

# To Those Who WALK... May I say a word to you?

WE ALL KNOW that it takes at least two to make an accident—you need never be one such person if you "Try Courtesy" and walk with full regard for the motorist and his problem of driving a ton of machinery.

In previous messages, I have been appealing to motorists to "Try Courtesy", when they drive for their own sakes as well as for yours. Today, I am appealing to you pedestrians to "Try Courtesy" for your own sakes as well as for that of the motorist.

Let us remember that a motor car is a big heavy piece of moving machinery weighing a ton or more and that to stop it or speed it up instantly is seldom possible. You, on the other hand, as a pedestrian, can stop or move more quickly on the instant.

So when you are walking on the same thoroughfare as the one on which the motorist is driving, "Try Courtesy".

Cross the streets with the green signal or if there is none, cross at a reasonably smart walk.

Refrain from jay-walking for this reason: motorists drive their cars according to what they expect the traffic immediately around them to do. And they don't expect pedestrians to go jay-walking. Cross at the crossings where the motorists expect you to cross and for which the motorist makes allowances by slowing down.

When walking at night where there is no sidewalk, carry a flashlight or wear a light garment which the headlights of the oncoming motor car will "pick up".

Courtesy on foot as well as courtesy at the wheel is the mark of a true gentleman. I appeal to you to "Try Courtesy" and set a good example which will make our city streets and country highways safer for everyone.

Sincerely yours,

*B. J. Duester*

#### THE COMING WORLD WAR

The Chesley Enterprise in last issue, claims to have word from authoritative sources regarding the nearness of an approaching world war. In fact it is to come upon us in 1937. The Premier of Canada, as well as the present Opposition leader, are and have been Minister of External Affairs and as such, are kept constantly in touch with inside information emanating from British Government officials. They hold these positions for reasons of policy. When questions are brought up in the House involving imperial policy, these leaders back each other up in being very careful not to allow a debate that involves imperial interests. They are sworn to secrecy though their staffs are not and once in many moons a leak occurs.

Ottawa, according to this information received, has now the alignment of nations for the next world struggle—Germany, Italy, Austria, Japan on the one side, with Great Britain, France, Russia and the little Entente of three Balkan nations on the other side, with smaller nations becoming involved as the war progresses. The Enterprise goes on to say: "Japan's attack on Russia from the East is intended to give Germany a freer hand in her invasion of France thru Switzerland and Holland. The attack of Japan on Russia is expected to draw the United States into the conflict on the side of its allies in the great war."

Writing about the early prospects of a more horrid war than the last one is not a pleasant task but those who have followed the re-armament of European nations in recent years, the breaking of the treaty of Versailles by Germany, Italy's haste to restore the prestige of ancient Rome, and the millions voted this year by British Parliament for air, land and naval defences threaten to become a grim reality before long and the information reaching Ottawa is the magazine will blow up next year.

With Japan attacking the United States on the Pacific, Canada as part of the British Commonwealth of Nations, may also become involved and Japan with its powerful fleet, could soon cause tremendous damage to British Columbia ports. With the League of Nations impotent and the Motherland fighting for its very existence against air raids that would lay its cities in waste, from an enemy base only 320 miles away, Canada will have to make preparations for its own defence for our motto should be "Give us liberty, or give us death." The threatening war clouds are certainly ominous and defenceless Canada, with its tremendous natural resources, would be a grand prize for any nation that is seeking territorial expansion.

#### WOULDN'T DRAW CROWD NOW

In the death of Tom Marks: many of the older generation can recall the first time that they ever saw a stage performance, and it was a gala day when the Marks brothers came to the Ontario towns. The entertainment they put up pleased the public, who eagerly awaited their annual return. Now the same class of entertainment would scarcely draw a baker's dozen. In the talkies we get the very best in the world's fiction dramatized, we get the very best of the world's actors, all at a trifling cost, so the entertainment provided by the Marks Brothers, while it suited thirty years ago, now, like many other things has passed into oblivion.

#### MILVERTON EDITOR DIES IN LONDON TUESDAY

After an illness of some duration in London Hospital, Malcolm McBeth died on Tuesday, August 4th in his 68th year. Mr McBeth was born in Brant Tp., Bruce Co., and educated at S. S. 7, Brant and at Walkerton high school. From 1890 to 1891 he was sessional writer in Ontario Legislature and in 1893 moved to Milverton taking over the "Sun". He was installed as postmaster at Milverton in 1905.

