TREES FOR EUROPE

As far back as 1920 the American lions of trees have been sent overseas in this way and Canadian trees have likewise been supplied.

Today the results are a magnificent justification of this splendid idea. The trees are said to range from 15 to 20 feet high, are flourishing, splendidly, and have done much to replace forests blasted out of existence along the battle lines in

The sanguine people are and courageous, rash and hasty. sometimes they incline to be hottempered and domineering. They make plenty of friends by their sociability, they are thorough "good sorts," and their cheery optimism is something to be envied. Nervous Type

Those of "nervous temperament" are not unlike the sanguine at first sight. They have hair that is auburnt or golden, or perhaps bright brown, the cyclashes usually the same color and always long and too, but not florid or ruddy. It is soft and fine, with an almost imperceptible tinge of yellow.

These people are affectionate, but not very constant. They are clever and artistic, easily influenced by "The introduction of the first cul- beauty in any form. You find writ-

dreamy. This temprament does not take kindly to an out-of-door life, Gentle and easy to live with, they do not exact much from their friends, and it i srare for them to be involved in quarrels and arguments. Their chief fault is a tendency to

be changeable and lacking in consistency. Artistic work is their strong suit, it does not seem to become irksome to them, and in this field they often go far. In their faces you will see that the organs which give musical ability are often well developed. The nose is seldem the dominant feature

of the face. As you can imagine, it

is the mouth which shows their love of pleasure. They are generous, improvident, inclined to be careless and luxurious in their instincts, and have much natural charm of manner. Fourth Group

The pure Melancholic Temperament is unmistakable. Black, or dark brown hair, guiltless of the slightest undulation, deep set dark eyes, and a pale or sallow skin are the main features of this type. The melancholic are not given to look on the bright side of life. But they have constancy strongly developed, also reticence, order and love of learning. It is usual for them to be well endowed mentally; some of the very finest intellects belong to this type.

Don't play fast and loose with the melancholic. They can be jealous Miss Watson acted with decision, an hour sounds impossible to many make allowances for people less
