

Man Knits Socks As A Livelihood

Aged Wawanosh Resident Beats Depression—Continually Busy Making Fine Products

WINGHAM.—Celebrating his seventy-fifth year, J. R. Webster of St. Helens in West Wawanosh Township, believes himself to be a "depression-beater."

Born in Ashfield Township, he worked as a laborer as a young man and worked for a number of years on the famous Joynt estate near Lucknow. Advancing in years when the famous depression came on, he decided to take up knitting as a hobby that might eventually help out financially.

His knitting was confined to socks and soon he began to get a demand for them. Men going up to work in the lumber and pulp camps were hearty in the praise for the "all-wool" products of his hands. The demand increased, and so far the past number of years he has been constantly busy simply "knitting socks."

Asked if he believes knitting to be a woman's job, he just laughs. "Of course it isn't. I like knitting, and whoever says it isn't interesting . . . well, just let him try keeping threads from getting knotted."

Voting Is Oral In The Bahamas

No Other Unit of the British Commonwealth Has Retained This Ancient System

Voters line up alphabetically at the polls to elect their candidate to office in the Bahamas legislature by the antiquated viva voce (oral) method of voting now, but a plan to change that is afoot.

The Bahamas is the only unit in the British empire that has not reformed its system of electing representatives. In the Bahamas, with 50 percent of its population negroes every proposal to introduce the secret ballot has been contested hotly on the ground there would be no white legislators. Recently, the government announced another proposal to change election laws and it would be placed before the fall session of the legislature.

Lined Up Alphabetically
Voters in the Bahamas mark no ballots. On election day, they go to the polls and are asked for just whom they wish to vote. Their answers are entered on a printed form by a recorder.

When Harry Oakes, Canadian gold mine operator, defeated Milo Butler, negro grocer, for the legislature in the Nassau election several months ago, the campaign was so well organized that Oakes' supporters were lined up alphabetically at the polls.

Freedom Comes With Control

To Be Responsible Is To Be Self-Controlled

"I want to live my own life," is a common cry.

Which life is that? We are members one of another. Your life and mine and the life of all our neighbors grow on one stem, writes John S. Wright in the London Daily Sketch. The creature that lives fast their own life on the leaves; they are parasites.

"Living your own life" means thinking only of yourself, and how bereft you must get! It means self-indulgence, and that means for the most part of the brain and hardening of the heart.

"A Natural Weakness"
The lunatic asylums are full of people who would lead their own lives. For madness begins by your thinking yourself all important.

A Purpose Beyond Self
There's a lot of talk about freedom nowadays, but few realize that freedom means responsibility, and that you can't be responsible until you have gained self-control. The strange paradox is that you can't gain self-control until you have a purpose outside yourself.

Freedom is not an instinct, but an art. You know that is so in music and sports and so on. The specialist with perfect freedom of movement has gained it only by long and painful drudgery. So must you if you want to live a free life.

Prophetic Stone

There is said to be a kind of stone in Finland which, like a barometer, forecasts the weather. The stone, according to report, turns black or blackish-grey when rain or bad weather is approaching, and becomes covered with small white spots at the approach of clear weather.

England reports an American millionaire who was so seasick on his first Atlantic crossing that he stayed aboard the rest of his life.

Sunday School Lesson

LESSON I
THE ONE TRUE GOD

Exodus 20: 2, 3; Isaiah 45:22; Mark 12:28-34; I Corinthians 8:4-6
Golden Text—Thou shalt love Jehovah thy God with all thy heart, and with all thy soul, and with all thy might. Deuteronomy 6:5.

THE LESSON IN ITS SETTING
Place.—The Ten Commandments were given 1498 B.C.; the passage from Isaiah was written about 690 B.C.; the conversation of our Lord with the scribe was on Tuesday, April 4, A.D. 30; the First Epistle of Paul to the Corinthians was written A.D. 53.

Place.—The Ten Commandments were given at Mount Sinai; the conversation of Jesus with the scribe took place in Jerusalem; the city of Corinth was located in northern Greece.

