

Wood Ashes Make A Good Fertilizer

They Should Not Be Thrown Away When Fuel Wood is Cut

Approximately 10,000,000 cords of fuel wood are cut and burned in Canada every year, and a great deal of the ashes are thrown away, although they have a definite agricultural value. A report from the Chemistry Division of the Dominion Department of Agriculture shows that wood ashes are as valuable as fertilizer. They contain potash, carbonate of lime, and a small amount of phosphoric acid which are plant foods. Unleached wood ashes may have as much as 8 per cent. potash. Few ashes, however, are pure: bits of charcoal, earth, and other materials are always present. Nevertheless, if the ashes are kept under cover to prevent leaching, the percentage of potash is around four to six per cent. Hardwood ashes contain more potash than ashes from softwood.

PLENTY OF POTASH

Along with potash, wood ashes contain about 70 per cent. carbonate of lime and perhaps two per cent. of phosphoric acid, both being plant foods. Because of the high lime content, wood ashes are particularly beneficial on acid soils, especially acid peats and mucks. The potash content of ashes makes them desirable for mangolds and the clovers which are both heavy feeders on lime and potash. However, ashes should not be used for potatoes, the alkaline nature of the ashes encouraging the growth of scab in the potatoes. Suggested rates of application of ashes are from 1,200 to 1,500 pounds per acre, equivalent to 60 to 70 pounds of potash, 500 to 1,100 pounds of carbonate of lime and 24 to 30 pounds of phosphoric acid, if the ashes are clean and unleached.

Fights In Air At 50 Below

An air battle in a temperature of 50 degrees below zero gave Royal Air Force fighter command men something to talk about during one of the frigid spells of a record-breaking British winter.

The planes spotted a Heinkel at a height of 25,000 feet off the northeast coast of Scotland. But the sub-zero conditions didn't affect the fighting efficiency of the British craft for the enemy machine was brought down.

Fighter pilots keep snug even in such temperatures thanks to heat from the engine which circulates through their small enclosed cabin.

New Theatre of War

On the heels of the Allied announcement of the laying of mines in Norwegian waters at the three places indicated, German troops landed in Scandinavia at a number of points, and a new theatre of war was created in Europe.

Five Million Face Famine

Reports from foreign missionaries and reliable Chinese sources in the interior of the North China Province of Hopei tell of a struggle by 5,000,000 peasants to survive famine conditions born of floods last August and September.

WEIRD DIET

Inhabitants of 12,000 villages in 32 of Hopei's 140 counties are said to be on the verge of starvation—reduced to eating bark, swamp grass and porridge made of weeds and cotton lunks. Farmers lucky enough to have crops in prospect are reported driven by hunger to eat the young shoots of their grain.

Chinese striving at Peiping from surrounding Hopei Province say they have seen corpses of their starved countrymen in whose pockets money has been found, indicating that in some places food is not so plentiful.

What chew tastes a lot better?

HAVE YOU HEARD?

An exploration party, in the interior of Brazil reached a point some hundred miles from Lquitos after a fortnight's hard going, and were unfortunately enough to strike an area of dense jungle and steamy swamps.

During the usual afternoon rest near one of these, one member of the party noticed another peeing up and down, a worried look on his face. He stopped him and asked just what was wrong.

"You know," he replied, seriously, "I keep thinking today's Thursday."

They were having a busy day making and boiling plum puddings. "Mary," said the mistress, "just go and see if that large pudding is cooked. Stick a knife in it and see if it comes out clean."

In a few minutes Mary returned. "The knife came out wonderfully clean, ma'am," she said, smiling, "so I've stuck all the knives in it."

"Do you consider the defendant a reliable woman," asked the judge. "Has she a good reputation for veracity?"

"My lord," replied the witness, "she has got someone else to call her chickens at feeding-time. They won't believe her."

How Can I?

BY ANNE ASHLEY

Q. How can I tighten loose chair rungs?

A. Remove the rungs and slightly split the ends. Then insert small wooden wedges. The harder they are pressed into the holes, the tighter they will fit.

Q. How can I prevent the formation of icing when making syrup?

A. When the syrup is coming to a boil, add 13 teaspoon cream of tartar to every 2 cups of sugar used. This will prevent the formation of icing, or turning back to sugar.

Q. How can I clean zinc laundry tubs effectively?

A. Scrub the tubs with coarse salt and paraffin.

Q. How can I give immediate treatment to a sprain?

A. Sprains may be relieved by plunging the affected part into water as hot as can be borne, keeping it hot for half-an-hour. Then bind firmly, but not tightly enough to cause discomfort, with adhesive tape. The best thing to do is to have a physician apply the bandage.

