riage to Asenath is only another evi-

dence of the high position in which

he had been placed, for the priests

were the highest and most privileged

class in Egypt, and intermarriage

with this caste gave him the very

highest social position. The name of

his first child, Manasseh, "making to

forget"; the name of his second child

Ephraim, means "to be fruitful." Our

lesson closes with a brief notice of

Joseph's remarkable administration

during the years of famine. To Phar-

instituting the world's first ministry

of food with Joseph as food-control-

true of corn is also true of character.

Rationing is never a pleasant experi-

ence. It means doing without some

things for a while and partaking

sparingly of others. Pleasure hours

may have to be rationed, but only for

later advantage, to stave off idleness

and ignorance, and to secure the

JOSEPH'S EXALTATION

June 6th "Now therefore let Pharaoh look out a man discreet and wise, and set him over the land of Egypt. Let Pharaoh do this, and let him appoint overseers over the land, and take up the fifth part of the land of Egypt in the seven plenteous years." - Literally, the phrase should read: "Let him fifth the land, i.e., lavy a tax upon its produce to that extent which was double the annual impost exacted from Heyptian farmers, but which the unprecedented fertility of the soil enabled them to bear without complaint."-Thomas Whitelaw.

"And let them gather all the food of these good years that come, and lay up grain under the hand of Pharaoh for food in the cities, and let them keep it. And the food shall be a store to the land against the seven years of famine, which shall be in the land of Egypt; that the land perish not through the famine. And the thing was good in the eyes of Pharaoh, and in the eyes of all his servants." -The advice which Joseph gave to Pharaoh is found carried out in the latter part of this chapter, and in chapter 47.

Such an immediate exaltation to a place of supreme power and influence as is described in the following verses is difficult to understand by those of us who live in such a time as this, and are citizens of a nation in which high office is generally obtained by election. Yet the entire episode "and the description of Joseph's function and position as vizier are in full accord with all that we know concerning the duties and privileges of the state officials standing next after the king. In this connection we are particularly enlightened by detailed regulations for the office of vizier preserved in the tomb of inscriptions of Rekh-My-Ra, the vizier of Thutmosis III (1501-1447 B.C.). After the king, the vizier is the highest dignitary in the state with all the rights and powers accruing to the king. In a world, he replaces the king. In the king's absence, the vizier is the actual ruler, and in the king's absence the vizier is the actual ruler, and in the king's presence no person and no matter can reach the king except through the vizier's mediation. It is the vizier who issues all orders and he it is who carries out the royal commands. Every officer from the highest to the lowest must report to

'And Pharaoh said unto his servants. Can we find such a one az this. a men in whom the spirit of God fs? And Pharach said unto Joseph, Forasmuch as God hath showed thee all this, there is none so discreet and wise as thou. Then shalt be over my house, and according unto thy word shall all my people be ruled; only in the throne will I be greater than thou, And Pharaoh said unto Joseph, See, I have set thee over all the land of Egypt. And Pharach took off his signet ring from his hand, and put it upon Joseph's hand, and arrayed him in vestures of fine Enen, and put a gold chain about his neck," -The signet ring signified not only the confidence of the crown, but it was also a token of high privilege, the bestowal of which rested with the king alone."

"And he made him to ride in the second chariot which he had; and they cried before him, Bow the knee; and get him over all the land of Egypt." -Joseph was driven in a royal charlot through the streets with runners calling for attention in front of him. There are many pictures showing royal charlots in sumptuous official apparel, the horses fully capar soned as on solemn occasions of state ceremonies. It is noteworthy that some old Ezyptian customs have beca preserved to this very day in the valley of the Nile. In the same manner as runners were employed in front of Joseph's chariot, so throughout the ages right down to the khedives and viceroys of modern times, runners have been employed to clear the way for kings and high personages. Probably Lord Kitchener was the last counterpart of Joseph to have the runners with swords in their hands running in front of his earriage." - The very word here translated "bow the knee," which is the word "abrek", meaning, literally, "mind thee", is the exact equivalent of the Arabic word "balak" which is used today by vehicle-drivers in Cairo when shouting to the pedestrians, by which they mean "Look

"And Pharaoh said unto Joseph, I am Pharaoh, and without thee shall no man lift up his hand or his foot in all the land of Egypt."- The full meaning of this verse is explained in the quotation given above from Professor Yahuda. The meaning of the new name which Paharoh gave to Joseph has been vigorously interpreted. Some suggest that it means "the salvation of life," or " the salvation of the world," or "the food of the living." Professor Yahuda combines all these and says that it probably means "food of the land is this living one." conveying the idea that Joseph was the feeder of Egypt. Joseph's mar-

Claims Co-Eds Are Spiritless

Woman Professor Declares That Modern College Girls Lack Fire

LINCOLN, Neb .- The modern college girl lacks fire and spirit, in the opinion of Dr. Louise Pound, professor of English language at Nebraska University.

