

Shorter Hair Coming Back

Forecast of Styles For Spring: It'll Be Much Shorter Than The Coiffures We've Been Wearing.

NEW YORK.—You will be interested in the spring forecast of hair styles, and while it may be somewhat confusing there is always the privilege of being individual.

First you will find the smartest Fifth Avenue shops as well as the advanced European styles call for shorter hair. Much shorter than we have been wearing. It will be definitely off the neck and some of the newer coiffures will be flat and without waves, and the style that predominates is the rather large flat ringlets all around the head.

Flat And With Few Waves.

While some of the numbers wore the hair back from the forehead, there is a tendency to a slight dip or curl down over the left side or in the centre.

We will repeat: there seems to be a definite urge to cut the hair quite short.

From Hollywood we hear the new bulletins are all advising the girls to let the hair grow, as the longer and more romantic hair-dos are on the way in.

The glamour girls of Hollywood have never worn short hair. They all have curls about the shoulders.

HEARTS TO SPARE

Ann Rutherford isn't going to be caught short-handed on St. Valentine's Day. Miss Rutherford finds her "Garden of Hearts" such a useful treasure that she personally does the gardening work herself.

T.C.A. Starting Passenger Line

Air Service Between Toronto, Montreal and Vancouver Opens April 1

Trans-Canada Air Lines will start a passenger service between Montreal, Toronto and Vancouver April 1, Transport Minister C. D. Howe announced last week.

The air line hoped to extend passenger service to the Maritime Provinces before the end of the year, the transport minister said. Services from Toronto to Detroit and Toronto to Buffalo are also under contemplation, and it is hoped they would be put into operation during 1939.

Steps To Ensure Safety.

Air service would tend to bring all sections of the country closer together, and he thought it would "go a long way" toward cementing better feeling among people of those sections. He emphasized every precaution would be taken to ensure the safety of passengers in T.C.A. planes.

Canadian Cow Top Producer Of Butterfat

16-Year-Old Ayrshire Owned By Macdonald College Is World's Champion

Macdonald Dorothy, a 16-year-old Ayrshire cow owned by Macdonald College of Ste. Anne de Bellevue, Que., has been proclaimed world's champion Ayrshire butterfat producer, the Canadian Ayrshire Breeders' Association announced last week.

Record Lifetime Production.

Starting her present and 10th lactation period last June 15, Macdonald Dorothy in the subsequent 216 days produced 11,522.9 pounds milk, 551.49 pounds butterfat. Added to her previous production figures her total production is 7,003.49 pounds of butterfat from 165,633.9 pounds of milk in 3,480 milking days, a record lifetime production.

Ardgowan Valda, of the Glen Campbell farms of Dundas, Ont., is world's Ayrshire champion in one lactation, giving Canada two champion Ayrshire producers.

Sunday School Lesson

LESSON VIII BEVERAGE ALCOHOL AND ITS SOCIAL PERILS (A Social Aspect of the Liqueur Problem)

Amos 6:1-6; I Peter 2:11, 12; 4:1-5.

Golden Text.—It is good not to eat flesh, nor to drink wine, nor to do anything whereby thy brother stumbleth. Rom. 14:21.

THE LESSON IN ITS SETTING.

Time. — Amos prophesied between 811 and 784 B.C.

Amos was a shepherd and fruit farmer of Tekoa, a small village six miles south of Bethlehem. Amos was sent to denounce Israel's wickedness, and he went directly to Bethel, which was the chief center of Israel's idolatrous practices. He preached that God was a just and righteous God, who would punish the sins of every nation and individual in his good time, a fact that finds small recognition in modern statecraft and the average life.

1. Woe to them that are at ease in Zion. And to them that are secure in the mountain of Samaria, the notable men of the chief of the nations, to whom the house of Israel come!

2. Pass ye unto Calneh, and see. And from thence go ye to Hamath the great. Then go down to Gath of the Philistines. Are they better than these kingdoms? or is their border greater than your border?

If cities until recently so flourishing, so far from being now "Bethel" or more prosperous than Israel and Judah, have been overtaken by disaster, let Israel take warning betimes, and not rely too implicitly that its present good fortune will continue to attend it.

Fallen Greatness.

