

PRICEVILLE AND VICINITY

PRICEVILLE Keep in mind the annual congregational meeting Monday p.m. Jan. 20, at 12.30 when a good attendance is hoped for.

present. Miss May Stewart presided. The current events were taken by Mrs Jno. Nichol Jr.; Mrs Wm. Beatson gave a splendid talk on "Preventive medicine"; a lively discussion followed.

Our local hockey club were again in their first tilt, (or is it the first?), with Swinton Park on Friday last and came out with the small end of the score 7-4.

Mr and Mrs A. L. Hincks and family attended a fowl dinner on Saturday evening at the home of Mr and Mrs Wilfred Wright, Swinton Park, when 26 sat down to dinner.

Mr and Mrs Henry Tucker and family visited Sunday at Andrew Hincks.

Miss Jean Hincks returned to Toronto Monday after spending over two weeks at her home.

Mr and Mrs E. Bennett, Flesherton Mr and Mrs Thos. Nichol and Donald; Mr and Mrs D. L. McArthur spent New Year's at Mr and Mrs J. Nichol's, Cayton.

Mr. C. E. Hincks left on Saturday for Hudson, Ont., after spending the Christmas vacation with friends here.

SWINTON PARK Well January has now got into her teens and has been cutting up a bit. Hope it does not become notorious.

Mr. Halber's soil was a gravelly loam, low in nitrogen and none too well supplied with phosphorus and potash, but it was alkaline or sweet in reaction.

Mr. Halber's soil was a gravelly loam, low in nitrogen and none too well supplied with phosphorus and potash, but it was alkaline or sweet in reaction.

Mr. Halber's soil was a gravelly loam, low in nitrogen and none too well supplied with phosphorus and potash, but it was alkaline or sweet in reaction.

Mr. Halber's soil was a gravelly loam, low in nitrogen and none too well supplied with phosphorus and potash, but it was alkaline or sweet in reaction.

George Black Sr. slipped on the house steps, badly spraining his ankle from which he has suffered much. Not to be outdone, Mrs. Archie Ferguson, con. 14, while thawing out a frozen water pipe at the cistern, slipped and fell on the edge of the cistern, breaking some ribs.

Other happenings in this locality: An old Scotch lady, who had not been feeling very well for some time, received as a Christmas remembrance a calendar from the undertaker, and she said, "Na, na, I'm no makin' a date with you yet."

2-12-6 28.8 bus. 2-16-6 28.8 bus. 2-12-10 31.8 bus. The harvested peas were of good quality. This crop is especially susceptible to injury from insects, hence the added help of suitable fertilizer gives the crop a vigorous start, which enables much of it to make extensive growth towards maturity before insect pests attack it.

Other happenings in this locality: An old Scotch lady, who had not been feeling very well for some time, received as a Christmas remembrance a calendar from the undertaker, and she said, "Na, na, I'm no makin' a date with you yet."

FOR SALE A 6 tube Battery radio, looks and works like new. Wood accepted as part payment. If interested apply at the Review Office.

IN DAYS OF YORE

25 YEARS AGO Taken from Review file, Jan. 12/11 For the third time in as many seasons, the Durhams took the measure of the Hanover septette on their own ice, winning out last Thursday night by the score of 7-5.

Dr. Farquharson will be at Holstein and Fairbairn preaching, these places vacant next Sunday, and will likely attend the induction services on Tuesday at North Mornington, where Rev. Mr. Little assumes his new charge. It is a distinct loss to the evangelistic forces of the Presbytery to lose Rev. Mr. Little.

New automobile regulations have been decided upon for Ontario by the Provincial Secretary's Department. 7,000 owners will be affected and the license revenue from automobiles will be doubled. Hereafter the annual license fee will be \$4 per year. Previously it was \$4 to secure a license and \$2 per year for renewal. Under this arrangement the owners did not get a new marker. The old rubber markers will be discarded and their place will be taken by colored enamelled ones bearing the year of their issue.

Holstein corr.: The following constitute the board of management of Holstein library for 1911: Dr. Brown J. H. Brown; L. B. Nicholson; J. H. Sharp; Rev. Mr. Marshall; W. J. Sharp; Bert Edwards; T. Brown Winfield Hunt. Messrs D. Allan and D. W. Cameron were appointed auditors. The directors of the Egremont Creamery Co. met last Saturday and engaged Mr. D. W. Cameron again as buttermaker for 1911.

15 YEARS AGO Taken from Review file, Jan. 13/21 Mr. Murray Ritchie has purchased the A. Ashley farm formerly owned by Mr. A. A. Catton, about two miles north of town and will work both his present place and this one this year. It is a splendid 100 acre farm with good buildings. Mr. Ritchie has also acquired the 75 acres of Ashley property west of the show grounds.