2. I am Jehovah thy God. The most important and the most influential conception that a man can have is his conception of God. Our thought of God determines our outlook on the world.

The word "Jehovah" means fundamentally, One.

Who brought thee out of the land of Egypt, out of the house of bondage.

No Other Gods

3. Thou shalt have no other gods before me. If God is what he claims to be, then he must be the supreme object of worship.

Isa. 45:22. Look unto me, and be ye saved, all the ends of the earth; for I am God, and there is none else. In the verse preceding the one assigned to our lesson from Isaiah, God is spoken of as "a just God and a Saviour," i.e., a God who always does right, whose word is true, whose promises are fulfilled, and a God who is able to save his people from their sins, from wrath, from eternal death, from their enemies. Because God is such a God he can extend the invitation that we find in our verse, "Look unto me and be ye saved."

There is in this a testimony to God's uniqueness, to God's knowledge of the helplessness of man, to God's love for man in his helplessness. The scribes came, and heard them questioning together, and knowing that he had answered them well, asked him, What commandment is the first of all? This conversation took place on Tuesday of Passion Week, in the city of Jerusalem. The Pharisees, having heard that Jesus had silenced the Sadducees, gathered around him. The Jews divided the Pentateuch into six hundred and thirteen precepts, three hundred and sixty-five prohibitions, as many as there were days in the year, and two hundred and twenty-eight commandments, as many as there were parts in the body. Among the greater commandments they reckoned Sabbath observance, circumcision, rules of sacrifice and offerings, and rules about fringes and phylacteries.

The Two Commandments
29. Jesus answered, The first is, Hear, O Israel; The Lord our God, The Lord is one; 30. and thou shalt love the Lord thy God with all thy heart, and with all thy soul, and with all thy mind, and with all thy strength. 31. The second is this, Thou shalt love thy neighbor as thyself. There is none other commandment greater than these. In reply to the scribe's question, the Lord quoted Deut. 6:4, 5 and Lev. 19:18. Though Jesus does not directly quote from the Ten Commandments, he does quote a passage which summarizes the teaching of all the Commandments, and puts the emphasis first on the character and recognition of God, then upon our utter, absolute love for God, and finally, upon our love for one another. If every living person were just obedient to these two commandments, to love the only true and living God with all one's being, and then truly to love one's neighbor, he would be living the fullest, richest, most satisfying life men can ever attain to.

32. And the scribe said unto him, Of a truth, Teacher, thou hast well said that he is one; and there is none other but he; 33. and to love him with all the heart, and with all

Life Near Pole "Is Really Fun"

Geologist and Wife Found The Far North An Ideal Place To Live

EDMONTON.—A life in the Arctic with fish and canned food flown in to them by airplane, was described as "Great Fun" by Mr. and Mrs. A. Lincoln Washburn, of Hanover, N.H.

Washburn, a geologist still in his '20's, returned here after a six weeks' study of glacier and geological formations in the far north. By airplane and schooner he and his wife visited a number of points, including Yellowknife, Cambridge Bay, Read Island, the Colville Mountains, Victoria Island and the Baillie Island.

"It was great fun," Mrs. Washburn said. "Glad to get back?" No. I'd like to stay up there. The people are simply wonderful. And there wasn't any hardship. The food was good — fish and canned food was flown in by airplane. It's the way I like to live."

At Read Island in the Arctic Ocean, they visited Mrs. Ray Ross, North America's farthest north white woman. Mrs. Ross is the wife of a Hudson's Bay Company trader.

Glass Buttons Provide Safer Night Driving

R. M. Smith, Ontario's deputy minister of highways, announced last week his department would extend the use of an experimental safety device which is being tried out on the middle road.

The device consists of a number of small glass buttons, about the size of a half dollar, placed in sets of three on short posts about 100 feet apart and seven feet from the shoulder of the road. So far they have been tried on a mile and a half stretch of highway just west of Oakville, on the south lane of the middle road.

