...SMILES...

The pearly gates. A loud knock. "Who is there?" queries St. Peter. "It is I," comes the reply. And responded th St. Peter: "Get away from there. We don't want any more school teachers."

Imperial Alibi

Nero was being reproved for fiddling while Rome burned. "After all," he retorted, "it is better than harping on one's troubles."

Hey, Presto!

No magician
Is Folsom Fitch,
Yet he turned his car
Into a ditch.

Insurance Agent—"Yes, I once got a man to insure his life for $50,000, and the next week he fell out of a window and broke his neck."

The Other Man—"By Jove! You must have been sorry you persuaded him to insure."

Insurance Agent—"Not a bit. I married his widow."

You can always tell when a boy is engaged to a little angel by the way he goes around feeling like he is in seventh heaven.

Opal—"What is Virginia's reason for wanting to be married in an aeroplane?"

Mabel—"Well, you see, she once made a solemn vow to marry no man on earth."

He—"Will you sail with me on the sea of matrimony?"

She—"Yes, after you have made a raft of money."

"Satan finds some mischief still, for idle hands to do." And—for busy hands too. Half the misery of the world is created by busybodies and meddlers.

There are some women that the others don't talk about when they leave the party earlier than the rest. However, they generally are the ones who have covered the subject themselves before leaving.

Easy Street in the Straw

"How could Pinchpenny be a successful business man when he has to sleep in the stable?"

"He's got the whole house rented to tourists."

No Way Back

It was so very smooth and wide,
The road I took away,
I thought I could retrace my steps
Most any day.

Yet now it is a brambled path,
And not one star the same,
With never any turning back
The way I came.

Governess—"Methusaleh was nine hundred years old."

Bobby—"What became of all his birthday and Christmas presents?"

Someone has figured it out that one's chances of being struck by lightning are about six in a million. Not knowing exactly what the score is is what causes most of us concern during a thunder storm.

The best proof of the identity of the designer of the modern home is found in the fact that while to-day it has plugs for floor lamps in every corner it is short of a miracle if it boasts of a decent shaving mirror.

The patent medicine vendor of a few years ago on the street corner has changed his ways and now talks over the radio.

Minister—"Don't you ever attend a place of worship?"

Youth—"Yes, sir, and I'm on my way to her house now."

Doctor—"I am going to put you on a milk diet."

Mr. Grouch (sceptically)—"I'm no cattle! lead a dog's life and you better prescribe bones."

Sporting Chance

A couple who first met at a bridge party last year are to marry. But then, there are risks in every game.

Former Kaiser Still Wealthiest German

Berlin.—With property assessed at 700,000,000 marks ($185,000,000 at par), the former Kaiser still leads the dwindling list of German millionaires.

This is revealed by the latest inheritance tax statistics.

The post-war inflation and the depression have played havoc with the ranks of the wealthy Germans, and where there were more than 15,000 mark-millionaires before the war, there are now only 2,300, many of these belonging to the old noble families.

CANADIAN NATIONAL
EXHIBITION
TORONTO
AUG. 25 to SEPT. 9 1933
(EXCLUSIVE OF SUNDAYS)

Brilliant, glamorous, fascinating, inspiring, this renowned "Show Window of the Nations" reflects the changes of modern civilization from year to year.

For fourteen days and nights in great permanent edifices of stone and steel, new and improved manufactured and natural products of the Americas, Europe, Asia, Africa, Bermuda and the Indies will be on display. Modern agriculture in all its branches in the world's largest show building—an agricultural education in itself. New paintings from near and far in two art galleries. Famous Band of His Majesty's Scots Guards and thirty other bands. World's championship Marathon swims, Women's 10-miles, Friday, Aug. 25, open, 15 miles, Wednesday, Aug. 30. Sculling races for the world's professional championship. "Montezuma" glittering costumed production depicting the conquest of Mexico by Spanish adventurers under Cortes presented by 1500 performers on a 1000-foot stage. Thrilling performances in the new Million Dollar Horse Palace. Pedigreed pets at the international dog and cat shows. Models of 1934 at the Motor Show. Happy, carefree throngs on a mile long midway.

There's only one world's largest annual Exhibition, plan to see it this year.

Exceptional excursion rates arranged. Consult local agents. Railways, Steamships, Motor Coaches.

