

Ellen Terry's Home Saved

Perpetual Preservation Planned

The cottage of Ellen Terry, the actress, has been acquired by the National Trust for Perpetual Preservation. The Trust has in its charge properties of historic and picturesque interest in all parts of England. But this is its first theatrical acquisition, an official declares. The announcement coincides with the pulling down of Ellen Terry's old theatre, the Lyceum, to make way for a big traffic roundabout at the end of the Strand to accommodate the greatly increased flow of vehicles anticipated from the new Waterloo Bridge now in course of erection.

Cottage Built About 1450

The cottage, which is at Small Hythe in Kent, is one of a group of four. It was built about the year 1450, and is considered a very attractive specimen of black-and-white architecture. Two of the cottages are let, and the fourth is the home of Miss Edith Craig, Ellen Terry's daughter. Miss Craig is to continue supervision of the Ellen Terry cottage, which is now a museum. It has a particularly interesting selection of theatrical costumes, including dresses worn on the stage by Mrs. Siddons, Ellen Terry (covering a period of 50 years), and Henry Irving.

Adjoining the Ellen Terry cottage is a Barn Theatre, where Miss Craig each month organizes a theatrical entertainment on behalf of a society established in 1931 for that purpose. It is intended to continue these entertainments now that the property has been acquired by the Trust.

Represents Lord Baden-Powell

Representing the Chief Scout, Lord Baden-Powell, Sir Percy Everett, deputy commissioner, is shown as he arrived at Quebec aboard the Empress of Britain. Sir Percy will visit Canadian scout's central divisions throughout Canada.

Mid-Summer Statistics

Encouraging Factors in Dominion Outlook

Mid-summer finds business in Canada showing remarkable stability, with distinct signs of improvement in industrial fields, a rising export trade, and encouraging factors in the outlook. Foremost among these factors is the almost assured prospect of a good grain crop in the Prairie Provinces.

Crops in Ontario and Quebec are up to the average and the past month has witnessed a welcome improvement in the crops of the Maritime Provinces.

Dairy Industry

The dairy industry is now at the peak of its production and the output of cheese and creamery butter four June were respectively 22,050, 271 lbs. and 40,943,551 lbs., as compared with 19,969,256 and 27,674,911 lbs. in May, and 22,157,229 and 41,784,894 lbs. in June, 1938.

Hikers Take Heed

Take Care of the "Dogs" That Carry You Along

About a fortnight before your holiday, start massaging your feet twice a day with foot salve and alcohol alternately. This will gradually harden the skin.

Keep up this treatment during the tour and dust your feet plentifully with talcum powder before putting on your stockings.

Try to get stockings which have no seam under the foot and wear fairly thick wool socks. These act as a cushion for the feet and absorb any undue perspiration.

A soothing footbath is to throw a few crystals of permanganate of potash (just enough to color the water mauve), in warm water and soak the feet in this.

Every just bargain pays double, enriching both the seller and the buyer.

Imperial Airways Giant "Caribou"

A fortnight ago the long-expected Trans-Atlantic Air Mail Service was inaugurated. Carrying 25,000 pieces of mail the Imperial Airways giant flying boat Caribou, shown above, roared up the St. Lawrence to land at Boucherville 33 hours after taking off from Southampton.

Sunday School Lesson

UZZIAH: A KING WHO FORGOT GOD—2 Chron. 26:3-5, 16-21

Golden Text.—Every one that exalteth himself shall be humbled; but he that humbleth himself shall be exalted. Luke 14:14.

THE LESSON IN ITS SETTING

Time.—Uzziah ascended the throne in 806 B.C. The time when the events in this chapter took place cannot be determined with absolute accuracy, but inasmuch as Uzziah died in 755 B.C., his being stricken with leprosy is placed generally about 768 B.C.

Place.—Jerusalem.
3-4. Sixteen years old was Uzziah when he began to reign; and he reigned fifty and two years in Jerusalem; and his mother's name was Jechiliah, of Jerusalem. And he did that which was right in the eyes of Jehovah, according to all that his father Amaziah had done.

