

Huron County Will See Walt Disney

Famous Creator of Animated Cartoons Is To Be Welcomed at Old Family Homestead This Summer

Walt Disney, famous creator of animated cartoons, whose motion pictures have started new trends in the film industry, will visit Morris Township, Huron County, this summer to see the old Disney homestead, where his great-grandfather settled in 1848.

He will be accompanied by his father, Elias Disney. The famous cartoonist was born in Chicago, but the district regards him as one of its native sons.

Two Miles From Wingham Morris Township, just two miles from Wingham, is Walt Disney's home. The dog owned by Sandy McEwen, who now farms the old Disney homestead, answers to the name of Pluto. Down the road there is a real Donald Duck. His Majesty's Mail is drawn by a horse answering to the name of Horace Horsecollar.

The biggest and most elaborate reception in the history of Morris Township is planned for Walt Disney and his father. Plans are already being made for the "welcome home" celebration.

Originally From Holmesville The first Disney arrived in Huron County in 1848, and that was the present Walt Disney's great-grandfather, Elias Disney. He settled at Holmesville, about six miles from Goderich and started a grist mill and a sawmill.

New Legislation Aims To Improve Canadian Cheese

It Is Designed To Improve Conditions In Our Cheese Factories, Raise the Proportion of High Scoring Cheese

The Cheese and Cheese Factories Improvement Act which has been passed by the Dominion Parliament is not only designed to improve conditions in Canadian cheese factories, but to raise the proportion of high scoring cheese produced in Canada. The milk producers who supply milk to cheese factories in which 92 and 94 score cheese is manufactured will benefit to the extent of two cents per pound for 94 score and one cent per pound for 92 score.

Start With Clean Milk Naturally the cheesemaker has a great deal to do with the quality of the cheese which is marketed. The milk producer, however, must co-operate to the fullest extent as no cheesemaker can make high scoring cheese unless he has clean, pure milk, which has been properly cooled, to start with. The principal purpose of the Act is to maintain and improve the position of Canadian cheese on the United Kingdom market, where for many years the best type of Canadian cheese has been rated as the finest Cheddar cheese imported from any country and where most of the factory cheese made in Canada is sold.

Drivers Should Carry Permits

Attorney-General Conant last week warned that drivers of motor vehicles must carry their operators' permits with them or face prosecution.

Issuing instructions to provincial police to maintain a close check on motorists, Mr. Conant said: "Any drivers found without their licenses will be prosecuted, even though they have licenses but did not have them with them. Under the law they are required to carry their licenses."

Mars Is Coming Close To Earth

July 27 Red Planet Will Be the Nearest to Our World in 15 Years

A decade or two is not long to astronomers, who do a nice job of watching. A long wait will be over for some of them next July 27, when Mars will approach within 36,000,000 miles of the earth, the nearest it has been in 15 years.

36,000,000 Miles Away They hope to learn whether the white cap which appears first at Mars' south and then at its north pole, as winter comes, is composed of ice and snow. Vapor should be rising from it and with a spectrograph they may be able to learn what it is made of. It might be carbon dioxide, indicating the residents of Mars, if any, have a natural supply of "dry" ice.

The astronomers also will get a closer look at Mars' canals and dust storms.

Fail To Rescue 99 Men Trapped In Sunken Submarine

This composite photograph, made up of an artist's drawing and an actual photograph of rescue vessels, graphically illustrates the desperate, but vain, attempts of salvage crews to rescue the 99 men entombed in the sunken British submarine, *Thetis*, which sank to the bottom of the Irish Sea while on a trial run. Four men aboard the ill-fated craft succeeded in escaping by using the Davis lung.

Have You Heard?

An old ducky approached the minister cautiously and very lightly tapped his shoulder. "Parson, sub," he said, "Ah done wants you all to pray for me. Ah's in a bad way, sub."

"Well, Rastus, what's wrong with you?" "Suh, Ah's got a floating kidney, Ah has, sub."

"But, Rastus," replied the minister, "I can't pray for physical things like that; I only pray for spiritual things."