WM. INGLIS, President. H. W. WATERS, General Manager

The WORLD'S LARGEST ANNUAL EXHIBITION
FIFTY-FIFTH CONSECUTIVE YEAR
AUG. 25 to SEPT. 9. 1933

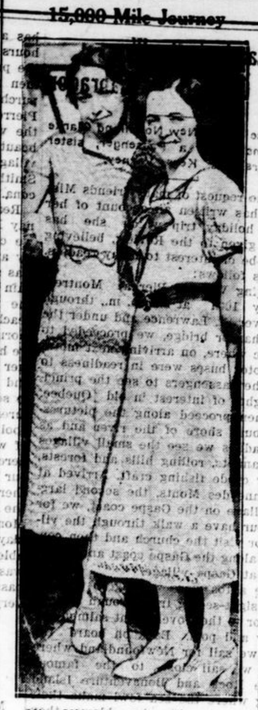
Significant—Is It Not?

Occasionally a merchant is heard to say, "my windows are my advertisement." Judging by the business done some doubtless are. Over in Coldwater, Ont., accepting the challenge of the News, a local merchant decided to exprimant along this line. He placed a number of articles in the windows and among others placed one item and marked it at one-fifth its regular retail price. And so far he has not received one inquiry concerning this particular item. Rather significant is it not?

"Business to revive, must practice new methods, adopt new principles and develop a new mind."—Adolf Hitler.

"Religion has to do with the soul and political economy with the body."—Dean Inge.

15,000 Mile Journey



Miss Nina Handy, left, mathematics expert, and Miss Irene Wheeler, dean of girls of a New York college, at Santa Ana, Calif., on last lap of 15,000-mile journey in eight weeks.

Pocket Camera To Take "Movies"

Latest Photographic Invention Pictures Magnified 42,800 Times

London, Eng.—A moving picture film twenty-six times smaller than a postage stamp, which can be magnified for showing on a normal-size home screen, was demonstrated for the first time before a number of film experts in London recently.

The "silver grains" of ordinary film size with which these films are coated, and which are the secret of the invention, were discovered accidentally by a research worker at the Kodak works at Harrow.

This invention has enabled the Kodak Company to produce a new home cine camera which can be carried in the pocket, while the twenty-five feet of film in the camera will take 14,000 pictures.

Lineman Lives After 6,000 Volts

Sydney, N.S.—Six thousand volts of electricity were shot through Jack Grant's body but he still lived.

Grant was working as a lineman at the steel plant when he contacted the high voltage wire. Foreman George Doherty went to his rescue and managed to pull him clear of the wire. Both men were badly burned about the wrists and hands but otherwise unharmed.

Good sense and good nature are never separated, though the ignorant world has thought otherwise. Good nature, by which I mean beneficence and candor, is the product of right reason.—Dryden.

"I sometimes think it is a pity that people travel in foreign countries; it narrows their minds so much."—G. K. Chesterton.

Jerusalem Notes

Water Fifty

The average daily consumption of water in Tel Aviv, which was founded twenty-two years ago on the sand dunes outside Jaffa, and now has a population of 65,000, is higher per capita than in London. As against 150 liters a day, rising to 230 liters in summer per person in Tel Aviv, the London figure is said to be 140. Water consumption in Jerusalem is only 45 liters a day, less than a third of Tel Aviv's figure, due to the inadequacy of Jerusalem's water supply which makes strict rationing essential. While the population of Tel Aviv is growing rapidly, and Haifa is also developing, there is a movement away from the ancient capital. This tendency toward a decrease in the Jewish population of the Holy City is being largely blamed on the perennial water shortage.

Timber Needed

The extent to which Palestine had been denuded of its forests in past centuries is being increasingly felt with the growing demand for timber for orange boxes, buildings, furniture manufacture and other comparatively young industries. During 1932, "forest produce," including manufactures, was imported to the amount of £423,000. The Government is doing its best toward reforestation, having planted 744,000 tree seedlings during the past year. In addition, it distributed 103,000 trees for amenity purposes. Olive trees were planted in 1932 by cultivators to the number of 122,000. Some ninety-three plantations, covering 350 acres, were started by the Jewish National Fund.

New Air Line

The Dutch Government has acquired a plot of land for the construction of an airdrome near Jerusalem, which will be a station on the Holland-Java air route. Establishment of an air service from Poland to Palestine is being considered in Warsaw at the suggestion of the Palestine-Poland Chamber of Commerce. There is a possibility that the existing Poland-Salonica line will be extended to Palestine, or alternatively, that a connection will be established with existing British and other lines. An argument in favor of the new air line is that Palestine takes second place in the list of countries exchanging mail with Poland.

