

## Single Jobless To Go On Farms

**Unemployed in Ontario Who Have No Homes Will Be Absorbed Into Agriculture Provincial Welfare Minister Announces**

Unemployed single men who have no homes and are unable to claim municipal relief will be absorbed on Ontario farms under provisions of the Dominion-Provincial youth training scheme, Hon. Eric Cross, provincial welfare minister, said.

**Under Youth Training Scheme**

The project will be directed by A. Maclaren, who placed more than 4,000 young men on farms under similar circumstances from 1925 to 1935 while superintendent of the Norval hostel at Glenhurst Farm at Georgetown.

**Aged 16 to 30**

Only unemployed transients now in Toronto will benefit by the plan at present, Mr. Cross said, but if the measure is successful it likely will be applied in other sections of the province. Men wanting farm employment have been ordered to register at the Toronto office of the labor department and they will be placed in order of registration.

The minister said the program would involve young men from 16 to 30 years of age and would be carried out entirely under direction of the labor department.

## Openings Seen For Engineers

**Britain Is Seeking Trained Canadians for Service in Air Research**

The British Air Ministry has advised the National Defense Department of Ottawa that there is a wide field open in Great Britain for Canadian university graduates with honor degrees in engineering or physics or with research and practical engineering training.

**Candidates Physically Fit**

The air ministry said it would be willing to consider applications for appointment for Air Ministry research at the Royal Aircraft Establishment, South Farnborough, Hants.

Candidates should be physically fit for flying and willing to fly as observers. If appointed from Canada they are required to pay their own passage to the United Kingdom and also the return passage if they are unsatisfactory.

## May Enter the Race

**MAYOR WILLIAM MORRISON** Of Hamilton, who is a likely candidate for the leadership of the Ontario Conservative Party.

## Plants At Night Steal Our Oxygen

**McGill Savants Confirm Belief Flowers Should Be Removed From Sickroom at Nightfall**

Science has justified the old practice of removing plants from a sickroom at night. The explanation comes from McGill University.

Plants breathe just as human beings do. Under daylight conditions they consume carbon dioxide so help to purify the air. The metabolism of a plant, however, is dependent upon the amount of light it receives, for it requires the energy of sunshine to convert the carbon dioxide from the air and the water which it takes up through its roots into starches.

**Stop Breathing Carbon Monoxide**

When dusk comes the plant stops "eating" and thus does not require any carbon dioxide. It continues to breathe, however, and in this breathing process it actually consumes oxygen. During the night, then, it does nothing to purify the air of carbon dioxide, while at the same time it uses oxygen which is vital to human beings.

"I am just a song-and-dance man who, though his chassis may be a little bent, can still shake a leg."

—Fred Stone

## Sunday School Lesson

**LESSON VII THE SACREDNESS OF HUMAN LIFE**  
Exodus 20: 13; Matthew 5: 21-26, 38-42

**Golden Text**  
Thou shalt not kill. Exodus 20: 13. Whosoever hateth his brother is a murderer. 1 John 3: 15.

**THE LESSON IN ITS SETTING**

**Time.** — The Ten Commandments were given 1498 B.C.; the Sermon on the Mount was preached by our Lord in the early summer of A.D. 28.

**Place.** — The Ten Commandments were given on Mount Sinai. We do not know the particular mountain from which Jesus preached this famous sermon.

13. Thou shalt not kill. The English Revised Version makes the verse to read more accurately, "Thou shalt do no murder."  
Matt. 5: 21-26. 21. We have heard that it was said to them of old time, Thou shalt not kill; and whosoever shall kill shall be in danger of the judgment: 22. But I say unto you, that every one who is angry with his brother shall be in danger of the judgment; and whosoever shall say to his brother, Raca, shall be in danger of the council; and whosoever shall say, Thou fool, shall be in danger of the hell of fire. "Raca" expresses contempt for a man's head, "You stupid!" "Fool" expresses contempt for his heart and character, "You Scoundrel!" The regular use of such opprobrious epithets Jesus regards as the supreme offense against the law of humanity.

23. If therefore thou art offering thy gift at the altar, and there rememberest that thy brother hath aught against thee, 24. leave there thy gift before the altar, and go thy way, first be reconciled to thy brother, and then come and offer thy gift. A man cannot offer hatred toward a fellow man live in sin with some other person, and ever think that he can be right with God while these things continue.