#### BOWLER FALLS INTO "CRICK"

A Lucknow bowler, who took in the Scotch doubles twilight tournament at Cargill on Friday evening last, is now convinced that the northern village is the wettest spot this side of the Great Lakes, and wet in more ways than one.

This chap who had been imbibing rather freely and had reached the stage where he saw a trio of kittens where only one should be, while playing a Walkerton pair, walked through the gateway at the rear of the green and toppled into the creek. He was immediately fished out but not before he had soaked up almost as much water outside as the amber-hued liquid he carried in his "innards".

Being a stranger within their gates the Cargillites took him in, but in this instance the genial motor salesman, Trimble Baile who in these times of depression, boasts of two pairs of trousers, played the good Samaritan role and loaned the Lucknowite his extras and other items of raiment and the chap went on his homeward way rejoicing, but wise to the fact that Cargill is wet—very wet.—Walkerton Herald-Times.

### At Queen's Park

BY THE WATCHMAN

Toronto, August 6th—Millions of words were printed by Ontario newspapers before, during and after the cancellation of the Quebec power contracts. The Hepburn government staggered before the combined assault of the Conservative and even some of the Liberal press. There is no need to go into what happened. Repudiation became the favorite word of politicians eager to deal a blow at the Queen's Park regime.

This article is not an attempt to defend the action of the Hepburn cabinet. The word repudiation has a nasty sound. The government called it cancellation. But the Quebec Hydro row is so much water beneath the bridge of time. What has been the result? The public is somewhat sceptical, and rightly so, of statements containing imposing figures. There is the old saying of "figures don't lie, but liars figure." When the Quebec contracts vanished under a few strokes of the pen (proving once more that the pen was mightier than the sword), Premier Hepburn publicly declared that the immense saving that would result from the wiping out of the "nefarious contracts" would mean a lowering of Hydro rates to the power users of Ontario.

The intelligent citizens of Ontario sniffed audibly at this statement. As far as many of them were concerned, it was so much eye-wash, designed to sweeten the bitter pill. But, as strange as it may seem, substantial reductions in Hydro rates have become an accomplished fact. Maybe Mr Hepburn robbed the provincial till or the party war chest in order to keep his promise, but nevertheless the lowering of rates has been brought about. There is to be a \$6,000,000 saving to Hydro users, the Premier says. That is a lot of money in any country.

So perhaps Mr. Hepburn was right. Even Conservatives are ready to admit that a Liberal can be right—once. After all, promises roll glibly off the smooth tongue of a politician. It is a horse of another color to put them into effect. Maybe there will be a power shortage or some other major disaster as a result of the Hydro policy of the present government. Mr. Hepburn and Chairman Stewart Lyon laugh at the suggestion. Perhaps there is a deep-laid plot to wreck Hydro and hand over control to the private interests of St. James and Wall streets. Maybe, but there is no sign of it yet. As a matter of absolute fact, Hydro is in just as sound a position today as it ever was. No government in the history of the Hydro enterprise has ever started out to deliberately wreck Hydro. No matter what stripe the occupants of the treasury benches were, they were actuated by a genuine desire to build a mighty edifice for the people.

But good intentions alone are not sufficient. There have been some bad decisions made by governments in the past. The action of the Hepburn government in cancelling the Quebec contracts was an effort to correct one of these mistakes. Perhaps the same result could have been accomplished without resorting to the drastic decision to break a solemn agreement. Who knows?

He was installed as postmaster at Milverton in 1905.

Mr McBeth's interest in the newspaper world was not confined to Milverton. At Halifax in 1930 he was made president of the Canadian Weekly Newspaper Association. He was also interested in educational matters and in 1931 was president of the Ontario Trustees and Ratepayers Association.

With his widow here mourn two daughters, one brother and a sister.

#### HEAVY CROP OF ONIONS EXPECTED BY PREMIER

With favorable weather conditions continuing Premier Mitchell F. Hepburn expects to harvest a crop of from 30,000 to 40,000 bushels of field and Spanish onions from his black muck land. He has over forty acres under cultivation on his farm near St. Thomas. The onions have made such rapid growth this month that many of the blocks are almost solid masses of young onions and onion tops. Indications are that the harvest will get under way about three weeks in advance of last year. The Premier spent last Friday in inspecting his crops.
