

Week-end Jaunts To Pole Foreseen

Airplanes Carrying 100 Holiday Makers Are Engineering Realities, Aeronautics Expert Says

Airplanes capable of carrying 100 passengers on special week-end cruises to the North Pole and seven-day trips around the world were engineering realities, said Ignor I. Sikorsky, noted aeronautical engineer, in Toronto last month.

Speaking before the Affiliated Engineering and Allied Societies in Ontario, the designer of many successful types of airplanes said plans had been completed for 100-ton "clipper" ships and manufacturers could guarantee their performance.

Larger Planes Successful

He told the meeting it had been discovered larger airplanes gained efficiency rather than lost it because of size. He said large flying boats were the most successful and most effective planes of today.

These machines would travel between Quebec and England in 14 to 16 hours, providing the same passenger comforts as modern ocean liners, he said.

Flew To Toronto For Lunch

Raymond Massey, distinguished Canadian actor who is making such a hit on the New York stage as Abe Lincoln in "Abe Lincoln in Illinois" flew to Toronto today to be present at the luncheon in Hart House given for Their Majesties.

Trade Secrets Of Auctioneer

The Technique Doesn't Come Naturally, Veteran of the Sales Block Declares; Auctioneers Made—Not Born

If you have an idea auctioneering technique, including the sing-song comes naturally, listen to Fred Reppert.

"Auctioneers," Reppert said sternly, "are made—not born."

How Do They Do It?

A veteran at the block who has seen auctioneers come and go for years, he operates a school for this specialized type of work.

Reppert revealed several trade secrets. He said auctioneers use a sing-song chant merely to make life more pleasant for buyers who must stand in front of them all day long.

Low Tone Of Voice

"They use a low tone of voice making it as musical and pleasing to the ears as possible, and cut out every unnecessary movement of the lips to gain speed," he said.

Not all auctioneers use the sing-song technique.

In real estate sales, he said, an auctioneer talks slower and in a normal tone of voice, inasmuch as he has only one article to sell and all day to do it.

Registered livestock is also sold slower to permit the auctioneer to build up each animal's show records, pedigree, merits and production.

