

## Style Leaders Praise Queen

Her Clothes On Tour Win Fashion's Applause — Smart Hats, Chic Gowns, Pastel Colors

When the Duke of York ascended to the throne of England, the clothes of his Queen became matters of first importance. Queen Elizabeth faced difficult fashion problems. The simple little black frocks which other women wore with such distinction were not for her. Trained in the tradition of Queen Mary, she had to choose clothes light and distinctive enough in color to make them stand out from the crowd.

Moreover, she faced figure problems, as every woman does. Her's was shortness of stature. The fashion demands of her position had to be grafted on the demands of her silhouette.

"Elizabethan" Mode  
Working with one of London's leading dressmakers, she took up the difficult problem and so began the development and evolution of the wardrobe of a Queen. Soft powder blues, lilacs, grays and dusty rose supplemented the beige she had worn so much before. Flounces and draped effects gave way to simple smart cuts.

Fluffy fox collars were pruned away to reveal that short graceful curve of her throat, and the fur was placed on other parts of her costumes to retain the richness they demand.

Gradually a new "Elizabethan mode" evolved, but not one costume sacrificed the personality of a woman who was feminine to the crown of her head.

On her first overseas tour her clothes are winning fashion applause. A slimmed figure has given an appearance of height; smart hats have added to her chic.

## Why You Should Keep Milk Cool

There Are Many Advantages — Bacteria Growth Is Retarded

It hardly seems possible that Nature intended that milk should ever be used other than in the natural way. Certainly she could scarcely be expected to provide a preservative for keeping milk in bottles, pitchers or pails. But she does if given a chance. Fresh milk has been found to contain a substance called Lactenin, which restrains bacterial growth for a certain period. The effect of this natural preservative is soon destroyed if cooling is delayed.

Best if Ice is Used  
Scientists have discovered that bacterial action is very marked at temperatures from 70 to 100 degrees Fahrenheit. Even at 50 degrees milk will tend to spoil, but if it is cooled to 40 degrees as quickly as possible the bacterial count does not increase so long as the temperature is kept down. Even if it later warms slightly the effect of Lactenin remains for 24 hours or longer.

Milk cools very slowly in air. It takes about 12 hours to bring milk down to 50 degrees even if the air is below freezing. Cold water will cool the milk twenty times as fast, quicker still if the water is stirred, best of all if ice is used.

## Trivial Things Cause Divorces

Director of Marital Relations Bureau Lists Main Ones

John J. Anthony, director of the Marital Relations Institute in New York, lists these "trivial complaints" as the troubles that most often send people to the divorce courts:

- 1—Shop talk.
  - 2—Nagging about money.
  - 3—Digs at in-laws.
  - 4—Personal carelessness.
  - 5—Overcriticism of little things mostly household matters.
  - 6—That one drink too many.
  - 7—An anti-social attitude, that "I'm too tired to go out tonight."
  - 8—Attention to other women.
  - 9—Indifference to the children.
- Husbands say—
- 1—Too much attention to the children.
  - 2—Being forced into diversions they're not interested in.
  - 3—Wives' intrusion into personal interests.
  - 4—Jumping to conclusions.
  - 5—Slipshod housekeeping.
  - 6—Spoil-sports who go home just when the party gets lively.
  - 7—Mental laziness.
  - 8—Bossy Wives.
  - 9—Extravagance.

An excellent way to keep the stove clean, when frying fish or meat that should not be covered, is to place an inverted colander over the skillet. This quite effectively prevents the spattering of grease, yet allows the steam to escape.

with a glass of milk

Fresh, crisp, delicious, nutritious—a well-balanced meal.

Calling Dr. KILDARE

GERTRUDE GELBIN

### SYNOPSIS

Young Dr. James Kildare finds himself persona non grata at the Blair General Hospital when Dr. Gillespie, in two seconds, undoes an experiment he has worked over for two days and nights. Gillespie tells him curtly that experiments with guinea pigs aren't nearly as effective as a human understanding of his patient. Kildare takes the oral trouncing badly, so Gillespie decides to teach him a lesson. He sends for head-nurse Mollie Byrd and tells her he wants the prettiest nurse on the staff. Then he hatches a plot with Carew, head of the hospital. Jimmy, meanwhile, is not only chagrined at the downfall of his experiment, he is also troubled by the fact that he has been completely neglectful of his mother, father and sweetheart Alice who have been waiting for him to visit them in his hometown, Dartford.

