wallet, no money in their purse.

LESSON X. SERVING WITH WHAT WE HAVE Mark 6:1-13. THE LESSON IN ITS SETTING

Time.-Winter, A.D. 29. Place.-The events of the first half of our lesson occurred in the ing. City of Nazareth, where Jesus lived until he began his public ministry. The twelve disciples were sent out

into Galilee probably from the city of Capernaum. 1. And he went out from thence. That is, he went out from Capernaum, where so much of his work was enryled on. And he cometh into his own country; and his disciples follow him. The Lord was regarded by the Galileans as a Nazarene; his birth at Bethlehem was forgotten, and the village where his family liv-

ed (v.3) and where he had passed

his youth (Luke 4:16) might well be called his country. 2. And when the sabbath was come, he began to teach in the synagogue. And many hearing him were astonished. It is to their credit that they were listening, which is more than every one does who goes to church. Saving, Whence hath this man these things? and, What is the wisdom that is given unto this man, and what mean such mighty works wrought by his hands? "A change had come over Jesus, for which they could not account; the workman had become the rabbi and the worker of miracles. Of his wisdom they had Levidence in his discourse; But whence

and what was it? The Village Carpenter

3. Is not this the carpenter? The village carpenter in our Lord's time held the position of the modern village blacksmith. Here is one of the few places where the veil is removed from his early life. He was brought up to the trade of a village earpenter. He worked with Joseph in building and repairing boats for the lake, in making furniture for the synagogue, and, according to an early testimony, in shaping plows and yokes for oxen.

The son of Mary, and brother of James, and Joses, and Judas, and Simon? and are not his sisters here with us? And they were offended in him. The last people to recognize a prophet are always his kindred and his countrymen. "Far-away kirds have fine feathers." Men resent it as a kind of slight on themselves that the other, who was one of them but yesterday, should be so far above

them to-day. The elders of Nazareth had seen Jesus grow up, and to them He would be "the carpenter's son" still. It is easy to blame them; but it is better to learn the warning in their words, and to take care that we are not blind to some true messenger of God Just because we have been blessed

with close companionship with him. 4. And Jesus said unto them, A prophet is not without honor, save in his own country, and among his own kin, and in his own house. "How true it is that home and one's home town are the hardest places in which to witness! The Nazarenes did not see how a carpenter could be a prophet." But why not? It is not one's surroundings which determine his character, but one's self.

No Mighty Work 5. And he could there do no mighty work, save that he laid his hands upon a few sick folk, and healed them. Jesus required faith for the performance of his miracles, and that was wanting here; nay, there was a positive disbelief, no mere doubt. Here the genuine unbelief of the nation reached its climax.

6. And he marvelled because of their unbelief. And he went round about the villages teaching. That which amazed our Lord was the utter unreasonableness of these people. The one thing that was keeping them from receiving Christ as a prophet come from God was that they - And decided in their own minds that the man who once was a carpenter in the midst of them, could not, somehow, be also a great teacher.

and a worker of miracles. 7. And he calleth unto him the twelve, and began to send them forth by two and two. Though Jesus has been rejected at Nazareth, and only a few there were saved by his ministry, yet he is not at all discouraged; he sends out his disciples on similar work, knowing there is no other hope for men but his gospel. The twelve apostles had been previously brought together as a band of disciples. More and more they were devoting all of their time to service under the Master's direction. In these mission journeys of the newly chosen apostles we see how well it suited the objects in view that they should go in pairs. A man by himself has many dangers. The presence of his colleague would recall him to his true position and remind him that he was not about his own work but his Master's. And he gave them authority over the unclean

Artificial "Fits" Combat Insanity

Induced by Camphor, They Prove a Startlingly Effective Treatment

Two treatments for the mental ill ness called schizophrenia, one by inducing epileptiform fits through doses of a camphor preparation, the other by producing a coma with insulin, were described in the last issue of the British Medical Journal, Lancet. Editorially, Lancet refers to the treatments as "dramatic" and "start-

Not many among the crowds who watch the cheetah speeding in the wake of a stuffed rabbit at about fifty-five miles an hour realize that this animal was trained for sport as long ago as 865 B.C., by the Kings of Persia, and that centuries later, at the zenith of Mogul domination of Hindustan, Emperors used to keep hundreds of cheetahs, just as huntsmen in the Old Country keep packs

the Kings used cheetahs for hunting deer as in India, and in the reign of George III a few were brought to England. The Duke of Cumberland tried them for stag-hunting in Windsor Forest; but they were not an unqualified success, for they refused to attack stags at bay.

******************* IS THIS YOUR BIRTHDAY?

By A. R. WEIR

9, 10 and 11

If you were born on any day listed above, Pisces is your zodiac sign -two fish is the symbol of this zodiac period. Those born under Pisces have strong, changeable emotions. They are restless and often moody. They can do a number of things well and have to cultivate concentration or they would flit from one occupation to another. If you were born under this sign you are now entering a favorable period-the years 1939 and 1946 will be specially favorable for you, Guard against being despondent and gloomy-the world is what you make it.