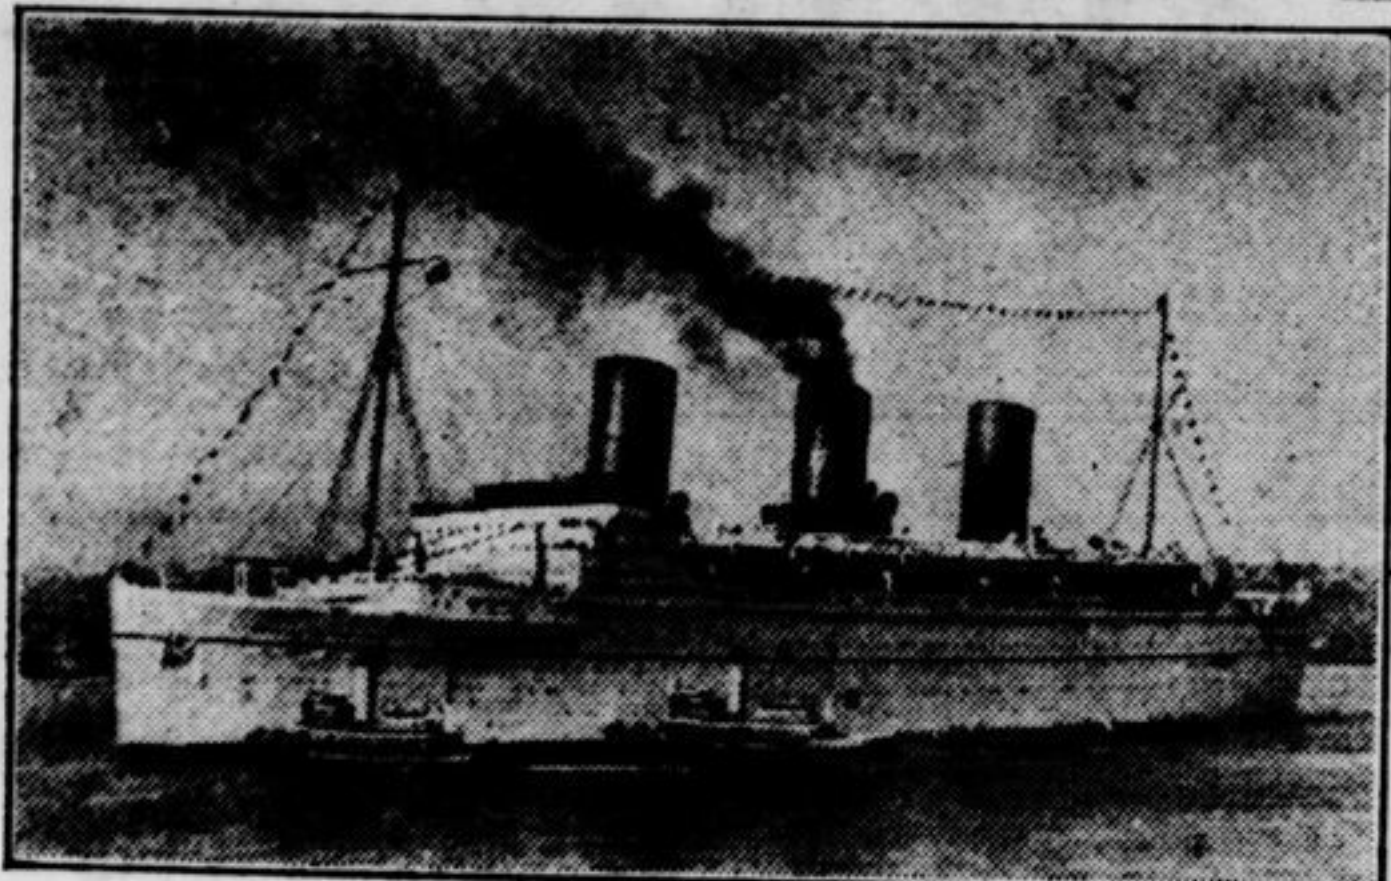

Professor M. Urbain has returned to the Vincennes (France), zoo with three gorillas, eight chimpanzees, 80 monkeys, 12 ostriches, two eagles and many other wild animals which he gathered in Equatorial Africa.

Canada, Home Of Lost French Arts

France is re-discovering herself in Canada, said Juliette Gaultier de la Verendrye, authority on French-Canadian, Frencho and Indian arts and handicrafts, who arrived in the Dominion last week.

The France of today has lost much of her old folk songs, lore and handicrafts, but is finding them in French-Canada exactly as they existed 300 years ago, she said. France was even looking to Canada to hear the "purest French language in the world."

This Ship Will Take The King and Queen Home

The "Empress of Britain," handsome C.P.R. steamship, is calling for King George and Queen Elizabeth at Halifax, June 15, to carry them back home to England.

Modern Etiquette

BY ROBERTA LEE

- 1.—Isn't patience a virtue that everyone should do his best to acquire, in order to get the most out of life?
- 2.—If a woman's stationery is engraved, Mrs. Arthur Davis, and she signs a letter Elhel Davis, is it necessary for her to write (Mrs. Arthur) in parentheses?
- 3.—What would be a good toast to give at a birthday party?
- 4.—When people persist in talking at the theatre, is it permissible to ask them to stop?
- 5.—Is there any difference between the one should eat soup and bouillon?
- 6.—What kind of gifts does the tenth wedding anniversary call for?

Answers

1.—Yes. "He who has most patience best enjoys the world," says an old proverb. 2.—No. 3.—"May you live to be a hundred—and, after that, make up your own mind." 4.—Yes, but do so as quietly and pleasantly as possible. If they resent the request or ignore it, speak to the usher. Only the most rude and ill-bred people are guilty of this. 5.—Yes; a person eats soup, but drinks anything in bouillon or consommé cups. 6.—This is the tin anniversary.

Farm Forum

Conducted by Professor Henry G. Bell of the Ontario Agricultural College, Guelph, with the cooperation of the staff of the O.A.C.