### CHAPTER IV Saving A Life

Young Dr. Kildare started at the exquisite girl standing before him. Her eyes filled with terror at the sight of the boy bleeding on the make-shift bed.

"He's my brother. He's not—dead?" she whispered.

"No," Jimmy smiled reassuringly. "I'm Dr. Kildare. The ambulance will be here in a minute."

She eyed him squarely, her terror giving way to a cool determination. "Suppose the ambulance doesn't come?"

"That's ridiculous," he began; then realized the full import of her words. "Did Red call that ambulance or didn't he?" he demanded.

"I told him not to," she replied. She put her hand upon his arm.

Beauty for YOU

The Secrets of Good Looks

by Barbara Lynn.

### SAVE YOUR NECK!

Summer time is unmerciful to our necks—because they are out in the open! Whatever defects they possess will stand out for all to see, and a pretty face will never offset a wrinkled, sagging or discoloured throat! It's not too late to save your neck, if you will start at once.

First, whenever you cream or massage the face, extend the treatment to your neck.

Wash your neck and face twice a day with warm water and gentle palmolive soap, because it both cleanses and youthifies the skin. Rinse with cold water.

Next, stimulate the skin with a good astringent lotion. Apply it on a pad of cotton-wool, and press lightly over the neck.

Now to erase those lines and discolorations. Get some Three-Purpose cream, and smooth it all over your neck. Take the thumb and index finger of both hands and, starting under the chin, pinch the flesh as hard as possible. Do this until every part of your neck has been covered.

Finally, use this bleach occasionally: Pour a tablespoonful of milk of magnesia into a saucer and stir in teaspoonful of lemon juice. Apply thickly over neck (and face), leave on for 30 minutes, then wash off with tepid water. Rinse with cold water.

Write me direct for confidential beauty advice, enclosing 3c stamp for my reply. And detailed leaflets on various beauty subjects are available for 3c stamp each. Address: Miss Barbara Lynn, 73 West Adelaide St., Room 421, Toronto, Ont.

calling Dr. KILDARE

GERTRUDE GELBIN

"You can take care of Nick, here, can't you?"

"I can't," he announced flatly. "What's more, I won't. Why not the hospital?"

"You'll put him in a tough spot," she said slowly.

He shook his head. "There are certain things about a gunshot wound I have to do—and I'm going to do them."

"Suppose he is my brother—"

"Makes no difference to me. Even not reporting a gunshot wound might land me in jail—"

Her Own Brother  
"Land you in jail?" she repeated anxiously. "Take him to the hospital and I go to jail!"

"You?" he said in astonishment. "Yes," she paused momentarily. "I shot him."

"You shot your own brother—a kid like that?"

The wounded boy opened his eyes. "I've got to get out of here," he moaned. "I don't want to get her mixed up in this. She didn't shoot me, Doc—it was the guy who ran away—"

"It's alright, Nick," Kildare soothed. "I'm going to take you to the hospital."

"You mustn't!" the girl cried desperately. "You can't—if you do you'll be sending him to the cemetery—one way or the other—"

"I don't believe you," Kildare answered firmly.

"Don't turn me in, fella!" Nick pleaded. "They'll lock her up for hiding me — for being in on a murder. It will ruin her whole life. If you can't play ball with us—go on and beat it — and give us a chance — "his words died down to a whisper and his eyes closed.

Jimmy's face grew stern with worry. The girl sensed his indecision and threw her arms about him. "Please, doctor," she begged. "You heard him say I had nothing to do with it — of course I didn't shoot him. I only said that to try and stall you. So why was he trying to get away?" She paused to let her question sink in. "I'll tell you why — because if the law won't get him, somebody else will!"

Kildare's decision wavered. He looked from her beautiful, tear-stained face to the wounded boy lying before him.

"Come on, Doc," she sobbed. "Don't do it for me. Do it for him."

