

## Indians Describe Submarine Moose

**Amphibious Creature Is Said To Feed on the Bottom of Lakes in Northern Manitoba and Saskatchewan**

An amphibious moose, with a bull-like body, stubby legs and which is said to feed on the bottom of northern lakes, was described late this summer to a curious school teacher P. G. Downes of Belmont, Mass., by Indians who claim to have seen the "mormoose."

**Seen Under Ice**  
Downes said belief in the existence of the creature, which the Indians call "pikwutchee kwaskay-pitchikaywin, seems to be universal among the older natives of the bush country.

Norman Lathlin, a 99-year-old reserve Indian, told him the story through an interpreter, Rev. R. B. Horsfield, an American missionary. "When I was a youth I was travelling in the spring across the angling in the wilderness (shown on modern maps as Landry's Lake, 12 miles east of The Pas," Lathlin said. "The ice was thin and the water very clean and deep. Suddenly, looking down through the ice and water I saw beneath my feet a Moose crawling along the sandy lake bottom and eating weeds that grew there."

"Years later, when I returned to the lake, I noticed that the tracks of 25 moose left the water and returned to it, but though my companions and I searched all around the lake, there were no tracks leading away into the bush," the Indian said. "When I told my father of this, he said: 'There will always be moose in the lake.'"

### IN THE CORRAL

Here we see Freddie Bartholomew trying out the new horse given him by his Aunt Cissy. Despite his English birth, young Freddie seems all in favor of the costume of the American west for riding purposes.

## Many Secure Swiss Refuge

Switzerland has become a refuge for thousands fleeing from Germany and France, many of whom are trying to pass through Italy while the latter remains neutral.

In an effort to control the flood the Swiss Federal Council ordered that all foreigners must have a Swiss visa and report to the police within 24 hours of arrival to obtain identity cards.

Former King Alfonso of Spain last week was with Spanish monarchist leaders at a hotel in Lausanne, while former Queen Victoria Eugenia was staying with friends at a villa in the same town.

The Aga Khan and the former president of Brazil, Dr. Washington Luiz, also were at Lausanne.

