

## Canada's Best Weekly Paper

In the Penticon Herald, B.C.—  
Ontario Gets Eight Awards  
in 1938 Contest

VANCOUVER—The Penticon Herald, of Penticon, B.C., was announced winner of the Canadian Weekly Newspaper Association's Mason Trophy for the "best all-around paper" having a circulation of 2,000 or over.

The award report of John C. Kirkwood stated the Herald's "styling is pronounced from first to last."

Ninety-four newspapers competed for the awards divided among the various provinces as follows: British Columbia, four; Alberta, one; Saskatchewan, two; Ontario, eight; Quebec, one; Nova Scotia, one.

Circulation 2,000 and Over  
Group of 2,000 circulation and over:

Mason Trophy—Best all-around paper: 1, Penticon, B.C., Herald; 2, Barrie, Ont., Examiner; 3, Simcoe, Ont., Reformer.

Davie Willis Cup—Best editorial page: Leamington, Ont., Post and News.

Arthur W. Marsh Shield—Best front page: Bowmanville, Ont., Statesman.

Group of 1,000-2,000 circulation:  
Charles Clark Cup—Best all-around paper: 1, Newmarket, Ont., Era; 2, Kelowna, B.C., Courier; 3, Listowel, Ont., Banner.

Malcolm MacBeth Shield—Best editorial page: Fergus, Ont., News Record.

Major A. James Memorial Shield—Best front page: Kelowna, B.C., Courier.

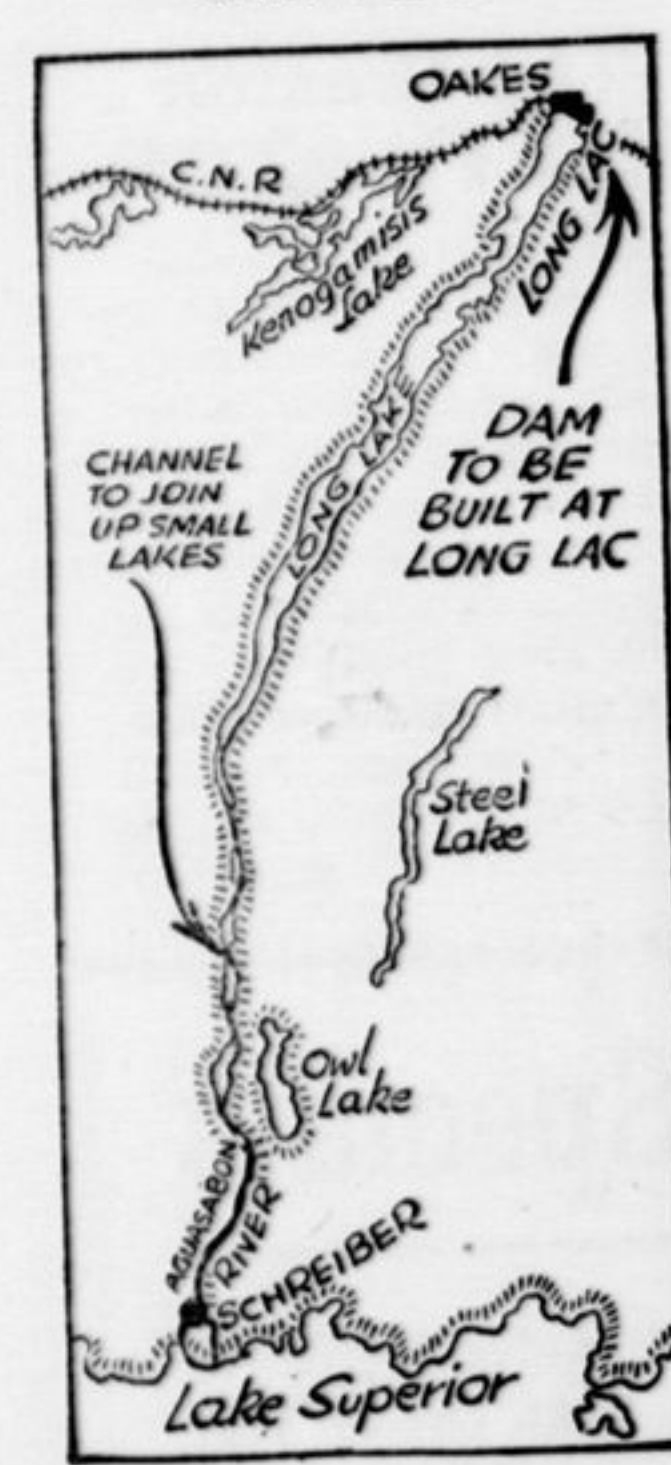

Jarvis Record Is Good  
Group of 500-1,000 circulation:  
Hugh Savage Shield—Best all-around paper: 1, Waterville, N.S., Acadian; 2, Granby, Que., Lender Mail; 3, Lacomb, Alta., Western Globe.