"Not Doing It For You"

He faced her grimly. "I'm not doing anything for you," he answered. "Whatever I am doing is be-

## Circus Comes To Town in Gay Laura Wheeler Juvenile Motifs

COPYING PERMISSIONS: SERVICE, INC. CIRCUS MOTIFS PATTERN 2045

These rollicking circus folk, some in plain stitchery, some in applique, will decorate many juvenile accessories, to every youngster's delight. Pattern 2045 contains a transfer pattern of 11 motifs ranging from 8 1/2 x 12 inches to 2 x 3 inches; applique pattern pieces; illustrations of Send twenty cents in coins (stamps cannot be accepted) for this pattern to Wilson Needlecraft Dept., 73 West Adelaide St., Toronto. Write plainly Pattern Number, your Name and Address.

### STRAWBERRY TIME

Here are some more delicious strawberry recipes:

**Strawberry Salad**  
2 cups ripe strawberries  
1 cup celery diced  
Heart leaves of lettuce  
Nut meats whole  
1/2 cup pecan nuts chopped  
1/2 cup salad dressing  
Whipped Cream

Combine strawberries, chopped nut meats and celery cubes. Marinate in dressing, arrange on lettuce. Top with whipped cream and whole nut meats. Serves 6. Salad dressing of your choice, a special fruit salad dressing. Makes a splendid combination and such a salad will be delighted to carry the honors of a dessert as well as that of a salad course. If used as a salad cheese wafers or small cheese sandwiches make an excellent addition.

**Strawberry Mousse**  
1/2 tablespoon gelatine  
2 tablespoons cold water  
1/2 cup fresh strawberries  
2-3 cup sugar  
2-3 cups whipped cream

Soften the gelatin in cold water. Crush the berries and stir and cook to boiling with the sugar. Dissolve the gelatin completely in the hot liquid and chill with occasional stirring until the mixture is as

thick as honey. Beat until frothy. Fold in the cream and the sliced berries. Turn into a tray of the mechanical refrigerator and freeze until firm.

Have you ever thought of making a relish with strawberries? It is quite unusual and makes a very nice fruit relish to serve with cold meats.

**Pickled Strawberries**  
3 quarts ripe strawberries  
1 cup vinegar  
3 cups vinegar  
1 tablespoon cinnamon  
1/4 teaspoon cloves.

Pick the strawberries place a layer in a stone jar, then sprinkle in a little cinnamon and cloves, then a layer of berries then spices until all are used. Bring the vinegar and sugar to boiling point, and skim and pour over berries. Let stand over night, in the morning drain off syrup and bring to the boil. Pour over the berries as before, allow to stand over night. In the morning boil syrup and berries together twenty minutes. Seal in jars.