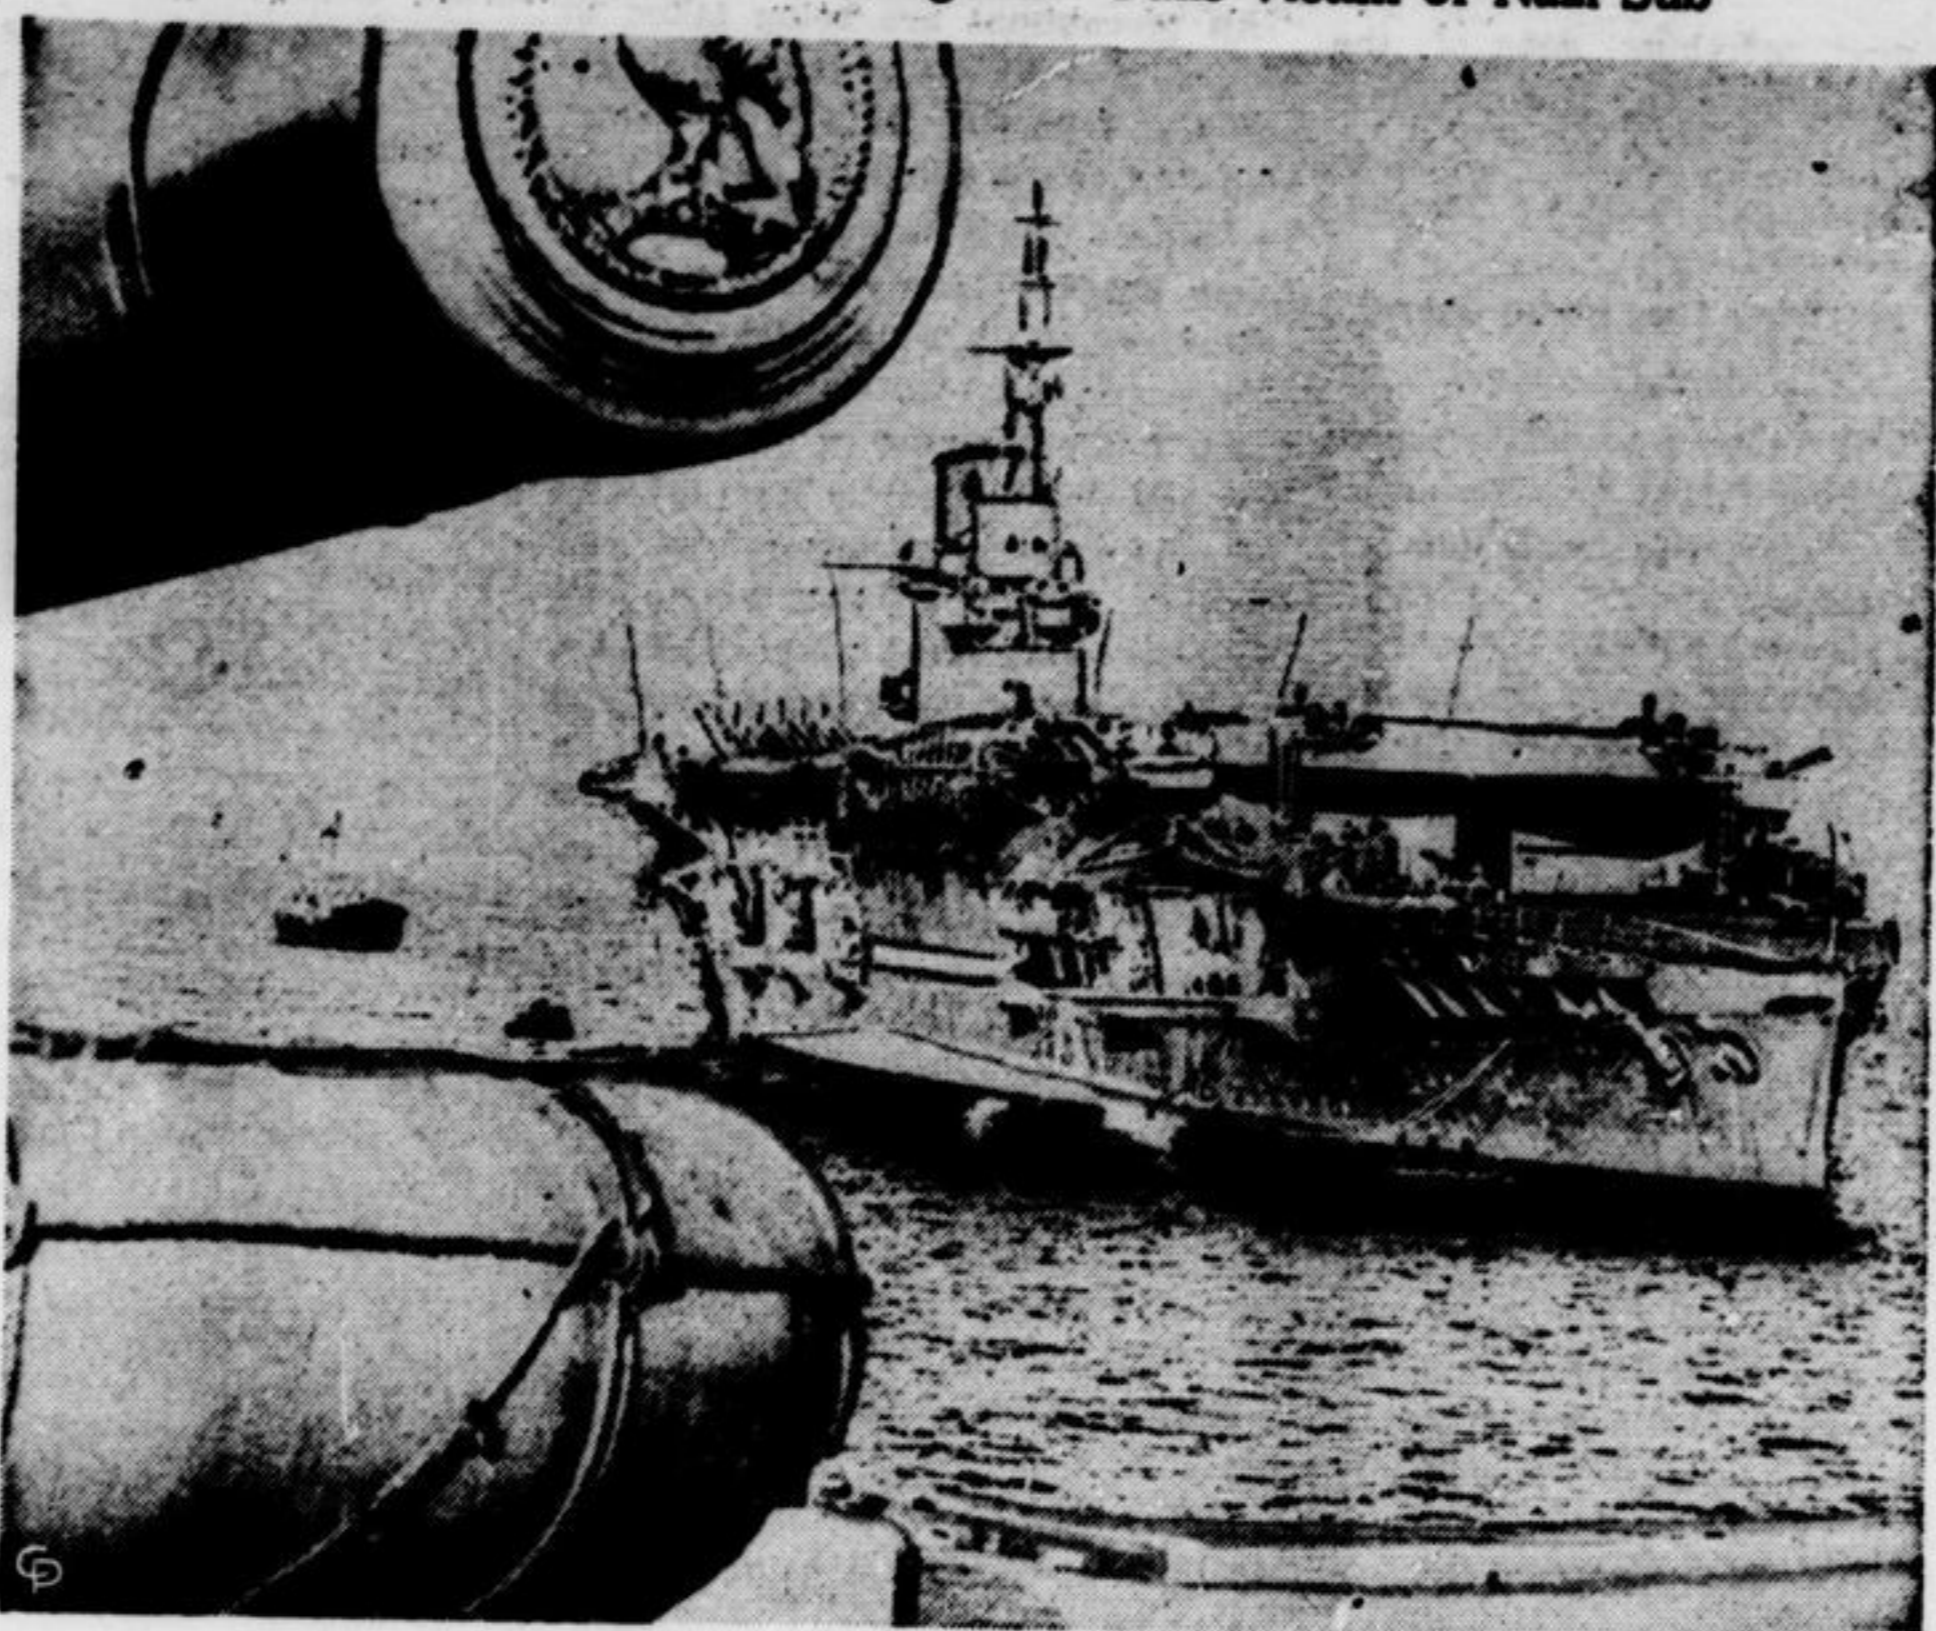

Ignace Paderewski and his sister, Madame Wipkonska, remained at the Villa Riord at Bossom, near Lausanne, where the former Polish premier followed the war by radio.

## Highway Sinks At Lunchtime

A section of the Devon Road, 45 miles west of Port Arthur has sunk 14 feet and water in two very small lakes beside the road simultaneously receded 18 inches. Department of Highway officials report the road section 150 feet long and 20 feet wide, is under 11 feet of water. Highway Department engineers said they had no explanation for the phenomenon.

Men were working on the road widening it and adding gravel, but were eating lunch when the road disappeared.

## British Aircraft Carrier "Courageous" Falls Victim of Nazi Sub

H.M. Aircraft Carrier, Courageous, was torpedoed and sunk by a German U-boat according to a statement issued by the British Department of Information. More than 500 lives were lost in the sinking of the Courageous, which usually carried about 1,200 men. Other naval craft in the vicinity rushed to the scene and it is thought that the submarine responsible for the sinking was also sent to the bottom. The Courageous is shown here in a picture from the deck of H.M.S. Rodney, one of whose 16-inch guns is in the foreground.