Printer and Publishers' Special—Best front page: Watrous, Sask., Manitou.

Group of under 500 circulation:  
The Charters Cup—Best all-around paper: 1, Jarvis, Ont., Recorder; 2, Rouleau, Sask., Enterprise; 3, Nakusp, B.C., Arrow Lake News.

Printer and Publishers' Special—Best front page: Jarvis, Ont., Recorder.

### Arctic Water to Flow Into Great Lakes

Diversion of water from the Arctic ocean watershed to the great lakes and the St. Lawrence through Long Lac, one of the largest engineering projects ever undertaken in northern Ontario, will be almost complete by the end of the year, according to reports from Fort William, Ont. The map, LEFT, shows location of the development. A \$600,000 dam has already been constructed at Kenogamiis lake, 50 miles north of Long Lac station and a second dam will be built at the head of Long Lac. The entire project, which will add a flow of 1,250 cubic feet of water per second to the Niagara river either to flow over the falls or for power development, and also making possible an increase of \$1,000,000 per year in the revenues from Ontario's forests, is under the control of the Ontario Hydro, headed by Dr. T. H. Hoag.

### Fishy Money

Codfish was the currency used to pay for the new 7,287-ton luxury motor vessel "Eggs". The vessel was built at Trieste, Norway had a surplus of codfish, which Italy was only too pleased to take in exchange for the ship.

Germany's tax receipts for the last fiscal year were 12 per cent. above the preceding 12 months.

## Classified Advertising

**AGENTS WANTED**  
SELLING WATERPROOFING, —  
paints, roof and floor mastics, di-  
rect to large consumers, part or  
full time. The Presco Company,  
Toronto.

**FOR SALE**  
FANNING MILL (KLINE), PROOF  
Best Mill, sell price new (Auction  
Sales), Kline Manufacturing, In-  
sington, Ontario.

**DERPO PRODUCTS**  
DERPO BUG KILLER 5c EXTREME-  
minates bedbugs — cockroaches—  
ants—termites, Derpo Moth Killer  
25-50c kills the moth worm. At  
Eastons, Simpsons, Famblyn, and  
other leading stores or Derpo Pro-  
ducts, Toronto.

**DESIGNING SCHOOL FOR CLOTHING**  
GALASSY'S PRACTICAL SCHOOL  
of Designing and Pattermaking  
for ladies and gentlemen's gar-  
ments, dressmaking, and fur de-  
signing. Correspondence courses  
if necessary. Day and evening  
classes. Individual instruction.  
Write for information, 65 Avenue  
Road, Toronto.

**FURNITURE**  
**LYONS**  
**TRADE IN DEPARTMENT**  
478 Yonge St., Toronto

**AUGUST FURNITURE SALE**  
RECOMMENDED FURNITURE  
Every article thoroughly cleaned,  
reconditioned and sold under a de-  
finite money back guarantee of sat-  
isfaction.

**\$35.00** Beautiful mahogany bed  
room suite, dresser, chiffonier,  
bed, sagless spring and new  
felt mattress. Perfect.

**\$39.00** Rich walnut finish suite,  
dresser, chiffonier, bed,  
sagless spring and new felt mat-  
tress.

**\$49.00** Modern suite in dark wal-  
nut finish, vanity, Venetian  
mirror, chiffonier, bed, sagless  
spring and new felt mattress.

**\$59.00** Beautiful large walnut fin-  
ish suite, chiffonier, triple  
mirror vanity, full size bed and  
sagless spring.

**\$69.00** Complete, chiffonier, bed, sag-  
less spring and new mattress, in  
two-tone walnut finish.

**\$119.00** Large dresser, full size bed,  
sagless spring and brand  
new mattress.

**\$79.00** Solid walnut suite, dresser,  
vanity, chiffonier, full size  
bed, sagless spring and new mat-  
tress. Like new.

