

# Whitefish Georgian Bay

Forty million Whitefish distributed at the present time from the Georgian Bay from the government hatcheries at

Key, director of the Fish Branch of the Department of Fisheries, returned to Park office recently after three days in superintending the first 25,000,000 fry. The area chosen for the hatchery is on the Bay of Islands, near the Bay of Islands, where 15,000,000 fry will be raised in the next two weeks.

# SEA CABLES AND THEIR REPAIR SHIP

The foot of Fourteenth Street, New York, found the ship, which is the annual weekly service in the boat that repairs sea cables in the area of the Atlantic to Key West, to a mile.

The grappling machine is a pretty conspicuous one, much like any other of the 1,200 tonner. Though Western Union, she's a home port in Halifax, a crew of British, Canadian and American.

They were ashore for the day, quite naturally. One went out of 53 feet either at sea or on the Halifax — but there was a board and, British, it was to sea. Over a while we learned some repairs.

The way that I'm abused, is hard for folks to realize. Until they estimate the size and see the rock she used."

Little Jane—Mother, they're going to teach us domestic science at school now.

Mother—Do you mean domestic science?

Father (interrupting)—There is a bare hope that our little Jane means what she says.

Of course married men are more successful, the turtle couldn't climb a tree until he had to do it.

Burglar (menacingly)—You don't know what danger you're in.

Householder—Are you selling accident or life?

Never quit a good thing until you have something to take its place. Look at the fix we're in without the word "flapper."

Stage Hand—Poor girl. So you're back in the chorus again. I thought you married a millionaire.

Chorus Girl—So did I.

The teacher had just explained the Ten Commandments to a class of beginners in a local Sunday School. In order to test their morals, she asked:

Teacher—Can any little girl give me a commandment with only four words in it?

Little Girl (after waiting some minutes)—I can, teacher.

Teacher—Well, let's have it.

Little Girl—Keep Off The Grass.

The tissue of our life to be we weave with colors all our own; And in the field of destiny we reap as we have sown!

Cohen appeared among his friends one morning wearing a magnificent diamond pin. His associates were impressed, and one asked him:

Associate—I say, Cohen, where did you get that diamond?

Cohen—You remember Levy?

Associate—Yes, but he didn't leave you any money, did he?

Cohen—No, he didn't. But I'm his executor, and he left \$500 for a memorial stone to be put up to him. This is it.

Youngsters don't go wild at nineteen. They just begin to show the effect of nineteen years of neglect.

Life even itself up fairly well. All of us have relatives that we are ashamed of, and also relatives who are ashamed of us.

"What is a budget?"

"Well, it is a method of worrying before you spend instead of afterwards."

"There is no moment like the present; not only so, but, moreover, there is no instant force and energy, but in the present. . . —Miss Edgeworth.

"The man who procrastinates struggles with sin."—Hesiod.

"Never leave that till to-morrow which you can do to-day."—Benjamin Franklin.

# HAVE YOU HEARD

The young lady of today doesn't wait until the young man asks for her hand, she rather waits until he shows his hand first.

Customer—With prices rising as they are, you must be making lots of money.

Butcher—Not exactly. My customers merely owe me more.

Short Inspirational Thoughts—What are you going to do when you can no longer do what you are doing? . . . Keep your fears to yourself; but share your courage with others. . . . A good resolution for every day: "I'm going to beat yesterday!" . . . Put the "man" in salesmanship if you want to succeed. . . . The easier it is to reform a man, the more you have to do to it. . . . We sometimes doubt that man is made of dust, for dust usually settles. . . . Fortunate is the man who really deserves the opinion he holds of himself. . . . So live that you won't be ashamed to sell the family parrot to the town gossip. . . . Hope is the anchor of the soul and whatever else you have that you deem of value.

ROCK ME TO SLEEP

"The court is deeply pained about the charge against your wife; Your bitter and unseemly strife must be at once explained.

"The charge is new and quaint, it says: 'That you were rocked to sleep.'"

And since your grief appears quite deep, what's back of this complaint?"

"The way that I'm abused, is hard for folks to realize. Until they estimate the size and see the rock she used."

Little Jane—Mother, they're going to teach us domestic science at school now.

Mother—Do you mean domestic science?

Father (interrupting)—There is a bare hope that our little Jane means what she says.

Of course married men are more successful, the turtle couldn't climb a tree until he had to do it.

Burglar (menacingly)—You don't know what danger you're in.

Householder—Are you selling accident or life?

