Find Prosperity Lengthens Life

People Possessed of Wealth Live Longer, Research Bureau Reports - Poor Die Young

Possession of wealth lengthens life, according to Ralp Carr Fletcher, head of the research work for the Federation of Social Agencies of Pittsburgh and Allegheny coun-

Fletcher reveals that studies have shown conclusively that people living in the slums die earlier than those living in prosperous neighborhoods. The reason, he says is the difference in environment and health conditions.

IMPROVES CONDITIONS

The average man residing in the prosperous section of a city may expect to live 61 years, while his brother in the so-called "blighted districts" can hope for only 51 years of life.

Fletcher believes the solution to this problem lies in raising health, social and economic standards in the poorer sections of town.

"It is reasonable," he said, "to expect that improved economic and social conditions with adequate public health measures in the blighted areas would raise the expectancy of life in these districts in a parity with that in the more prosperous areas."

Leaflet Bomber

A member of the crew of a British bembing plane demonstrates the method of dropping propaganda leaflets on enemy territory. The leaflets are slipped through a chute in the bomb-bay. They scatter as they fall. These planes recently dropped their verbal bombs on Vienna, Prague and greater Germany.

Gardening

THREE DANGERS Professional gardeners warn against three things, planting too deeply, too early and too close. Nasturtiums, peas, beans, corn and such large seeds should go in about an inch or so and be planted at the least three or four inches apart. Tiny seed like alyssum, poppy and onion is merely pressed into the soil. Before sowing mix with a little sand to help spread the sowing more evenly.

COMBINATIONS

One can do wonders with flowers alone, but still more amazing results will follow where we combine flowers skillfully with grass, winding walks, shrubbery and bits of stone work. In this combining, however, we must take care not to reproduce a jungle. Flowers and the shrubbery must not be so crowded that they become spindly and weak.

Little flowers must not be hidden by tall things like full size marigolds, cosmos or zinnias. Beds also must be so arranged that we can keep down weeds and remove fading foliage. Above all, we must remember that unless we are very skillful, it is best to use a fair amount of lash as a foreground for our flowers. Lawns are almost wital in creating garden pictures.

FIRST VEGETABLES First vegetables to be planted in the Spring are spinach, all sorts of lettuce, radish and peas.

Second planted vegetables will be carrots, beans, cabbage, potatoes and similar things. These will resist a fair amount of cold.

Tender vegetables include corn, melons, cucumbers and tomatoes. Nothing is to be gained by planting these before danger of frost is over. With most vegetables it is advisable to make at least three sowings a week or two apart in order to spread the harvest that much

Sunday School Lesson

LESSON XII THE SEPULCHRE: TRIUMPH OVER DEATH .- Matthew 27: 57 28: 15.

GOLDEN TEXT - Now hath Christ been raised from the dead, the first-fruits of them that are asleep. 1 Cor. 15: 20.

THE LESSON IN ITS SETTING Time.-Christ's burial occurred some time before six p.m. on Friday, April 7; the visit of the women to the sepulchre occurred early Sunday morning, April 9, A.D. 30.