25. Agree with thine adversary quickly, while thou art with him in the way; lest haply the adversary thee to the judge, and the judge deliver thee to the officer, and thou be cast into prison. 26. Verily I say unto thee, Thou shalt by no means come out thence, till thou have paid the last farthing. Cf. Luke 12: 58. According to the Roman law the plaintiff could carry the accused with him before the judge; the defendant might settle the matter on any terms while they were on the way, but after the tribunal was reached the thing must go according to law.

The teaching of the whole passage concerns the nature of our animosity toward other men. Murder is only the final fruit of a hateful, revengeful spirit. What our Lord is getting at is not the prevention of a murder but the utter cleansing of the heart of all those passions which so easily arise in the injustices and animosities of life, as we mingle among other people, that make our hearts to be aflame with revenge, with a desire to do evil to others.

Matt. 5: 38-42. 38. Ye have heard that it was said, An eye for an eye, and a tooth for a tooth. The Old Testament teaching to which our Lord here refers is found in Ex. 21: 24; Lev. 24: 20; Deut. 19: 21. 39. But I say unto you. Resist not him that is evil; but whosoever smiteth thee on thy right cheek, turn to him the other also. This is not a fight, but simply the expression of one person's desire to shame, or insult, or anger one against whom he has a grudge. The person so struck, according to our Lord's teaching, is not to strike back, for that would mean that he has become angry, and in doing so sins. Our Lord is not condemning or forbidding the right of self-defense, either personal or national.

40. And if any man would go to law with thee, and take away thy coat, let him have thy cloak also. The idea here is that if a man, for security, or in payment of something due, should demand before the court one's inner coat, it being presumed that this was about all that the man had, instead of being revengeful or furious or rebellious about it, the man should let him have his cloak also, which here, undoubtedly, denotes the outer garment, a large, loose robe.

**Cheerful Service**

41. And whosoever shall compel thee to go one mile, go with him two. Christ's counsel is: Do not submit to the inevitable in a slavish, sullen spirit, harboring thoughts of revolt. Do the service cheerfully and more than you are asked. The counsel is far-reaching, covering the case of the Jewish people, subject to the Roman yoke, and of slaves serving hard masters.

42. Give to him that asketh thee, and from him that would

## "Suicide Car" Precedes Trains In Warring Palestine

More important than the "cow catcher" as an obstacle remover for Palestine trains is this "suicide car". Manned by a picked band of daredevils it precedes trains looking for land mines, weakened bridges and barricaded tracks. The work is extremely dangerous as mining of railroads is a favorite trick of the Arab terrorists.

## Swing Brings Thick Ankles

**Exhausted Nerves Are Also The Penalty Of Dancing To Modern Music, Osteopaths Say**

Dancing to swing music causes sluggish minds and thick ankles, warned E. A. Ward, immediate past president of the American Osteopathic Association, in an interview.

"The hysteria for swing music and the hopping, grinning dances that go with it," he warned, "will pay its adherents with thick ankles, broken maladjusted feet, and an exhausted nervous system, unless they recognize its dangers."

**And Sluggish Minds**

"The Big Apple uses many different muscles, putting them to a stress and strain for which, in most cases, they are not prepared. These dances are violent, exercise, and require as much training and as good physical condition as tennis, basketball, swimming and similar sports."

If a person wished to dance the Big Apple, Mr. Ward advised, the heart should be tested, muscles should be gradually conditioned, and regular care given to the body. He said the dances are throwbacks to the war and religious dances of primitive tribes.

## Horse Of Future More Like Mule

**Head of Ridgetown Experimental Farm Predicts It Will Be More Self-Reliant, Looking After Itself**

The livestock raising picture is changing materially, and the horse of the future will be bred for qualities of stamina and endurance now common to the mule.

**Won't Need Grooming**

This prediction was made last week to a meeting of the Windsor Lions Club by Prof. J. C. Steckley, head of the Ridgetown experimental farm. Prof. Steckley pointed out that more and more livestock, especially in Canada, is being raised for purely commercial purposes.

"The horse of the future will be the horse that can take care of itself—the horse that can get along without the grooming and attention needed now," he expert said.

Livestock, especially the horse, long has had an intimate connection with man in peace as well as war, he said.

borrow of these turn not thou away. But to give everything to everyone, the sword to the madman, the alms to the impostor, would be to act as the enemy of others and ourselves. Ours should be a higher and deeper charity, flowing from those inner springs of love.