The buttons catch the gleam of the headlights of a car at 100 foot intervals and reflect the light, the deputy-minister explained. They appear to a fast-travelling car like a continuous streak of light that outlines the road clearly and shows up any pedestrian or cyclist.

the understanding, and with all the strength, and to love his neighbor as himself, is much more than all whole burnt-offerings and sacrifices. 34. And when Jesus saw that he answered discreetly, he said unto him, Thou art not far from the kingdom of God. And no man after that durst ask him any question. The meaning here is that we should have the same solicitous regard and care for our neighbors which we have for ourselves. It is really another form of the Golden Rule. Jesus, perceiving that the scribe answered intelligently, said, "You are not far from the kingdom of God."

Paul Reaffirms It

I Cor. 8:4. Concerning therefore the eating of things sacrificed to idols, we know that no idol is anything in the world, and that there is no God but one. 5. For though there be that are called gods, whether in heaven or on earth; as there are gods many, and lords many. There is no God, no real Divine Being, but one. As in so many other places in the New Testament, Paul is not content with a negative denial, but now brings forth a positive affirmation—the gods of the heathen are non-existent, but there is a God who is God the Father, from whom all things come, and in whom, through the Lord Jesus Christ, we are.

6. Yet to us there is one God, the Father, of whom are all things, and we unto him; and one Lord, Jesus Christ, through whom are all things, and we through him. See John 1:3; Heb. 1: 2, 3; Col. 1:16; Rom. 11:36. Note the contrast between the many gods of the heathen and the one God of the Christians. The whole passage is a clear acknowledgment on the part of the apostle Paul that the Lord Jesus Christ was external in his existence. Our God is not a rival of any other gods. In him is life, and without him there is no life.

Are You Listening?

By FREDDIE TEE

FRENCH STAR JOINS UP

Jean Sablon, internationally famous singing star, is now a member of the "Hollywood Hotel" program heard over the Columbia network every Friday. (WABC-CBS, 9.00 to 10.00 p.m. EDST). Born in Paris, France, Sablon is a newcomer to these shores. His fame preceded him by many months, however, for he had become popular in the French theatre, English music halls and on American loud speakers through his international broadcasting.

Jean Sablon

"THE MIGHTY SHOW"
Agnes Moorehead, "first lady" among character actresses of the airwaves, is a Boston-born minister's daughter who made an enviable record on the legitimate stage before making her microphone debut. She will play the part of the lovable, understanding "Ma Hutchinson" in the new dramatic serial, "The Mighty Show," which began on the Columbia network.

Says Film Stars Live The Longest

Dr. Lawrence Spangard, a Hollywood hospital doctor, believes that film stars live longer than most folk.

"My study of film stars led me to believe that practically everyone who gets into the first ranks of players adds 10 years to his life," he says.

"It is nothing unusual. Stars take better care of themselves than the average person because they must be physically attractive as well as mentally alert."

"They work hard, which is good for them. When they rest they get plenty of sunshine and fresh air."

Oh, well, who wouldn't — on \$1,000 a minute, or whatever it is stars get.

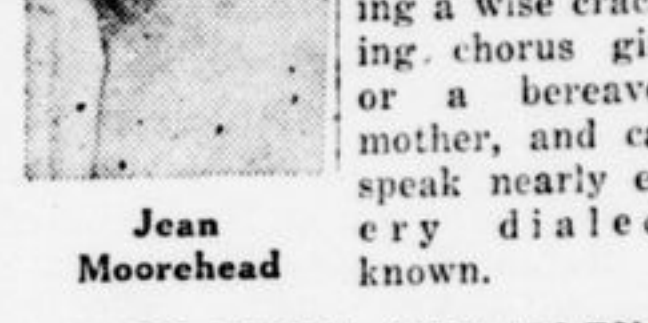

Czech Army Head

General Inspector Jan Syrový, of the Czechoslovakian army, is one of the "men of the hour" in the present critical European situation. Pictures of Czechoslovakia's army and efficient modern equipment are shown in another column.

