Any Time is Tea Time "SALADA" TEA

TOO SOON A BRIDE

By MARJORIE B. PEREGRINE

She thought she had escaped it forever. She might have known better—might have known the staid would never let her get away. It had caught Ma and Pa, had dragged them down from self-respecting farm people to a state of sodden wretched-

WRAPPED AIR-TIGHT

ROYAL YEAST CAKES -keep Full Strength-

RAISIN BREAD

SANDWICH ROLLS

APPLE CAKE

Use Royal Yeast Cakes and Royal Sponge Recipes for these good breads...

These famous dry yeast cakes assure perfect leavening. Fine quality is one reason... careful packing is another. Every Royal Yeast Cake is separately wrapped. Air-tight—it keeps fresh. No other dry yeast has this protection. The standard for over 50 years—Royal Yeast Cakes are now preferred by 7 out of 8 Canadian women who use dry yeast. Order a package.

Production of Zinc Higher

Totalled 127,459,990 Pounds
For First Five Months

TORONTO — Canadian production of zinc in the first five months of this year totalled 127,459,990 pounds an increase of three per cent. over the output in the same months of last year.

Production of lead in the same period showed an increase of 14 per cent., totalling 152,267,991 pounds. Canadian producers of Portland cement reported shipments amounting to 418,839 barrels in May as compared with 293,538 barrels in April and 387,384 barrels in May, 1935. Shipments during the five months ending May totalled 1,070,620 barrels, an increase of 20.7 per cent. over the shipments in the corresponding period of 1935.

Shipments of lime from Canadian kilns in the first five months of 1936 totalled 166,803 tons or more than four per cent. higher than the tonnage shipped a year ago.

More Prosperity As Result of Drought

United States Secretary of Agriculture, Henry A. Wallace, said in an address, that "drought did not bring scarcity into the average American home in 1934, nor will it in 1936."

"The record shows," he continued, "that the real period of scarcity was in 1932. It was the when the surpluses were greatest, that the breadlines were longest. It was then that the farmers were losing their farms, that industry was prostrate and fear and hunger were rampant. It was when farmers were burning corn instead of coal that the city people were most hungry."

"The record shows that every year since 1932 farmers have been able to buy more things. City people have been better, and more people have gone back to work."

Toronto Exhibition Winners Tell Methods

Mrs. F. W. Fordham of 44 Lambton Avenue, Toronto, a veteran prize winner at the Canadian National Exhibition, has again this year become famous for the red and blue prize tickets on her jars of jellies and jams. Mrs. Fordham has won over a hundred prizes with her cooking in the last twelve years. There must be a thrill in realizing one has such excellent recipes and judgment that a prize can be won every year! Mrs. Fordham gives a lot of credit to bottled fruit pectin which she uses, and so makes sure of success. Her Red Currant Jelly is a joy to behold, as well as being a joy to taste. The color and the flavor have been kept so perfect by the short boil method that better red currant jelly just isn't possible. Mrs. Fordham is so enthusiastic about the short boil method that she has passed on to her daughter the same enthusiasm and the daughter, a very young housekeeper, has the bottled fruit pectin habit too and is turning out rows of gorgeous jams almost as proudly as her mother. This short boil method, which takes less fruit and less time, gets to be a family tradition. A cook who can win every year at the C.N.E. has reason indeed to be proud of her achievements. Congratulations, Mrs. Fordham!

There is time now before many fall fairs for other women to win prizes with their grape, peach and apple jams and jellies made by the short boil method. Peaches are coming in at their best now and here is a prize-winning recipe for ripe peach jelly.

Ripe Peach Jelly
6 1/2 cups (2 1/2 lbs.) sugar, 3 cups (1 1/2 lbs.) juice, 1 bottle fruit pectin. To prepare juice, remove pits from about 3 1/2 pounds peaches. Do not peel. Crush peaches thoroughly. Add 1/2 cup water, bring to a boil, cover,

and simmer 5 minutes. Place fruit in jelly cloth or bag and squeeze out juice. Measure sugar and juice into large saucepan and mix. Bring to a boil over hottest fire and at once add pectin, stirring constantly. Then bring to a full rolling boil and boil hard 1/2 minute. Remove from fire, skim, pour quickly. Paraffin and cover at once. Makes about 9 glasses, 6 fluid ounces each.

THIS WEEK'S WINNER
Boiled Salad Dressing
1/2 tsp. salt, 1 tsp. mustard, 1 tbs. sugar, 1 tbs. flour, 1 egg, 1 tbs. butter, 1/2 cup milk or water, 1/4 cup vinegar.

Mix dry materials in upper part of double boiler. Add egg well beaten and milk. Add vinegar; slowly cook in a double boiler, stirring until thick. Remove from heat, add butter and cool.