## Sunday School Lesson

### LESSON 1

#### THE INFANCY OF JESUS

Matthew 1 and 2

Printed Text, Matt. 2:13-23

Golden Text.—And they shall call his name Immanuel; which is being interpreted, God with us. Matt. 1:23.

#### THE LESSON IN ITS SETTING

Time.—The time of our Lord's birth is still a matter of dispute, but by many it is placed in December, 5 B.C. The visit of the wise men probably took place in February, 4 B.C.

#### The Flight into Egypt

Matt. 2:13. Now when they were departed, behold, an angel of the Lord appeareth to Joseph in a dream, saying, Arise and take the young child and his mother, and flee into Egypt, and be thou there until I tell thee; for Herod will seek the young child to destroy him. 14. And he arose and took the young child and his mother by night, and departed into Egypt; 15. and was there until the death of Herod; that it might be fulfilled which was spoken by the Lord through the prophet, saying, Out of Egypt did I call my son.

The prophecy here quoted is found in Hos. 11:1. When God is telling the story of his love to Israel, he says to them: "I loved you and brought you out of Egypt. Egypt to you was a place of oppression, the place of slavery." There was a great exodus, and he led the exodus out of Egypt. Now, four hundred years after the voice of prophecy, a child is born, the child upon whom all the hopes of God should rest, and therefore the hopes of men. The child shares the result of the sin of his own people, and is driven by the corruption of Israel (which resulted in the Edomite Herod being on the throne) into Egypt. As of old, God loved Israel when a child, and brought it out of Egypt, so his love centers still upon the king who is yet to build a city and establish a nation, and he also shall come out of Egypt, and coming out shall lead the exodus with others following.

#### Slaughter of the Babes

16. Then Herod, when he saw that he was mocked of the Wise-men, was exceeding wroth, and sent forth, and slew all the male children that were in Bethlehem, and in all the borders thereof, from two years old and under, according to the time which he had exactly learned of the Wise-men.

17. Then was fulfilled that which was spoken, through Jeremiah the prophet, saying, 18. A voice was heard in Ramah, weeping and great mourning, Rachel weeping for her children; and she would not be comforted, because they are not. Herod's massacre of the babes of Bethlehem of course did not achieve its object. The prophecy referred to here is to be found in Jer. 31:15. Rachel is introduced here to represent the common grief of Israel, at the cruelty of Nebuchadnezzar several centuries before.

#### Return to Nazareth

19. But when Herod was dead, behold, an angel of the Lord appeareth in a dream to Joseph in Egypt, saying, 20. Arise and take the young child and his mother,

## Tourists Keep Hotels Crowded

### Thousands From U. S. Make Trips To Canada And Not To Europe

Hotels and tourist homes in Canada are benefiting as a result of the war in Europe. Thousands of American tourists, who rarely visit either Britain or Continental Europe in the summer have now decided to confine their holidays to the American side of the Atlantic.

In consequence hotel registrations, which ordinarily show a great drop immediately after Labor Day and the commencement of school in the United States, are still very numerous. Staffs of city hotels are being kept on at full summer strength.

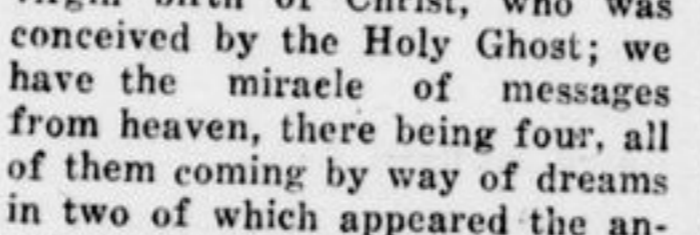

Washing eggs is not advised; water removes the "bloom" protecting the shell.

Pears, more than any other fruit, are affected by temperature changes, temperature being held to be the most important single factor relating to their handling, particularly in cold storage.

In these two chapters of Matthew we have the miracle of the virgin birth of Christ, who was conceived by the Holy Ghost; we have the miracle of messages from heaven, there being four, all of them coming by way of dreams in two of which appeared the angel of the Lord himself; there is the miracle in nature of the star that guided the wise men to Bethlehem; and there is, finally, the great miracle of fulfilled prophecy, five prophecies being referred to in these two chapters, one from Isaiah, one from Micah, one from Hosea, one from Jeremiah, and one a summary of the teachings of all the prophets concerning the humiliation attending the birth and residence of the Savior. Heaven sends for the accomplishment of God's purpose in this event the Holy Spirit, the holy prophetic writings, the angels, the star.

