recent Events From Overseas**

**Importance of Advertising.**  
 London, Eng.—Major J. J. Astor, M.P., Chairman of the Times Publishing Company, speaking at a luncheon of the American Chamber of Commerce here, emphasized the importance of advertising at the present time to bring about a trade revival.  
 Advertising interests are making a bold attempt to help towards trade revival by organizing an advertising and marketing exhibition in Olympia, next month, he said. It is surely in times of slump that initiative is likely to achieve most and that wise preparation is likely to produce the greatest ultimate return. Much can be done by good and skilful advertising. Now is the time to advertise.

**Observation Balloons Scrapped**  
 London, Eng.—Observation balloons, the "sausages" and other types so familiar to Canadian troops in the war today are possibly on the way to oblivion. The Air Ministry has ordered one of the latest type wingless autogyro "windmill" airplanes for experimentation as a likely substitute for the balloon, it has been learned.  
 Air Ministry experts believe the autogyro will prove superior to the balloon for observation work because of its lesser vulnerability to attack and ability to resist attack or retire quickly in face of a powerful hostile force. The type the Air Ministry has selected for its experiment will have a crew of five. It will be equipped with wireless and machine guns.

**Bananas Worry Officials.**  
 Port of Spain, Trinidad.—Are bananas fruit or vegetables?  
 This is a problem confronting the Collector of Customs here. Though the dictionary describes them as fruit, West Indian housewives habitually slice them and fry them to eat with the mid-day meal. No one worried about what they were called until recently when the Trinidad Legislature suddenly decreed a tariff on foreign vegetables, to encourage local market gardeners.  
 Thousands of bunches of bananas have been imported into Trinidad every year from Venezuela, but by describing them as vegetables, and taxing them, supplies will come from British Guiana instead, until such time as Trinidad grows enough to meet its demand.  
 The Government recently granted £2,000 to aid the growers and until such time as they can supply the local market consumers will be safeguarded against a rise in price by powers granted to the Governor to allow importation of foreign bananas duty free at any time a shortage arises.  
 A test case to determine legitimacy just what they can be called by local importers is now in the law courts.

**Bank Asks Less Money.**  
 Kingston, Jamaica.—Not so long ago depositors of currency in United States banks could get out only a percentage of their accounts. The Government Savings Bank of Jamaica has reversed the process. It is limiting accounts.  
 The bank feared a run—not of depositors looking for their money, but begging the bank to take it.  
 The situation came about through action of the four commercial banks operating in Jamaica—Barclay's, the Bank of Nova Scotia, Canadian Bank of Commerce, and Royal Bank of Canada—reducing their interest rate

**The Flying Mollisons Recuperating**

Sea breezes bring the wan smile back to the faces of Capt. James Mollison and his wife, former Amy Johnson, as they try and forget at Rye, N.Y., all about that crash.

**Scrapping of Ships Exceeds Building**  
 Washington.—Nations of the world scrapped two vessels for every new one launched in 1932, according to an announcement from the Commerce Department.  
 While more than a million and a quarter tons of merchant ships under all flags were decommissioned during that year, only 726,591 gross tons in new ships were built, the report said.  
 Great Britain, who depends on a merchant marine for her existence, scrapped 96 vessels.

**Mosquitoes to be Killed By Electrical Device**  
 Orillia.—The Orillia Anti-Mosquito Committee in its war on the pests have voted to use electricity. A new device which, it is predicted, will wreak havoc among the winged insects, has been invented by Frank Gover, chairman of the committee, with the assistance of L. G. McNeice, town engineer.  
 The invention consists of a screen door, the wire netting of which is charged with 110 volts of electricity, deemed sufficient to kill every mosquito that may alight upon it. The charged screen is masked on both sides with pieces of uncharged netting. A test of the device will be made in the near future.

than his wealth. Gain his confidence and you will become rich.  
 "An army training is good for any business man. I plan all my business deals on military lines. I arrange my attack and my defence."  
 "Before you can receive you must learn how to give. I am supposed to be the richest man in China. I have already made plans for the disposal of my money when I die."