**\$23.50** Solid oak dining room  
table, large buffet, exten-  
sion table and 6 leather seat chairs.

**\$29.00** Beautiful large buffet, ex-  
tension table and 6 leather  
upholstered chairs in solid oak.

**\$39.00** Complete suite, solid oak  
cabinet, china cabinet, exten-  
sion table and 6 leather slip seat  
chairs.

**\$42.50** Large English oak suite,  
buffet, double door china  
cabinet, extension table and 6  
leather upholstered chairs. Perfect condition.

**\$59.00** Smart oak suite, buffet,  
square extension table,  
china cabinet and 6 leather slip seat  
chairs.

**\$79.00** Beautiful large walnut ve-  
ner suite, buffet, cabinet,  
table and 6 leather upholstered  
chairs. Perfect.

**\$109.00** Large solid walnut suite  
cost new over \$200),  
buffet, extension table, cabinet and  
6 leather upholstered chairs. Perfect  
condition.

**\$119.00** Beautiful curved English  
oak suite, buffet, refec-  
tory table, closed china cabinet, 6  
leather chairs. Cost new \$225. Used  
6 months.

**\$125.00** Large curved walnut  
suite (regular \$375.00)  
buffet, beautiful cabinet, extension  
table and 6 leather chairs. Perfect  
condition.

**\$127.50** McLagan suite solid wal-  
nut, large buffet, china  
cabinet, extension table and 6 leather  
upholstered chairs.

**\$149.00** Beautiful large walnut  
suite (cost new over \$300),  
buffet, extension table, china  
cabinet and 6 leather upholstered  
chairs (6 months old).

**\$49.00** Floor sample chesterfield  
suite, in rust ropp, reversible  
Marshall spring cushions.

**\$37.50** Large mohair suite, 3  
pieces, reversible Marshall  
cushions, show wood walnut  
furniture.

**\$29.00** Smart 2 piece chesterfield  
suite in rust ropp, reversible  
Marshall spring cushions, thor-  
oughly cleaned.

**\$14.95** Three piece chesterfield  
suite, tapstry cover, good  
condition, Marshall cushions.

**\$32.50** Smart three piece suite up-  
holstered in fine French  
beige, reversible Marshall cush-  
ions. A beauty.

**MARRY—WOULD YOU MARRY IF  
suggested? Hundreds to choose from.  
daughters and widows with prop-  
erty. Particulars, Inc. Confiden-  
tial. Canadian Correspondence  
Club, Box 128, Calgary, Alta.**

**POULTRY AND POLTRY**  
**SALE OF SEVEN AND EIGHT  
week old Barred Rock cockerels  
25c. Feed some of these well  
started cockerels with your own  
plus grain. Also 5 week \$25.50, 4  
week \$20.50, 3 week \$15.50. High  
Quality Ice Cream, Egan Ed-  
is, 1272 Den-dove Ave., Toronto.**

**PULETS 4 WEEKS TO 22 WEEKS.**  
Barred Rocks, White Leghorns,  
Also started chicks and cockerels,  
3 week to 7 weeks. Write for pri-  
ces. Tweedle Chick Hatcheries  
Limited, Fergus, Ontario.

**5 TO 6 WEEK OLD PULETS.** Barred  
Rocks 25c. Leghorns 25c.  
4 week, Barred Rocks 25c. Leg-  
horns 25c. 3 week Barred Rocks  
15c. Leghorns 25c. Large  
Quality and Ice. Top Notch Chick-  
eries, Guelph, Ontario.

**NEWSPAPER OPPORTUNITY  
PROPERTY WANTED**  
ADVERTISER IS INTERESTED IN  
purchasing Ontario Weekly News-  
papers. Can make reasonable  
down payment in cash and monthly  
payments for balance. Must in-  
clude good job business and well  
established newspaper in growing  
district. C. Emerson, 9 Belvedere  
Ave., Toronto.

### Gardening Notes

**LAWN SEEDING TIME**  
More and more generally it is be-  
coming recognized that the late  
summer—August 15 to September  
15—is the best time for seeding  
lawns. The grass grows vigorously  
until hard freezing weather, and  
such annual weeds as may start  
are killed off by the first frosts.