Never quit a good thing until you have something to take its place. Look at the fix we're in without the word "flapper."

Stage Hand—Poor girl. So you're back in the chorus again. I thought you married a millionaire.

Chorus Girl—So did I.

The teacher had just explained the Ten Commandments to a class of beginners in a local Sunday School. In order to test their morals, she asked:

Teacher—Can any little girl give me a commandment with only four words in it?

Little Girl (after waiting some minutes)—I can, teacher.

Teacher—Well, let's have it.

Little Girl—Keep Off The Grass.

The tissue of our life to be we weave with colors all our own; And in the field of destiny we reap as we have sown!

# DOUBLED UP WITH RHEUMATISM

Could Not Wash Himself Nor Brush His Hair

So bad was his rheumatism that his friends declared he would never work again. Although he is 70 years old, he proved they were wrong. Read what he says:

"I am seventy years of age. Last Christmas I was completely doubled up with rheumatism. I could not brush my hair nor wash myself. People said I should never work any more. I am working harder than a young man to-day. Thanks, many thanks, to Kruschen Salts. I take them in my tea, and I have recommended them to many. I could not get in or out of bed myself, nor sit up. But see me work now—12 hours a day sometimes. Kruschen Salts have done it."—G. J.

Rheumatic conditions are the result of an excess of uric acid in the body. Two of the ingredients of Kruschen Salts have the power of dissolving uric acid crystals. Other ingredients assist Nature to expel these dissolved crystals through the natural channel. In addition, there are still other salts in Kruschen which prevent food fermentation in the intestines, and thereby check the further accumulation not only of uric acid, but of other body poisons which undermine the health.

Quebec's Motor Accidents in 1934

The annual report concerning automobile accidents in the province of Quebec during 1934, together with comparative figures for 1932 and 1933, was published last month.

The report shows that 7,030 automobile accidents, in which 254 persons lost their lives, and 5,066 were injured, occurred in the province during the year, this being a substantial increase over figures for 1933, when 6,118 accidents were reported, 228 people killed, and 4,162 injured.

Speeding was responsible for 3,344 of the year's accidents, with carelessness of pedestrians with cause of another 1,863 mishaps. Negligence on the part of drivers and chauffeurs caused 4,484 accidents, while the official list shows that carelessness on the part of the operator of a vehicle other than a motor vehicle resulted in 698 accidents during the year. Drunkenness caused 236 accidents, and defective brakes another 622.

Operators of horse-drawn and other vehicles, however, showed more care, since the number of accidents caused through their negligence was smaller than in 1933, and 50 per cent. lower than in 1932.

Four thousand and fifty-eight accidents in which persons were killed or injured were reported during the year, 13 collisions being reported between automobile and horse-drawn vehicles, with loss of life in each case, and 166 being reported where persons were injured. There were 349 such collisions in all. Automobiles crashed into trains 40 times during the year, into 231 tramways, and into a total of 3,444 other autos in all. — Quebec Tourist Bulletin.

DEADLY GAS FOR FLIERS

Carbon Dioxide Valuable For Breathing In High Altitudes

The researches of Professor Yandell Henderson on the part that carbon dioxide plays in breathing are now classic. At first he shocked physicians by telling them that pure oxygen tends to retard respiration, but that when a little deadly carbon dioxide is added the asphyxiated are quickly brought back to consciousness. Now his methods of resuscitation are used in most hospitals.

In the British scientific weekly Nature Professor Henderson, collaborating with Drs. Samuel B. Childs Jr. and Hannibal Hamlin, pursues his inquiries further. This time mountain climbing is the subject of study for the reason that tourists who ascend high mountains in their own legs are often overcome by what is called "mountain sickness," a form of asphyxia attributed to lack of oxygen.

Last year Childs and Hamlin spent a few days on Pike's Peak (14,100 feet) and experimented on

themselves, three acclimated hotel employees and thirty tourists who were more or less affected by mountain sickness. Childs and Hamlin and the three hotel employees breathed the measured amounts of carbon dioxide supplied by cylinders slung by a strap over one shoulder. When fifty liters of air were breathed a minute the carbon dioxide was diluted to 2 per cent; with twenty liters a second the dilution was 5 per cent.

The effects observed were not large, "but on the whole the evidence indicates that the exertion was made with somewhat less strain on the heart and respiration." Excessive loss of carbon dioxide was prevented and the utilization of the available oxygen aided.

The tourists did not wear the apparatus, but they were permitted to inhale carbon dioxide. Those who suffered from dizziness, nausea, blue lips, cramps and twitching were distinctly benefited.

