PLATINUM METALS

Canada produces more than half the world output of platinum metals. The successful development of the copper-nickel mines near Sudbury, Ontario, has been largely responsible for the increased Canadian production of metals of the platinum group, as the ores of these mines contain a notable amount of platinum metals and are the chief source of the Canadian output.

A few ounces are also obtained from the rivers of British Columbia and small quantities are recovered as an impure residue in the refining of gold at Trail, B.C.

Since 1934 Canada has been the leader in the world's production, displacing Russia, which country previously held first place. The other principal producers are Russia, Colombia and South Africa.

During the past fourteen years the price of platinum has fallen considerably, decreasing from about six times the price of gold to approximately the same value. This reduction in price together with re-

search on the possibilities of platinum as an industrial metal has brought about a greater use and increased demand for platinum.

Due to its high melting point and specific gravity, its freedom from oxidation at high temperatures, and its comparative immunity to acid, platinum is finding increasing use in the industrial field. In the electrical industry it is used extensively for contact points, power switches, thermostats, resistors for high temperatures, electric control apparatus and clocks, while the chemical industries use platinum for laboratory equipment for anodes, and as a catalyst in the production of sulphuric, acetic and nitric acids. Rayon firms use platinum for spinnerets, glass manufacturers use it as a dye, and architects employ it as a plating material. A considerable demand for platinum and platinum metals has been developed in the armament industries, where it is used for instruments, for reflectors and lamps for searchlights and for contact points in aeroplane engines.

In the evening Mr. Hirtle spoke on the influence of parents and leaders and workers in the church on the community, and used Joshua's decision, "As for me and my house, we will serve the Lord."

Presented With Bible. At the conclusion of the morning service the members of the Young Peoples' Society gathered in the schoolroom and presented D. J. Firth, Vice-President of the Provincial organization, with a bible. F. Ritchie and Margaret Edge gave the address and made the presentation.

Short prayers were offered by Mrs. Hepburn, Mrs. Derby and Mrs. Honeyman

PACIFIC SALMON Friday is fish day pretty much all over Canada so that we ought to know a few facts concerning our Canadian Salmon.

The most valuable of all Canada's food fishes are the Pacific salmon which are taken in the coastal waters and rivers of British Columbia. There are several species—Spring, Sockeye, Coho, Steelhead, Pink and Chum—and the annual value of the British Columbia salmon catch, when processed and marketed, runs from twelve to fifteen millions of dollars.

The bulk of this production is canned—the leading variety as to quality being the Sockeye, with Coho, Chum and Pink next in order.

Pacific salmon fresh or frozen is available at all times, but the season when they are taken in largest quantity is from June to October. The fish vary much in size. The Spring salmon is the largest and averages 20 pounds, Sockeyes 5, Cohoes 6 Steelheads 7, Pinks 4, Chums 8.

Now this is important to remember. While the general demand is for the red-meated salmon, the paler varieties are just as palatable and similar in high food value. The Pacific salmon, according to

Only four of the regiments in Military District No. 2 have been mobilized to date and the Grey-Simcoe Foresters are one of the units which have received no orders to undertake recruiting.

In Military District No. 2 the four units which have been called out are the Royal Regiment of Canada, the Forty-Eighth Highlanders, the Toronto Scottish (Machine Gun) and the Royal Hamilton Light Infantry. It appears that the units picked were those ranking highest in the last Infantry Association tests.

An amusing little story reveals how narrowly the Grey-Simcoe Foresters missed the coveted mobilization orders. At the last military camp, where Infantry Association tests were held, the Grey-Simcoe Foresters placed only a few points behind the Royal Hamilton Light Infantry. Their failure to place fourth is blamed by the officers on the poor showing in a department in which the sergeant usually in charge of the drill was absent. He was called away owing to the illness of his wife and when the tests were held in his absence this department of the Regiment received only half the number of marks it usually scored. But for the illness of a sergeant's wife, the Grey-Simcoe Foresters might be mobilized today.

Mobilization has been practically completed for all four units in Military District No. 2 and for this reason the Perth Regiment (Machine Gun) is being permitted to seek recruits here, although Grey County is not in its territory.

Major A. A. Kennedy feels certain that the Grey-Simcoe Foresters will be one of the regiments which will be mobilized in the next draft. Should an expeditionary force of two divisions be sent overseas, two more divisions will have to be recruited immediately for home defence.