Mayor Allan is perhaps the busiest and most versatile man in town these days. On Sunday last he occupied the two south Normanby pulpits during the illness of their pastor; Monday he officiated at the Council Board and inaugurated his reign as Mayor, while this week he is in harness in his former position on the High School staff during the illness of Principal Henderson.

Wm. Nichol and Jas. Burt were applicants for caretaker of the town hall; the former got it at \$100 yearly. The only application for town constable was the former one, Dan McLean, who gets the old gig, but with some new duties added on. H. R. Koch and Frank McIlraith were re-appointed auditors at \$25 each.

For two-thirds of the game Chesley's Junior Northern hockey team battled with Durham here every inch on the way last Tuesday night. Durham had scored the only goal and always had a margin on the play, but could not make it count. In the last period their superiority was evidenced by results as well. Durham got 3 more goals while Chesley was blanked, final count being 4-0.

Mr John MacFarlane, Bunesan returned to Toronto last week after a week's holiday at home. His sister Miss Flora accompanied him back, where she has secured a position in the Rennie Seed Co.

Mr Alex McQueen is in Williamsford for two weeks relieving the Manager of the Standard Bank there.

AN INTERESTING BARLEY TEST On the farm of W. J. Halbert, a barley-fertilizing test of considerable interest was conducted by the Department of Chemistry, Ontario Agricultural College in co-operation with the local Department of Agriculture, for Grey County.

Mr. Halber's soil was a gravelly loam, low in nitrogen and none too well supplied with phosphorus and potash, but it was alkaline or sweet in reaction. All of these conditions made it a favorable location for growing barley of fine quality. The barley crop of 1935, succeeded a grain crop in 1934. The particular test on Mr. Halbert's farm, consisted of trying out 3-10-5 fertilizer at two rates one and two bags per acre.

Yields were as follows: Treatment Yield per acre Gain 0 30.0 bus 250 38.3 bus 8.3 bus 375 43.3 bus 13.3 bus The cost would run from \$3.81 to \$5.72 per acre.

Of Course, all the fertility would not be used up in the barley crop that was grown. If the barley was seeded to grass or grass and legumes the seeding down would obtain a great deal of help from this added fertility. Mr. Halbert's neighbors will be especially interested to learn of the results of the test.

FERTILIZERS FOR PEAS The growing of peas in Grey County has for several years been an important grain crop. Climatic and soil conditions of this section seem to be distinctly favorable for Peas. During the past summer, a test on fertilizing peas was conducted on the farm of J. H. Menary, Markdale, by the Grey Department of Agriculture in co-operation with the Department of Chemistry, Ontario Agricultural College. While the gains were by no means phenomenal, they were a good indication of what can be done in improving pea yields in this section. Where Mr. Menary's peas were grown, the soil was gravelly loam. It was in sod in 1934. The treatment and yields in this demonstration were as follows: Treatment Yield per acre 0 27.5 bus.

Dept. of Agriculture Conducts Fertilizer Tests

WHAT FERTILIZER FOR OATS? During the past summer, the Grey Department of Agriculture, in co-operation with the Department of Chemistry, Ontario Agricultural College, conducted tests of two fertilizers on Oats on the farm of Richard Allen, Flesherton. This crop is of great importance in this grain and livestock county, hence, anything that makes for improved yield and quality in grain is of great importance to Grey county farmers.

Mr. Allen's oat soil was gravelly loam, sweet or alkaline in reaction, low in nitrogen, medium in potash and very low in phosphorus. All cereal crops thrive best where there is good supply of phosphorus, because it is this element that not only invigorates growth, but hastens ripening and has a great deal to do with the plumping of the grain.

Results obtained on Mr Allen's test acre: for no fertilizer, 42.3 bus. per acre and for 250 lbs. of 2-12-6, 56.4 bus. per acre, or a gain of 14.1 bus. per acre. The fertilizer at 250 lbs. per acre, costs about \$3.75.

Oat growers of the Flesherton section will be especially interested in the outcome of this test. It follows very closely the test in oats, conducted on the farm of McLoughry Bros., Markdale, in 1932, when 2-12-6 fertilizer made a gain of 11 bus. per acre in Oats, when applied at the same rate.

AN INTERESTING BARLEY TEST On the farm of W. J. Halbert, a barley-fertilizing test of considerable interest was conducted by the Department of Chemistry, Ontario Agricultural College in co-operation with the local Department of Agriculture, for Grey County.

Mr. Halber's soil was a gravelly loam, low in nitrogen and none too well supplied with phosphorus and potash, but it was alkaline or sweet in reaction.