Q.—I have not been sowing any commercial fertilizer with grain and while I am getting crops the equal of any of my friends who do, I feel that could I obtain a fertilizer that would stiffen straw it would be of advantage. While grain does not lodge badly, I think a small amount of fertilizer of the nature to stiffen straw would improve sample and perhaps the yield. I recognize the fact that 125 lbs. per acre of the usual fertilizer would stiffen the straw as desired but would not increase yield sufficiently to offset the cost. Twenty-five lbs. per acre of the proper ingredient should, I think, do the trick. I would like your opinion and as to best available information re this matter.—W.M.H., Wellington County.

A.—The elements that have to do with strength of straw appear to be Calcium and Potash, hence it is that we find a judicious amount of Phosphated Potash Fertilizer usually results in giving a stronger straw with an earlier and more even crop than where no fertilizer had been applied. The Superphosphate contains a considerable

SHE WAS A VICTIM OF HEADACHES

Kruschen Got at the Cause

This woman's headaches were of the gripping kind that reduce the sufferer to something like helplessness. She tried tablets. She tried pills. All without avail. Only Kruschen could help her. "I used to get very bad headaches," she writes. "No tablets or pills of any kind could relieve them. One morning, casually, I tried Kruschen Salts in a glass of hot water. I continued taking it, but I have not had one of those awful headaches since. Kruschen salts me better than anything else. I find it very good."—(Mrs.) L. A.W.

Headaches can nearly always be traced to sluggishness of the kidneys, liver and intestines, and to the unsuspected retention in the system of stagnating waste material which poisons the blood. The numerous salts in Kruschen stimulate the internal organs to healthy, regular action so that no clogging waste is allowed to collect. Your inside is kept clean and serene. And that is just how Kruschen Salts brings quick and lasting relief from headaches.

Lesser quantities of course, will give you results.

Q.—Could you give me any information in regard to sowing salt on land. I am dealing in salt this spring and quite a few farmers bought salt to put on land. Others are inquiring about it. I have had no experience with it whatever. If you can tell me how to sow and what it is supposed to do, I would have something to show.—A.B., Oxford County.

A.—In answer to yours of the 19th, I would say that we do not advise the use of Salt as an application to the soil. Salt does not supply any plant food whatsoever. All it does is to liberate a certain amount of Potash, hence the continuous use of Salt simply means the impoverishment of soil. Some farmers have used it on mangels with some results, but there is no logical reason for its use, and we do not advise it.

Ceremony With Bread, Cheese

Started in the days of the reign of Queen Victoria, the traditional bread and cheese ceremony on the Six Nations Reservation was observed May 24.

Seven hundred loaves of bread and 700 lbs. of cheese were purchased for the occasion and the residents of the reservation were served from long tables in the Community Hall of Ohsweken. Each received a slice of bread and a liberal helping of cheese.

What Science is Doing

HALTS NEAR-SIGHTEDNESS

It has been discovered that myopia, or progressive near-sightedness, which has inflicted blindness or thick-lensed glasses on thousands, may be checked by the use of adrenalin.

The treatment is simple. It involves only the use of adrenalin eye drops over a period of months, and it may be done at home.

INSANITY NOT INHERITED

New proof that insanity is not inheritable was announced last week before the American Psychiatric Association.

An intensive study of 330 inmates of state asylums and of their parents, brothers and sisters, and other relatives has failed completely to show that the diseases followed any pattern of inheritance such as the patterns which hold true for physical characteristics.

TO SAVE LAND FERTILITY

The Royal Society of Canada, was told last week at Montreal, that a large-seeded, drought-resistant plant will be produced shortly for Western Canada, designed to aid in maintaining fertility in dangerous dust areas.

Scouts of Two Nations Unite In Celebration

Taking part in celebrations to commemorate the King's birthday, Canadian Boy Scouts are shown crossing the International Bridge at Alexandria, N.Y., to plant a George Washington black walnut tree and a Canadian maple tree on American soil. A large group of American Scouts did the same on Canadian soil.

Have You Heard?

And so it happened, while his eyes were filling with woe and sadness His little tail went wagging on Because of previous gladness.