3. Ye that put far away the evil day. These people did not want to think of a time coming when their sins would be punished, though down deep in their hearts they knew such a day must ultimately arrive. And cause the seat of violence to come near.

4. That lie upon beds of ivory. Amos now proceeds to enumerate some of the vices which every one knew so tragically flourished in Israel, flourished even though she had the law in her hands and sacrificed daily to the God of holiness. And stretch themselves upon their couches. The custom of reclining at the table is first mentioned here. And eat the lamb out of the flock. This form of meat would no doubt be a special delicacy with the Israelites. And the calves out of the midst of the stall. The place where they were tied up to be fatted; they were stall-fed. 5. That sing idle songs to the sound of the viol. That invent for themselves instruments of music, like David.

6. That drink wine in bowls. And anoint themselves with the chief oils, i.e., oils of the best kind. As a rule, fresh olive oil was used for anointing the bodies. But they are not grieved for the affliction of Joseph. They were not sick at heart, as noble and generous natures would have been at the misery that awaits their country. Put Amos into modern English, and he is denouncing the heartlessness of wealth, refinement, art, and culture, which has no ear for the complaining of the poor, and no eyes to see either the sorrows or sins around it, or the lowering cloud that is ready to burst in tempest.

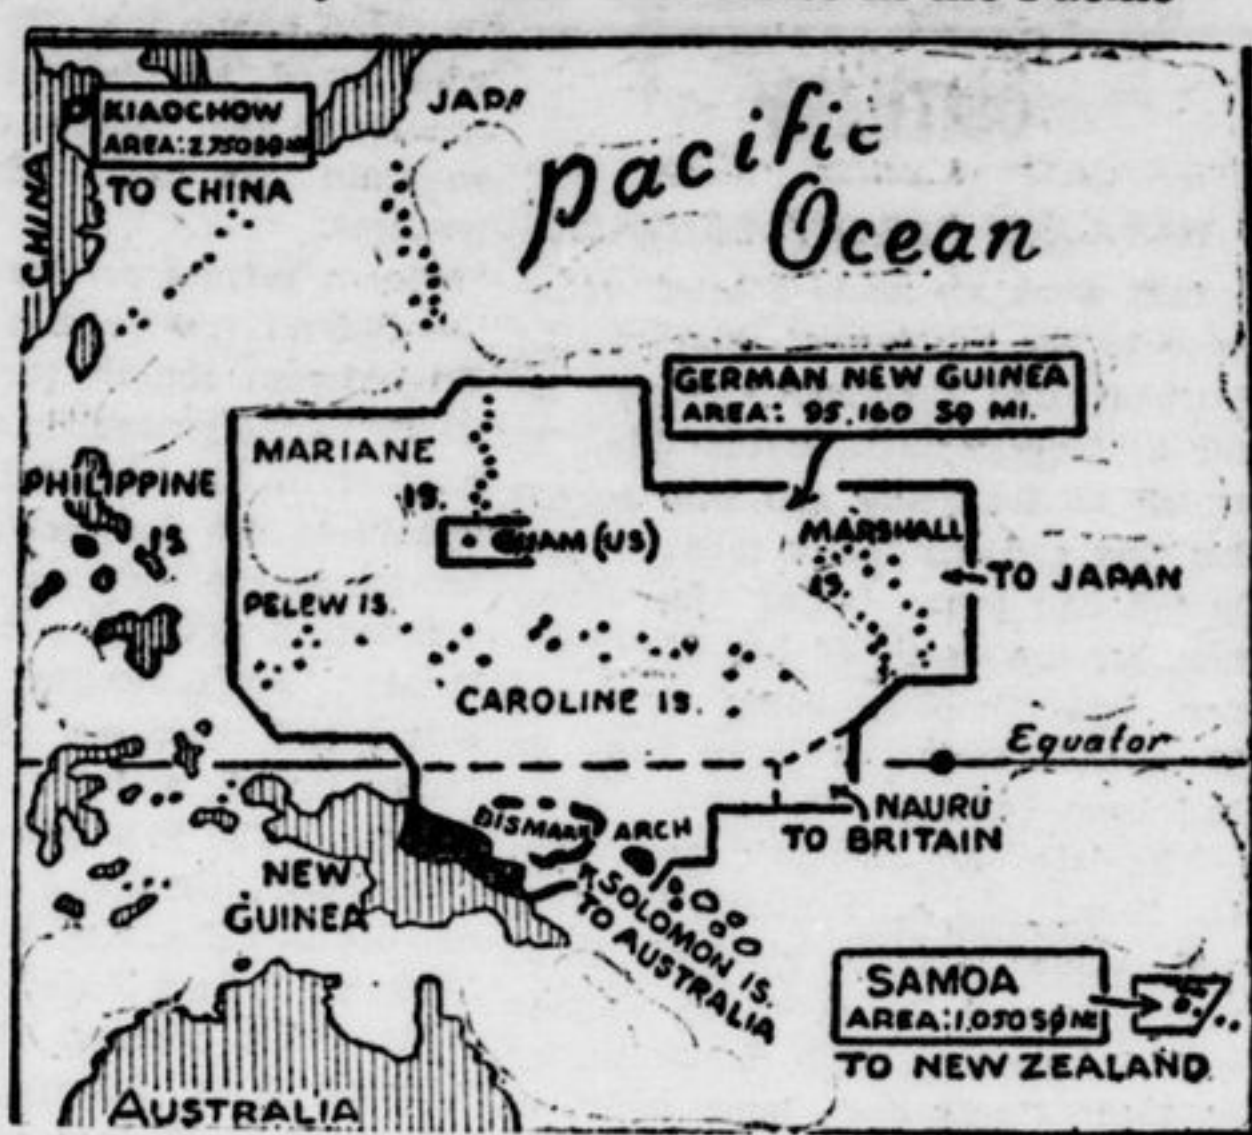

Reason for Abstinence.

Four reasons for abstaining from fleshy sins, I Peter 2:11, 12; 4:1. 11. Beloved, I beseech you as sojourners and pilgrims. To abstain from fleshy lusts. Travelers in a strange land, yet more in the land of enemies, do not care commonly to adopt all its customs. They retain their nationality. The phrase "fleshy lusts" takes in all desires that originate in man's nature, as well as those directly connected with the appetites of the body. Lust is appetite run wild. There is no harm in any natural appetite considered in itself. Which war against the soul. The soul here stands as the entire spiritual nature of man.

