'But, Herbert,' I cried, making this further objection rather faintly, for my age had almost vanished at his touch, 'you might possibly make some blunder over it. Let us wait till we get to the hotel in London, and then we will send for a dector, and have it done properly and scientifi-

Among the most notable frequenters of

the House of Commons gallery may be mentioned Lady Macdonald, Mrs. Mackenzie, Mme. What a wonderful woman is Lady Macdonald, and what a strong consort she has been to the great man whose name she boars. Unless Sir John should follow the examples of Disraeli and John Stuart Mill, and give to the world the biography of his wife, no one will ever know how much it is owing to her that the record of his life is what it is. Mrs. Mackenzie is a tall woman, of good presence and Scotch in every &ature and in every word.