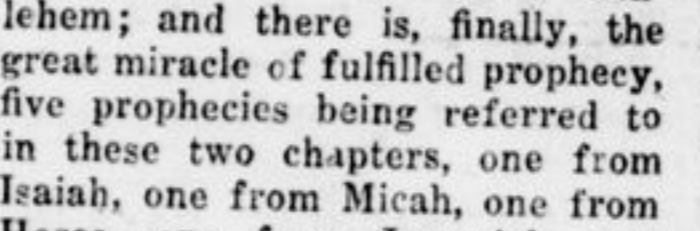

Caplan, on Sunday, October 1st at 1:30 p.m. over CBL.

## Canadian Military Leader

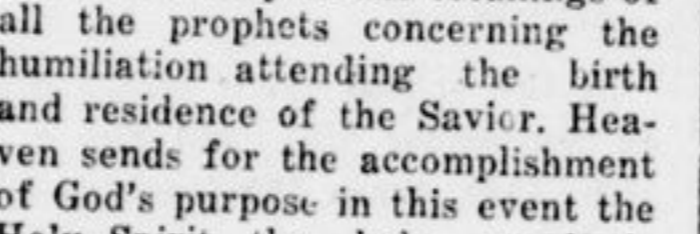

Major-General T. V. Anderson, Chief of Militia Staff of Canada

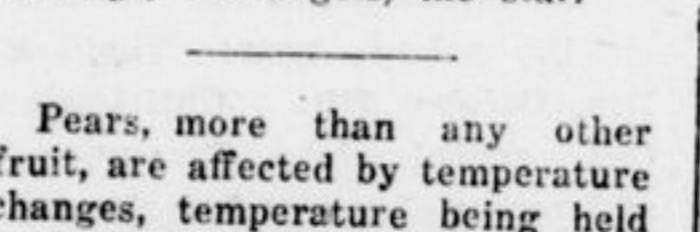

## POP—Impractical

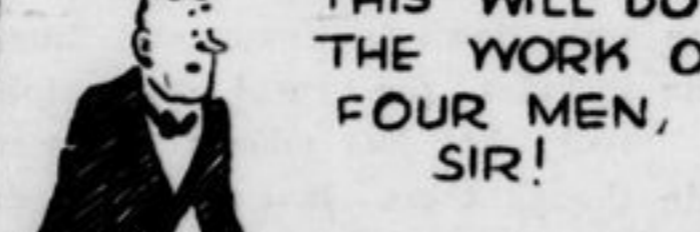

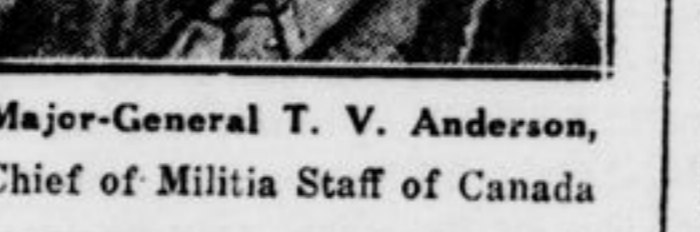

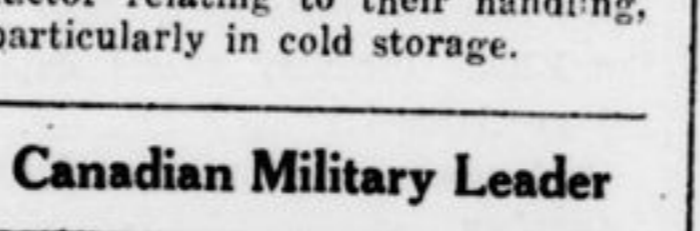

THIS WILL DO THE WORK OF FOUR MEN, SIR!

WELL, I'VE ONLY GOT WORK FOR THREE MEN —

— SO THE THING WOULD BE WASTING ONE MAN'S TIME!

## Medical Science Slowly Mastering Many Diseases

### Death Rate Has Been Lowered Considerably in the Past Half Century

That the progress of science during the last fifty years has been of real benefit to mankind is now shown by a review recently given by Sir Edward Mellanby, Secretary of the Medical Research Council, England. Even in the year 1900 typhoid fever killed over 5,000 people in Great Britain. Nowadays even a mild epidemic causes a public scandal. The last fifty years has, in fact, witnessed a series of triumphs in the medical field about whose value to society as a whole there can be no doubt whatsoever.