12. Having your behavior seemingly among the Gentiles; that, wherein they speak against you as evil-doers. Even in the earliest days of the Christian church followers of Christ were often accused of the foulest crimes with great injustice and without a shred of evidence. They may be your good works, which they behold, glorify God in the day of visitation.

I Peter 4:1. Forasmuch then as Christ suffered in the flesh, arm ye yourselves also with the same mind; for he that hath suffered in the flesh hath ceased from sin. Seek ye first the kingdom of God and his righteousness. That was the mind of the Master. He sought his gratifications in the eternal. The flesh may have its desires; but the cleansed heart will refuse to yield to them.

Germany's Former Territories In the Pacific

World-wide attention being focussed on Hitler's demand for Germany's "lost" colonies, we take a look at a map of the Pacific. Here pre-war Germany held German New Guinea, the Bismarck and Solomon Islands, West Samoa, Nauru and scattered islands of the Marshall, Caroline and Mariana groups. Of these Nauru was the most important. It contains a mine of high-grade phosphate which has been developed under mandate.

Great Wealth Of Copper, Iron, Tin

Is To Be Found In The North West Territories — Province of Alberta Wishes to Extend Northward.

Iron, copper and some tin have been found in commercial quantities in the region of Great Bear Lake, Hon. W. A. Fallow, Alberta Minister of Public Works, announced last week at the Alberta Social Credit League annual convention.

Mr. Fallow made the announcement after a discussion of efforts by Premier Aberhart to have Alberta's northern boundary extended northward to the Arctic ocean. Securing of the area and their minerals would bring Alberta everything necessary for establishment of metal industries, he said.

Extension of Alberta's boundaries to include these new sources of great wealth is reasonable because the outlets from these mining areas lie through Alberta—either by way of Athabaska route to Edmonton, or, eventually, by the Hay river route through Peace River and Grande Prairie.

Home Scarcity Growing Acute

There's a Housing Shortage In Canada of Between 100,000 to 200,000 Dwellings, Says Architect.