The effects are even better when there has been no physical exertion. Hence it is suggested by Henderson and his co-workers that airplane passengers who travel at altitudes of 14,000 feet might well breathe carbon dioxide. Not much of the gas need be carried along — because so little is required.

All May Help

Want your home town to go ahead? Then take hold and do a little pulling ahead yourself! Want your home town business to keep your home people well employed? Then give that business your full support by buying your supplies at home.

Want your business to grow? Then talk about it. Write about it. Advertise it. And this applies not only to those who own or operate a business, but also to those who are employed by that business. More interest in your work, more business, more employment for yourself and others at better wages. All may help.—Exchange.

# Gardening

By Gordon L. Smith

SCREENING

Growing screens offer a solution to things which are better hidden. The straight lines of a residence should be broken by a few bushes and vines. These growing screens are divided into two classes, annual climbers and tall plants which, of course, must be renewed each year, and perennial creepers and shrubs of trees. The latter are permanent and take more time to produce and may be supplemented the first year or two with annuals. The annuals, instead have the advantage of speed, in a month or two they are performing their duty of shutting off an objectionable view, or screening the noon day sun from the verandah, and the very fact that they are there for one year only, allows an opportunity for change, and changing things about is one of the fascinations of gardening. Of the annual plants, African Marigolds, Cosmos, Ornamental Sunflowers, Larkspurs, Castor Beans, and other bushy, fairly tall plants will make satisfactory screen by early July. Among the annual climbers are Morning Glories, Nasturtium, Sweet Peas, Hops, Scarlet Runner Beans, Cobea, Gourds, Cardinal Climber and Canary Bird Flower.

GROW VEGETABLES QUICKLY

If vegetables are to be tender, they must be grown quickly. Especially with such things as radish, carrots and beets, slow growth is disastrous as the roots become woody

and filled with objectionable fibres. But this rule also applies to salad materials like lettuce. Therefore, growth should be pushed along with frequent cultivation, which in addition to checking weeds, also conserves moisture. Cultivation alone will often keep the vegetables going through a dry spell, but of course, a few pails of water or an hour or two with the hose at such a time, will prove beneficial. Where the supply of water is not large, plant those things, most in need of extra moisture, such as radish, lettuce and celery, closest to the pump. Fertilizer is another way of hurrying growth and therefore assuring vegetables of the highest quality.

PLANTING

Flowers divide themselves into main planting groups. The first to be sown are those very hardy kinds which naturally reproduce themselves in Canada. Cosmos, California Poppy, Alyssum, Calendula and Candytuft are very hardy and can be sown first thing in the spring. In the second group are the Zinnia, Marigold, Nasturtium, Stocks, Aster and Petunia, which do not stand serious frosts, and of the tender things, which must be held back until all danger of freezing is over are the Dahlias, Cannas, and Gladiolus. As the latter are all bulbs and do not come up until a week or so after planting, they may be risked within a few days of the arrival of really warm weather.

Four thousand and fifty-eight accidents in which persons were killed or injured were reported during the year, 13 collisions being reported between automobile and horse-drawn vehicles, with loss of life in each case, and 166 being reported where persons were injured. There were 349 such collisions in all. Automobiles crashed into trains 40 times during the year, into 231 tramways, and into a total of 3,444 other autos in all. — Quebec Tourist Bulletin.

# Great New Factory

Industrial Britain.

One of the most important developments known to Lancashire for many years — and an indication of the faith of one of the world's largest concerns in the industrial future of Lancashire — is the announcement that Messrs. Courtaulds, Ltd., are to build a huge rayon factory at Preston.

Messrs. Courtaulds, six years ago, acquired about 340 acres of land at Ribblesdale, near Preston, and it is on part of this site that the new factory is to be built. It is expected that the works, which will be the firm's largest single "unit" in Britain and will embody many new features, will be completed in about eighteen months' time.

Work will be found for about 2,000 workpeople at the start, increasing to 3,000 as the factory gets into full production. The firm expect to add at least 30 per cent. to their production of viscose yarn with the new factory.

Snakes Don't Like Erin's Dampness

Dublin.—A new reason has been assigned for the absence of snakes from Ireland. It's the weather!

Popular legend has it that they were all banished by Saint Patrick, the national apostle, 1,500 years ago. The more material view that snakes dislike Ireland's wet weather was taken by M. Farrington, lecturer at a meeting of the Geographical Society of Ireland here.