WITH BURNS AND ALLEN

Frank Parker, youthful tenor, will act as soloist for the first three programs of the weekly Burns and Allen series which makes its bow over the Columbia network on Friday, September 20. (WABC-CBS, 8.30 to 9.00 p.m. EST.)

SPREAD-BAND DIALS
Rogers new 1939 "Super-Value" radios contribute many new features for convenience, including easier, quicker and more accurate tuning—but most important are their exclusive six individual spread-band dials.

Only one dial is visible at a time on this new Canadian radio so that there can be no question as to what band is being tuned.

Corn Should Be Cut Quite Low

Provincial Entomologist Gives Advice On How To Control Borer

Provincial Entomologist, Professor C. Caesars, O.A.C., Guelph, urges low cutting of corn this fall as a help in the control of the borer and a means of avoiding the unpleasant task of hand-picking stubble in the spring. Professor Caesars writes as follows:

"There is a large crop of corn almost all over the province this fall and as a result many persons will be tempted to cut it high. To do so would be a mistake because the borer is decidedly more abundant this year in most counties than usual and extra care will have to be taken to hold it in control. The long stubble means that several times as many borers will be left in the fields after removing the stalks as there would be if the corn had been cut low. Moreover, it is very much more difficult to plow long stubble under completely and not drag it up again in the spring when working the field; hence farmers wishing to avoid the necessity of hand-picking their fields for next winter should cut their corn as low as practicable."

Britain Views Canadian Art

Shipment Arrives at London Of 5 Tons of Paintings and Sculpture by Canadian Artists

Five tons of Canadian paintings arrived in London, England, this month, and will remain. They will be hung in a special exhibit at the Tate Gallery in London.

In the massive crates are 250 pictures by Canadian artists portraying "a century of Canadian art." The exhibit will be officially opened by the Duke of Kent at the gallery on Oct. 15th, and is the first to be shown at the famed rendezvous of London art connoisseurs.

Gleaned from galleries across Canada and private collections, the paintings are representative works of Canadian artists. Included with the exhibit of water-colours and oils are several outstanding pieces of Canadian sculpture.

