

Let's Go A New Travelogue by The TOLL BROTHERS

With the best of still and motion-picture equipment, the Toll Brothers spent sixteen adventure-packed months exploring and photographing in Central and South America. Where there were roads, they hitch-hiked. Where there were no roads, they forayed on foot and mule-back, across mountains and through jungles where white men had seldom been. A story of youth—danger—romance.

ARTEMESIA WILL NOT HAVE DEPUTY REEVE

Artemesia will be without a deputy reeve for 1940, due to the fact that there are not enough voters in the township to qualify so that a second representative would be enabled to sit in county council. It takes one thousand voters to qualify for a deputy reeve and Artemesia has only 982, 18 short. Osprey township has 1,002 voters on its list, two over the required number, so that they are assured of two men at the county council.

No Objectors to Restricted Area

Declaring that the fact that up to the present time, no Grey County farmer has raised objection to having his herd tested in accordance with Restricted Area regulations was a real credit to this section of the county, T. Stewart Cooper Agricultural Representative for the county of Grey spoke to members of the County Council at their meeting on Thursday afternoon. His department was, he declared, making a determined effort to have the entire County checked before the end of the year. April 1st, 1940, and three extra veterinarians were being sent to Grey to supplement the three already at work.

A FACT A WEEK ABOUT CANADA

THE VAST BRITISH EMPIRE

The war in Europe has been in progress for about three months and important things have happened. Poland has been destroyed. Russia has entered the devastated land and shares with Germany the spoils of that country. Russia has made moves towards the Baltic and Germany is now endeavouring to repair the situation on the west front where France had entered the German territory almost all along the frontier from Switzerland to Luxembourg. British troops are in France and the British navy is carrying out successfully a campaign against undersea raiders. In the air it is known that many Canadian lads are playing a heroic part and because of this fact that arm of the service up to now has captured the imagination of the Canadian folk.

During peace time we have not thought very much about the breadth and strength of the British Empire which is united with the French Empire in the defence of liberty, but now that we are at war, it's being brought home to us more and more that this British Empire is embattled more strongly than any force the modern world has ever known.

The area of the British Empire is approximately 13,318,000 square miles, with a population of 493,000,000. The area of the whole world is 51,166,000 square miles, and the population 2,025,000,000. Great Britain, therefore, owns nearly one quarter of the surface for the globe and considerably more than one-quarter of the population of all nations. The remarkable thing about the Empire is that it consists of a Common-

wealth of free peoples who govern themselves, Canada being a notable example of the success of the British parliamentary system. The area of British territory by continents is as follows: Europe 120,791 square miles, Asia, 1,988,429, Africa, 3,832,275, North and Central America and West Indies 3,991,262, South America, 95,098, Oceania, 3,289,928.

No Snow Plowing on Co. Roads in Grey

Grey County will, during the winter of 1939-40, again adhere to her usual policy of doing no snow plowing on County roads, it was decided after lengthy discussion at Friday afternoon's session of Grey County Council in Owen Sound. This county, one of the few remaining who do no winter work on their county roads, has found the issue a lively one on every occasion upon which it has come before Council; however thus far, suggestions for winter plowing have not enjoyed the approval of the majority.

The issue was raised on Friday when Reeve S. M. Patterson of Egremont, moved the adoption of a clause in the County Roads Committee report, recommending that Grey follow her usual policy with regard to winter work.

A deputation from the Township of Osprey, headed by Mr. Long, was present, and their leader addressed members of the Council. Osprey Council were very much concerned about the keeping of a ten mile stretch of county road, that represents the main traffic artery of that part of the county. Osprey was declared, without the services of a regular doctor, and in mid winter with roads plugged fast, people taken seriously ill could not possibly receive prompt attention. Some parts of the township, he pointed out, were near enough to other centres that doctors could be summoned, but he added "there in the north east, if we happen to get sick, it's just a case of God help us."

Farmer, he claimed, could not get their stock out by truck, as there was no provincial highway touching the township on any side, and generally speaking, with the county roads blocked with snow, the situation was a serious one. He estimated that the road could be kept open for \$50.00 per mile.

Reeve Arnold Hutchinson, Osprey, who has devoted a good deal of time and energy towards gathering information about winter road work, wanted the Council to take advantage of the scheme whereby the Township paid 25% costs, the county paid 25%, and the remaining 50% was stood by the province. He did not feel that such an arrangement would prove a heavy drain on County Council funds, as there were few municipalities in which the need of winter plowing was so great as it was in Osprey, and there would not be many to pay extra for this service.

Reeve S. M. Patterson of Egremont, Road Committee chairman however pointed out that the allotment of that committee at the present time, did not any more than cover expenses incurred in keeping summer roads in shape. Any extra drain through winter work would stand in the way of necessary improvements, and he, speaking for his committee, could not approve of the idea. Deputy Reeve Thomas Randle of Meaford pointed out that the county at the present time had no equipment for winter plowing, and added his objection to that of Reeve Patterson.

Reeve D. J. McDonald pointed out that there was a war on at the present time, and if estimates had been barely sufficient to permit needed work this summer, they would fall short next year in face of steadily increasing costs. To start winter work of any kind was going to let the Council in for an expenditure greater than they might estimate, for it was impossible to tell how far the work would have to be carried.

Reeve Alfred Down of Flesherton declared that in his estimation, winter roads were every bit as essential as summer roads. Reeve Austin Ball of Hanover declared that it would sooner or later be necessary to begin work of this kind, and he suggested that the Osprey road be kept open for experimental reasons, to determine, if possible, the cost of such a venture.

It was felt though, that it would be unfair to single out any one township for work of this kind, Warden John A. Davis, reeve of Artemesia, pointed out that other counties who do winter plowing had found that the frost played havoc when the protecting layers of snow were removed, and additional expense was incurred in the spring on this account.

After over an hour's discussion Reeve William Riley of Meaford, who had taken the chair while the Council was in committee of the whole on the question, put it to a vote. By a slender margin the original recommendation of the road committee that no winter work be done, was carried.

OBITUARY

MR. G. L. LEDINGHAM

After a long illness, Mr. George Leask Ledingham passed away in a Saskatoon Hospital at 5.30 on Sunday morning, October 29th, 1939. His wife and most of the family were at his bedside when the end came.

The body was brought to Hawarden on Monday and the funeral was held on Tuesday. A private service held at the house at 1.30 when Mrs. Montour sang a solo.
