Newest Styles "Hair-Raising"

One of the "Musts" For Milady's Winter Fashions

Debutantes and movie actresses may cling to their long bobs, but the sophisticate who is taking the new bustle silhouette seriously will consider a charming version of the pompadour. She'll put her shining locks up - in some romantic, reminiscent-of-bygone-days fa-

To wear with an evening gown, one hairdresser does a charming coiffure which makes use of quite short hair. There are soft, subtly waved bangs across entire forehead and a mass of loose ringlets on top. Unwaved hair at sides is brushed backward, then up to form part of the back section's upward swirl. The curls, the fringy bangs and the upward movement at the back and sides make this essentially romantic and in the "bustle

Chignons for Evening There are smart versions of the up-and-down for women who like curls atop their heads but insist on softness behind the ears to break an otherwise hard jawline. One flattering style has a large, soft cluster of small curls on top. Hair at the sides is drawn smoothly upward with the ends finished in ringlets that are part of the topknot cluster Long ends on the nape of the neck are turned up-

A New York salon shows chignon coiffures to wear with evening gowns which feature bustles as such, as well as bustle effects, like huge bows tied at the back. In one, the hair is dressed on top of the head, but slightly toward the back with a chignon pinned right below the natural cluster of curls. This chignon consists of five medium length curls which dangle on the nape of the neck.

Feed Your Grain To Cattle, Hogs

Farmer Can Realize His Greatest Profit In Such A Way

The increased interest displayed by junior farmers prodicts a coming era of greater prosperity for agriculture, Dr. G. I. Christie, the President of the Ontario gricultural College, Guelph, declared in opening the Peterborough Agricultur-

al Exhibition in August. The number of young farmers exhibiting and taking part in the many contests exceeded all prevlous records. They filled all accommodation facilities on the grounds and had to resort to tents for a great many of their displays

Increased Interest Among The · Farmers A bountiful grain crop, coupled with low grin prices, meant only one thing for the farmer, Dr. Christie said. He emphasized the necessity of feeding the grain to cattle and hogs, "because it is through those mediums that the man on the farm can realize his greatest profit, world conditions being what they are today."

New Jap Premier

Following the German-Sovjet non-aggression pact the entire Japanese cabinet resigned to allow for the reconstruction of Japanese foreign policies. General Nobukyi Abe, who is generally regarded as favoring closer co-operating with Great Britain, was given the task of forming a new

An eagle with a wooden leg, supplied by the local veterinartan, has been placed in the railway station in Aosta, Italy, and scems happy except when the newsboy appears with the papers; Cities Of Europe Are Not Far Apart By Air

The figures on this map indicate the flying distance between the chief cities of Europe, all of which may be targets for bombers. German planes at Berlin have but 320 miles to fly to Warsaw in the heart of Poland. Inverness, British admiralty headquarters, is 450 miles from the mouth of the Baltic Sea. This is a short distance from Heligoland, scene of the famed British-German naval battle of Aug. 28, 1914.

Have You Heard

Mrs. Jones: "We need a new

Jones: "What's the matter with the old one? It doesn't leak." Mrs. Jones: "No, but I don't want to be ashamed every time an airplane flies over the house."

Fred-"You are a singular sort of girl." Mabel-"Well that's easily

A literature class showed signs of restlessness while the English teacher, Prof. William Lyon Jones was lecturing on Browning. Finally, seeing the restlessness growing more acute, the quick-witted professor said:

"Only a minute. I have just one more pearl."

A historian asserts that Englishmen played a sort of golf in King Harold's days. It will be remembered that Harold himself went out in '66.

Negro couple applied for a marriage license. Clerk: "Married before?"

Bride-to-be: "Yes." Clerk: "Husband deceased or divorced? Bride-to-be: "I deceased him."

S.S. Teacher: Children, how do you think Samson felt after Delilah sheared him? Billy Bright: Pretty sheepich, I guess.