"You all can't pray for a floating kidney? Then how come you all prayed last Sunday for the loose livers?"

1st Kangaroo — Annabelle, where's the baby?
2nd Kangaroo — My goodness, I've had my pocket picked!

Progress of romance in the wheat belt, deduced from the Regina (Sask.) Leader-Post classified column:

Teacher Wanted, Protestant; salary, \$550; 11 pupils; English-speaking district; nine teachers married from school in last 19 years. Possibilities not exhausted. Give phone numbers when replying. Address, Teacher, Box 175, Hanley, Sask.

It makes me sad To think that we Can never see Our Vertebrae.

Father: "I wish you wouldn't always keep asking questions. Didn't you ever hear that curiosity killed the cat?"

Little Arthur: "What did the cat want to know, Father?"

Cupid may be a good shot but he makes some awful Mrs.

Hysteria Reigns As Refugees' Ship Driven From Cuba

Refused permission to land 915 Jewish refugees from Germany at Havana, Cuba, the Hamburg-America liner *St. Louis* sailed from Cuba to the Caribbean until some other port was made available for the landing of the refugees. Failing this the liner sailed back to Germany with its cargo of human misery. Many of the women refugees became hysterical as the *St. Louis* sailed from Havana and had to be restrained from throwing themselves overboard. They would rather jump into the sea than return to Germany.

Schools Compete At Exhibition

Every Province In Dominion Will Have Entries By Scholars In C. N. E. Competitions This Year

That so-called "new Canadians" are quick to take advantage of the facilities provided by the Ontario system of education is strikingly reflected in the extraordinary number of foreign names in the more than nineteen hundred entries already received in the school exhibits and competitions at the Canadian National Exhibition this year.

Northern Ontario mining and agricultural areas will be represented in a very large way. In the Kirkland Lake district alone five schools have sent 800 entries and there are more to follow. Entries embrace writing, drawing, modeling in soap, clay and other materials, and all the wide variety of work covered in the Exhibition's educational section. Marked increase in the number of exhibits from all parts of Canada has necessitated shifting the location of the educational pavilion to the mezzanine of the Automotive Building.

Every province in the Dominion will have more or less representation in the school competitions this year. Ontario representatives already have arrived from Saint Ste. Marie, Picton, Amherstburg, Kitchener, Owen Sound, Simcoe, Walkerton, Englehart, Brighton, Dryden, Stayner and elsewhere.

Emaciation's Out Of Fashion

Miss Katherine Krug, Wilson College's dietitian, is not certain whether "emaciation" has ceased to be fashionable, but she does know that girls under her care "eat far more sensibly than they used to."

Although there is no college rule on the subject, Miss Krug said, the girls "attend meals regularly—even breakfast."

"The consumption of milk has almost trebled in 10 years," she said.

What Science is Doing

Slim Types Safest The slim, "asthenic" type of person is likely to go through life with normal, or even low, blood pressure, but the "pyknic" type, characterized by short, broad body structure, is susceptible to high blood pressure, a medical survey shows.

Civilization causes many degenerative diseases, and many of these are accompanied by overweight. We are victims of both hurry and inactivity.

"Dynamite" In Bugs The "hidden dynamite," carried by some of the smallest bugs which infest men is declared today to be a potent cause of disease and of death during the summer months.

This "dynamite" is the virus of Rocky Mountain spotted fever, carried by dog ticks and transmitted to man when an infected tick bites a human being. It is so powerful that the amount which could be picked up on a pin point can cause death.

Rate of Fingernail Growth Two doctors from Queen's University, Kingston, have informed the Royal Society of Canada, that they are studying the rate of the growth of the human fingernail in hopes of illuminating certain phases of cancer research.

Selecting Your Child's Clothes

See That They Are Well Made So They Will Stand Wear and Washing

Children's clothes should be well made. They get hard wear and frequent trips to the tub, and if they are to stand up under this and at the same time be comfortable to wear, seams and finishes should be narrow, smooth and pliable. The kind of construction is determined by the particular garment, the material and the kind of wear it will be given, but, in general, thread should always match the fabric in strength and color. Stitching needs to be close and properly adjusted and reinforcements are a protection for places likely to be strained.