With Canada at the bottom of the list in construction in comparison with six other countries and an acute housing shortage of between 100,000 and 200,000 homes existing, there are unlimited possibilities for a return to prosperity by accelerating construction, C. A. Fowler, prominent architect of Halifax, N.S., declared last week.

Referring to Canada's status in construction work in comparison with other countries, he cited figures prepared by the League of

I Peter 4:2, 3. 2. That ye no longer should live the rest of your time in the flesh to the lusts of men, but to the will of God. The more continually we submit to the will of God, the less powerful will be the fascination of the things of the flesh.

3. For the time past may suffice to have wrought the desire of the Gentiles. He pleads here with his readers to recognize the fact that they have wasted enough of their lives in fleshy indulgences. And to have walked in lasciviousness, lusts, winebibbings, Revellings. And abominable idolatries.

4. Wherein they think it strange that ye run not with them into the same excess of riot, speaking evil of you. Every Christian who is really striving to live a godly life has experienced the laughter and ridicule and mockery of the ungodly world.

5. Who shall give account to him that is ready to judge the living and the dead.

Nations in 1937, based on an index of 100 as of 1929, showing Canada's comparative position in housing thus: South Africa, 279, Great Britain 157, Australia 88, New Zealand 84, United States 66, France 46, Canada 38.

"While South Africa was building 279 homes in 1937 to 100 in 1929, Canada in 1933 was building 38 homes to 100 in 1929," he continued. "There are unlimited possibilities for prosperity wrapped up in the construction of between 100,000 and 200,000 homes across Canada. Taking the average cost of a home at \$4,000 and the minimum figure at 100,000 houses, we would have an expenditure to balance our economic necessities of \$400,000,000," he said.

Gossips Will Be Thrown Into Jail

Bored will be eliminated from Papua, New Guinea, if the natives can carry out their plans. They want to do it legally if possible, but "natives are not infrequently done to death by a maddened listener because they talk too much," declares the Lieutenant-Governor of Papua, in his annual report.

The village councillors at Abau have proposed a new law providing that "if two or more women are found gossiping together they shall be arrested and put in jail for two months." They said that the existing law against spreading lying reports was not enough because it punished after the "bad talk" had done damage, instead of before.

Sawfly Threat Is Controlled

There Is Hope of Saving Canada's Spruce Forests From The Menace Of Its Destruction.

A reasonable hope now appears of saving the spruce forests from destruction by the European spruce sawfly, the woodlands section of the Canadian Pulp and Paper Association was told at its convention in Montreal last week.

Since it was first discovered in 1930 the insect has damaged thousands of square miles of spruce forest in Eastern Canada each year.

Parasites to Combat It.

"The only hope of a permanent check to the outbreak still seems to lie in the establishment of effective parasites," said R. E. Blatch of the Dominion Entomological Laboratory at Fredericton. Several parasites have shown ability to combat the sawfly but study must be made for several years before reliable information is gained of their ability, he said.

"The situation is much more encouraging than it was two years ago," said A. B. Baird of the Dominion parasite laboratory at Belleville, Ont., who told of parasite work done in Canada, Britain, United States and Europe. "With the continued co-operation of all interested parties there appears to be reasonable hope of saving the spruce forest from destruction by this insect."

Get First Sight Of Civilization In Fifty Years

Next Summer For The First Time In Half a Century Quebec Nuns Will See The Outside World.

Cloistered, some of them, for half-a-century, nuns of the Roman Catholic Church's Ursuline and Augustinian orders in Quebec City will see a new and altered world next August when they participate in tercentenary celebrations of North America's oldest hospital — Hotel Dieu, Quebec.

Kept within convent confines by their own vows, the nuns will receive a special dispensation for the ancient institution's anniversary, to be observed from Aug. 27 to Sept. 3.

For Oldest Hospital's Anniversary

In their first public appearance since they took the veil, the sober-garbed sisters will form a procession and walk through Quebec's narrow, winding streets to re-

Are You Listening?

WHY DOES A CHICKEN—?