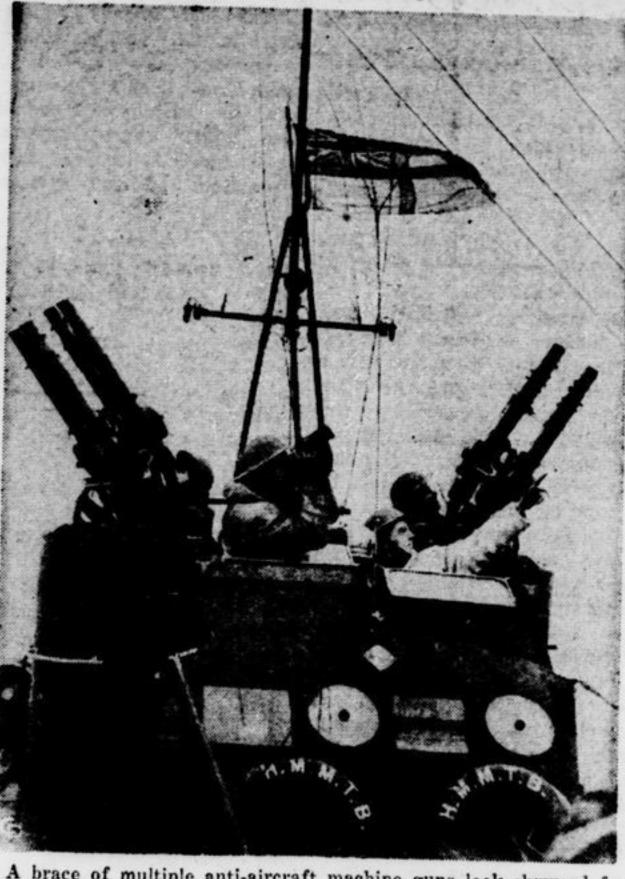

Place.-Calvary and the nearby tomb of Joseph of Arimathaea were both a short distance outside the walls of Jerusalem.

57. And when even was come, there came a rich man from Arimathaea, named Joseph, who also himself was Jesus' disciple: 58. this man went to Pilate, and asked for the body of Jesus. Then Pilate commanded it to be given up. Joseph of Arimathaea was a man of means of refined mind, a member of the Jewish Sanhedrin, and held in good repute among his fellow counsellors. It was this man with his mind already enlightened by Jesus, and his heart drawn to him, who stood under the cross of Christ. Remorse or his past shrinking smote him, he forthwith sought the body of Jesus to bury it in his own grave, prepared for his own costly burial.

Laid in the Sepulchre 59. And Joseph took the body, and wrapped it in a clean linen cloth, 60, and laid it in his own new tomb, which he had hewn out in the rock: and he rolled a great stone to the door of the tomb, and departed. The body was laid in a loculus in the tomb, formed by a slab of stone places across one side of the tomb so as to form a coffin-like recess behind it. The entombment of our Lord is a remarkable fulfillment of Isa. 53: 9, which foretold that the Messiah would make his grave "with the rich in his death."

61. And Mary Magdalene was there, and the other Mary, sitting over against the sepulchre. The Mary mentioned here together with Mary Magdalene, must be Mary the mother of James and Joses (see v. 56). These were the women who had ministered to Jesus throughout the three years of his public ministry.

Britain's Multi-Aircraft Guns Offer Triple Threat

A brace of multiple anti-aircraft machine guns look skyward from the bridge of one of the British navy's newest racing motor torpedo boats, of which Britain now has a large fleet on coastal duty. The boats, capable of great speed, are armed with torpedoes for use against surface craft; depth charges for dealing with submarines and these guns for taking care of attack from the air.

Christ And The Birds

Before the first faint hope of dawn could lay Its slender fingers on the purple sky, Christ issued from His tomb on Easter Day And passed the sleeping soldiers softly by.

The birds, so early waking from their sleep, Roused in their nests the way He went along; Knowing the promise that He rose to keep, They meant to greet their Master with a song.

He laid His fingers to His lips, and turned To indicate the guards, heads drowsy-bent, And then He smiled, but in His eyes there burned Rich pleasure at the little birds' intent.

So, long ago, Christ walked before the light In Joseph's garden, heralded by none; Watched over by the feathered host at night, He went His way. The miracle was done.

RADIO REPORTER

By DAVE ROBBINS

NEXT: TELEVISION

Television is on the way slowly but surely. In the New York area there are some 2,000 television receiver owners, with a potential audience of about 10,000. But don't let this excite you into buying a television set just yet. Did you ever consider just what television would mean??? Suppose they decide to televize a drama once a week for some sponsor like the current Monday night theatre. They'd have to get it together in a week, yet Hollywood will spend a year making a movie. If it becomes possible to get all sport activities like hockey, boxing and so on, who will go, and can the sport survive without fans to pay the shot at the box office? Television will make changes in our activities that are not even dreamed of yet.

DRAMA ON THE AIR The radio offers many excellent

dramas-but the other day while doing a little dial exploring we came on one that in our mind ranks with the Lux theatre of the air-and it had no top names in the cast either. The program was Mary, Queen of Scots, a chapter from Cavalcade of Drama, heard from CKOC at 7.30 Monday, Wednesday and Friday.

Paul Whiteman stars in an outstanding show from the CBS chain each Wednesday night at 8.30the program is as big time as Paul himself. It's heard in this part of the country from WGR.