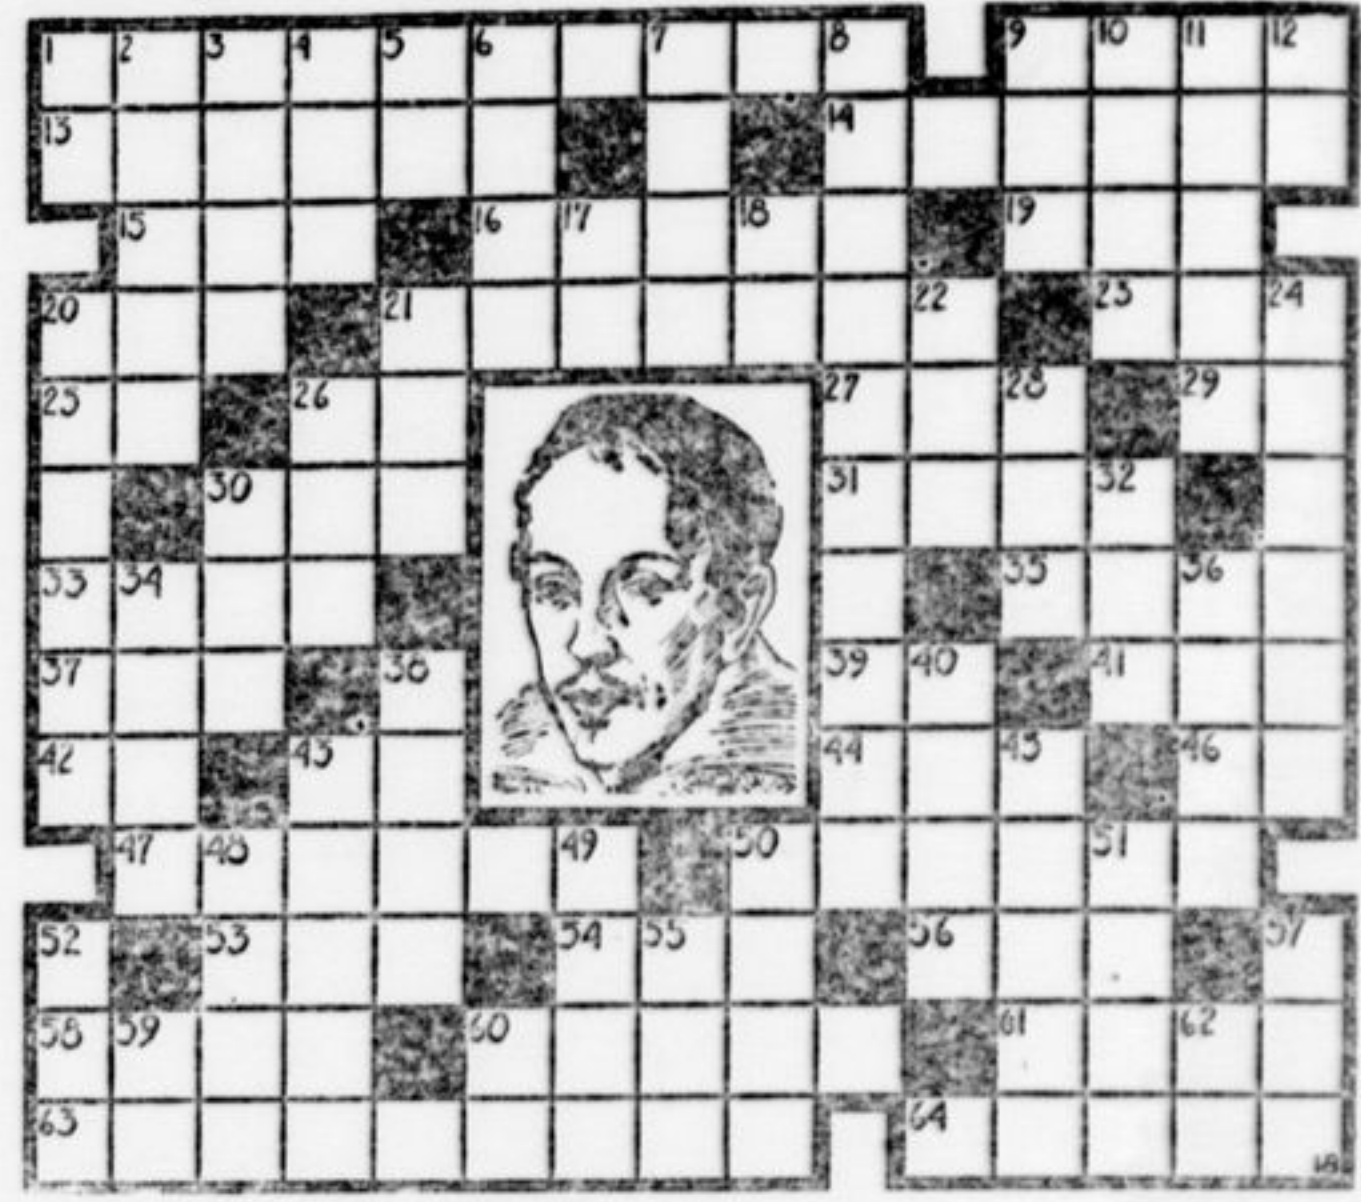

The bulk of the paintings were taken from the walls of the National

Famed Violin Maker

Answer to Previous Puzzle

HORIZONTAL
1 Violin maker of the 17th century.
9 Duration.
13 Motive.
14 Courses of travel.
15 Frost bite.
16 Fleishy root.
19 You and me.

Keeps Fruit For Many

New Chemical Preserves Fruit

Discovery of a new process by which all may be kept fresh at little cost, is the invention.