Q. How can I clean ebony brushes and mirrors that have become dull in appearance?

A. Try rubbing a little white vaseline into them with a soft cloth. Rub until the wood has absorbed all the grease and taken on a rich gleam.

About 2,000 persons in Vienna are employed in plants making blackout buttons, which are luminous rosettes or flowers worn by pedestrians at night.

1940 Keynote Is Naturalness

Fashions Say Ideal Figure Is Slender, But Not Emaciated; New Coiffures Feature Real Straight Hair

The new vogue for naturalness ought to make spring 1940 a great deal simpler for the beauty-minded. It's a season to wear a comfortable foundation garment instead of a tightly-laced, wasp-waist corset; to wear your hair straight, if you find that it is becoming minus curls and swirls; to let it be its natural color.

The ideal figure at the moment is slender, with a stretched, supple look between hips and the navel, underneath the arms. Attention to rules for good posture, limbering and stretching exercises, diet if necessary, and a comfortable flexible foundation garment will accomplish fine results in this direction.

LIFE MADE SIMPLER Some of the smartest head-dressers are advising chic patrons to try wearing their hair straight. If you have thin, fine hair and a long face, you won't even consider the idea, of course. But if your features are pretty symmetrical, your hair is thick and easy to manage, you most certainly will. Especially when you remind yourself that the swimming season isn't far off.

One new hair-do for uncurled locks features a smooth crown and sides and turned-under ends. Another is parted in the middle with long ends at the back fashioned in a soft, rolled-looking figure eight.

Modern Etiquette

BY ROBERTA LEE

Q. When a girl is attending a party or a dance with a young man, is she not privileged to suggest that they go home at a reasonable hour?

A. Yes, this is not only her privilege, but her duty, as the man should not suggest it. However, she should not suggest leaving when the affair is only half over.

Q. How should one eat a sandwich?

A. Knife and fork are used for the open-face sandwich. The fingers are used for the regular sandwich, and it should not be broken.

Q. What is the birth stone for the month of April, and "its language"?

A. The diamond, which stands for innocence and purity.

Q. What is the best way to extend invitations to a bridge party?

A. If the party is informal, invitations may be extended by telephone. Or one may send a visiting card, giving the date, time, and the place, and R. S. V. P.

Q. When having luncheon with a friend in a public place, and you expect each to pay for his own meal, but this friend insists on paying for both, what should you do?

A. Do not argue, or make an issue of it. Let the friend pay, then you pay the next time.

Q. When a hostess is giving a bridge party in a public room of a hotel, should she wear a hat?

A. Yes.

Calories and Color

Usually a meal that is very colorful and pleasing to the eye is well balanced in calories and other food values, writes Miss Sadie B. Chambers, food expert. Vegetables, which retain their color or are more appetizing as well as containing all the vitamins, to cook vegetables such as beans and peas uncovered in rapidly boiling water. Soften the water in which you boil onions, cauliflower and other white vegetables with a little cream of tartar added to the boiling water.

Parcels For Overseas Men

Should Be Carefully Packed, Wrapped and Address Slip Inserted

Officials of the Base Army Post Office, Canada, state that reports have been received from England to the effect that difficulty is being experienced in effecting delivery of parcels mailed from Canada to the members of the Canadian Active Service Force overseas. Due to the fact that flimsy wrapping paper is being used on the parcels in a great many cases the wrappers are badly torn or entirely destroyed, leaving no indication whatsoever as to whom the parcels belong or who had sent them.

IN HEAVY PAPER Thousands of parcels of all different shapes and sizes are being mailed to troops overseas and the senders should bear in mind that considerable handling is necessarily involved in connection with the sorting, bagging and shipping of the parcels.

It is essential, therefore, that if the parcels are to be delivered in good condition, care must be taken to see that they are carefully and securely packed to enable them to withstand handling in the mails. Several layers of heavy paper and strong twine should be used in the wrapping of the parcels.

PROPER PACKING An extra safeguard a slip also should be enclosed in each parcel bearing the name and address of the SENDER, as well as Regimental number, rank and name of the individual, name of the Unit in full, the initials C.A.S.F., and the words "C/o Base Post Office, Canada". Such a slip, furnishing a return address and the address in full of the person for whom the parcel was intended, would be valuable in case the wrapper containing the address was torn away.

Those sending parcels are reminded that if a parcel is worth mailing, it merits proper packing.

HEALTH TOPICS

Safeguard Health: A Job For Women

Canadian women have an important role in winning the war by protecting the health lines of the home front, Dr. Gordon Bates, general director of the Health League of Canada, declared in a recent address.