For something entirely different you should catch Stranger Than Fiction-a truly novel five minutes-from 1120 each morning at 8.55. All the oddities from everywhere.

. . . **RURAL ONTARIO** The small towns of Ontario are going on the air . . . one each week, over CKOC, Hamilton, Thursday evenings at 6.45. Announced by the "Town Crier"

they pass before the mike in newsy review . . . happenings of interest as seen through the local newspaper, choice bits of information about the locality in question . . . Here's your chance to learn more about "Main Street", Ontario, or hear your own town achieve radio fame.

ELECTION RETURNS

Dominion election returns compiled by the Canadian Press following closing of the polls on Mar. 26 will be carried over the national network of the Canadian Broadcasting Corporation and made available to every radio station in Canada.

The broadcast service will begin at 5.30 p.m., E.S.T., and provide three-minute bulletins every quarter-hour through to midnight, E.S.T., if necessary.

To be Heard . . . March 22, CBL 7.00 p.m. CBC Singers present special Good Friday choral program . . . 8.00 p.m. CBY Stabat Mater Oratorio from Montreal . . . March 23, 9.00 p.m., CBL National Hockey League Playoff from Toronto . . . March 24, 1.30 p.m., CBL "Christ the Arisen," biblical play . . . 4.45 p.m., CBL Hart House Carillon.

Pilate, 63. saying, Sir, we rementbed what that deceiver said while he was yet alive, After three days I rise again. 64. Command therefore that the sepulchre be made sure until the third day, lest haply his disciples come and steal him away, and say unto the people, He is risen from the dead: and the last error will be worse than the first. 65. Pilate said unto them, Ye have a guard: go, make it as sure as ye can. 66. So they went, and made the sepulchre sure, sealing the stone, the guard being with them.

sees were gathered together unto

The Jewish authorities of Jerusalem apparently could not rest after Jesus was dead. Haunted by his prophetic words, in which he declared that he would rise from the dead on the third day, they went back to "late, requesting hat a guard be placed at the sepulchre. The Pharisees used political arguments to influence Pilate. They contended that, if the disciples persuaded people that Jesus had risen from the dead, they might cause a far more serious rising than had occurred at the triumphal entry, in conse-

quence that Jesus was the Mess-The Resurrection

Matt. 28: 1. Now late on the sabbath day, as it began to dawn toward the first day of the week, came Mary Magdalene and the other Mary to see the sepulchre. It was not until they were well on their way that it occurred to them to ask how the great stone, which they had seen rolled to the door, was to be removed. The difficulty, however, melted away almost as soon as it was realized. The stone was already gone.

Movie-Going Jury Humored

"May we have the evening off?" a juryman asked at Mon treal last week when the trial of Romeo Foucault on a charge of murder was adjourned for the day.

"I suppose you want to go to the movies," said Mr. Justice Wilfrid Lazure.

"Yes" the juror said. "Well, if the police captain can pick a picture that is fitting for you to see, you can go," the judge decided after the request was discussed with

2. And behold, there was a great earthquake; for an angel of the Lord descended from heaven, and came and rolled away the stone, and sat upon it. 3. His appearance was as lightning, and his raiment white as snow: 4. and for fear of him the watchers did quake, and became as dead men. 5. And the angel answered and said unto the women, Fear not ye;

for I know that ye seek Jesus, who hath been crucified. 6. He is not here; for he is risen, even as he said. Come, see the place where the Lord lay. Had the temb remained sealed

and guarded, the world would have had stronger grounds for denying the resurrection and would have claimed as it does today, with far greater force, that our Lord's subsequent appearances were merely spiritualistic.

Farm Forum

(Conducted by Prof. Henry G. Bell, of the Ontario Agricultural College, Guelph, assisted by other members of the O.A.C. faculty)

Q. I have a 50-acre farm of sandy soil. As I have not enough barnyard fertilizer for both places, I am hauling the fertilizer to the sandy soil and intend getting lime for clay land. Will you please let me know if this is a wise thing to do? If so, will you plaese advise me what quantities of lime to use? If there is a better method of enriching the soil for this year's crop will you please let me know, if it is not more expensive? - S. R., Dufferin-Simcoe.