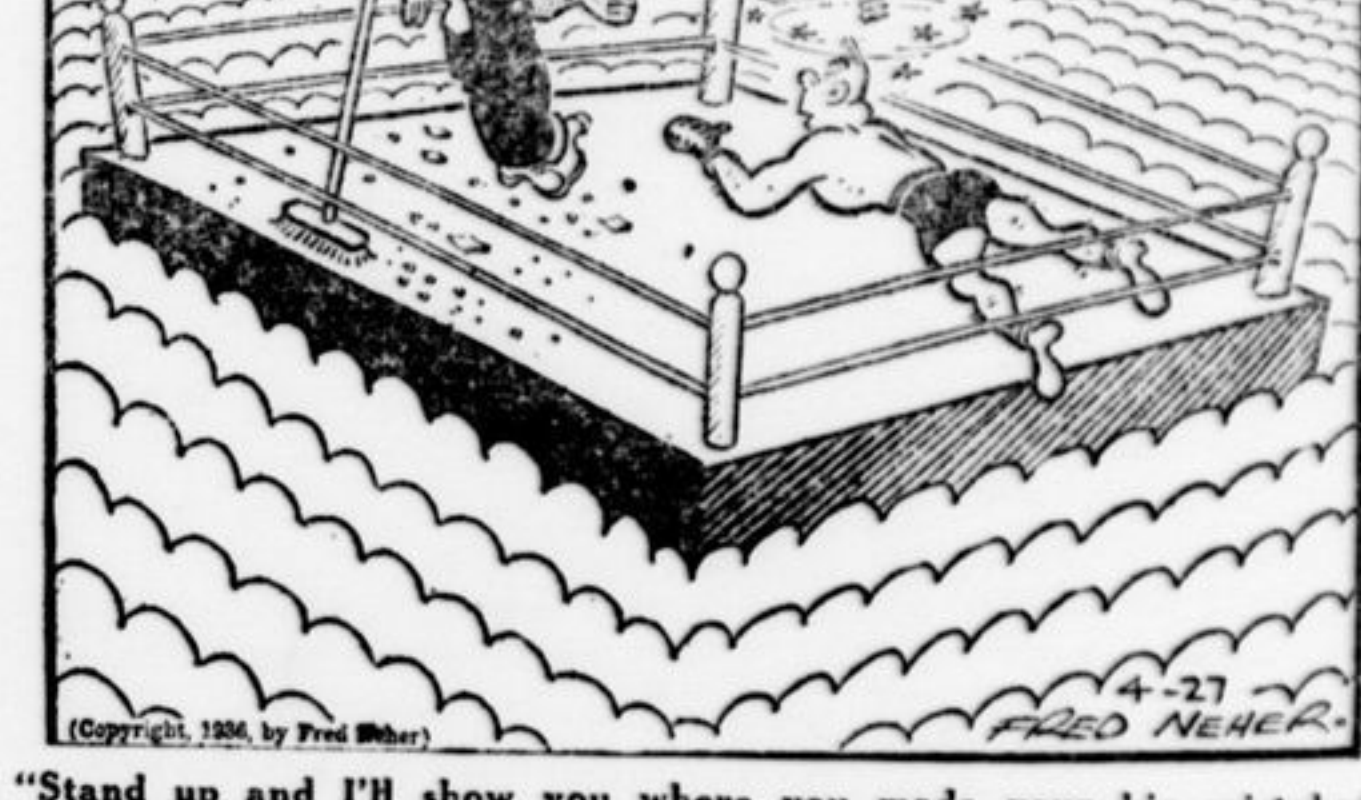

Dr. Jay, who is monitoring for Illinois, his discovery will revolutionize the fruit industry and refrigeration. The Dr. Jay's process is a compound, which is less gas, causing to come "dormant."

One-and-a-half components, which are basic, will preserve fruit for a year or more. The fruit can be used in quantities in warehouses, trains and on land, in ordinary rooms. The only gas is a pressure gas, which is a pressure gas, which is a pressure gas.

Dr. Jay's process has been made use of the chemicals are used. It could be worked out that his process.

Eggs for nine months; which will be laid; citrus fruits; without change or flavor, for months; peaches; in twelve months; peaches; tartness; and all fruit, for at least
