

WHO ARE THEY ?

Who are the bright youngsters on this pretty steed? They're older now than when this photograph was taken and perhaps not so innocent. They'll be here Old Home Week. Guess who they are and win a dollar from each. The only condition is that to win the two dollars, you must have on your persons a copy of Old Home History, and must accost them on the Show Grounds as follows: "Are you one of the mysterious jockeys?" No relatives of the above or no member of the Old Home Week Committee are eligible for the prize.

Dr. T. H. Middlebro, a prominent Owen Sound physician, died suddenly this week.

Successful Canadian exhibition in the International Grain and Hay Show to be held at Chicago, November 29-December 6, will be awarded liberal bonuses in addition to the regular premiums offered in the prize list now being distributed. The provincial governments of Quebec, Ontario, Alberta, Saskatchewan and British Columbia, the Calgary Board of Trade and the Canadian Pacific Railway have also announced offers of special awards for Canadian exhibitors.

That elk are attracted by music seems to be established by the actions of two fine specimens of that animal which stroll out of the bush when dancing begins at the Banff Springs Hotel every evening. Under the ballroom windows they begin to shake their heads and prance, cavort and caper while the music lasts, not even stopping to eat until the orchestra has ceased playing.

Canadian poultry are rapidly being recognized throughout the world as reaching unusually high standards and recently the S.S. Empress of Canada, clearing from Vancouver to China, Japan and the Philippines, carried 60 head of registered white leghorns consigned to Manila to be used in building up the poultry industry of the islands. The birds came from a poultry farm near Vancouver.

Captain R. W. McMurray, for the past five years marine superintendent of the Canadian Pacific's British Columbia coast steamship service at Vancouver and prior to that a commander with the Canadian Pacific trans-Atlantic fleet, has been gazetted in the London Times of July 14 captain in the Royal Naval Reserve, promoted from the rank of commander, R.N.R. Captain McMurray, whose rank is equivalent to the army rank of brigadier-general, is one of the few living Canadians holding such a high position in the R.N.R.

The province of Manitoba last month celebrated its sixtieth birthday. Where 60 years ago the buffalo reigned alone, Manitoba farmers are now pasturing 360,000 horses and 680,000 cattle and the prairie dweller instead of returning to fort or wigwam from his day's work, spends his evenings in his radio-equipped home or motors over good highways to the nearest city.

About a thousand tons of zinc concentrates from Field, B.C., on the main line of the Canadian Pacific Railway, were shipped to Japan recently, this being part of a movement of 1,500 tons monthly from a mine which started five months ago and which ships lead concentrate to California.

NEED OF TOURIST CABINS

The needs of yesterday are not the needs of today. If, say 25 years ago, we wrote an article such as this the readers would think we were slightly light in the upper story. When we speak of the need for tourist cabins today our readers know what we mean. And that is the gist of this article. You can read it and digest it for what it is worth.

It was Friday night last, and the "Review" was asked if there were any tourist cabins within town or a few miles access to same. The night was hot and they preferred some tourist accommodation to a hotel. We had to tell them Durham had had no such accommodation for overnight, and the nearest service to be had of this nature was in Owen Sound. So there you are. Doubtless the same question has been asked frequently by other transients.

The town has built a very rustic but commodious cookhouse in the open enclosure behind the Town Hall, and this with picnic tables will be a great boon during the summer season. Why not build a cabin or two, equipped with hydro and running water? Up in Warton, the Women's Institute are sponsoring a park and tourist camp. The main point to remember is that cleanliness has to be the strong point. A cabin is worse than useless if it is not kept so.

SCHOOL FAIR PREPARATION

The holidays, having started for 5,000 boys and girls in the rural schools of Grey County, affords a most excellent time for them to prepare for exhibiting at the School Fair. It is hoped by the Grey County Branch of the Department of Agriculture that many parents will encourage their boys and girls to start preparing exhibits for the School Fair.

For some time the idea has been forced upon the minds of those in charge of the School Fair that better exhibits would be secured if the boys and girls were given some direction at home. This partially applies to Domestic Science and Manual Training. A good suggestion to follow would be to allow the girls to start the first week of their holidays to bake the articles which they will compete in at the Fair. By assisting the girls to bake the first two or three loaves, they will become so proficient that help need not be given at the time of the Fair, when the Fair baking is done.

The above suggestion will apply to Manual Training. If the fathers or older brothers would give the boys a little help in the use of a plane, saw and other tools, as well as measuring, the children would be pretty well equipped if judges should ask the boys to demonstrate their talent in the making of the prescribed exhibits or articles.

It is a busy time, but surely it is a good policy to give boys and girls instruction in these two classes.

Proficiency will be attained by everyone and the old trust that Dad or Mother did the work will be discarded. At the present time some claim that the children get help. It is not expected that they can learn without some assistance, but the time to give it is during the two months preceding the Fairs.

