### Bells on Cats Help To Birds

Movement Grows in Alberta To Increase Protection Songsters

More than 300 citizens of the central Alberta town of Red Deer have signed a petition requesting a by-law requiring all cats to wear bells while out of doors.

The petition was circulated by the Alberta Natural History Society, officials of which announced there are 320 Red Deer residents who have erected bird houses.

N. Finn, social official, said Red Deer has all the natural conditions to make it a bird paradise but prowling cats have destroyed many fledglings and even cat owners have agreed bellling of the animals would result in some protection.

Mr Finn hopes the city will follow the example of Stavelly where a by-law requiring bellling of cats was passed in 1936. In six other Alberta towns—Nanton, Coleman, Stettler, Turney Valley, High River and Camrose—cats are belled either voluntarily or by-law and A.N.H.S. officials report the bird population in these centres has increased due to this protection.

### Flying Ports And Schools Made Ready

Heyday of Construction Is Going On In Canada at This Moment — Work Against Time To Complete Jobs

With a drive never equalled in the construction history of Canada, not even in the heyday of railway building, airports are being made ready and airframes erected from the Atlantic to the Pacific. Contractors have been notified to get all out, irrespective of the schedule on which they were supposed to have been working, to get the jobs completed at the earliest possible date.

**AIR TRAINING PLAN**  
 Elementary flying training schools, all observers' schools, bombing and gunnery schools, service flying training schools, equipment and repair depots, wireless schools, air navigation schools, initial training schools and central flying schools are being made ready at a hectic pace. The speed is designed, in respect to fields and other facilities, to have the commonwealth air training plan effective in its ultimate largeness not only to meet its general purpose, but to provide for emergencies as they develop in Europe.

As originally planned, the scheme was worked out to have so many training fields ready this year, so many next and so many in 1942. All this has gone by the boards. Airports which were to be ready this autumn are now to be ready in June or July.

**FOR AIRDRONE DEVELOPMENT**  
 The money allotted, up to June 6, for airframe development, in various parts of Canada is as follows: Calgary, \$409,547, Mossbank, Sask., \$330,890, Windsor, \$17,500, Lethbridge, \$27,760, Fort William \$90,389, Prince Albert, \$17,600, Edmonton \$48,282, Regina \$230,299, Saskatoon \$358,800, Airdrie, Alta., \$89,000, Vanscoy, Sask., \$177,900, Oiler, Sask., \$45,400, Penhold, Alta., \$24,250, Malton, Ont., \$70,500, Brantford \$436,155, Hagersville, Ont., \$268,300, Burch \$72,000, Ottawa \$221,950, London, \$120,400, Windsor Mills, Que., \$78,406, MacLeod, Alta., \$340,500, Granum, Alta., \$207,400, Pearce, Alta., \$62,300, Jarvis, Ont., \$346,600, Fingal, Ont., \$372,250, Charlottetown \$243,000, Mount Hope, Ont., Edwards, Ont., \$86,500, Dunnville, Ont., \$393,350, Welland \$69,000, Kohler, Ont., \$262,500, Quebec, \$63,865, Rivers, Man., \$265,288, Three Rivers \$93,270, Summerside P. E. I., \$241,300, Wellington, P.E.I., \$86,500, Carberry, Man., \$498,000, Petrel, Man., \$288,500, Oberon, Man., \$76,500, Camp Borden \$18,000, Edenville, Ont., \$249,100, Alton, Ont., \$90,800, Moncton \$334,343, Soudon, N.B., \$310,400, St. Hubert, N.B., \$150,000, Medicine Hat \$352,290, Holom, Alta., \$204,900, Whittier, Alta., \$50,000, Collins Bay, Ont., \$436,700 Taylor Ont., \$225,500, Sandhurst, Ont., \$106,000, Port Albert, Ont., \$304,800, Goderich, \$42,100, Vancouver \$44,835, Moose Jaw, \$523,000, Buttrass, Sask., \$276,000, Boharm, Sask., \$66,000, Picton \$361,000, St. Catharines \$59,725, Swift Current \$32,535, Brandon \$77,200. Total—\$12,458,339.

Pulp and paper manufacturing in Canada uses approximately 1,800,000 horse-power of hydraulic power.

### Along The Roof Of The Continent

It is a far cry from the days Major Fred Brewster, noted mountaineer, packed a freight horse as shown in picture (left above) and the ease with which visitors to Jasper National Park now cover the old pack train route over the new Columbia Icefield Highway which will be officially opened July 1. One of the world's most scenic drives, the Columbia Icefield Highway has been open from Jasper Park Lodge (lower right) to the Icefield, a distance of 75 miles during the past two years and has now been extended south another 75 miles to Banff Park.

From Jasper Park Lodge the highway leads to the foot of Athabasca Glacier (right), where is located the new Columbia Icefield chalet. Near by are Snow Dome, Kitchener and other glaciers, all welded into one inseparable mass, binding these 11,000 feet skywards. On these mountains which tower more than glaciers, unexcelled summer skiing may be enjoyed and it is here that some of the continent's outstanding men and women skiers train for Canadian and international events.

The completion of the Columbia Icefield Highway marks another chapter in the history of Jasper National Park, 4,200 square miles in extent. The Canadian National Railways' Jasper Park Lodge in this, America's largest National Park, now offers visitors every modern luxury where in the early days explorers, traders and trappers, set up their primitive camps.