New Upholstery

Canda Cloth Combines Suede-Like Smoothness With the Utmost in Utility

The old adage about beauty be ing only skin deep is completely disproved by the advent of canda cloth - a new, revolutionary upholstery fabric developed this year and already marked for wide adoption by car owners.

It appears that canda cloth reconciles two diverse viewpoints, namely: the strong desire for the beauty and smoothness in upholstery and the equally strong desire for ruggedness and long life. Now these two preferences find a common ground, for the introduction of canda cloth makes available not only beauty and silken smoothness but enduring service as well.

Wash With Soap and Water The new canda cloth combines all the beauty and durability of the fine mohair velvet with the best features of other types of upholstery. The result of intensive research and study of car owners' requirements, this revolutionary fabric has a smooth, suede-like surface which is as handsome in appearance as it is soft and comfortable to ride upon. It can be kept fresh indefinitely, for it can actually be washed with soap and water, and its durability will provide years of service equal to that of

the finest velvet. It is probable that canda cloth has a fine future ahead of it. Car owners have long wished for such a fabric - a fabric, moreover, that is inherently distinctive, yet rugged as any upholstery material so far available.

Canadian Is Army Head

Commissioner George Carpenter, territorial commander in Canada at a meeting of the high council in London, England, was named the new leader for the world, of the Salvation Army, succeeding General Evangeline

What Science Doing

TO EXPLORE OCEAN FLOOR Departing for the time being from his adventures into the stratosphere, Prof. August Piccard, the Swiss physicist, is devoting his attention to the floor of the ocean, which he plans to explore from a glass gondola attached to a huge steel sphere.

UNKNOWINGLY HAVE T. B. Tuberculosis is much more prevalent than generally supposed. A great many have the disease and have no knowledge of the fact. This was revealed in an extensive series of m ical examinations made on the students in the University of Chicago. It was found that 11/2 per cent. of the students unknowingly had the disease and it was advanced to the point at which a clinical determination of its presence could be made.

MEASURES BREATH OF LEAF An apparatus has been invented in distant East Africa for measuring under natural conditions the

rate of breathing of a single leaf. The apparatus, "an important contribution in the investigation of plant physiology," does its work by measuring continuously and automatically the differences in water content between two different streams of air.

PAINLESS DENTISTRY A new drug has banished pain from the dentist's chair. To-day, every major dental operation can be performed, without

the least pain to the patient. The drug which makes short work of pain has this chemica name: para-amino, mono-isobutyl benzoate hydrochloride.

Beefsteak Can't **Abolish Shiner**

Government scientists last week aimed a knockout punch at the idea that a piece of raw beefsteak is a fine remedy for a black eye. If you're unlucky enough to acquire a "shiner" and some one provides beefsteak, the scientists said the thing to do is to eat the beefsteak-and apply a cold compress to your eye.

****************** How Can 1? BY ANNE ASHLEY

Q .- How can I prepare a remedy for excessive perspiration? A .- Bathe the parts daily and then apply a lotion consisting of two teaspoonfuls of powdered alum to one pint of water. Follow by dusting with a powder made of one ounce boric acid and ten proins of salicylic acid.

.- How can I reireshen wilted vegetables? A .- Add a slice of lemon to a pan of water and soak the vegetables in it for about a half hour. This is particularly effective for

spinach, lettuce, and parsley. Q .- How can I make use of a soapy dish water? A .- It is claimed that soapy

dish water thrown on the rose bushes will make them thrive. Q .-- How can I prepare a good

roast meat sandwich? A .- Use the following: Diced cold roast meat, 2 tablespoons peanut butter, 1/2 cup finely ground raw carrots, salad dressing, salt, and lettuce. Whip the peanut butter with salad dressing until creamy, then add to the salted carrots and meat.

Q .- How can I treat sunburn if I have no lotions or salve? A .- Spread butter lavishly over the burned parts and it will prove an effective first aid.