## What Does Today's Young Man Want?

**In A Future Marriage Partner**

Specifically, what are some of the qualities the up-to-twenty-five young men are looking for in future marriage partners? Here's the answer, in Mrs. Gertrude Chambers' opinion:

"They want a healthy wife. (They know continual doctor bills wreck any budget.)"

"They want a wife who has enough personality to impress friends."

"They want her to be attractive looking. Smartness gets as much attention with today's young men as prettiness."

"They want a wife who will share their enthusiasms."

"They want a wife who can understand what they are talking about when they discuss business. (If her ideas are good, they'll even say 'Thanks' when they borrow them.)"

**"Healthy Attitude"**

"They want a wife who knows how or is capable of learning to stretch a dollar."

"They want to marry a woman who will make a go of the social side of marriage."

"Many of them from necessity want a wife who can bring home a pay check, for a while at least."

Mrs. Chambers thinks a girl should not resent such demands. For meeting them will keep the girl on her toes.

"In fact," she says, "this new attitude is a healthy one all the way around. It is better for the man, better for the girl, and a good foundation for marriage."

## High Heels, Pie, Mean Shorter Life

High heels and pie mean shorter life, says Dr. Sara Janson, of Chicago.

She believes it is possible to live 100 or 120 years, but "no one has a right to expect it if she will wear high heels, eat pie, stay up later than 10 p.m. and drink less than ten glasses of water each day. We have no right to ask for years if we are unwilling to take care of the body."

## Are You Listening?

By FREDDIE TEE

**PLAYING SAFE**

Although Richard Crooks knows by heart most of the numbers he sings on NBC's Voice of Firestone concert he invariably carries all his music to the NBC studios. He keeps such songs before him on a music rack, switching the piece just finished to the bottom of the pile.

"The more variety there is in your life, the more you have to draw upon in presenting a wide range of types on the air."—Helene Dumas of NBC's Jane Arden program.

## Conduct Rally

Bob Hawk, left, and John E. Kennedy, widely known news commentator and writer, conduct the new "People's Rally," 8:30 to 9 p.m., EST, Sundays, over WLW and the Mutual Broadcasting System. Listeners are asked to express opinions on current problems as well as the studio audience.

**WANT TO JOIN RIPLEY**

Since Robert Ripley announced on his NBC program that he would leave soon on a tour of the world to continue his search for more "Believe-It-Or-Not" facts he has received nearly 5,000 letters from men in all walks of life asking to be taken along. Dentists, lawyers, physicians and men in other professions have offered to wash clothes, scrub decks or act as chef or secretary in return for the privilege of accompanying Mr. Ripley on his forthcoming venture. Oddest request came from a Trenton, New Jersey, man who asked to be taken along in order that he might win the hand of his girl friend.

**THANKS, MR. WELLS**

Radio listeners are indebted to Mr. H. G. Wells for the "thriller," as produced by Columbia Broadcasting System on Sunday night, recently. It's a good thing those comets and planets were falling on Princeton, New Jersey, instead of Callendar, Ontario—then we would really have had something to worry about in Canada.

**THIS THING CALLED "SPREAD-BAND"**

The 1929 DeForest Crosley "Music Master" DeLuxe Radios have the new "Spread-Band" dials which simply short-wave and particularly foreign-station tuning as the different "channels" have been spread out so that at least 10 times as much space on the dial, is devoted to each band (or channel). It makes foreign reception now a reality—sure and certain.

## Tuberculosis Eradication

Should the present rate of decrease be maintained, Britain should be entirely rid of tuberculosis by 1960, Sir Edward Mellanby, secretary of the British Medical Research Council, told the Canadian Club at Montreal last week.

In the last 80 years, he said, the tuberculosis death rate in Britain had dropped from 3,500 per 1,000,000 of population to 700.

Scarlet fever had dropped from 700 to a mere 57 per 1,000,000 in the last 50 years, and in the same period typhoid had declined from 320 to four and infant mortality from 150 per 1,000 to 57 per 1,000.

## Hunt Moose With Arrows

Armed with six-foot bows and steel-tipped twenty-eight-inch arrows, Arnold Wyttenbach, Jack Austin and Phil Saueve, of Toronto, accompanied Chuck Austin, prominent Ontario airman, on a moose-hunting expedition into the woods west of Gozama this month.

They used bows which were made of hickory, lemon-wood and Texas osage orange-wood. The twenty-eight-inch arrows they used were made from B.C. fir.

## LIFE'S LIKE THAT

By Fred Neher

"Henry's going to teach the birds to use that both if it's the last thing he does!"