Take one large tomato cut in pieces to represent a tulip and decorate with dressing and parsley and lettuce leaves.—Miss Louise Bunce, care of Mrs. P. Dike, R.R. 2, Markham, Ont.

ATTENTION!
Send in your favorite recipe for pie, cake, main-course dish or preserves. We are offering \$1.00 for each recipe printed.

HOW TO ENTER CONTEST
Plainly write or print out the ingredients and method and send it together with name and address to Household Science, 73 West Adelaide Street, Toronto.

**WAKE UP YOUR
LIVER BILE—**
And You'll Jump Out of Bed in the Morning

The liver should pour out two pounds of bile into your bowels daily. If this bile is not flowing freely, your food cannot be digested. It just clogs in the bowels. Gas builds up your stomach. You're constipated. Hereditary poisons go into the body, and you feel sour, sick and the world looks pink. A slow bowel movement down 'at' always get at the cause. You need something that works on the liver itself. It is this that Dr. Carter's Little Liver Pills do. They get the bile flowing freely and make you feel 'up and up'. Heredity and genes. They make the bile flow freely. They do the work of a natural bile but have no副作用 in them. Ask for Carter's Little Liver Pills by name! Stubbornly refuse anything else. No.

Perfect White Does Not Exist

Science Discloses Traces of Color Even in Snow and Chalk

Cambridge, Mass.—The color of perfect white does not exist on earth. Closest to it are new-fallen snow and purest chalk. Third comes the whites made by science and industry.

The results of three years' study to prove this, announced as the first made scientifically, were given to the recent color conference at the Massachusetts Institute of Technology. David L. MacAdam of the institute made the report.

Previous to this study, he said, scientists recognized only one color of materials as white, the nearly perfect white of a thick layer of new-fallen snow and purest chalk.

Increasing widespread use of the words white and whiteness in industry, merchandise and advertising, he explained, led industrialists to ask science to define whiteness. They gave the problem to the Technology color laboratory.

Their analysis showed that all colors ordinarily called white were slightly darker than perfect white or were slightly colored. In many cases they were both.

Instruments revealed the shadings of grayness, or darkness, invisible to the eye. The most frequent slight coloration, Mr. MacAdam said, was yellow. A bit of blue is usually added to "whiten" in such cases. Blue is the second most prevalent discoloration in white.

The color laboratory found a method of measuring whiteness which had been accepted as a standard, Mr. MacAdam said. By it the whiteness of any sample can be found by simply measuring in an optical instrument the grayness and the amount of color on the surface of the material.

"Even at the height of the late prosperity nearly 99 per cent. of the American population were receiving less than \$5,000 a year."—Harry Elmer Barnes.

"Man does not live by himself and for himself alone. We are coming to realize that law is not an end but a means to an end."—Justice Harlan F. Stone.

Here's a cracker that hits the spot!

Everybody likes crackers fresh, flaky and crisp. That's why so many people prefer Christie's Premium Soda Crackers. They're wonderful partners to a piece of cheese, soup or any of the many good things with which crackers are enjoyed. Ask your grocer for Christie's Premium Soda Crackers, and enjoy a fresh delight.

Large Increase in Marriages

1935 Figures for Weddings
Highest Since Peak Year
of 1929

A slight decline was shown in live births in Canada during 1935 at 221,226, a rate of 20.2 per 1,000 population, compared with 221,303 and a rate of 20.5 in 1934, the Dominion Bureau of Statistics reported.

Illegitimate births in 1935 numbered 8,327, a rate of 3.8 percent. of all live births, against 8,070 and a proportion of 3.6 per cent. in 1934. Still births totalled 6,444 or 2.8 per cent. of all births, compared with 6,452 in 1934 with the same percentage.

Exclusive of still births, there were 195,511 deaths during 1935, a rate of 9.6 per 1,000 population, against 191,582 and a rate of 9.4 the previous year.

Deaths under one year numbered 15,723, a rate of 71 per 1,000 births, against 15,870 and a rate of 72 in 1934.

Maternal deaths totalled 1,093, a reduction from the preceding year, when there were 1,167 deaths. The maternal death rate of 1935 was 4.9 per 1,000 live births, compared with 5.3 in 1934.

The natural increase of the population of Canada in 1935 amounted to 115,715, against 119,721 in the preceding year. The rate of natural increase, 10.6 per 1,000, was the lowest during the period commencing with 1926 for which statistics are available.

The marriages of 1935, numbering 71,883, showed an increase of 3,791 from the preceding year, in which 73,092 marriages took place. The 1935 figure closely approached the total of 77,288 for the year 1929, which was the peak year for marriages in Canada, but the marriage rate of 1935 was only seven per thousand population as against 7.7 in 1929.