Uzziah was fortunate to have such a wonderful mother and father. What a blessing for any young man to have a father who has so lived that the boy can do nothing finer than to walk through life in the path which his father had made for him. A father by being honest and pure of heart, upright in all of his dealings, faithful in the services of the church can certainly set up an ideal for his son and help him to live in the way that will bring him the greatest peace and happiness in life.

5. And he set himself to seek God in the days of Zechariah, who had understanding in the vision of God; and as long as he sought Jehovah, God made him to prosper. Uzziah prospered indeed. He fought the Philistines into real subjection. He strengthened the defenses of Jerusalem by building towers at its three weakest points. He organized, equipped, and disciplined the military force of the country on a new plan. The whole country prospered under his rule.

16-17-18. But when he was strong, his heart was lifted up, so that he did corruptly, and he trespassed against Jehovah his God. For he went into the temple of Jehovah to burn incense upon the altar of incense. And Azariah the priest went in after him, and with him fourscore priests of Jehovah, that were valiant men; and they withstood Uzziah the king, and said unto him: It pertaineth not unto thee, Uzziah, to burn incense unto Jehovah, but to the priests the sons of Aaron, that are consecrated to burn incense; go out of the sanctuary; for thou hast trespassed; neither shall it be for thine honor from Jehovah his God.

19-20. Then Uzziah was wroth; and he had a censor in his hand to burn incense; and while he was wroth with the priests, the leprosy brake forth in his forehead before the priests in the house of Jehovah, beside the altar of incense. And Azariah the chief priest, and all the priests, looked upon him and behold, he was leprous in his forehead, and they thrust him out quickly from thence; yea, himself hastened also to go out, because Jehovah had smitten him.

Thus for his sin he was punished with the terrible visitation of Leprosy. This severe penalty disabled and disqualified a man for all the days and enjoyments of life. His sin was not a mere question between king and priest; that would have been small enough. It was a question whether God should continue to rule, through his chosen officers, over the nation, or whether the king should set aside the divinely given law, and practically make himself supreme. To assume a prerogative which God had strictly confined to the priestly order, was a step that was revolutionary in its character and overturned the most sacred traditions. Too much success had spoiled Uzziah and en-

Beauty In Belts Transforms Gowns

Belts have become more and more elaborate. All sorts of strange and unlikely materials go to the making of them.

A plain black dress can be given whatever character you please by changing the belt.

Do you wish the general effect to be "plain but good"? Then wear a narrow white satin belt embroidered in black silk with your Christian name, and a single string of pearls round your neck.

Make These Yourself

Do you wear something a little bizarre and unusual? Then wear a wide belt in thick oatmeal linen, faced with black felt, and trimmed with flat scarlet beads and little golden bells.

If you have a discarded natural coral necklace, sew the coral round a white suede belt, scatter gold beads in between and wear a gold and coral necklace to complete the effect.

A narrow black crepe de chine belt embroidered in gold thread and edged with gold fringe gives a very sumptuous look to your black frock, and a heavy gold necklace will add the final touch of chic.

Your Eyes Require Care

Avoid Irritation and Infection By Exercising Precaution

In the daily routine of life, it is important to try to remember to wash one's hands after touching banisters, door knobs, push plates, etc., to avoid carrying infection to the eyes. Even shaking hands transmits germs from one person to the other. Rubbing the eyes after using a handkerchief to blow one's nose is a possible and probable source of infection.

Danger of infection lurks in the swimming pools if the eyes are opened under water and bath towels at public pools, beaches and the Summer resorts are another common source of infection. Do not dry your eyes at all under these conditions.

When motoring try to prevent dust and water from being blown or splashed in the eyes. Trying on other people's glasses and goggles can transmit lid infections and even conjunctival inflammation. The allergic inflammations from foods eaten and from external irritants such as pollen from trees, plants, flowers or talcum and face powders and dandruff from pets can be guarded against if they seem to cause an irritation. Tissue towels and paper handkerchiefs can cause the sensitive person to have inflammation of the eyelids or eyeballs.

The pupil of the eye is so-called from the Latin word pupilla, meaning little doll, because you can see a small miniature of yourself when you look in another's eyes.