"You are soldiers of the defense lines just as much as the soldiers in the Maginot line," Dr. Bates said. "Health is important enough in peace time, but in war time it becomes our primary patriotic duty to preserve and improve health." He told the group that next week will be "Toxoid Week."

He cautioned women against thinking that the fight for safe milk was over. "The milk is not entirely won over to the value of pasteurization," he said. "Public education must continue. Safe milk prevents disease and we must not rest on our oars now that the government has passed the pasteurization law. Laws are of little use unless they are backed by an educated citizenry."

MEASLES ARE SERIOUS Dr. J. W. Fraser, Kitchener (Ont.) medical officer of health, warned against treating measles lightly, when he addressed home nursing classes sponsored by the Red Cross. He scored the old idea that children should have certain so-called "children's diseases," and directed attention to research on immunization for such diseases.

FOUR DAY TRIP 2,671 MILES TO Fairview, Alberta, 346 miles north of Edmonton, in the Peace River District and 277 Barred Rocks and White Rock chicks alive on arrival of 100 per cent. Treadle Chick Hatcheries Limited, Fergus, Ont.

EGG TRAYS MORE MONEY FOR EGGS. Eliminate loss from cracks and breaks by packing in Kayes Trays (Egg flats). 30 doz. large eggs packed in regular cases. Send for free samples or 25c for enough for one case. Postage paid. Hawley Products Ltd., 29 Elgin Street, Brantford, Ontario.

SPECIAL 10 FREE CHICKS WITH EVERY 100 ORDERED. Delivery on credit. Proven quality, blood-tested. White Leghorns 5c; Barred Rocks, 10c. Guaranteed pullets, 20 per cent. R. Deane Poultry Farm, Billings Bridge, Ont.

CANADIAN POULTRY REVIEW CANADA'S OLDEST BEST poultry magazine. A real help to the poultryman, large or small. Only \$1.00 per year. Sample copy free. Canadian Poultry Review, 144 Adelaide Street West, Toronto.

CHRONIC SUFFERERS MEDICAL SPECIFICS FOR ANY ailment. Write me all your symptoms. H. C. Sanders, Althorpe, N.S.

GARDEN SPECIALS ASSORTED - SIX FRUIT TREES \$5.00. Six Roses \$2.00. Three hundred Dahlias \$4.00. Fifty Raspberries \$4.00. Complete Requisites supplied. Cash with order. Burlington Nurseries Co., Burlington, Ontario.

"MIDDLE AGE" WOMEN Thousands go thru this "trying time" by taking Paktant - willow bark for helping female functional troubles. Try it! LYDA E. PHIBBS'S VEGETABLE COMPOUND

What Science Is Doing

MEASURE HUMAN VOLTAGE Scientists at last have measured in terms of voltage the electrical activity of human nerve cells. Dr. R. Lorente de No, of the Rockefeller Institute, told physicists at the California Institute of Technology, that a single nerve cell, by statistical treatment, has been found to produce an electrical potential as much as 1-16 of a volt.

STAVE OFF THROMBOSIS Men who buy window stomachs who are threatened with coronary thrombosis, the heart trouble that kills high-pressure mental workers, can stave off the disease by wearing elastic belts to hold up their "adiposities." Coronary death is really suffocation of the heart. The "pump" fails to receive enough oxygen from the coronary arteries which feed its muscles.

WONDER MEDICINE

A new remedy for pneumonia, which in its first trials on about 1,500 human beings in the last few months, has proved better than anything previously known, is announced.

The drug is sulfathiazole, a "relative" of the recently discovered "wonder medicine" sulfanilamide, and is the second such "relative" to prove good for pneumonia. The first was sulfapyridine.

Read For Relief From War-Strain

Public libraries can contribute enormously to the "nerve tone" of the civilian population in wartime, Miss Winnifred Kydd, former dean of women at Queen's University, told the Ontario Library Association at its fortieth annual conference.

Miss Kydd said reading exerted a steady influence on nerves subjected to the strain of war. By keeping people informed and expanding their knowledge, she added, it helped to prepare them for the peace to follow.

What Makes The Milky

Scientists Believe Space is Filled by Water and Cosmic Rays

Wandering atoms particles of cosmic cloud-like mass which now believe, called vacuum space.

EARTH ON THE earth is only one of this cloud that if you look at it from the earth you see a blue globe.

The Milky Way shaped, a huge cloud of gas and dust, is also, but smaller, lying within the earth is known as the "Milky Way" cloud.

The Milky Way is a vast cloud of gas and dust, is also, but smaller, lying within the earth is known as the "Milky Way" cloud.

Dr. Roscoe S. Sturges, astronomer, has a picture of this cloud, thereby many of the clouds of the Milky Way