Black Is Supreme Again For Autumn

Browns Next in Importance "Rembrandt" Greys For Evening

PARIS—The midseason showings indicate that black is again supreme for fall. The browns are next in importance; they are largely in the reddish range, running from very dark tones to rosy fawns. Auburns and tawny shades are continued. Beige looks seasonable when trimmed with heavier "Rembrandt" greys are stunning for evening. This designer's dark bottle, myrtle or moss greens are also interesting. Numerous Autumn-leaf, grape and plum tones are presented.

Pinks for Summer

Pinks are introduced by many houses for summer afternoons and fall evenings. Chanel, Balenciaga, and other designers endorse Mainbocher's vivid yellowish aviary-pink gamut as a welcome change to the overworked sycamen tones. Longs, salmon, peach and banana tones fall into the same color trend. Many bright reds are shown; they avoid the purplish cast.

The PERFECT Chewing Tobacco

A breeding program to produce this perennial plant through combining favorable characteristics of wheats and wheat grasses is being carried out by the Dominion experimental farms and the National Research Council.

Four-Day Tour Of U. S. Packed

Every Minute of Royal Visit Across the Border Is Taken Up

Not a spare minute is left for Britain's King and Queen on the detailed program of their visit to the United States.

And the minutes have been so carefully allotted that, to meet their engagements, the King and Queen will have to keep exactly to schedule from the time they cross the border at 10.35 p.m., E.D. T. June 7, until they leave Hyde Park, N.Y., at midnight, June 11, to return to Canada.

The King and Queen arrive in Washington at noon Thursday, June 8 and into a stay of two days and one night there will compress:

Sojourn in Washington: the greeting at Union Station by President and Mrs. Roosevelt and an official reception committee; a luncheon at the White House; sightseeing in Washington; a garden party at the British Embassy; a state dinner at the White House, followed by a reception and musicale; a reception at the British Embassy for members of the British colony; a visit to the Capitol; a visit to the Washington Navy Yard; a trip to Mt. Vernon aboard the Presidential yacht Potomac to lay a wreath at Washington's tomb; a visit to the Civilian Conservation Corps Camp at Fort Hunt, Va.; laying a wreath on the tomb of the Unknown Soldier, Arlington, Va.; tea at the White House; and dinner at the British Embassy for the President and Mrs. Roosevelt.

From here they will go by train to Red Bank, N.J., then by automobile to Ft. Hancock, Sandy Hook, where they will embark on a destroyer and proceed with naval escort up the bay to the Bat-

tery, New York City. Governor Lehman and Mayor LaGuardia will welcome them.

Afterwards they will drive through New York City to the World's Fair where they will have luncheon and visit the Canadian, Irish and British Pavilions. Later in the afternoon they are to visit Columbia University and then drive to Hyde Park, arriving at 7.15 p.m.

They will spend the night and the next day, Sunday, at Hyde Park and leave at midnight by train for Canada, crossing the border during the night.

Seal Of Power

If the Crown were to leave Great Britain this year it would be for the first time in history. But the Great Seal must stay behind, as without it the machinery of government would, at least theoretically, be unable to function.

In the days when kings couldn't read or write it was indeed as indispensable. But gradually, as the keepers of the Great Seal became too powerful, and the experiments of the Privy Seal and the Sign Manual also put a single power into the hands of too much servant of the Crown, the office became split up so that now there are several Secretaries of State.

Germany's supply of free labor is practically exhausted.

RIGHT THIS VERY MINUTE How Do You Feel?

Tired? Irritable? No ambition? Look at your watch! Note the time. The same time tomorrow, compare how you feel then with how you do right now! In the meantime, stop at your drug store and, tonight, drink a cup of Garfield Tea.

Tonight — "Clean Up Inside" — Feel Different Tomorrow! Lose that let-down feeling. Let Garfield Tea clean away undigested wastes — intestinal "left-overs." Acts gently, promptly, thoroughly. Drink like ordinary tea. 10c. — 25c.

Different Tomorrow! Write for Free Sample of Garfield Headache Powder — also Garfield Tea, used for constipation and indigestion, and to keep clean inside." Write: Garfield Tea Co., Dept. 61, 1 Close Avenue, Toronto 3, Canada.