> **FARM PROBLEMS**

(Conducted by Professor Henry G. Bell of the Ontario Agricultural College, Guelph, assisted by other members of the faculty of the O.A.C.)

Q .- Would you please tell me if bad silage that you throw out of the silo odd times through the winter months, is bad for your ground to spread as manure, and also if you could use it to mulch grapes or peaches when you have quit working them for the season towards the end of July without it doing any harm?

A .- There is no reason why decayed silage should not be used as manure. It will supply a good quantity of Organic Matter, and the temporary Acidity which it may have carried while in the silo will be quickly corrected when it is exposed to the air. It should be satisfactory as a mulch for Grapes and Peaches when you have ceased to cultivate them. "H. H .- Lincoln Co."

Q .- Could you please give me any information regarding sowing Salt on root-ground? I am putting Turnips on Sweet Clover pasture land. This land is high and bad for drying on it. I have it covered with manure. How much Salt should I sow per acre? Would it be alright to sow fertilizer along with the Salt? I will finish the field with Barley. How would it do to mix Salt with the fertilizer

for the Barley? A .- In answer I wish to say that there is no argument for the sowing of Salt since Salt does not supply any element of plantfood. The only thing it does is to liberate a small amount of Potash from the soil. The same amount of money invested in Potash Salt such as Muriate of Potash will give much larger returns since the Potash carried by the Salt is used directly by the crop.

Issue No. 36 — '39

SCOUTING

Boy Scouts, Wolf Cubs, Girl Guides and Brownies of St. Catharines, Merritton, Thorold, Port Dalhousie and Niagara-on-the-Lake, combined for a Scouts' and Guides' Own church service at Montebello Park, St. Catharines. Led by the Salvation Army band and colour parties bearing many flags, the youthful procession made an impressive spectacle on the way to the park. The service was conducted throughout by Scout and Guide leaders, the chief address being given by District Scout Commissioner H. G. Morrow.

A demonstration of methods of rescuing unconscious persons from a burning house was put on by each patrol of the Stratford Baptist Scout Troop, to mark the presentation of the Scout Fireman's Proficiency Badge to Troop Leader Sylvester.

"The Boy Scouts showed in that work what an effective body for service to the community the Boy Scout Movement is." The comment was that of Fire Chief Lampman of Welland, Ont., upon the work of a bucket brigade of Scouts of the "Stop 19" Troop in attacking a fire in a cottage dwelling. The efforts of the Scout fire fighters confined the flames to the dwelling until the arrival of firemen and apparatus from Welland.

A Scout Group charter has been issued by Quebec Provincial Headquarters to the province's farthestnorth unit, 600 miles from Montreal on the eastern shore of James Bay. The new Scout Troop and Cub Pack are made up of Indian boys attending St. Phillip's Anglican Mission School at Port George.

A demonstration of bandaging for fractures, the carrying of unconscious persons and other firstaid work was given by a team of four Boy Scouts at a meeting of the Womens' Institute of St. Mary's, Ont.

******************* Modern Etiquette BY ROBERTA LEE

1.-What is the correct way to give a tip? 2.- May a fork handle rest on the table, with the prongs on the edge of the plate, when not in

3.-What is the correct salutation when a woman telephones another woman of her own social po-

4.-What does it indicate when a person misspells five or six words

in a letter? 5.—Isn't it discourteous for a motorist to drive through a funerel procession?

6.—When a woman is playing golf with a man, who should pay her caddy?

ANSWERS 1.- A tip should be given quietly and courteously, without show-

ing the least display. One who gives a tip in a conspicuous manner invariably does so to impress those who are watching. 2. Never. The fork should rest on the plate, the prongs pointing upwards. 3. -"Mrs. Baker? This is Dorothy Moore." 4 .- It indicates both negligence and laziness. Every desk should contain a dictionary, and it takes but a minute to consult it 5 .- Yes; he should be patient and wait, even if in a hurry. 6 .- The woman should pay her own caddy.