Even better results are obtained  
when the area to be planted can  
be prepared a few weeks in ad-  
vance. This gives the soil a chance  
to settle under heavy rains, so that  
any uneven places may be graded  
just before sowing. It also pro-  
vides a chance for any weed seeds  
in the soil to sprout. These are  
easily destroyed when the ground  
receives a final preparation for  
sowing the grass, which then can  
get off to a clean start, with the  
minimum competition from weeds.

If lime is to be added to the soil,  
it can also be put in now; this is  
preferable to applying it just be-  
fore the grass seed is sown.

**SPINACH AND CABBAGE**  
The home owner with a vegeta-  
ble garden looks to early August  
as the time to sow spinach for a  
within a month or so. Most im-  
portant, however, is the sowing of  
Chinese cabbage which usually  
fails to head if sown in April.

The row where they will grow, be-  
cause they resent transplanting.  
Thin the seedlings when they be-  
gin to crowd one another, until the  
plants stand fifteen inches apart.  
They will make solid heads by late  
autumn and add to the menu a  
delicacy that has a flavor more  
mild and pleasant than ordinary  
cabbage. It also makes a delicious  
slaw and the leaves may be eaten  
raw like celery or lettuce.

**Successful Respirator Mask**  
A new type of respirator mask,  
tried out in planes flying in the  
sub-stratosphere, may some day  
serve as a substitute for oxygen  
tents now used in hospitals.

Dropping out of the sky after a  
non-stop flight at Minneapolis  
last week with scientific data on  
oxygen mask equipment expected  
to make an important contribution  
to medical science.

For seven hours and 40 minutes  
the large transport plane of  
Northwest Airlines has flown from  
Los Angeles and has flown from  
one third of the time at an alti-  
tude of 31,000 feet in order to  
give the crew time to test the new  
masks.

**Deadly Germ Photographed**  
Bringing with him what he  
described as the only photographs  
ever made of the dread strepto-  
cocci germ, Dr. Herbert Rogers,  
resident pathologist of the North  
Middlesex Hospital of London,  
England, arrived on this continent  
last week to confer with Harvard  
medical authorities. Dr. Rogers  
said he discovered the germs ac-  
cidentally four months ago while  
examining the blood of a 30-year-  
old woman patient. Although the  
germs were known to enter the  
blood stream of victims, he asserted,  
they very seldom have been lo-  
cated.

**Measure Cosmic Rays**  
Maybe a cosmic ray doesn't  
mean much to you. Maybe you  
don't even know what it is. But  
over in Philadelphia, scientists  
are striving to fathom its myster-  
ies.

Members of the Bartol Research  
Foundation have built a cylindrical  
iron tank, over 40 ft. high, and  
10 ft. in diameter, to be used as a

### To Make Glass, Sand Is Needed

Heat Causes It To Run Into A  
Transparent Glaze—How  
Glass Was Discovered

Well may we speak of the shift-  
ing sands, says a writer in the  
Children's Newspaper, for year by  
year the contours of the sandy des-  
erts change. In the Canary Is-  
lands are huge heaps of sand piled  
up by winds that have blown from  
the Sahara, and in Syria and Per-  
sia and Arabia the sands are for  
ever drifting over the ruins of an-  
cient cities. These hills and valleys  
are never still, and when a hurri-  
cane springs up and the sand flies  
before the storm men bury their  
heads and crouch down with fear  
and trembling.

But sand is useful. Without it  
we should be at a loss to know  
how to build our houses, and but  
for sand we might have no glass.  
Though experts are not sure where  
glass-making began it is believed to  
have been in Egypt or Syria, both  
countries having abundant sand.

It is possible that glass was ac-  
cidentally discovered by Phoeni-  
cian merchants who did their cook-  
ing in the sand and found that  
heat caused it to run into a trans-

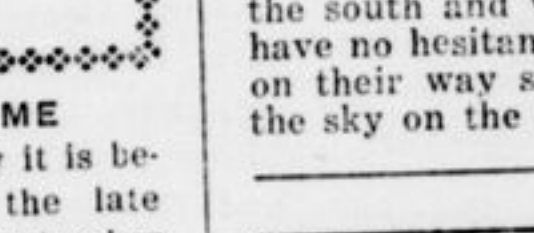

parent glaze. From that time to  
this sand has always been largely  
used in the manufacture of glass.

Sand has long been used for  
measuring time. We still have egg-  
timers with their little lot of sand,  
and in the days before clocks were  
cheap the sand-glass, or hour-glass,  
was always at hand.