### THE WAR-WEEK—Commentary on Current Events

#### France Signs Herself Away; Budget Brings Heavy Taxes

A blitzkrieg of taxes struck the Dominion last week following the bringing down of the Budget. With drastic increases in income taxation reaching virtually every earner, almost prohibitive taxes on automobiles and several new taxes, Finance Minister Balston asked the tremendous sacrifices of the Canadian people for war purposes. For the first time, the cost of the war was carried direct to the pocket-books of every income group in the country.

**Affects Everybody**  
 Highlights of the new taxation: Income rates increased so sharply that a married man with no dependents, paying \$36 on a salary of \$3,000 under present rates, will now pay \$195 . . . A new tax on automobiles starting at 10 per cent on manufacturers' value up to \$700 and increasing sharply to 50 per cent on value in excess of \$1,200 (used cars are taxed, too) . . . A new national defense tax of two per cent flat rate imposed on all salaries over \$600 in the case of single persons and \$1,200 in the case of married persons, increasing to three per cent for salaries of single persons above \$1,200 . . . a 10 per cent tax imposed on all imports except those commodities entered under British preferential tariff . . . Cigaret tax raised from \$5 to \$6 per 1,000, manufactured tobacco from 25 to 35 cents a pound, cigar taxes doubled, etc. . . . Imposition of ten per cent tax on phonographs, radios, cameras and radio tubes . . .

The Ontario Government, facing a possible revenue loss of \$3,000,000 arising from the increased Federal income tax levies, was expected to make a readjustment of income brackets some time this year to bring 50,000 more persons, hitherto exempt, within the tax-paying category.

Meantime everywhere in Canada rents were going up (due in great part to an increase in coal prices) . . . Food prices remained at approximately the same level as in the past couple of months but gains were recorded for beef, bread, canned vegetables, potatoes, tea, coffee, onions, pepper and salt . . . Clothing was expected to rise as a result of the new tax on imports and the diversion of textiles for war use . . .

**Unemployment Insurance**  
 Prorogation of the first session of the 19th Parliament of Canada was looked for around July 20 . . . The main item remaining last week for consideration was unemployment insurance (contributed to by employers and employees); but before such a measure could be brought before

### Say Nighthawks Like Dive-Bombers

Quite a commotion has been caused in Leamington, Ontario, during recent nights by nighthawks that frequent the town's business section. Sound of the birds as they dive after insects has been compared to that of dive-bombers.

Great Britain was next in line for a totalitarian attack by Germany, that the moment Hitler's preparations were complete, the blitzkrieg on the British Isles would begin, proceeding with bombing, submarine warfare and an armed invasion. The people of Britain braced themselves for the blow.

The balance of power on the sea depended on who obtained the French navy. It was known that the addition of the French fleet to the navies of Germany and Italy would bring the Axis to numerical parity with Britain and to numerical superiority, with 90 per cent more fighting vessels . . . Prime Minister Churchill, voicing his anger at the manner in which the Petain regime had violated its "many solemn assurances" in ceding sea power to the Nazis, acknowledged that the ultimate disposition of the French fleet would "powerfully though not decisively affect" Britain's safety . . . In the war with Italy, Britain was aware that loss of the French Navy would seriously endanger her position throughout a vast 40,000 mile theatre stretching from Gibraltar to Aden, because all land forces involved therein must be supplied by sea . . .

**Japan In Ascendancy**  
 The effects of the European war, actual and anticipated, were seen last week as exercising a dynamic influence on Japan's international policy. A change in the world balance, Japanese leaders inferred, might mean that Japan would not only be interested in an alliance with the Axis powers, but in making her position in the Pacific and the Far East impregnable.

It was expected that Japan would shortly issue a sweeping pronouncement amounting to an "oriental Monroe Doctrine" warning all powers against interference of any kind in all territories in East Asia. "The dream of decades — a Far East dominated by Japan — was on the verge of climbing into the realm of action." ("Time," June 24). "The only force which could turn that dream into a nightmare has always been the U. S. The big question taking shape last week appeared to be: could the U. S. summon enough diplomatic adroitness to make friends with Japan without: 1. selling out both China and the Allies in the Far East; 2. being double-crossed herself if she attempted too much appeasement. Failing either alternative, could the United States risk a war with Japan?"

### Many Materials For Housecoats

Pique, Sharkskin, Dotted Swiss Muslin and Printed Voile

Pique, sharkskin, dotted swiss muslin and printed voile are favorite fabrics for morning housecoats. Even the most inexpensive seen in New York are charming in color and very well styled and cut. A white pique with wide, squared-off collar, cuffs and pocket trimmed with bright red rickrack braid will make any one feel cheerful in the morning.

**ALL WITH FULL SKIRTS**  
 Swiss muslins, trimmed with delicate lace edging, or more tailored types in sharkskin may be had, not only in white but in luscious pastel colors. Almost all made to fasten with zippers, which keep one looking neat no matter how quickly one has dressed, and all have skirts with plenty of room, and well-cut sleeves, so if there is a train to be caught after breakfast, you can fly around comfortably while you make toast and coffee.

But all the world knew that

### Bagpipe Music Is Different

A Lot More Spacing and Fewer Notes — People Who Do Not Like It Should Not Be Condemned

There are lots of people who are not Scots who say they enjoy hearing the bagpipes, although some quality their appreciation by saying the pipes sound best when the operator is a long distance away. Others, real Scots perhaps, says the Stratford Beacon-Herald, think that there is no grander or more inspiring music than a hundred pipers an' a' an' at close quarters.

We learn, however, that there is a reason why one likes or dislikes the pipes. A blind Scottish piper told a service club recently that although the note scale is similar to the ordinary scale, the spacing is sometimes different, so that to those who have not been brought up with the sound of the pipes in their ears the music sounds atrocious. Therefore, he generously add-
