

AN EMPIRE'S YOUTH IS HERE

Student officers of the Royal Air Force learn to use rifle and bayonet at their training schools in Britain. Youth from every part of the far-flung British Empire is to be found among them.

ASSEMBLED IN CANADA, LARGE BOMBERS GET TEST FLIGHT

Less than a week after they arrived from England two Avro Anson reconnaissance training bombers were assembled at the De Havilland Aircraft Company's plant near Toronto and put through their last flights. These are just the advance guard of more than 1,600 Anson bombers which will be used in connection with the Commonwealth Air Training Scheme. View of the big bomber is shown here as it was put through its paces by Test Pilot G. R. Spradbrow.

ORCHARD

The weather continues very warm but everything is looking favorable. Miss Robina Grant and little sister of Goderich spent a few days last week with their aunt Mrs. Cornish. Rev. Mr. Knox took the service last Sunday and his message was much enjoyed. We welcome him and Mrs. Knox to this community. Congratulations to Essie Dickson. Myrtle Westervelt and Gerald Pinder, who were successful in their exams in Holstein Continuation School. Sympathy is extended to Mr Bert Eva in the death of his sister in Hanover last week. Some of the children are suffering from chicken pox in this section. Miss Essie Dickson is spending a couple of weeks holidays with friends in Chesley.

THE WEEED OF THE WEEK - POISON IVY

Poison Ivy may be found growing under a variety of conditions throughout Old or Southern Ontario. Everyone should be familiar with it and should take immediate steps to eradicate it. It is sometimes mistaken for Virginia Creeper, though is easily distinguished by its leaves which are in groups of three, whereas those of the Virginia Creeper are in fives. The leaves of Poison Ivy are quite smooth, glossy and firm. Poison Ivy has a distressing toxic action on the skin. The active principle of the plant is an oil which is present throughout root, stem, leaf, flower and fruit and even the easily detached hairs. Tearing or bruising of any part liberates the oil which comes in contact with exposed parts of the body. Poison Ivy can be entirely eradicated by the use of Chemical sprays. One method is to dissolve 1 pound of Sodium Chlorate in 1 pound of Elephant Brand Ammonium Sulphate to 1 gallon of water and spray to saturation any time after the middle of June, using a fine nozzle sprayer with as much pressure as possible. Wet the infested area thoroughly. Use Elephant Brand Ammonium Sulphate.

CAUTION: Do not mix Sodium Chlorate and Ammonium Sulphate in dry form. Each ingredient should be put separately into the water immediately before spraying. A second method is to spray with Atlacide Weed Killer, 2 pounds per gallon of water. Apply this solution in form of a fine spray any time during the growing season. If new growth appears late in the fall a second spraying will be necessary. Thorough cultivation will eradicate Poison Ivy. Hand pulling is often the simplest way to eradicate it from very small areas. Trailing parts should be pulled or grubbed out. Gloves should be worn and precautions taken to prevent transferring the oil to the skin. Persons highly susceptible to poisoning should leave the work to others. Cattle, sheep and goats relish Poison Ivy and can pasture in it without any harmful effects. Space does not permit a lengthy Discussion of Treatment for poisoning so it is suggested that all interested persons should write The Crops, Seeds and Weeds Branch, Parliament Buildings, Toronto, for the pamphlet "Poison Ivy". It will be sent immediately free of charge. Ontario, with its thousands of children and its enormous revenue derived annually from tourists, cannot afford to neglect this weed. Municipal councils, organizations, summer resort owners, park commissioners, school trustees, road authorities and the general public are urged to completely eradicate this weed.

THE TWO WAYS

The lawyer thus illustrates the language of his craft: "If a man were to give another an orange he would simply say: 'Have an orange.' But when the transaction is intrusted to a lawyer to be put in writing he adopts this form: 'I hereby give and convey to you, all and singular, my estate and interests, right, title, claim and advantages of and in said orange together with all its rind, juice, pulp and pips, and all rights and advantages therein, with full power to bite, cut, suck and otherwise eat the same or give the same away with or without the rind, skin, juice, pulp or pips, anything thereinbefore or hereinafter or in any other deed or deeds, instrument or instruments of whatever nature or kind whatsoever to the contrary in any wise notwithstanding.' And then another lawyer comes along and takes it away from you."

Big bundle of old papers, only 5c. at Review office. Just the thing for lighting fires, laying carpets, etc. This year, the production of seed alfalfa in Saskatchewan will reach more than 6,000,000 pounds. Three years ago it was just 175,000 pounds, and last year it reached 2,000,000 pounds. On January 1, 1900, the total water-power installations in the Dominion reached just 142,156 horse-power; on January 1, 1939, it had increased to 8,190,772 horsepower.

If in doubt, don't do it. You can't buy confidence. Hate turns beauty sour. Every religion teaches prayer. Faith begins where reason ends. It is much less trouble to tell the truth. More beautiful than a diamond is a dewdrop. Some people think Americans should be made to fit the Constitution.
