The Week In Ottawa

OTTAWA.—The election campaign is getting hot. The Prime Minister is in full stride via the radio and the response to his series of half hour broadcasts has been gratifying.

While the campaign which soon will develop rapidly, is conceded now to have elements of obscurity, it is believed that well before the end of four weeks the situation will be very much clarified.

What appeal the proposed retirement on a species of pension of workers at sixty or thereabouts will carry appears to be problematical.

WHEN BARN WALLS GET FROST-COVERED

With a Cold Wall It Is Difficult To Prevent Frosting

In many barns the walls get frost covered in cold weather, due either to lack of insulation in the walls, lack of proper ventilating system, or both.

The chief objection to the masonry stable wall, whether of concrete, concrete blocks, hollow tile or stone is its being cold and subject to frost on the inside, unless proper insulation is provided.

Double Wall and Windows The eventual solution of the double wall problem will probably be a thoroughly waterproofed insulation board which can be built right into the concrete or concrete block or clay block double wall.

It pays to have double windows for dairy barns. They will cost a few dollars for the preliminary coat, but will help a great deal in keeping the stable dry and will prevent the glass coating over all "Winter long" and cutting off the greater part of the sunshine.

RETIREES AFTER 35 YEARS WORK

After thirty-five years on the staff of the Dominion Department of Agriculture, twenty-nine years of which he has occupied with distinction the position of Seed Commissioner, George H. Clark, B.S.A., is retiring on October 3, 1935, from the Government service.

Mr. Clark, a native of Brant County, Ontario, and an 1898 graduate in agriculture of the University of Toronto, came to Ottawa in 1900 to assist the late Dr. Jas. W. Robertson, Commissioner of Agriculture and Dairying, in conducting the MacDonald-Robertson Grain Growers' Competition organized that year.

When this work was completed, three years later, he recommended the basic outline for establishing, in 1904, the Canadian Seed Growers' Association, and became Secretary of the Association in 1905. In 1902 he was appointed Chief of the newly organized Seed Division and in that capacity conducted an investigation of the conditions of the seed trade in Canada which culminated in the passing of the Seed Control Act in 1905.

Mr. Clark's official duties as Seed Commissioner have not been limited to the devising and administering of control legislation. In the early years of his commissionership he co-operated with the late Dr. Jas. Fletcher in compiling the illustrated work "Farm Weeds of Canada", and associated with the late Dr. M. A. Malte, prepared the popular publication "Fodder and Pasture Plants", both of which are used as text books in agricultural colleges throughout North America.

In 1907, following his study of wheat crops in the Prairie Provinces, Mr. Clark outlined the plan, still in effect, for encouraging pure seed production by means of field crop competitions, seed fairs and provincial seed exhibitions and in subsequent years, inaugurated other effective programmes to the same end, some of which had been suggested by his observations in Europe in 1906.

In 1916, led him to organize the Seed Purchasing Commission to assemble and distribute supplies of seed grain of suitable variety and quality. This commission operated until 1922 and entailed merchandising activities with a turnover exceeding \$16,000,000, all of which was returned to the Dominion Department of Finance with a profit of \$251,000.

During the eventful years 1914-1918, when Canadian grown cereals were shipped to the ports of the allied countries and when adequate supplies of field root seed from Europe were difficult to obtain, a Seed Stocks Committee for North America was organized on which the Seed Commissioner represented the interests of Canada.

In civic life Mr. Clark has made contributions comparable with the outstanding part he has contributed in his official sphere. For seven years he was a member of the Ottawa Public School Board, of which organization he was Chairman in 1928 and 1929, and for the past three years he has been a valued member of the Ottawa Collegiate Board.

He has for many years been a prominent Mason and is Past Master of the Masonic Lodge No. 58, Grand Lodge of Ontario, and a member of the Rose Croix of the Scottish Rite of Freemasonry. For several years he was a director of the Royal Canadian Golf Association and is a prominent member of the Rivermead Golf Club, Ottawa, of which he was Vice-President from 1925 to 1930 and President in 1931.

Mr. Clark's attainments have not been solely the successful performance of the duties of an important official post, for among the outstanding qualities in his character is a generous and genuine kindness which has won for him wide and enduring esteem. His long residence in Ottawa, the Dominion-wide scope of his official duties over a period of more than three decades and his association, during much of that time, with the foremost leaders in Agriculture in Canada, Great Britain, the United States and countries of Continental Europe, leaves him a background rich for retrospect. He has chosen as the place for his retirement the Roseland suburban area of Burlington, in what is regarded as one of the loveliest sections of Old Ontario.

It is the sincere wish of every member of his former staff of the Seed Branch and the Dominion Department of Agriculture as a whole, also the many with whom in past years he has worked for the advancement of Canadian agriculture, that he will live long to enjoy fully a long period of retirement so richly earned.