A. You are doing well to have the manure put on the lighter soil. It may be that the heavier clay soil would benefit materially from a light application of manure.

Regarding applying lime to clay soil, I would say that you should have the soil tested first to find if Lime is required. If the soil is already neutral or alkaline, it is a loss of time and money to put Lime on it. If you will have a sample of soil taken according to the instructions on pages 29 to 32 of the enclosed pamphlet and forward the same to the Dept. of Chemistry, at O.A.C., Guelph, we will have it tested and will then be able to let you know whether or not Lime is required. Lime is not a manure or a plantfood, it is simply a soil condi-

. . . Q. I wonder if you would give me some information regarding sulphur as an acidifier of soil. I have considerable difficulty with alkaline water, although aluminum sulphate will correct it. I have been told that sulphur has a longer lasting effect than aluminum sulphate, but am not familiar with the propensities of sulphur.

Any advice you would give me in this matter will be greatly appreciated. W. G., York Co.

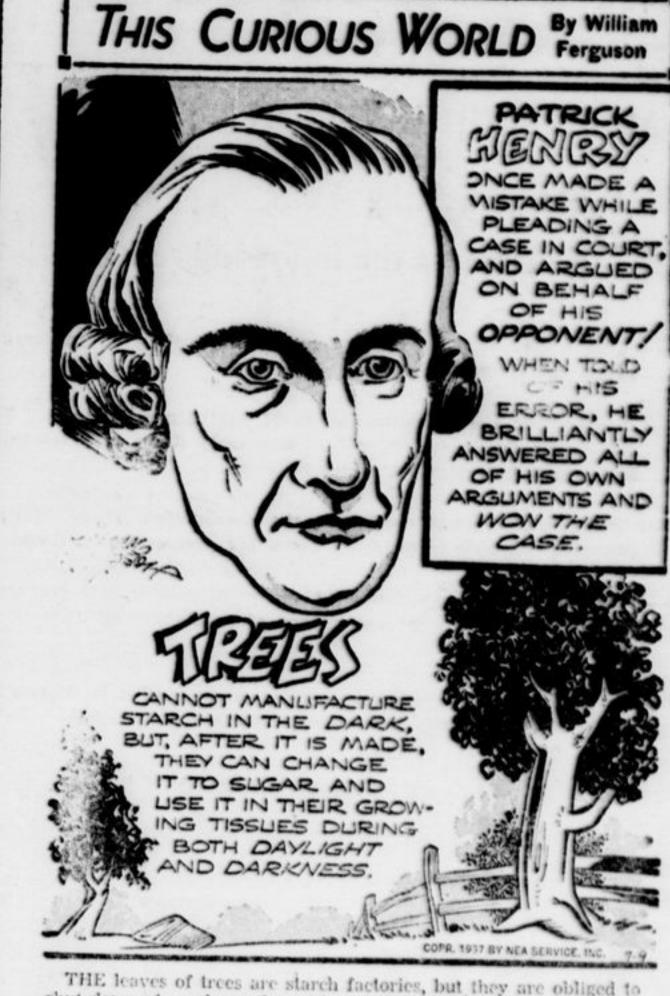

A. I would say that Flowers of Sulphur used at rates of 300 to 600 lbs, per acre will produce desirable acidity in controlling scab on potatoes. If the Sulphur is broadcast just after the land is plowed, and before discing, Sulphur can be added most effectively. One experimenter advises that on soils that lack Sulphur-oxidizing bacteria, it is advisable to use inoculated Sul-

During 1938 the nine dredges operated in the Yukon Consolidated Gold Corporation handled 8,-550,000 cubic yards of gravel. which yielded 60,055 fine ounces of gold and 14,413 fine ounces of silver.

Weather-Phone

Telephone subscribers throughout greater New York may now receive authoritative forecasts of weather conditions. Information for these announcements is sup-

plied hourly between 7 a.m. and 11 p.m. by the local office of the U.S. Weather Bureau over a direct teletype connection. The subscriber has only to telephone the bureau and he receives the recorded message.

THE leaves of trees are starch factories, but they are obliged to shut down at sundown, for without sunlight, the curious substance known as chlorophyll refuses to work. It is estimated that a mature maple tree exposes nearly a half acre of leaf surface to the sun.