Old Temple Unearthed

A discovery of considerable historical value has been made in the village of Sahsieh, near Damascus, where a Jewish temple dating from the first century has been brought to light in the course of excavations by the Franco-American Archaeological Mission, under the direction of Count Doymesnil and Mr. Hopkins. The mission has been working in this village for several years and this is the oldest discovery made up to the moment. The walls of the temple are decorated with mosaics, depicting the exodus of the Jews from Egypt until their arrival in the Promised Land.

Sericulture Promoted

The Government Sericulture Service, established in 1928 for the encouragement of silkworm breeding in Palestine, has assisted in the planting of 87,000 mulberry trees. Mulberry seedlings, implements and silk-worm eggs are distributed free, and advice extended to interested persons, schools and institutions. Two model mulberry plantations have been organized and sericulture and silk reeling have been introduced in government schools. Research work is in progress to determine the varieties of mulberries and silk worms most suited to local conditions. The planting of mulberry trees on an extensive scale is considered the first essential for the promotion of sericulture on a commercial basis in Palestine. The first attempt in modern times to reintroduce the ancient silk industry into Palestine was made thirty-five years ago under the auspices of Baron de Rothschild, who built a filature at Rosh Pinah.

Canada's Tree Sparrow Studied by Student

Winnipeg, Man.—Mr. A. Noble Hewitt, Cornell University student of ornithology, knows all about the home life of the tree sparrow in the frozen tundra lands of Canada's far north. She left here for Chicago en route home with full data and photographs and sketches on two months close observation of the birds at Churchill, newest Canadian port on Hudson Bay.

The birds Miss Heydweiller will write about in her doctorate thesis at Cornell, become amusingly tame when they leave southern Manitoba to raise their young in the north country, she reported. She had a number of pairs of birds under observation from the time nesting began until the young hatched and the fledglings left the nest. Banding experiments she carried out at the University last winter round out a complete picture of the sparrows' life and habits.

Tonnage Increases

Sault Ste. Marie, Ont. — Tonnage passing through American and Canadian locks in July was 6,047,479, an increase of more than 100 per cent. over June, it is announced here. Eastbound tonnage was more than double the westbound, with 4,291,059 tons going east and 1,756,420 west. Canadian tonnage was 311,085. There were 3,000 passengers on boats, a high mark for the year. Wheat, grain other than wheat, and iron ore led the list, followed by general merchandise, copper, pig iron, flour, lumber and stone.

Razor Blades FREE with POKER HANDS!

You can get these five keen, well-honed safety razor blades (fit any Gillette-type razor). Given free for just one complete set of Turret Poker Hands any man would appreciate such a gift!

Mild, yet sweet and full of flavour—Turret Fine Cut is a particular favourite with men who "roll their own." A 20 cent package of this mellow Virginia Tobacco will make at least 50 cigarettes . . . in it are combined satisfaction and genuine economy.

News Tit-Bits Across Canada

Canadian Preferred

A contract for one stationary air compressor was awarded recently to the Ingersoll, Rand Co., Ltd., of Toronto, despite the fact that the company's tender was $60 in excess of the lowest figure. It was agreed that it was advantageous to award business to a Canadian firm, which will manufacture the entire product in the Dominion.

Must Work

Under the new Manitoba Relief Commission, all physically fit single men, who have been on relief more than three months without doing any work, will be required to go to work camps. Their stay at the work camp will be for three months and they will be allowed food, shelter and clothes and $5 per month. Physically unfit single relief recipients will continue on relief as heretofore.

New Stamp Issue

To commemorate the hundredth anniversary of the departure from Pictou, N.S., of the first Canadian Steamship to make a trans-Atlantic trip, the postal department of Canada will issue a special stamp. On Aug. 17, 1833, the Royal William set out from Pictou to cross the Atlantic under her own steam, making the journey in 21 days. The stamps will be issued shortly.

Circulation Down

Lindsay—Circulation at the Lindsay Public Library showed a slight decrease for the month of July from the previous month of June. The total number of books distributed in the month was 4,811, as against 4,962 for June. These were made up of 3,819 adults' fiction, 256 adults' non-fiction, 618 juvenile fiction and 118 juvenile non-fiction.

