

MURDER OF HAZEL MORRIS

by AGATHA CHRISTIE

NOTICE TO CREDITORS
The estate of Hazel Morris, late of the County of York, Ontario, deceased, is being administered by the undersigned, Executor.

CHAPTER XI (Continued)
"Up to Sittaford? You're set on going there, my dear?"

"Yes," Emily nodded vigorously. "Well, now," Mrs. Belling coughed the matter. "There's only one place in the county where you could go."

"Sittaford? There's the big house, the Sittaford House, which Captain Trevelyan built, and that's let now to a South African lady. And there's the six cottages he built, and No. 5 of them, cottages has got Curtis, what used to be gardener at Sittaford House, in it, and Mrs. Curtis. She's a young girl in the summer, and the Captain allowed her to do so. There's a house called the blacksmith's, and the post office, and Mary Hilbert, she's got six children and her sister-in-law living with her, and the blacksmith's wife she's expecting her eighth child. But how are you going to get to Sittaford House?"

"I'm going to get to Sittaford House," said Emily. "I'm going to get to Sittaford House."

"On no account," said Emily. "I'm not going to get to Sittaford House."

"I'm not going to get to Sittaford House," said Emily. "I'm not going to get to Sittaford House."

"I'm not going to get to Sittaford House," said Emily. "I'm not going to get to Sittaford House."

"I'm not going to get to Sittaford House," said Emily. "I'm not going to get to Sittaford House."

"I'm not going to get to Sittaford House," said Emily. "I'm not going to get to Sittaford House."

"I'm not going to get to Sittaford House," said Emily. "I'm not going to get to Sittaford House."

"I'm not going to get to Sittaford House," said Emily. "I'm not going to get to Sittaford House."

"I'm not going to get to Sittaford House," said Emily. "I'm not going to get to Sittaford House."

"I'm not going to get to Sittaford House," said Emily. "I'm not going to get to Sittaford House."

"I'm not going to get to Sittaford House," said Emily. "I'm not going to get to Sittaford House."

"I'm not going to get to Sittaford House," said Emily. "I'm not going to get to Sittaford House."

"I'm not going to get to Sittaford House," said Emily. "I'm not going to get to Sittaford House."

"I'm not going to get to Sittaford House," said Emily. "I'm not going to get to Sittaford House."

"I'm not going to get to Sittaford House," said Emily. "I'm not going to get to Sittaford House."

"I'm not going to get to Sittaford House," said Emily. "I'm not going to get to Sittaford House."

"I'm not going to get to Sittaford House," said Emily. "I'm not going to get to Sittaford House."

"I'm not going to get to Sittaford House," said Emily. "I'm not going to get to Sittaford House."

"I'm not going to get to Sittaford House," said Emily. "I'm not going to get to Sittaford House."

"I'm not going to get to Sittaford House," said Emily. "I'm not going to get to Sittaford House."

"I'm not going to get to Sittaford House," said Emily. "I'm not going to get to Sittaford House."

Pithy Anecdotes Of Famous People

How delightfully children sometimes say things! A little girl who had come to church for the first time was asked on her return what the minister had said, and what his text had been. "I don't know," she said. "He said 'Experience and judgment are thought for a while, and then said 'Keep your body under.'"

Sees Empire's Future In Emigration

Right Hon. J. H. Thomas Says Natural Outlet for British People are the Dominions

London, July 13.—The Right Hon. J. H. Thomas, Minister of Education, said today that the natural and inevitable outlet for British people must be through our dominions.

Mr. Thomas, speaking at the opening of the South African display at the Empire Marketing Board's shops, appealed to his hearers to buy goods from the Dominions.

"I don't want to stress one point," Mr. Thomas said, "it would be this: That whatever may be the future of this country, one thing is certain that the natural and inevitable outlet for British people must be through our Dominions."

Mr. Thomas said that he was not a prophet, but that he was sure that the average number of men and women leaving Great Britain for overseas has been between 150,000 and 200,000 every year, and that for the first time in its history, instead of any going, 60,000 returned last year, you get some idea of the important part emigration must play in the solution of our problems here.

Therefore, to secure that, we must make our Dominions prosperous, and when we can combine duty with pleasure, and get satisfaction from both, we shall be on what I would call, in a sporting phrase, an absolute certainty.

In another part of his address Mr. Thomas said, "We are living at a time when national pride seems to be ruling mad, but do not let us forget that, with all the troubles which are being visited in the world today, the bright spirit that stands out in the British Empire is the spirit of the world."

Now Mr. Ripley

London, July 13.—The Right Hon. Mr. Ripley, Minister of Education, said today that the average number of men and women leaving Great Britain for overseas has been between 150,000 and 200,000 every year, and that for the first time in its history, instead of any going, 60,000 returned last year, you get some idea of the important part emigration must play in the solution of our problems here.

Therefore, to secure that, we must make our Dominions prosperous, and when we can combine duty with pleasure, and get satisfaction from both, we shall be on what I would call, in a sporting phrase, an absolute certainty.

In another part of his address Mr. Thomas said, "We are living at a time when national pride seems to be ruling mad, but do not let us forget that, with all the troubles which are being visited in the world today, the bright spirit that stands out in the British Empire is the spirit of the world."

Fresh Fragrance of Blossoms

"SALADA" GREEN TEA

"Fresh from the Gardens"

New Serum Used As Cure Of Influenzal Pneumonia

London, July 13.—Two cures of influenza pneumonia by serum similar to that for immunizing ferrets against influenza were reported today by a London physician.

In telling how he treated two women, one of whom was dying, Dr. Hare said "both cases reacted in a very dramatic fashion" and recovered.

The serum was prepared from human beings convalescing from influenza. Recent influenza epidemics have been infected with the "H" virus, which is considered highly important because of the possibility that the germ could be isolated and an antidote be found for human beings.

Dr. Hare reported in the Lancet, British medical journal, that his first case was a woman of 27, who in a grave condition, was brought to him by her husband.

After two injections of serum four hours apart, he said, she began to improve and slept very well at night. A third injection was made the following day and, despite a tendency to have temperatures of 100 degrees, the patient recovered.

Dr. Hare added that further cases were unavailable, so additional experiments and investigation are desirable.

The Lancet listed as discoverers of the reaction on ferrets, three doctors, Wilson Smith, G. H. Anderson, and P. P. Laidlaw. Previously the inability to find an animal susceptible to influenza hindered experiments.

The tests were said to have confirmed that influenza is partly due to a germ that can pass through filters.

Mounties Celebrate Diamond Jubilee

Established in Year 1873 2,000 Mile Trek

The force, then known as "Soldiers of the Queen," and 645 strong across the prairies from Red River in Manitoba to the Rocky Mountains, the entire march being more than 2,000 miles and through country which was then in part unknown.

The Indians were so impressed that a series of treaties were concluded and an agreement was enabled to assume effective control of the Indians.

In addition to discharging police duties and undertaking much executive work, such as guarding against prairie fires in the early days, visiting lonely settlers, and much other responsible work, the force had a share of military duties.

The original march across the prairies was a military task performed in a military manner. During the Riel Rebellion of 1885 in western Canada, the force took an active part; a number of officers and men were sent to the South African War, and two squadrons for service in France and Belgium and one for Siberia were furnished during the World War.

The present force of 2,500 officers and men is now distributed in the way best suited to perform its many and varied duties. It is found in control over territory where it is an important factor in preventing the entrance into Canada of undesirable persons.

It is located on or near Indian reserves to maintain good order and to aid in the enforcement of laws.

Its members occupy many lonely posts in the North West Territory and the Yukon, as well as along the coast of British Columbia.
