"goo-tee" which is a ball of clay held together by moss or fiber around one of the nodes (or joints). First, the soft cord which is wound around the ball. After a few weeks roots are formed and penetrate the ball of clay. The stem is then cut off just below the ball and the upper part is potted up as a new plant, while the remaining portion of the old plant may be discarded or encouraged to throw out new shoots down below. Of course a simpler and much less interesting way to shorten the rubber plant is merely to cut it off just above a node and hope that these shoots will be situated so that slowly. Add fruit, which has been they will make a respectable looking slightly floured, and fold in beaten time and who like to do the un- pan from one hour to one hour and common thing the Chinese method is a quarter.

to be preferred.

NEW CLOSET SPACE How to fit new closets in the old houses when they are being reconditioned is often a perplexing problem which may be solved in a bedroom by building one in each of the two corners in a wall. This forms an alcove in which the head of a bed may be placed, in the French fashion. Pastel-hued walls, gray or rose. for example, are appropriate in such a fireplace chimney.