Consider Likes And Dislikes Parents should also bear in mind that children begin to develop color preferences and standards of taste and quality very early. Some children are very sensitive to colors and their likes and dislikes should never be ignored or ridiculed. By letting a child have what he enjoys, so far as it is possible, parents can encourage a wholesome pride in appearance.

How You May Reduce Varicose or Swollen Veins—Heal Ulcers

A Simple Home Treatment The world progresses. Today many minor ailments that took weeks to overcome can be helped much more quickly. If you have varicose veins or chancres, start today to bring them back to normal size and if you are wise you will do so.

Just get an original bottle of *Moon's* and apply it night and morning to the enlarged veins. In a short time the veins begin to grow smaller and by regular use soon approach normal.

People who want to reduce varicose veins or swellings, should not hesitate to try a bottle at once. It is so penetrating and economical that a small bottle lasts a long time.

Farm Forum

Q.—Would you please tell me if it would do any good to put hardwood ashes (sifted) on my lawn, as the grass is rather poor owing to sandy soil, also would it do to put around dahlia roots?—K.W.—York County.

A.—As to applying Hardwood Ashes to your lawn, this will mean an application of Potash and Lime. If you like a fair amount of Clover in your lawn, it will be quite good, however, if the soil is slightly acid which I surmise it might be from your description, an application of Hardwood Ashes would sweeten it up and make it a more desirable location for valuable grasses and clover.

As to putting hardwood ashes around dahlia bulbs, records show that dahlias thrive in a slightly acid to neutral soil. If your soil is slightly acid, then the addition of hardwood ashes will correct this condition since they carry 20% lime. The potash in wood ashes will help the formation of starch in dahlia roots which is also desirable.

Q.—Could you please tell me if old sawdust is useful as a fertilizer? I have a large quantity of it and would use it on the land if it would be of any value to the land.—S.H.—Leeds County.

A.—In reply to your inquiry of the 12th instant, which has been unfortunately mislaid until now, I wish to say that sawdust is not looked upon as a very high grade fertilizer. I have one analysis of it which shows a content of about .1% Nitrogen, .2% Phosphoric Acid, .4% Potash. This is how it compares with Oat Straw, the latter is 6.2% Nitrogen, .2% Phosphoric Acid and 1.04% Potash. I presume that a light dressing of this material on a heavy soil would tend to open the soil up. On light soil it would tend to bind the soil together and give it body.

Sawdust does not rot very quickly, but applied in moderate quantities would be of some benefit to the soil.

Modern Etiquette

BY ROBERTA LEE

- 1.—When a person has finished eating, isn't it helpful if he will stack the empty dishes?
- 2.—Should a man and wife register at a hotel as "William L. Allen and wife"?
- 3.—How long before the hour for the church wedding ceremony should guests arrive?
- 4.—When you have been introduced to a person, and upon leaving, this person says "I hope I shall see you again before long," what should the response be?
- 5.—When a man is forced by circumstances to send a girl whom he has been accompanying, home in a taxi, should he pay the taxi fare?
- 6.—Should a person butter the entire slice of bread at one time?

Answers
1.—He may consider it helpful, but it is certainly not good form to do so. The dishes should remain as they are until the waiter removes them. 2.—No. The man should register, Mr. and Mrs. Will-

DIXIE

PLUG SMOKING TOBACCO

Liam L. Allen, Chicago. Omit the street address. 3.—About twenty minutes, never later than ten minutes. 4.—"Thank you. I hope I shall see you again, too." 5.—He should ask the driver the approximate amount the fare will be and pay him, adding enough for a tip. 6.—No. One should butter a small piece at a time.

Quick Change Police

A youth, summoned for riding a bicycle past traffic lights in London, England, told the Court he

was 16, so the case was sent to the Juvenile Court. There magistrates had to wait until the police officer in the case changed into civilian clothes. By that time the youth could not be found, so the policeman had to change back into uniform and go in search of him. Eventually he turned up, and the policeman having put on civilian clothes once more the case went on and the lad was fined 60c.