Not so very long ago pulmonary tuberculosis was responsible for nearly 3,000 deaths annually in every 100,000 of the population. In 1937 there were only 690 deaths per 100,000. Diphtheria is being rapidly overcome by suitable preventive inoculation.

The death rate in many large American and Canadian towns has been reduced to minimal proportions; and in Hamilton, Ontario, a town of 175,000 inhabitants, not a single case has been diagnosed in the last five years.

### Discovery of Insulin

In the field of bio-chemistry also there have been equally beneficent advances, says Sir Edward Mellanby. The discovery of insulin has saved thousands of lives in the case of diabetes and enabled many more thousands of sufferers to lead comfortable and active lives. The same is true in respect of pernicious anemia, thanks to the discovery and application of liver and certain stomach extracts.

More recently still the discovery of the sulphanilamide group of the compounds has brought a new and already proven weapon into the field against a large group of bacteria-produced diseases.

### Surgery

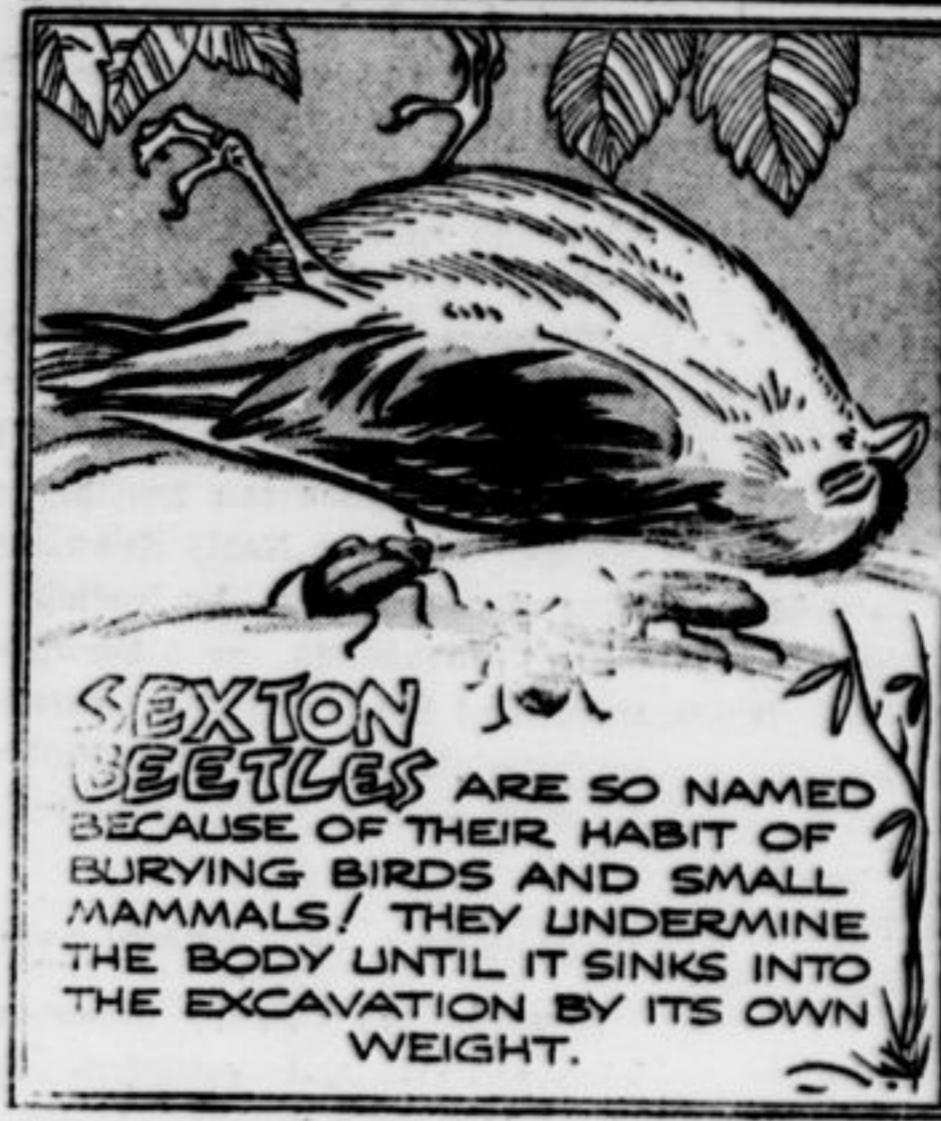

Again, in the field of surgery, particularly of the brain, chest and thyroid, there have been similar triumphs. Tumours in portions of the brain which, fifty years ago, would have been considered as wholly inaccessible, are today being successfully removed with restoration to health and normal life on the part of the patients concerned.