Again we introduce a new program to Canadian listeners-this one entitled Barbara Brant, heard over CFRB Mondays and Wednesdays at 3:00 p.m. Miss Brant conducts a fifteen minute gossip period in which all those things dear to a woman's heart are discussed-food, clothes, public events and so on. Listeners are asked to write in letters, five of which are

. . . .

drawn. To the senders of these five,

a large tin of Hershey's chocolate

syrup is sent and to all correspond-

ents a recipe book is mailed. Miss

Brant is about five foot six, fairly

dark complexion, and has a splendid

When Dogs Do Bark

A dog's bark may be worse than his bite-but it can also be a big factor in the success of a radio program. For instance: In the Sunday evening broadcast of "Heroic Dogs." heard over CBL at 7:30 p.m., the barking of a dog figures largely on every broadcast. A couple of weeks ago after the program was off the air, the phone rang. A voice said "We have a little bet on in our home as to whether it was a real dog on your program tonight." As a reply the man in the studio brought the "bark" to the phone where the "dog" obliged by barking-and we imagine that the man at the other end of the line is still puzzled as to how the bet should be settled. For his information the bark was faked by Stan Francis-who not so long ago fooled yours truly with a lion's roar when the script called for a trip through a zoo.

Rumors hold that in the very near future out-of-towners will have an opportunity of appearing on the Dr. Jackson show, "Airbreaks," heard over CFRB, Fridays at 8:30 p.m. We free advice by trained service men. repeat that all who appear on this program are paid a regular profession- shown how, through minor changes i al fee, and if they are selected win- their system of handling drafts an ners, they again appear and get paid | fueling their f naces, they could save -in other words it's worth your while | several tons of coal every winter. For The Busy Farmer

Around The Dial

RADIO HEADLINERS OF THE WEEK

By FRANK DENNIS

What Price Swing? We were speaking to Dick McDougall, CKCL Announcer, who is also reporter for "Downbeat", the musicians' magazine. Dick tells us that the recent concert given by Benny Goodman in Buffalo revealed to many localities what a tough job playing in a world-famous band is. The trumpeters in the Goodman organization all had split lips from blowing their horns, and blood trickled down many a shirt front.

Here's one for the records. Even Paul Win, NBC's spelling master was stumped on this inquiry. The letter received at NBC's Radio City studios read: "My daughter, Betty Ann, aged six, asked me the other day why the man on the radio spelled New York in different ways. First it is WEAF New York, then WJZ, New York."

. . . . "Do You Feel a Knocking?"

"Do You Mean It" . . . "And How" ... "Nice work if you can get it" these are a few phrases that have recently caught the public's fancy. Here's a new one concocted by comedian Henry Burbig on a recent Cheerup America broadcast over N.B.C when he questioned the sanity of other members of the Burbig Laffing-Stock Company. It's-"Do you feel a knocking on the back of your head?"

"There are very few products," says James Stewart, the noted Heating Expert, "the aim of whose producers is to sell the consumer, not as much as possible, but as little. But one of these is 'blue coal'." Mr. Stewart, whose talks about heating are a very popular features of "The Shadow" programs over CFRB, Wednesday even ings, went on to explain that, means of the 'blue coal' system of thousands of householders had been in your vicinity.

"Canada" stated the speaker, "has been spending millions of dollars on immigrants as well as more than \$300,000,000 on sickness while we were letting mothers and the children they bear die for lack of prenatal care. Environment had much to do with our health and we should not be too conscious of a too healthy

Rurai Health Service

"It is particularly necessary that rural people should have health service," declared Miss McPhail. She advocated the establishment of health clinics throughout the country, thus setting up a preventive work which would save people much money as well as much suffering and misery.

Miss McPhail related how people of Grey and Bruce counties are living in an iodine deficient area and therefore there was much goitre prevalent.

"I have urged a survey of the counties by health authorities and not until after repeated demands was I able to get one which revealed that out of 160 examined 19 had enlarged glands. However, upon securing the results of a private survey made by a specialist of goitre it was found in one of the townships in this area 50 per cent, were affected with goitre," she sa'l.

Scientists Time Lightning Speed

Travels At 10,000 Miles Per Second, Tests Reveal

Measurement of the speed of lightning, at 10,000 miles a second, was reported to the American Institute of Electrical Engineers meeting at Pittsburg last week, by Karl B. McEach-

The speed was timed at the Empire State Building in the heart of New York City. This world's tallest building is struck oftener than any other known place on earth, Mr. McEachron said. It acts like a needle to draw electricity.

Camera Settles It

A motion picture camera, on top of a skyscraper half a mile from the Empire State, has caught every flash for three years. It is part of a lightning laboratory directed by Mr. Mc-Eachron for the General Electric Company.

The camera settled a long controversy. The dispute was about which direction lightning branches, up or down. Pictures showed both directions. The Empire State evidence shows that the branches will go in the direction of the original stroke.

This original stroke is not seen by the human eye. It is a series of lanceshaped flashes, each about 200 feet long. These, one after the other seem to "drill" a path in the air for the main stroke of fire. Each lance proceeds a little farther than the one be-W. A. Brown, Chief, Poultry Ser- to cheese factories.