**Grain Cargo Steamers Booked for Churchill**  
 Montreal.—Two British tramp steamers have been chartered to load grain at Churchill about the end of this month, the Thomas Walton and the Brandon. The former is now on the way to Montreal from Leith with a cargo of coal, and will sail here in ballast for the Hudson Bay port, and according to local agents, will load 264,000 bushels of wheat for Antwerp and Rotterdam with a Hamburg option.  
 Rates at which the vessels have been chartered are considerably higher than those prevailing out of Montreal. The Thomas Walton charter calls for 2s 6d quarter (eight bushels) to Antwerp or Rotterdam and 2s 9d to Hamburg. On the Brandon the rate arranged is 2s 4 1/2d to Antwerp or Rotterdam and 2s 7 1/2d to the United Kingdom. The British steamer Hazelwood has been chartered to carry wheat from Montreal next month to Antwerp and Rotterdam at 1s per quarter.

**Lightning Hits Log Cabin; Three Die**  
 Belleville, Ont.—Three small boys were burned to death when lightning set fire to the log cabin of Thomas Woodmore, near Bancroft, it was learned here.  
 The dead are: Roland, nine; Donald, eight; Woodmore's sons; and an eight-year-old nephew named Grant.  
 Meagre details of the tragedy are known. The fire occurred in a sparsely settled district with which communication is difficult. It was learned that Woodmore and his wife were sleeping in a room separated from that occupied by the children and could not reach them. The boys were burned beyond recognition.  
 The electrical storm which set the house afire was the worst experienced this year. Heavy rain accompanied it.

**Auto Firms Agree to 35-Week**  
 Detroit.—Gen. Hugh S. Johnson, United States Recovery administrator, here to confer with leaders of the automobile industry, announced that directors of the National Automobile Chamber of Commerce have agreed on an industrial code, which has as its basis a 35-week week.  
 The code will provide for a minimum wage of 43 cents an hour for cities of 600,000 population; 4 1/2 cents for cities under 500,000 and above 250,000, and 40 cents an hour for cities under 250,000. There will be no child labor.  
 General Johnson, who made the announcement after a second conference with directors of the N.A.C.C., said that the code was now up to the Government for acceptance."

**Lumber Exports From B.C. Greater**  
 Victoria.—British Columbia lumber mills shipped overseas a total of 295,747 feet, board measure, in the first half of this year. Shipments to the United Kingdom increased 58 per cent; to Australia 28 per cent, and to South Africa 100 per cent. Total waterborne shipments for the period were six per cent greater than for the corresponding six months last year.

**Drastic Dog By-law**  
 Orillia.—Any dog running at large in the township between sunrise and sunset may be destroyed on sight, according to the terms of a by-law to be considered by Tay Township Council at its next meeting. The by-law also stipulates that all dogs must either be tied or housed after nightfall.

**June Rubber Export Valued at \$538,852**  
 Ottawa.—The Dominion Bureau of Statistics reports that exports of Canadian rubber in June totalled in value \$538,852, almost the identical export of June, 1932. This product went to 55 countries, notably the United Kingdom, to which the export was \$167,825.  
 The principal item of export was pneumatic tire casings, the number being 32,204, valued at \$237,782. This was a decrease from May of 1,255 and from June, 1932, of 6,919.  
 Another large item was canvas shoes with rubber soles, the total being 110,222 pairs, valued at \$56,063. More than half, or 63,995 pairs, went to Great Britain, 23,600 to Argentina, British South Africa and New Zealand got large consignments. This export increased.  
 Rubber boots and shoes to the number of 129,192 pairs, valued at \$119,786, were exported. This was a heavy increase. Almost 100,000 pairs went to the United Kingdom. New Zealand got nearly 12,000 pairs and Italy over 10,000. The United Kingdom continues to take large quantities of rubber soles and heels.  
 Bermuda fishermen catch sharks by tying their lines to the tails of a parasitic fish named the remora. The remora is the laziest fish in the world. It gets free transport by attaching itself by a suction pad to the belly of a shark. When the fishermen play the big fish till it comes within reach of their harpoon, if they pull too hard the remora retains its hold but loses its tail.  
 The Nanking Government (China), has issued a decree, on grounds of national economy, forbidding the holding of birthday parties for persons under 60 years of age. No party may last more than two hours.