Six hundred variations of the old chicken gag lurk in the extensive repertoire of Al Bernard, one of the few remaining minstrels, who is heard with his merry men in the Columbia network every Friday afternoon. (WABCCBS, 4:45 to 5:00 p.m., EST). Steeped in the traditions of his birthplace, New Orleans, Bernard has written more than 350 songs in the minstrel vein and unearthed many original folk tunes from their sources. His outstanding success was the recording of "St. Louis Blues" in 1919, with more than 20,000,000 copies of the disc sold since his first rendition.

IF AT FIRST

If you cherish the job of being a radio actor, don't let the first setback throw you. Karl Swenson, who plays the title role in the popular Lorenzo Jones series on NBC, gave his first radio audition in 1929

FRANCHOT TONE

Franchot Tone, the popular movie and stage star who currently is appearing in the Broadway production, "The Gentle People" was a guest star of the Kate Smith Variety Hour over the Columbia network on Thursday, February 9 (WABCCBS, 8:00 to 9:00 p.m., E.S.T.) With Sylvia Sydney and Elias Kazan who also are members of the cast of "The Gentle People" he did an excerpt from that play.

NEW MOTOROLA

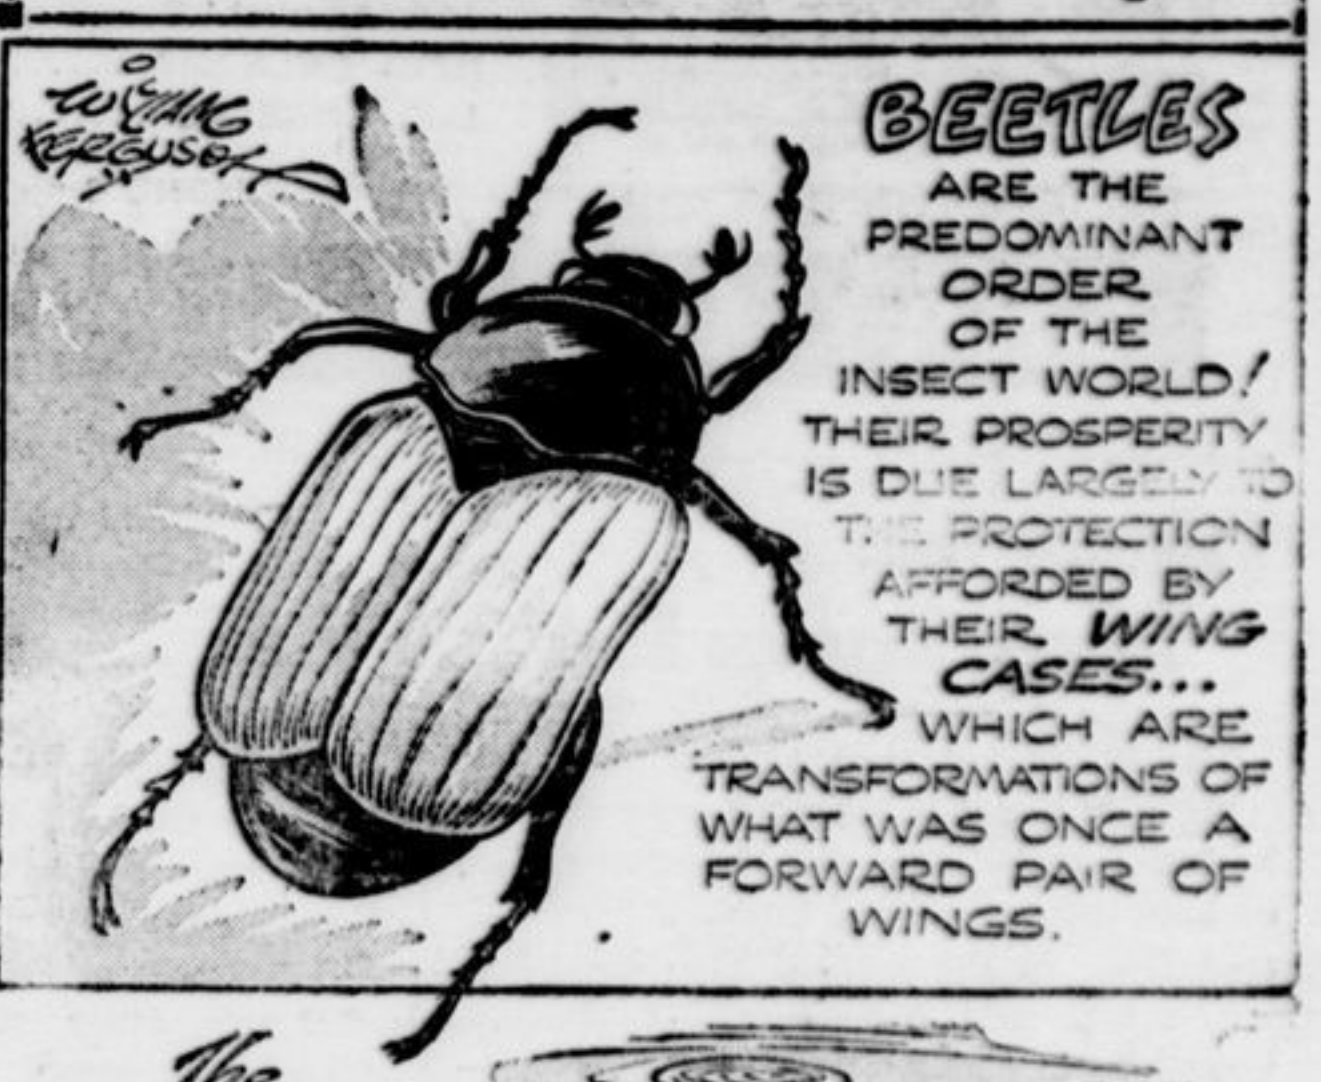

Rogers Majestic are announcing an assortment of six new Motorola auto radio models, at sensational low prices for 1939. Four of these models are automatic push-button tuning and a special "Boost-o-matic" Aerial which boosts reception 15 times stronger in dead points. These will be on display shortly at all Majestic, DeForest Crosley and Rogers dealers.

ligious services in big Quebec basilica. The Ursulines will start their procession from their convent in the heart of Old Quebec and the Augustinians from Hotel Dieu, which they administer.

Natives of this ancient city, many of the nuns will view scenes vastly transformed during their years behind convent walls, where no contact with the outside world is permitted.

Should you only need the white of an egg, instead of breaking the shell as usual, make a hole with a large needle in one end and drain away the white through that. Then cover the hole with a tiny piece of gummed paper or close it by just smearing a little of the white over it, and the yolk will keep fresh until wanted.

THIS CURIOUS WORLD By William Ferguson

The DUCKWEED.

SMALL PLANT WHICH MAKES UP THE GREEN CRUST OFTEN SEEN ON POOLS, SINKS TO THE BOTTOM IN AUTUMN, AND RISES TO THE SURFACE AGAIN THE FOLLOWING SPRING.