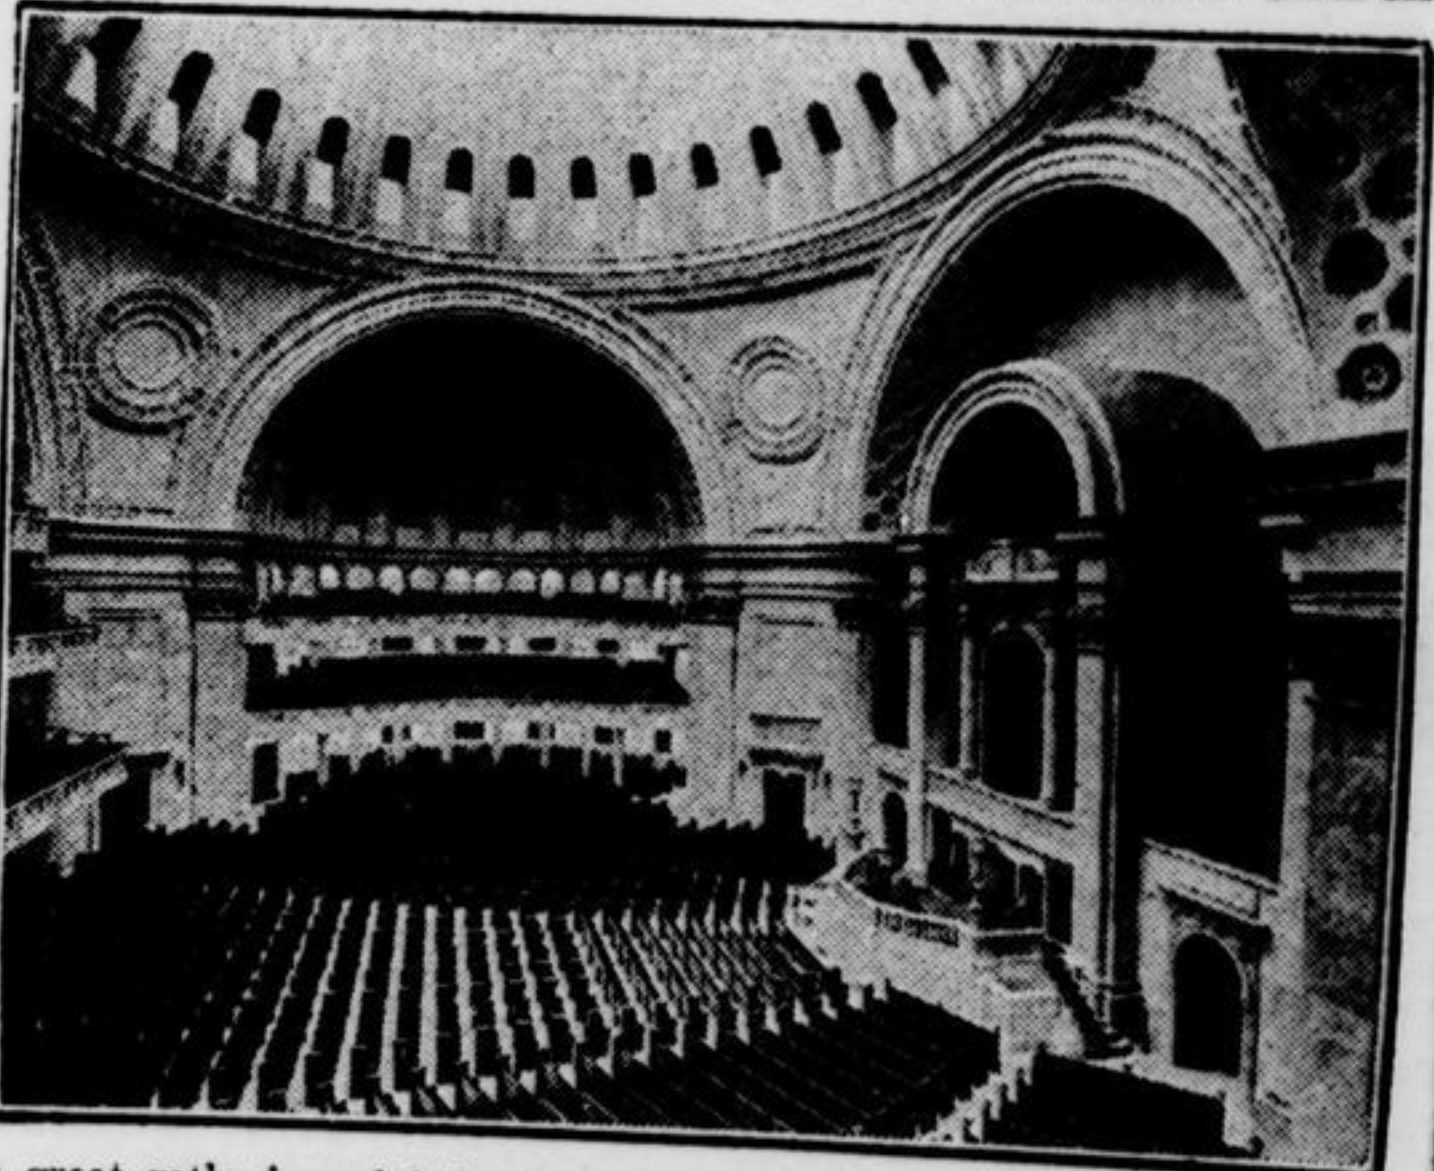

**Strawberry Conserve**  
1 quart ripe strawberries  
1/2 pound seeded raisins  
1 lemon  
2 oranges  
1/2 pound chopped walnut meats  
1 quart sugar

Wash and drain the berries then put in preserving kettle with the raisins, sugar grated rinds and the pulp of lemons and oranges. Cook slowly for 30 minutes, then add walnuts and cook for 10 minutes longer. Place in tumblers and cover with melted paraffin.

