Thos B Grace when Mary O'Hanley, daughter of Mr. and Mrs. Malcolm O'Hanley of Glenelg, became the bride of Otto Kleist, son of Mrs Fred Kleist and the late Mr Kleist, of Markdale, and Catherine O'Hanley, sister of Mary became the bride of Laughlan (Kidder) McInnis of Markdale, son of the late Mr and Mrs Daniel McInnis of Priceville. Later they proceeded to London where Laughlan McInnes is attached to the Army Medical Corps. War and the demands of the Canadian Active Service Force will lead to an enlargement of the summer training program of the non-permanent active militia in 1940.

Generally the militia units not already mobilized into the active service force will carry out a greater training program than in peacetime and one more calculated to fit their members to become specialists in the active service force, if and when required.

Thus, at training camps all across Canada next summer the militiamen will learn more of anti-gas procedure, and anti-aircraft gunnery and field-craft training than in other years and less of ceremonial drill.

There will be less leg-work and more lectures, less shouldering of arms and more shouldering of shoulders less marching in step and more creeping through the grass.

With the formation of the active service force many units in the non-permanent militia were asked to turn in some of the equipment, including rifles, uniforms and camp equipment. In the early weeks of the war every item in some lines of equipment was needed for the use of units mobilized in two divisions and then recruiting up to war strength.

Now the active service force units are being issued new equipment and by the time the non-permanent units go to camp next summer they will have ample stores of equipment for the number of men they will be authorized to train.

Somewhere in Ontario, before this hour has ticked away, a little child will be stricken or injured—Pneumonia, Poliomyelitis, an automobile accident, or one of a hundred or more diseases or accidents will have found a victim. The life of this little child may depend on the PROMPT ACTION of The Hospital for Sick Children in Toronto. Centralized here under one roof is every facility known to medical science for the effective prevention and cure of childhood disease and deformity. More than 9,000 little children were treated here last year. ONE-THIRD of these children came from Ontario Municipalities outside the City of Toronto. Most of them were children of parents unable to pay the low Public Ward rates. But they were not denied any treatment or care that would assist in their recovery. This humane policy resulted in a deficit of \$90,000 last year. We appeal to responsible, charitable Ontario citizens for donations to help us meet this deficit and for practical encouragement to continue and expand this work next year. Please . . . the life of a little child may be saved because you were kind and benevolent today. Send your donation, large or small . . . NOW.
