ELECTION DAY CLOSE ON US

For nearly two months have the electors of Canada known that the 14th of October, 1935 is the day set apart by Premier R. B. Bennett to decide which of the parties will rule Canada for the oncoming five years.

This "Balance of Power" condition is a serious hindrance to the progress of good government. The party should be clear enough to allow one party sufficient majority to enact desired legislation.

THE REGISTRATION LISTS

Last week's Chronicle again assails the Review, regarding some missing names from the Old Home registrations lists, and questions the Review's authority for securing part of the lists early.

As we stated, possibly one sheet had been lost at hall, before the book registrations were adopted. The Review secured and handled all lists received in a straight-forward and careful manner.
