The man's life was thus saved. Betty's feet were frozen but happily, she survived after treatment.-Border Cities Star.

BETTER MOVIES

Some of the new and better motion pictures are proving more valuable as box office attractions than their sexy predecessors ever thought being. It has taken a long time to publicity expert as "one of the best make producers realize that the pub. pieces of advertising literature that lie is even more willing to patronize clean films than it is to patronize dublous ones .- Brockville Recorder .

THE INSECT WAR

There are some 600,000 different kinds of insects in the world whose ways have been studied. In all the rest of the animal kingdom-birds beasts, reptile and fishes-there are said to be not more than 36,500 spe cies. And the insects are the mos direct and relentless competitors of man for a place in the sun. Hence we are at perpetual war with the insect world .- Winnipeg Tribune .

WELL, RATHER

Here is a poser. If a party without women is a stag party, would the fastest craft he has yet owned. the world without women be stagnation?-Guelph Mercury.

LOCK YOUR CAR

Judge McKinley, chairman of Ontario Parole Board, urges upon motorists the necessity of locking their parked cars. Many youngsters, he says, find the temptation of an unlocked car irresistible and decide to "borrow" it. To counteract this the judge suggests that insurance companies place a clause in their contracts to pay only 25 per cent. of claims when a car is left unprotect ed by lock.

It is a sad commentary on modern conditions when people have to "nail down" their property in this way in Society. order to prevent theft.

Yet Jucke McKinley's advice 4s good. A universal 'ocking of parked cars would probably prevent 75 per cent. of the auto thefts or "borrowings." Of course, smart thieves can even get away with a locked car, but the chances of their doing so are small, because they are so much more likely to detection.-Border Cities Star.

-Grace Noll Crowell.

A Little Knowledge Is Always Dangerous

Phyllis Jenkins, in the Glasgow Herald tells this amusing story: Two young Scots friends of ours have just ended up in Paris after a motoring trip through Normandy and Brittany. They have had a wonderful time on an old car, very little money and a very limited vocabulary. But one thing had puzzled them on the journey. What, they asked me, was the meaning of "Je m'en fiche?" Maybe you know and maybe you don't, but for the sake of the story and those whose French has not gone so far, I must explain that "Je m'en fiche" is not at all polite French and means more or less, "I don't care a"

Our two young friends arrived in France under the impression that "Je m'en fiche" was the politest of all forms for expressing regret, a kind of genial way of saying "I am sorry," and had used it freely on all possible occasion, rather pleased, in fact, with their fluent idiom. The result, as you can well imagine, has been funny in the extreme, and the amusement with which the expression was met all along the line finally made them suspect that something was wrong

But their best effort of all was a letter to the proprietor of an hotel enclosing a room key which had been carried away by mistake. After explaining painfully, but more or less intelligibly, what had happened, they ended their note with a final and