Dr. Pound, sister of Roscoe Pound, former dean of the Harvard law school, recalled when co-eds always were fighting and plotting something. Today's maidens, she said, tend to be disinterested in every-

"It is most discouraging," she declared, "to have the young lady in my front row applying lipstick the entire period during my class. In reading some beautiful poem, when I am trying to keep myself from being moved to tears, or am trying to move my audience to tears, I find it a fascinating distraction to watch this girl smearing her mouth, ob-

Sightless Folks "Making Good"

General Public Does Not Realize Their Work in Professional Fields

LONDON, Eng. - While many persons know of the skill of blind craftsmen, the extent to which sightless men and women are today "making good" in professional fields, is not yet fully realized by the general public, according to the National Institute for the Blind here.

Since the World War, it is pointed out by the institute, 73 blind students in Britain have successfully graduated at the universities, most of them taking honors degrees.

Men and women studying for the professions receive help in many ways from the National Institute for the Blind. For example, a special students' library of Braille books is maintained. This has been built up by preparing a Braille hand-transcribed copy of every work which any blind student needs for his studies.

The professions most accessible to the blind are the Christian ministry, the law, and teaching. Prominent among the blind clergy is Canon

Dr. L. J. Alexander, associate plant pathologist, discussed water culture, the scientifically valuable method

Water culture, he said, is the ideal means of "putting plants on a diet", and thereby learning which elements guite so quickly available as nitro- conditions. Hence the application of help and which hinder their develop-

> Although there is hope, there is no immediate prospect of the system base coming a commercial success, he warned, despite courries enquiries received from persons who would like to start a truck farm in a ful of

water. Water culture, he explained, is the growing of plants in water to which chemicals are added. He hopes to make findings which may help convert barren fields into productive

The essential chemicals of the process are calcium, potassium, phosphorus, nitrogen, sulphur, maganese. boron, zinc, copper and iron. Some others in minute traces may be valuable. These elements are dissolved in the water, and the plant "steps right along" as if raised in the earth. Plants are supported in trays abster the water and the roots reach into the

Suggests Canning As An Experiment

Packer Thinks Vegetables Might De Put on in P. E. I

CHARLOTTETOWN, P.E.A. - A few acres of vegetables, principally beans, tomatoes and pens, should be grown in Prince Edward Island this year as an experiment in an effort to ... arrive at the cost of production in quantities sufficiently large to war rant operation of a canning factory. in the belief of J. D. Jenkins, Island packer.

Considerable discussion concessant the establishment of causing plants has been evident throughout the province lately. Mr. Jenkins said he favored the idea but "didn't want to a ! anything foolish done along these

lines." He cited a case when he was forced to turn down an order of 1,500 came of beans from a certain store operating in the Maritimes because 'I could not meet prices of Upper Canada

packers." Prices quoted by Ontario publica were \$1.35 a case of two dozen this f.o.b. the factory, or \$1.50 per case landed in the Maritimes, Approximate cost of the finished produce here, allowing the farmer three cents a pound, would be \$1.82, which included cost of raw products, tins, processing, sales and other costs, Mr . Jenkins

Upper Canadian packers were able to "undersell" packers on their own market here because "their season is two weeks longer at both ends. We cannot safely sow the seed here before June 15 and the early fall frosts comes about the first of September Then too, our farmers here can unly grow about 3,000 pounds to the acroas compared with a production of 6,000 pounds in Ontario or Quebre.

There was also the problem of mass. production, Mr. Jenkins said, tior operating up there with so great a quantity of raw material to handle the canners do practically everything of machine. The beans come in at apend of the factory and go out the other end a finished product. installation of such machines for all quantity that we handle here would entail altegether too much over and in this way we cannot colored with them in the matter of price