Among the northern nations of  
Europe, in ancient times, it was  
the custom for newly married  
couples to drink methagen or  
mead (a kind of wine made from  
money) for thirty days after  
marriage. Antiquarian lore has  
it that from this custom the term  
"honey month," or "honeymoon"  
originated, says The Rocky Moun-  
tain Herald. Whether or not that  
is the origin of the word, it is  
known that in the days of mar-  
riage by capture the bridegroom  
remained in hiding with his bride  
until her kinsmen tired of the  
search for her.

Later, when love entered mar-  
riage and elopements were fre-  
quent, the bride and bridegroom  
remained in hiding for a while.  
Both of these "hiding periods"  
seem to point to possible origins  
of the honeymoon trip.

Swallows Say It'll Be A Tough Winter

It's a long, tough winter we're heading for if swallows be-  
trusted as meteorological prognosticators. When the swallows head for  
the south and warmer climates this early in the year weather prophets  
have no hesitancy in predicting an early and severe winter. Already well  
on their way south this flock of swallows is creating a design against  
the sky on the telephone wires in North Carolina.

laboratory for experimental pur-  
poses.

The bottom of the tank will be  
specially shielded from wireless  
waves—which disturb the cosmic  
ray—and the top of it will be  
filled with water, through which  
the cosmic rays will pass and be  
measured.

**Polio and Summer Flu**  
It is possible that there is some  
relationship between summer flu  
and infantile paralysis. Dr. B. T.  
McGhie, Deputy Minister of  
Health for Ontario, remarked last  
week. It appeared probable that  
many people might have the or-  
ganism, yet not develop any ap-  
pearance of paralysis, he said.

**New Nitrogen Form**  
There is a mysterious light in  
the night sky, which does not  
come from the moon or stars. Dr.  
Joseph M. Kaplan, associate pro-  
fessor of physics, University of  
California, at Los Angeles, has  
been investigating this radiation  
and his studies have led to the  
discovery of a new form of nitro-  
gen.

He secured pictures of its spec-  
trum which indicated the light  
came from electrically excited  
gases in the outer region of the  
atmosphere, but there were some  
lines in the spectrum that did not  
belong to known gases. Calcula-  
tions demonstrated that the lines  
photographed corresponded with  
those produced by nitrogen in  
atomic form. The known nitro-  
gen is a molecule made up of two  
nitrogen atoms. In the new form  
the nitrogen are single atoms.

**The BOOK SHELF**  
By ELIZABETH EEDY

**"PRAY FOR THE WANDERER"**  
By Kate O'Brien

The soft, warm charm of the  
Irish countryside is evoked as a  
convincing background for this  
tale of the Costello family who  
live at Weir House in the Vale of  
Honey.

The action of the story is en-  
tirely in the minds and hearts of  
three people. Matt Costello comes  
back after many years in London,  
after winning fame and riches as  
novelist and playwright, after the  
raptures of a passionate love af-  
fair—and after its end. A month  
of meetings with the cool, lovely,  
intelligent Nell Mahoney brings  
him the sudden hope of new life.  
What happens when he grasps at  
the hope, it is Miss O'Brien's pre-  
rogative to tell. The swift de-  
nouement is surprising.

"Pray For the Wanderer," by  
Kate O'Brien. 209 pp. Toronto:  
Doubleday, Doran and Company  
—\$2.50.

**Seaweed Wrapping**  
Latest wonder from the labora-  
tory is an entirely new transpar-  
ent wrapping material made from  
seaweed. Chemists found that  
certain species of the weed when  
boiled set like a jelly. They ex-  
perimented further, and found that  
this jelly could be turned into  
thin, tough sheets.

The secret is alginic acid—a  
substance half way between a sug-  
ar and a fat. Being an acid it re-  
acts on metals, and so it can be  
made to produce a variety of nat-  
ural colors from metallic salts.

Greatest advantage of the new  
material is that it is soluble in  
water.

**for RHEUMATISM**  
Four Minard's into a warm  
bath—Rub liniment gently in-  
to the joints according to  
directions. — one box  
you'll get relief!

### Science Should Point Way to A Better Life

Creation of a board of scientists  
and philosophers empowered to  
give or refuse permits for inven-  
tions likely to affect human life  
was proposed by Prof. C. E. M.  
Joad, head of the Department of  
Philosophy and Psychology in Bir-  
beck College, University of London,  
at a teachers' summer school meet-  
ing in London, England.