## Canada's Plane Output Soars

Production of the aircraft industry in Canada in 1938 amounted in value to \$6,927,105, a sharp increase compared with \$1,730,724 the previous year, the Dominion Bureau of Statistics reports.

There were 13 aircraft industry factories compared with eight in 1937, and their production of aircraft was 282 compared with 110 in the previous year. Value of aircraft produced was \$1,001,622, compared with \$1,461,626. The industry employed 1,617 persons compared with 608 in the previous year, and the payroll was \$2,093,717 compared with \$691,924.

## THIS CURIOUS WORLD

SEXTON BEETLES ARE SO NAMED BECAUSE OF THEIR HABIT OF BURRING BIRDS AND SMALL MAMMALS. THEY UNDERMINE THE BODY UNTIL IT SINKS INTO THE EXCAVATION BY ITS OWN WEIGHT.

## GOLFER

PLAYING FOR ONLY TEN CENTS ON THE FIRST HOLE, AND LOSING... THEN DOUBLING THE BET ON EACH SUCCEEDING HOLE, AND LOSING, WOULD BE OUT \$25,214.30 IN AN 18-HOLE MATCH.

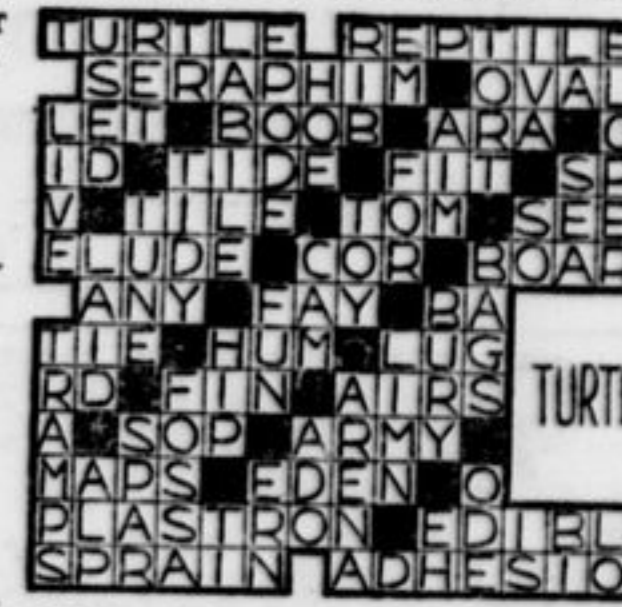

SEXTON beetles have an acute sense of smell, and quickly locate any dead creature lying about. After burying the body, the female beetles lay their eggs in the decaying flesh, so that the emerging young may be born amidst an ample food supply.