## Your Household Problems

Have you fussy enters in your family? Do you have trouble providing a varied and interesting menu? Do your cakes fall? Then write, enclosing a stamped, self-addressed envelope to Miss Sadie B. Chambers, care of this paper, and she will endeavor to solve your problems.

## Thousands of Christian Scientists Meet In Mother Church

A great gathering of followers of Mary Baker Eddy met in the Mother Church, The First Church of Christ Scientist, in Boston, Massachusetts, last week, for the annual meeting. The Church was filled at an early hour right up to the centre balcony under the very dome of the great edifice. The meeting challenged a troubled world to change its perspective from a material to a spiritual basis in its search for release from pressing economic and political problems.

blood to make it right?" she begged frantically.

He shook his head. "We'll try mine," he said calmly.

He repeated on himself the experiment he had tried on hers. Together they watched the outcome. The two drops of blood—Nick's and his own — mixed smoothly.

"We're okay," he said briskly. "Get-Nick's arm out of his elbow and swab the inside of his elbow with alcohol."

Beautiful and Brave

Throughout the transfusion Kildare's mind was filled with the wonder of this strange girl; she was more than just beautiful — she was brave, she had nerves of steel; she followed his directions and aided him with an intelligence beyond that of many nurses he had encountered. Not even after the transfusion was over and Nick was again breathing easily and regularly did her nerves snap.

"How long will he sleep?" she asked quietly.

"Till morning."

"The girl placed her hand on his. "Doctor, if you ever want an antidote — or need a little help — in robbing a bank — just let me know—"

"Let's get this straight now," he interrupted. "Anything I did, I did because I believe this boy's innocent."

His eyes met hers with defiant challenge: but her answer was a look of a woman who for the first time has met a man to whom she'd trust her very soul.

## Inadequate Rest Injures Health

Not Enough Sleep Has Detrimental Effect on Modern School Child

That inadequacy of rest is one of the most detrimental influences on the health of the modern school child, was the recent assertion of Dr. Duncan McArthur, Deputy Minister of Education, speaking to the Canadian Red Cross, Ontario Division.

Radio's Bad Effects  
Dr. McArthur was of the opinion that a great thing the Red Cross could do to improve health habits of the people would be to find a cure of the inadequacy of rest among children caused by the radio. "Taking as his subjects the importance of Education," Dr. McArthur proceeded to explain the place of health in the modern curriculum. As the chief end of education is to teach how to live and to relate ourselves to society, he declared, a knowledge of health and biology are important elements in the modern teaching course.

## Makes Gossips Sign Affidavit

English Vicar Has Almost Certain Cure For Scandal Mongers

Parishioners who repeat harmful gossip to the Rev. A. W. Beak, bachelor vicar of North Sheen, Surrey, England, are silenced by their own malice.

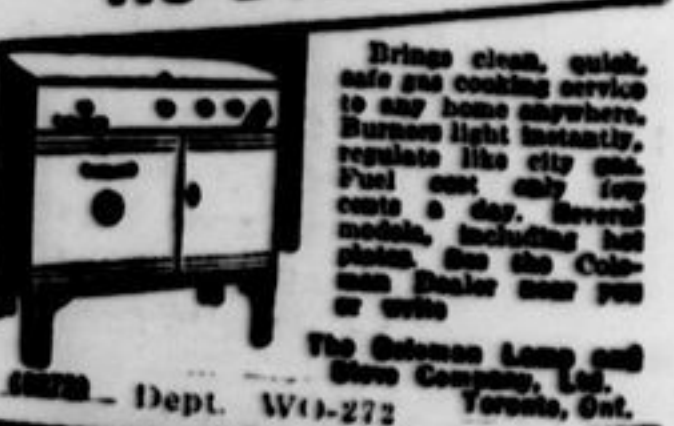

When he leaves home for his parish visits, he always carries a little notebook.

Somebody pours out a stream of gossip. Out comes the notebook, the vicar puts down the main points of what he has heard, and blandly invites the gossipier to sign his or her statement.

He always produces a pencil as well so there can be no excuse for not signing.
