A FACT A WEEK ABOUT CANADA

IVORY

Ivory is one of the glamorous articles of trade that remain to us in this more prosaic industrial age. Africa is now the chief source of supply. From Zanzibar and Mombasa, trading centres for the Kenya Colony and Uganda and Mozambique, regular shipments are made. Supplies are also obtained in the Sudan, and in the Central and West regions, chiefly the Congo, Cameroon and Nigeria. Russia ships annually some mammoth tusks unearthed in Siberia, of an age estimated from one thousand to fifty thousand years. A small supply is got in Siam from elephants that have died of old age.

At one time all the ivory was found dead in the African jungle. Native expeditions collected it in the "cemeteries" where elephants went to die. It is estimated that now about 50 per cent. of the animals are shot, although the slaughtering is strictly controlled.

In Biblical times ivory was classed with gold and silver. Solomon's throne was made of ivory, overlaid with gold. Ivory is also got from the hippopotamus, wild boar, sperm whale and walrus. There are thousands of uses for it.

The supply does not seem to diminish. Sales are held quarterly in London and usually the quantity put on the market varies from 15 to 30 tons. The soft ivory yields about one thousand dollars per hundredweight. Not much unmanufactured ivory is imported direct by Canada, only a few hundred pounds in a year.

When such interest in music is displayed by children as at Grey County's Music Festival, there is little chance of the county going to the "bow-wows" musically.

History of S. S. No. 6 Bentinck, 1858-1938

The first log school house was built at the south west corner of the school ground in 1858. Thomas Ashbury Sr. was the contractor assisted by his son Thomas. Neighbors gathered to roll up the logs as was customary in those days when a house was to be built. The interior of the school would be a curiosity in these days. Desks were attached to the walls around the room and the juvenile pupils sat on benches facing the walls. In the centre of the room was a long wide desk sloping on each side and flat on the top to hold books, slates etc. The senior pupils occupied this desk.

The first well was dug by Neil McLean (Kelly) and Charlie Boyd. Mr. Thomas Bailey of Hanover is the only one living of the pupils who were present at the opening of the school. He also assisted in giving first part of this history.

The first school board consisted of Malcolm McDougall, Peter Cook and William Brunt, trustees, and Samuel Hillis, secretary-treasurer. The first teacher was Miss Clara Grube. Next in succession were: Mr. McLean, Alex McKenzie, Mr. Wilson, Alex McIntosh, John Allan and William Campbell. Gospel meetings were held in this school house.

The present stonewood school house was erected in 1870 by Robert Patterson, and Edward Earls, and the present well was drilled by Edward Pratt of Durham in 1908. Gospel meetings were also held in this schoolhouse by Daniel Wright and J. C. Mukish, prior to the building of the Baptist church across the corner.

Union Sunday school was carried on for a number of years under the superintendence of James McLarty and Joseph Hendry. Some of the Sunday school teachers were Hendry O'Neill, James McLarty, Mrs. Patrick O'Neill, Jane Hendry and Thomas Ashbury.

After the war she went as a nurse to Dawson City where she has since passed away.

Others who took up teaching, who were not mentioned above, Thomas O'Neill, Hector McDonald, James Brunt, Dan H. McDonald, Catherine McDougall, Jessie Twamley, Reg. Adam, Gerald Brunt, Inez Twamley. The two latter are high school teachers.

EDUCATION can bring temperance! Wherever and whenever it has been tried, prohibition has failed... anyone who is capable of learning from experience must realize by now that people cannot be made good by law. Yet there is a constant flow of propaganda seeking to prejudice the public against the present sensible system of government control. It is better to educate the individual in self-discipline and self-control than to attempt impossible prohibitions. Such education is the object of this series of advertisements. We sincerely commend it to those genuinely interested in the cause of temperance. A LETTER FROM DICKENS "I am certain that if I had been at Mr. Fuzziwig's ball I should have taken a little negus—and possibly not a little beer—and been none the worse for it, in heart or head. I am very sure that the working people of this country have not too many household enjoyments, and I could not, in my fancy or in actual deed deprive them of this one when it is innocently shared. Neither do I see why I should deny it to myself." —CHARLES DICKENS replying to a letter from a lady who objected to references to drinking in his books. © This advertisement is inserted by the Brewing Industry in the interest of a better public understanding of certain aspects of the problems of temperance.