Awakened

The stormy wind blew
A bright flash of rain
Like a silver lightning
'Gainst the window pane.
Why did my heart wake
From a dull sleep?
Remembering fiercely
To weep, and to weep.
A dead dream awakened?
Ah! that should not be;
That dream from the past
Is bitter to me.
I had forgotten
Through the long years,
How swift remembering
Could stir one to tears.
Hush, wind, and never
Let me see again
Rain on a dark night
Light the window pane.

POP—It Takes Time to Collect Anything

Are You Sure Your Face Is Clean?

Normal Care For Normal Skin —Don't Powder Over Dirt

Much has been written about the beauty for people with greasy skins, dry skins, sensitive skins and so on. It is time that something was said on the subject of the normal skin. After all, there are many fortunate people who have nothing very much wrong with their complexions and it is only right and natural that they should want to know how to keep them in that happy condition.

It is, unfortunately, all too true that if a perfectly good, normal skin is left to look after itself, it stands a very good chance of losing its normality, of developing open pores, blackheads, etc. Therefore beauty culture for the normal complexion must be of a protective nature.

What is this protective treatment? Well, it consists of three parts: cleansing, nourishing, and guarding against age. The first is easily the most important part, because dirt is the greatest danger a good skin has to guard against. How many times do you wash your hands each day? Morning, midday, evening and last thing at night, don't you? Probably more often than that. And yet there are hundreds of people who just dab a little extra powder on their faces three or four times a day, and clean it only once. It is true that your hands are constantly in use, and are, therefore, in more direct contact with dirty objects, but it is also true that the foundation cream you use on your face makes it slightly sticky, so that the dirt in the atmosphere naturally clings to it.

There you have Rule 1 for skin beauty. Cleanse your face every time you wash your hands. Your complexion will repay you a thousand-fold for your trouble.

Fill your aluminum saucapan with water and chop up a fair-sized stick of rhubarb. Put this in and boil for two or three minutes. When you have done one saucapan with this mixture pour it into another, and so on, until you have brightened all of them.

Cowbell

It stands upon the woodshed shelf,
Tarnished but golden in the gloom,
Its throat, that on a summer hill
Will taste a waterfall's bright plume.
Or speak of cropped and dewy grass,
Is silent. In dusty shadows here,
The unshaken voice awaits the

hour
When it will wander swaying,
clear,
Telling the valley listeners when
The tawny cattle amble far
To nibble the low, white clover-
flower
Or homeward turn with the evening star.
—Frances Frost in The Christian Science Monitor.

THIS CURIOUS WORLD By William Ferguson

THE MACKEREL
MIGRATES UPWARD AND DOWNWARD! WHEN WINTER COOLS THE SURFACE WATERS, THE FISH DROPS DOWNWARD TO WARMER LEVELS.

CHARCOAL AND DIAMONDS
ARE MADE OF THE VERY SAME ELEMENT, CARBON! YET, DIAMONDS OF THE POOREST QUALITY SELL FOR MORE THAN \$2000 AN OUNCE, WHILE CHARCOAL IS WORTH ONLY ABOUT \$15 A TON.

MULE-DEER HEAD, BEARING WHITE-TAIL TYPE ANTLERS!
TAKEN NEAR MEEKER, COLORADO.

© 7-31 COPY, 1937 BY NEA SERVICE, INC.

DIAMONDS and charcoal are composed of carbon, in an uncombined state. A diamond is pure, crystallized carbon. Carbon is much more abundant, however, in a state of combination with other substances. United with oxygen, it occurs as carbonic acid in the atmosphere.

FEMALE POLITICIAN

HORIZONTAL

1, 5 An English politician.
10 Chopping tool.
11 Opposite.
13 Dress trimming.
15 Vocal composition.
16 Chair.
18 Chief.
21 Petticoat.
23 Behold.
24 Bucket.
26 Foe.
29 Head cook.
33 Being.
34 Sheep's call.
35 A craft.
37 Gone by.
38 Lava.
39 Arbitrary command.
42 Grain.
43 Smooth.
44 To glut.
46 To rectify.
48 Thing.
50 To entertain.
52 Enraptured.
53 Fountains.