He said Ireland boasted of a species of toad common to county Kerry but had nothing like the common English toad. England was first occupied by certain fauna which were slow of movement, also Ireland at a later stage, but as the land sank and the sea arose and cut off the British Isles from the rest of Europe, separating Ireland from England, there was less time for the fauna to move from the mainland, he said.

Also had no snakes, although South America was a comparatively squalid region. The reason for the absence of the reptiles was undoubtedly due, he said, to wet weather in both parts of the world.

"If we find ourselves unreasonable it is reason that leads us to that discovery."—Havelock Ellis.

Record-breaking gatherings of Boy Scouts and Girl Guides have been greeting Lord and Lady Baden Powell, World Chief Scout and Chief Guide, since their arrival in Victoria for the opening rally of their tour, Saturday, April 13. They will reach Winnipeg for the big rally there May 4th, and will meet their first Ontario greeting at Port William on May 8th.

Their subsequent Ontario and Quebec dates are: Sudbury, May 9; Toronto, May 11; London, May 14; Ottawa, May 15; Montreal, May 24; Quebec, May 27.

The 7th Brantford, one of our world correspondence troops, has set meeting period when the boys read letters from Scouts in other lands.

"And the boys get a better idea of countries and conditions in this way than from their geographies and histories, declares the Scoutmaster.

Wolf Cubs of Bath, England, have been specializing in the good turn of collecting old walking sticks, painting them white, and presenting them to the blind.

St. George, as the Patron Saint of Scouting, was remembered by special Scout services and banquets, April 23rd, by many Scout Groups throughout Canada. The big event was a radio address by the Chief Scout of the World, from Calgary.

One thousand picked Scouts from England and Wales participated in the annual National Scout Service at St. George's Chapel, Windsor Castle, on Sunday, April 28, and heard an address by the Dean of Windsor. The service was broadcast.

Another St. George's Day broadcast.

# Latin Held Need In Professions

Toronto.—While Latin may be dropped as a compulsory matriculation subject, as suggested by Duncan McArthur, Deputy Minister of Education, there appears little likelihood of it being eliminated as an entrance requirement at Ospeode Hall and the faculty of medicine.

J. D. Falconbridge, K.C., dean of the Law School, pointed out that apart from the mental discipline in the study of Latin, much legal phraseology was couched in Latin, and that a working knowledge of the language was therefore essential to law students.

Similarly Dr. E. Stanley Ryerson, secretary and assistant dean of the faculty of medicine, University of Toronto, said that the use of Latin for medical terms and materials made it essential that medical students should have studied the subject.

Queen's Will Make Latin Optional In Arts Course

Kingston.—Latin will no longer be a compulsory subject on the curriculum of the arts faculty at Queen's University, except for students taking certain honor courses, starting with the 1935-36 academic year. The classical language is still compulsory for entrance requirements, although it has been indicated by Duncan McArthur, Deputy Minister of Education, that even this may be made optional.

Under the new curriculum at Queen's, Latin 1 is made optional with mathematics 1 for all students registered in a pass arts course.

Birth Rate Is Lower, Deaths, Marriages Up

Ottawa.—A decline of 1 1/2 per cent. was shown in the number of births registered in 70 cities and towns with a population of 10,000 or more, when they numbered 6,755 in March, against 6,855 in the same month of last year.

Deaths numbered 4,309, against 4,298 in March, 1934, and marriages showed a 15 per cent. increase with 1,910, compared with 1,658 in the same month last year.

During the three months ended March births were 19,414, deaths 12,805, and marriages 5,815, against 19,610 births, 11,966 deaths and 5,614 marriages during the same period.

SCOUTING Here There Everywhere

A brother to every other Scout, without regard to race or creed.

cast was an address in English from Sweden by H.R.H. Prince Gustav Adolf. The Swedish Crown Prince is President of the Swedish Scout Council.

Canadian Scout Radio fans will be interested to learn of the coming of a short wave Rover Scout broadcasting station at Batavia, Java. The call is PKISCA. The station uses a frequency of 7,080 kc., and broadcasts regularly Tuesday and Friday, 7 to 9 p.m. Java time (7 hrs. 30 mins. ahead of Greenwich time).

The station has worked a non-Scout station at San Francisco, and should reach Canadian short-wave stations during favourable conditions.

for BURNS

Mix equal parts of Minard's and sweet oil, castor oil, or cream. Spread on burn or scald. Apply to burn or scald. Before long the painful smarting stops.