Every Bone Broken

Reports of automobile wrecks are so common that we may be accepting them as something which must be, observes the Peterborough Examiner. For the most part we glance at the headings if the wreck is not in our vicinity. There was one near Hamilton, and from the report we take a few excerpts:

"The car was travelling north and went out of control... he failed to make a sharp bend in the road... travelled 80 feet against a bank on the right side... swerved to the wrong side for 75 feet, struck a four-foot hard-clay bank... plowed through the hard dry earth, continuing crashed into a maple tree."

Then continuing with the story as it tells the results of such a drive: "The speedometer stood at 60 when it struck the tree and by that time the speed must have been materially checked... the engine was driven into the driver's seat; two front wheels off; axle bent double."

So much for the machine. Continue: "Day and Mock, both young men, suffered fractured skulls. They were still unconscious at a late hour."

Then about the driver: "The driver's limp body was removed from the mass of debris... one shoe was torn off... almost every bone in his body was broken, officers said... was breathing when lifted from the machine but died on the way to the hospital."

It is not pleasant reading, not a line of it. We have no intention of seeking to draw morals from that story or draw morals from it apart from suggesting you might keep it in mind next time you are inclined to

One Court — A Court of Law!

"We must not have two trials, one in court and one outside," is the emphatic assertion in a report of a special committee of the criminal law section of the American Bar Association," observes the Christian Science Monitor.

Presented to the annual convention of the association now meeting in Boston by Judge Oscar Hallam of St. Paul, Minnesota, the report criticizes severely the manner in which the Hauptmann trial was conducted. Inter alia, as lawyers say, it declares:

"The system of the public press arguing the case outside of the court is fundamentally wrong. In the second place, there is grave danger in the dramatization of crime and exploitation of the criminal."

It condemns the "indefensible deception" practiced on the court by those who took newspaper moving pictures during the trial. And in no measured terms it refers to Governor Hoffman's activities as "repugnant to our sense of propriety and in our opinion unwarranted."

Although the release of the committee's report seems to have aroused disension in the association, some members, including William L. Ransom, of New York, its president, regarding it as premature, the public will welcome it. In addition to Judge Hallam, members of the committee who signed the report were Charles F. Taft 2d of Cincinnati, John Kirkland Clark of New York and Dean Albert Harbo of the College of Law in the University of Chicago.

The report gives confirming weight to the proposal made previously to the convention by Philip Lutz Jr., Attorney General of Indiana, for a statute to prevent "newspaper interference with criminal justice."

The trial by newspapers' is common most Americans admit. Some times, as in the Lindbergh kidnaping case, it reaches a depth of indecency which makes them blush. Recognizing that some editorial rooms exercise commendable self-restraint, they also realize regretfully that a widely-circulating, sensation-mongering yellow press knows no ethics. There has been a general impression that something should be done about it. That the radio, the motion pictures and frequently the counsel on both sides share greatly in sensational publicizing during court trials makes the offense of some newspapers no less.

Such a law as he suggested, Mr. Lutz told the association, would provide a definition of what might properly be published, and, upon the citation of an editor, reporter, broadcaster or newswoman in contempt for a specific publication, the case would be heard by a special judge, agreed upon by the interested parties. He added:

Perhaps such a statute might assist the courts to maintain their dignity, their popular respect and their deserved independence in the face of the rising power of the enterprising agencies of modern publicity.

This is a consummation many will devoutly wish. And, incidentally, they welcome the recognition in the committee's report that notoriety-seeking counsel are not an edifying influence.

Newspapers are only human agencies and their errors possibly do not transcend those of other human activities. No sensible person wishes to see a manacled press. The object lessons existing in some lands are too shocking. In the eighteenth century "Junius" declared in his famous "Letters":

The liberty of the press is the palladium of all the civil, political, and religious rights of an Englishman.

That affirmation rings just as true for the American of 1936. But as Newton D. Baker has said, those rights are relative.

**WASHES
DIRT AWAY**
—no rubbing
and scrubbing

Cleaning jobs are quick and easy with Gillett's Pure Flake Lye. Use a solution of 1 teaspoonful dissolved in a quart of cold water. Off comes the dirt! And you do no hard rubbing. Use it for toilet bowls, too—and to clear sluggish drains. It kills germs, destroys odors. Never harms enamel or plumbing. Get a tin from your grocer—today!

*Never dissolve lye in hot water. The action of the lye itself heats the water.

GARDEN YIELDS STRANGE PRODUCE

Nova Scotia Woman Finds
Century-Old Coin in Soil,
Also Freak Flower

Halifax.—Another of Nature's 1936 quirks has been presented to a local newspaper to a local newspaper. A freak calendula Doorkill of this city, of Mrs. Walter Doorkill of this city, now heads the list of oddities from field, meadow and garden such as cabbage quintuplets, triple daisies, seven-leaved clovers, double-headed dahlias, these flowers in all cases being joined back to back.

Mrs. Doorkill's garden also yielded a century-old coin dated 1836.
