## Warning Given On Production

Ontario Agriculture Minister Favors Reasoned Plan For Farmers - Provide Against Big Surplus

A warning to farmers against headlong rush into a hasty and unreasoned program of increased production was sounded last week by Hon. P. M. Dewan.

The Ontario Minister of Agriculture urged farmers to study closely "those commodities for which there is likely to be an inereased demand," and suggested that greater production of bacon, mutton and wool "will be quite safe."

#### More Bacon Needed

Mr. Dewan said that Canadian bacon producers by no means reached the quota allotted in the British market during peacetime, and said the demand will be greater during the war. During a recent trip to England he met Canadian bacon importers who "seemed pleased with the manner in which the quality had been improving." They asked that the quality be further improved.

"I think, therefore, it is quite safe to suggest an extra brood sow on every Canadian farm," he said. Sheep-Raising Profitable

The raising of sheep can well be increased, for they provide both food and wool, two commodities of special value in days of war. Sheep are easy to keep, and skeep and wool furnish quick rash returns.

Concerning beef cattle, Mr. Dewan said that farmers would do well to maintain their operations on a normal basis until requirements of the war are better known

## **Army Great Coat** Has New Pattern

Trench Coats Out of Fashion For Canadians; New Mackintoshes Also

A new great coat is prescribed for officers in the Canadian Active service Force by regulations 'ssued at defence headquarters. Trench coats are no longer authorized and the short "British warm" coats may not be worn on parade except by general officers, brigadiers and officers of the foot guards.

Plain Sleeve, Cape Collar For all other officers the new great coat foll vs the lines of the former great coal except that it has a plain sleeve without the double cuff and a plain cape coilar instead of the mesent stand-andfall collar. This permits the coat to be worn open at the neck or buttoned over to cover the neck. The inverted pleat at the back is now omitted.

Officers possessing the lent style great co ' may continue to wear it. The same cloth winter cape authorized for other ranks will be worn by officers with their badges.

While trench coats are not authorized a water proof coat of Mackintosh pattern cut on generous lines with a detachable fleece lining may be worn but watches of rank are not worn on water proof

## Canaries Have Big Appetites

People who are very dainty are sometimes said to have only "the inpetite of a canary."

A scientific sceptic recently resolved to find out exactly what the appetite of a canary is. He weighed a canary and found it to pull down a little more than half an Junce. He also weighed its food, and found that the bird eats thir-.y-two times his weight every month, or actually more than his weight every day, showing that a pig is really a light eater as compared with the canary.

King George VI and Queen Elizabeth Pay Visit to South Africa House

A smile familiar to hundreds of thousands of Canadians is that of Her Majesty, the Queen, seen here with the King as they paid a visit to South Africa House in London. On the same round of visits they also stopped at New Zealand House and Canada House. Both the King and Queen have been active in taking a personal interest in the empire's war measures since the outbreak of hostilities.

Moreover, the effectiveness of the substance now establishes "the tremendous possibility" of transplanting organs from one part of an animal's body to another for physiological study.

### IMPROVES ADDISON'S DISEASE

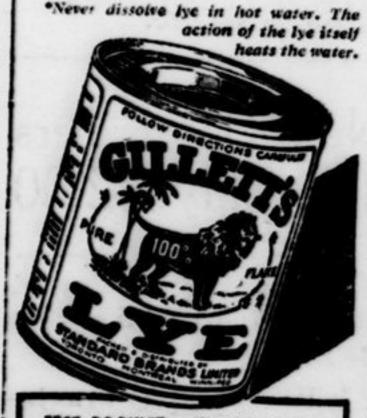

Striking evidence that a new synthetic hormone causes remarkable improvement in persons having Addison's Disease, a disorder of the adrenal gland, usually fatal, is reported.

Hope of finding an effective treatment for the adrenal insufficiency was aroused when research workers isolated crystalline substances from the adrenal gland and then, about two years ago, made the synthetic product. It has the chemical name "esters of desoxycorticosterone."

4.-When a woman invites another woman for luncheon in a public place, who should give the

things, clothes, food, etc.?

5.-Isn't it nice for a person engaged in any kind of sport or game to praise his opponent when the latter makes an exceptionally good play? 6 .- Is a woman's second wed-

ling as elaborate as her first? Answers

1 .- Yes, if he is conceited enough to think she will embrace such a wonderful opportunity. Otherwise, he can tell her that he would like to write to her, and if he possesses the least intuition he can tell whether or not she seems pleased with the idea. 2 .- No. Merely say, "No, thank you." Such expressions as "I am already too full," or "I feel as though I would never want to eat again," are not good form. 3 .- Yes; it is very poor taste to do so. 4 .-The guest should give her order to her hostess and the latter gives both orders to the waiter. This same rule applies when a girl is dining with a man. 5 .- Yes. A good sportsman will be quick to do so, and it is a sure way to become popular. 6 .- No. The specific arrangements vary according to the age of the bride and the attitude of family and friends toward the second marriage.

## Huge Bull Elk Sent Back Home

Students of Collingwood Collegiate are talking about a great new line plunger who wasn't eligible for their football team. The high school boys turned out recently to assist Provincial Constable . A. Rowe in the capture of a huge bull elk, roaming in the district. The students formed a horseshoe barrier, but several times the elk lowered his antlers and plunged through. Finally, the youths held the line and the elk was captured.

Later, when he was being tied and loaded aboard a truck for shipment back to the Bruce peninsula game preserve, 100 miles northwest, he attacked Rowe, tossed him from the truck with his antlers. The constable received only slight injuries.

## How Can 1? BY ANNE ASHI EY

Q .- How can I mix a good skin

A .- Mix 1/2 pint alcohol, 2 oz. spirits of camphor, 2 oz. spirits of ammonia, 5 oz. sea salt. Add enough boiling water to make 1 quart. Put into a bottle and shake until the salt is dissolved. Always shake well before using. Rub with this tonic after the bath. It greatly aids in banishing fatigue. Q .- How can I clear water that

has a milky appearance? A .- It can be quickly cleared by dissolving a small piece of rock alum in a pint of boiling water and using this much to a tub of water.

Q .- How can I prevent the inside of the silver-plated lids of my mustard and horseradish pots from turning green? A .- Coat them with a thin lay-

er of paraffin. Q.—How can I prepare a soup

that isn't too greasy? A.—If a large lettuce leaf put into the soup, it will insure a greaseless soup. Put in the leaf when about ready to be taken from the stove, and remove it before you serve. You will find that nearly all the excess grease will collect on the lettuce leaf.

Q .- How can I make putty? A .- Mix linseed oil with sifted whiting to the proper consistency.