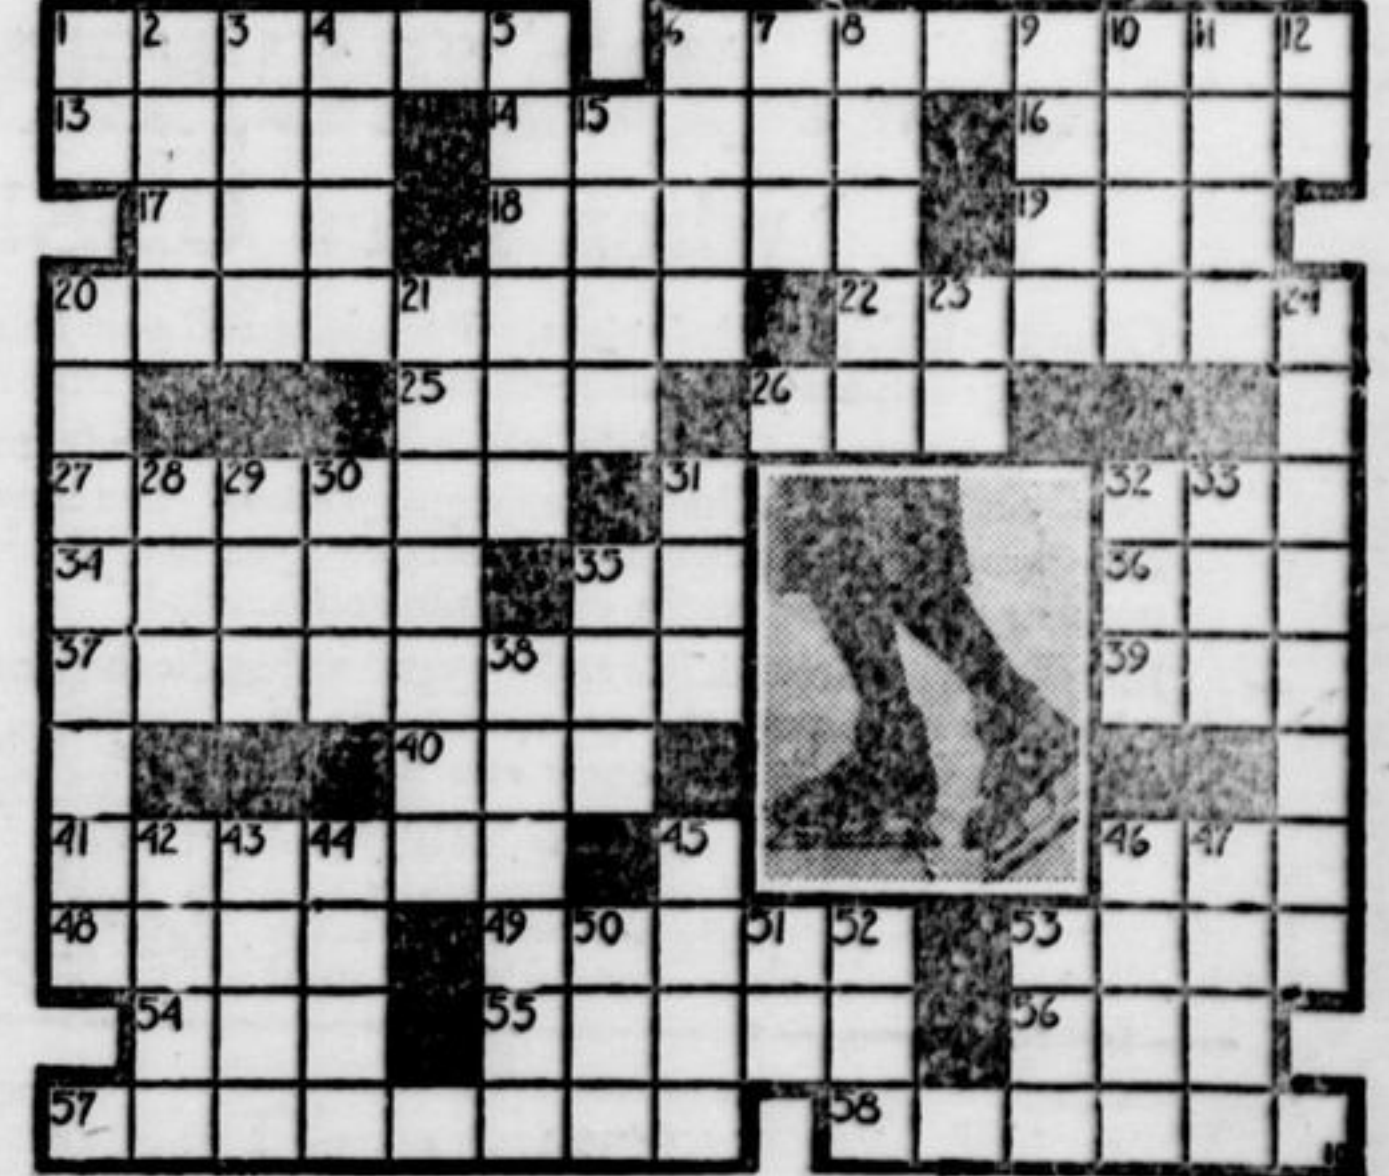

The AIR.

GETS BUT LITTLE OF ITS WARMTH DIRECTLY FROM THE SUN! MOST OF IT COMES FROM THE EARTH'S SURFACE, WHICH IS WARMED BY THE SUN'S RAYS.

THE atmosphere is too transparent to catch much of the sun's warmth. Most of the sun's heat passes through to the earth's surface, where it is reflected back to warm the air.