87 Below

Calgary.—A height of nine miles and a temperature of 87 degrees below zero is the record so far attained by meteorological balloons released from Calgary by Captain C. H. Bromley, in connection with the polar year tests.

Receives Medal

Calgary.—Dr. C. A. Zavitz, former head of the field husbandry department of the Ontario Agricultural College at Guelph, Ont., has been awarded one of two medals, given annually by the Canadian Seed Growers' Association for consistent contribution to the production of pure seed grain.

Cheap Going

Tilbury.—Travelling at an average cost of a tenth of a cent a mile, two Tilbury Boy Scouts, George Escott and Robert Adams, recently completed a 2,000-mile hitch-hiking trip to Halifax and back.

Lives Up to Name

Extension of the arrangement with the Salvation Army Citadel, Toronto, to March 31, 1934, whereby the club looks after the care and rehabilitation of certain men discharged from sanitaria who would otherwise have to be sent to one of the city hostels, has been authorized by the Board of Control.

Dr. G. P. Jackson, medical officer of health, stated that "the facilities afforded by the Salvation Army have been most welcome and have filled a much-needed want." Terms of the extension are to be the same as before, 80 cents per diem charge, and limited to a maximum of 10 cases at any one time.

Conscience Money

Because a Brockville, Ont., resident was smitten by his conscience, the Saskatchewan Treasury is to-day richer by $9. The cash was attached to the following note: "Enclosed please find $9 which I feel I never earned. In 1915 I was in Saskatchewan and received remuneration for some work on the prairies. Hoping you can make this useful in your province, yours, An Ontario Resident."

J. S. McILRAITH

Clock in Family More Than Century

Mrs. L. Magill, Moore Township, Ontario, has in her possession a clock which has been in the Magill family for more than 100 years. For some time it has been only an ornament as Mrs. Magill was unable to get it repaired but recently a clock repairer, going from house to house as in the olden days, called at Mrs. Magill's and within a short time the clock was on the shelf ticking away as though it had never been in trouble.

The ancient timepiece has five separate sets of works, and on the face has, in addition to the Roman numerals to 12, figures up to 31, the days of the week and months of the year, the minute hand moves from minute to minute; the hour hand from hour to hour, and at 12 o'clock midnight jumps from one day and date to the next, and in addition at midnight of the last day of the month moves on to the next month, and most astounding of all jumps from February 28 to March 1, except on leap years, when it moves to the 29th, and from there jumps to March 1.

Crows Found to Be Despoilers of Nests

How much damage do crows do in despoiling other birds' nests? Game Warden Charles Still of Vernon, B.C. found a partial answer when he counted the shells of 50 pheasant nests within an area of 12 feet square where a pair of crows had their retreat. Nearby were other shells, bringing the total to about 125. The crows were destroyed.

"Finance does not mean speculation although speculation when it does not degenerate into mere gambling has a proper and legitimate place in the scheme of things economic."—Otto H. Kahn.

Does August Find YOU "Fagged Out?"

Do you wake up in the morning feeling "dead tired," unfit to tackle a day's work?

Do "little things" upset you to the verge of tears?

Does your Heart palpitate? Your Head frequently ache? Is your Digestion bad?

Ready to Give Up?

Thousands of other women (and men, too), have felt disheartened and ready to give up before taking Dr. Williams' Pink Pills. Then, in a few short weeks, their shattered Nerves and their Vitality were restored and their systems rebuilt. Life, once again, became worth living. Grateful letters from 72 different countries bear testimony of their wonderful work.

There is no mystery about the reason for the prompt relief Dr. Williams' Pink Pills give. Recent scientific tests made by two prominent physicians on over 50 people recorded remarkable improvement in the Blood Streams of these patients, and the resultant improvement in their Health was correspondingly great.

Act Through the Blood Stream

Dr. Williams' Pink Pills act through your Blood Stream, which is your Life Stream—and, be it remembered, the condition of your NERVES and the measure of your Vitality depend directly on the condition of your Blood. Dr. Williams' Pink Pills increase the power of the Blood to absorb Oxygen, which, as any medical authority will tell you, is the great vitalizer of the body.

Oxygenizes Your Blood Stream

By oxygenizing your Blood Stream, Dr. Williams' Pink Pills invigorate and revitalize your NERVES—make your food digest and really feed your nerves and tissues—carry new strength to every part of your body.

Try these Pills. Your Druggist has them—50 cents a package.