The Rural School Fair is "The Children's Fair." Parents are urged to allow their children to do all the work in preparing their exhibits. Encourage and direct the child, but remember work done by the parent or teacher, helps to defeat one of the main objects of the School Fair; namely, to teach boys and girls to do things themselves and to do them well.

WE SELL PUBLICITY

(Dunnville Chronicle)  
There are a few people in every community who have the wrong slant on the mission of a newspaper. They do not realize that it is a business proposition, just the same as any other industry in a community, even though its stock in trade is publicity. For instance the Chronicle has housed under its roof a plant that cost approximately twenty thousand dollars, and the staff that operate it are paid wages that will compare favorably with those of any other manufacturing industry. There are three strings to our bow, and no one or two of them would be adequate to keep the business a going concern—it takes the combined earnings of all three branches—subscriptions, advertising and job printing. The most expensive end of the business in that which is operated to produce the newspaper—or in other words to produce publicity. No other business gives so much gratis

to its community as the press. It supports the town council in making effective by-laws that are passed to regulate civic life—it promotes every effort to make the town attractive to live and to make the citizens comfortable and happy—it loyally supports all philanthropies, those who are doing something for the underprivileged in life, such as the Lion's Club, Women's Institute, Daughters of the Empire, the Hospital and its Auxiliary, the Churches, the Legion and its Auxiliary, the various lodge fraternal societies, the Public Library, the Horticultural Society, the Retail Merchants' Association, our industries, in fact every organization whose mission is to keep our town progressive and up-to-date. Not only does the paper give generously of its space free of charge, but the staff lend financial support also. Yet there are some who apparently think the columns of the paper should be open to free space in boosting specific events or attractions. The hard and fast rule of all newspapers is that publicity for attractions out of which money is to be made, directly or indirectly, by an admission charge or collection, must be paid for. Committees might just as well walk into a factory, a grocery store or a dry goods store, and ask for two or three dollars worth of goods off the shelves—as ask a newspaper for free publicity that costs several hundreds of dollars each week to produce. We would remind the public that besides the wage bill, there enters into the cost of production of even a humble weekly newspaper, the cost of the plant, light, heat, power, telephone, telegraph, governmental and civic taxes, repairs, maintenance, office expense, and a hundred others. Perhaps this angle hasn't been considered by those who sometimes look almost astonished when the editor, who with his staff pay their obligations the same as other citizens, asks payment for what he has invested so much money in to be in position to sell.

A great loss to the Liberal Party is the resignation from political life of Hon. James Malcolm, Minister of Trade and Commerce in the last Liberal Gov't. He served his country well, and as is often the case with public men, to the detriment of his health. For this reason he is resigning. He has represented North Bruce at Ottawa for the past 15 years and in his work in his cabinet role, completely reorganized his department.

As far as the Grey-Bruce election concerned, the three candidates officially nominated are very happy and optimistic over the approaching election results. The Liberal candidate, Dr. Hall is perfectly sure of his success; L. G. Campbell for the Conservatives is sure he will get to Ottawa and Agnes Macphail, U.F.O. candidate is equally happy about her chances. It's fine to feel that way, and without a doubt they are all truthful citizens.

INVITED AND OPTIONAL

Newspaper advertising is one of the few media which are "invited publicity". We do not seek the sales talks that we get on the radio. We do not ask for sign boards to almost obliterate our view of rural scenery when we are motoring. We do not ask for those circular letters which half fill our mail boxes and later find themselves in the waste basket.

"Newspaper advertising is newsworthy in itself. It is informative of the business trends, inventions and styles. It is backed up with reader interest of all kinds. Personal mentions, world news and community goings-on surround the newspaper advertisement and cause it to be read. But it is not thrust upon the reader. He can peruse it or pass it by. No other medium has as yet been so effective as the printed word in the newspaper. — Mt. Forest Confederate.

THRESHERS MUST REGISTER

Information has just been received by the local branch of the Department of Agriculture to the effect that all threshing machines must be registered. The license will cost \$1.00. It is hoped that Grey County threshermen will respond to the request for registration. The \$1.00 may be sent to the Grey County Department of Agriculture, Markdale, or to Mr. J. D. Smith, Director of Crops, Seeds, and Weeds Branch, Parliament Buildings, Toronto. The aim behind the movement is to get all machine owners installing weed elimination screens on their threshing machines. This accomplished, it will be very much easier to get control of the weed situation in the county.

FOOD FUN

CHILDREN like Kellogg's Rice Krispies for three reasons. First, they're so delicious and crisp. Second, they snap, crackle and pop in milk or cream. And third, there's a Mother Goose story on the back of every package. Rice Krispies are full of nourishment, yet small stomachs can digest them easily. Ideal for the nursery supper. At grocers everywhere. Quality guaranteed. Made by Kellogg in London, Ontario.