## AIRPLANE BUILDER

### HORIZONTAL

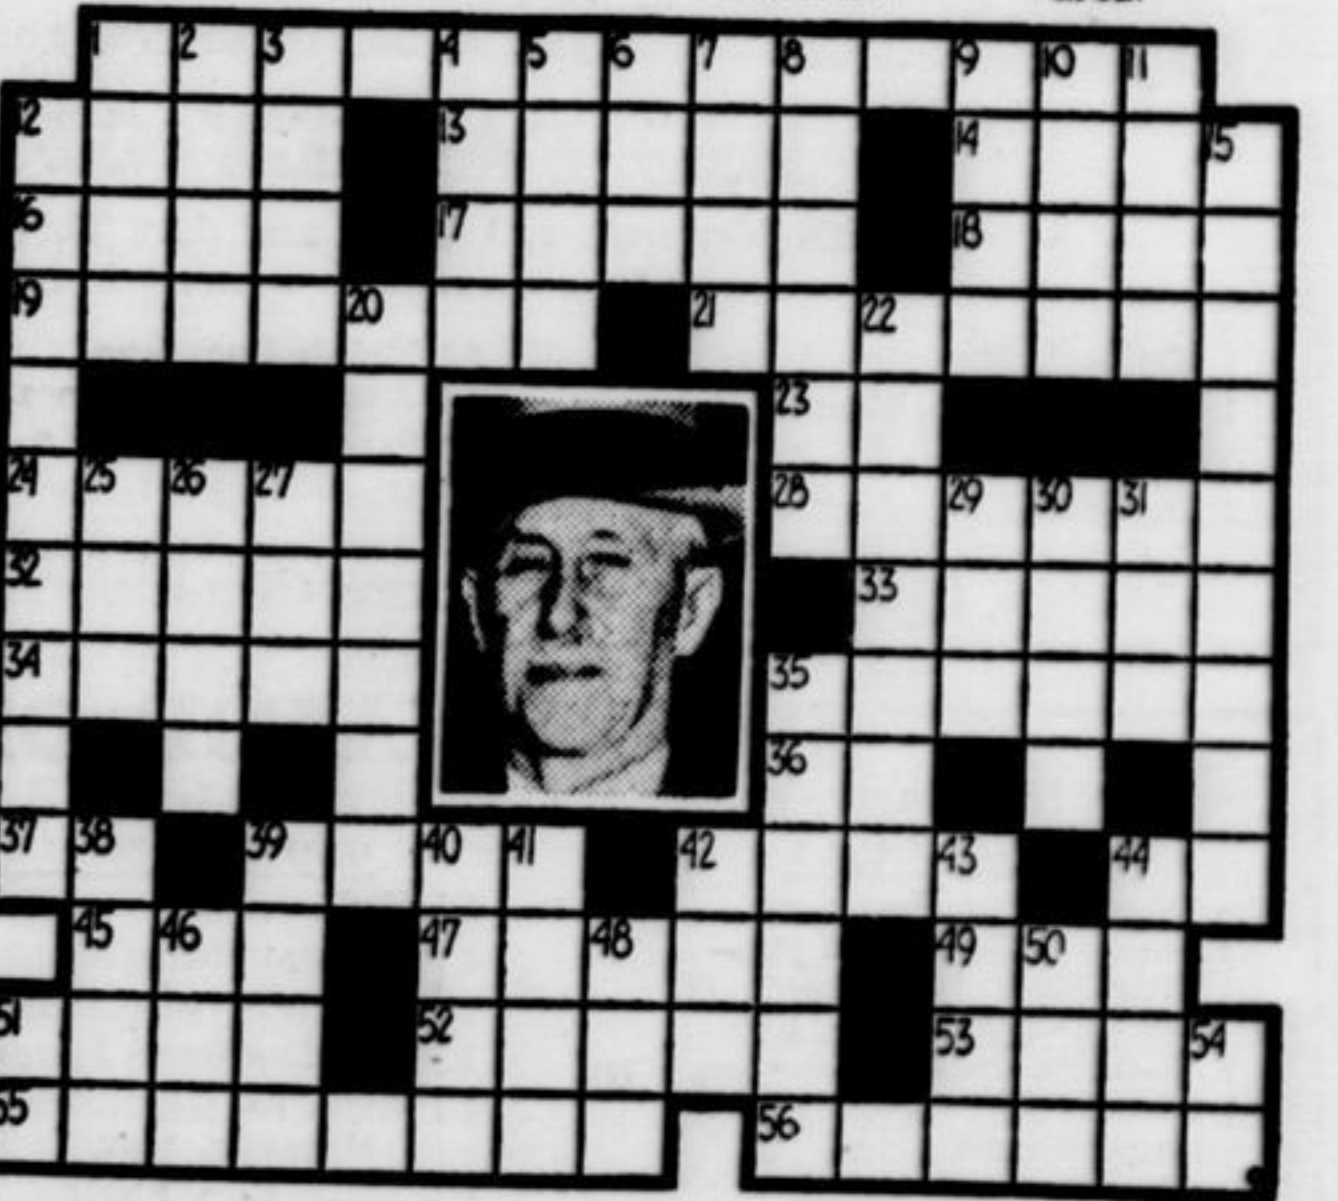

- Pioneer flyer and airplane builder
- Swift canoe
- Weird
- Corvine bird.
- Branches
- Concerning
- Person opposed
- Titanic iron-ore
- Most obscure
- Lava.
- Schoolmasters
- Shed.
- Apathetic.
- To lixivate.
- Thick soup.
- Midday sleep.
- Type measure.
- Electrical unit
- Land right.
- Units of energy.
- All right.

### Answer to Previous Puzzle

### VERTICAL

- Planes of today are built on the same — as his plane
- His first flight was at —
- In lieu
- Posting
- God of sky
- Jolt
- Rage
- Born
- Yarn spindle.
- To perform.
- Boatswain.
- Heavenly body.
- To eject
- Vestment
- Falsifier.
- To do wrong.
- Half
- Smother than.
- Gale.
- Pertaining to a rete.
- Metric weight.
- Johannycake.
- Children.
- Measure of area