"Science has given us powers fit  
for gods, yet we bring to their use  
the mentality of schoolboys and  
savages," he said. "The symbol of  
this is the airplane. The greatest  
of man's inventions which never-  
theless threatens his civilization  
with destruction.

"The superman made the air-  
plane but the ape has got hold of  
it.

**Civilization Throttled**  
"To step on foot throated, insert  
coins into metal slots, scan head-  
lines, crowd through flicking tur-  
tles, turn on the radio, hurl our-  
selves over the surface of the earth  
in a mechanism propelled by gaso-  
line—these constitute the modern  
motion of entertainment.

"Men of genius by the dozen,  
men of talent by the hundred la-  
bored in order that the radio might  
be. A miracle was performed, but  
with what result?

"Science, in short, has provided  
in abundance the means to the  
good life, but it has not taught us  
how to live."

Recently there was a Negro  
baptizing in South Carolina. Af-  
ter one of the converts had been  
immersed he was asked if the wa-  
ter was cold. "No, not a bit," said  
he. "Better put him under again,  
parson," advised a deacon, "he  
hasn't quit lying yet."

A couple of weeks were talking things  
over:

First—"When does your open-  
ing sale close?"

Second—"When your closing  
sale opens?"

A chairman is a man who spends  
21 minutes and 16 seconds intro-  
ducing a man "who needs no in-  
troduction."

Every one of us has a besetting  
sin.

One of us is lazy.  
Another is too fond of liquor.  
A third had rather starve than  
grasp unpleasant tasks.

Again you see a man or woman  
who gets nowhere because of ob-  
session always to do or to say the  
wrong thing. Occasionally he flies  
off the handle into senseless an-  
ger and undoes more than he ever  
can do.

Finally, a lot of us, who think  
we are paragons, kill ourselves  
eating.

Anyhow, it set the boy to think-  
ing.

Jerome (after Sunday School)  
—"Say, Dad, our lesson today told  
about the evil spirits entering the  
swine."

Dad—"Yes, and what do you  
wish to know about that, son?"

Jerome—"Was that the way they  
first got devilled ham?"

**READ IT OR NOT:** — The  
planet Neptune is never visible to  
the naked eye.

We doubt if it would be wise  
to test out your prospective son-  
in-law this way:

The big business man, who had  
never been known to get the worst  
of a deal, leaned back in his chair.  
Big Business Man (leaning back  
in his chair)—"So you want to  
marry my daughter, eh? Well,  
tell me this. Could you lend me  
\$1,000 at once, without security?"

Young Man (standing by the  
fireside, losing no time in reply-  
ing)—"Yes, sir. I could—but I  
wouldn't."

Big Business Man—"Good! Cer-  
tainly, you shall marry my Clarice.  
I'd trust her with any man who  
showed a spirit like that."

Girls who used to get finger  
exercise on the piano are now  
content to get it fingering the  
dials on the radio.

Dublin, Ireland, will invite the  
world to its dramatic festival in  
August.

**ITCH**  
... STOPPED IN A MINUTE ...  
Are you bothered with the itching, burning, or  
other excruciating, itchy eruptions, or other  
skin ailments? For quick and happy relief  
use cooling, antipruritic, liquid D. O. D.  
Preparation. Its gentle oils soothe the ir-  
ritated skin. Close, granules and stam-  
pers fast. Stop the most intense itching  
instantly. A 16 oz. bottle, at drug stores  
saves 4- of money back.

### Have You Heard

Set me a task, that I may work to  
gain an inch of ground  
Along the path of progress, where  
the joys of life are found.

Set me a task, that I may grow in  
strength of lessons learned;  
In pride and meekness let me be  
with clearer sight concerned.

Set me a task, that I may give  
what has been given to me,  
And know that greatest works are  
done out of humility.

Clarence (still bragging about  
himself to his girl at midnight)—  
"My boss says I have what he calls  
a lot of 'get-up-and-get'."

Sally—Then why don't you?

Recently there was a Negro  
baptizing in South Carolina. Af-  
ter one of the converts had been  
immersed he was asked if the wa-  
ter was cold. "No, not a bit," said  
he. "Better put him under again,  
parson," advised a deacon, "he  
hasn't quit lying yet."

A couple of weeks were talking things  
over:

First—"When does your open-  
ing sale close?"

Second—"When your closing  
sale opens?"
