

The War in the East.

The Russians Preparing to Cross the Danube.

FIGHTING BEFORE KARS.

A special from Constantinople states that the Sultan in his proclamation to the troops declares that in case of need he will join the army with the Standard of the Prophet, and sacrifice his life for his people.

Part of the English fleet has been ordered to the Bosphorus, and a fleet is held in readiness for a reserve.

The Constantinople newspapers report that an engagement has taken place on the Asiatic frontier near Ardahan, and that the Russians were compelled to fall back.

Safvet Pasha has addressed the following dispatch to the Turkish Ambassador at London:—"The first engagement has just been fought at Terakouk, near Batoum. After some fighting the enemy was defeated and put to route with the loss of 800."

A Madrid despatch says Spain will send an immediate squadron to the Levant.

A Rome despatch reported great activity at Naples, where Italian men-of-war are being prepared for sea.

A Berlin despatch reports that Germany intends to put into commission several additional men-of-war.

A despatch from Constantinople says:—"The Russians have occupied Giurgovo on the Danube."

The Daily Telegraph's correspondent at Pera says the Russians altogether lost about 2,000 men in the battle near Batoum, both Fort and Fort St. Nicholas have been bombarded and partly destroyed.

The Gazette gives rumors of a conflict of opinion between Lord Beaconsfield and some of his colleagues as to the part England should immediately take in the Eastern question. An army corps of 30,000 or 40,000 men is being rapidly prepared for despatch to any part where English interests require them. It is highly probable that this corps will rendezvous at Malta or Gibraltar. The command is to be offered to Lord Napier of Magdala.

A proclamation has been issued by the Queen stating that she is determined to maintain strict and impartial neutrality in the war between Russia and Turkey, and commanding her subjects to abstain from violating the laws relating thereto.

The Gazette publishes a letter from Lord Derby to the heads of the Departments of State announcing certain rules, according to which men-of-war of both belligerents are forbidden from using any British port as a station for any warlike purpose—bringing their prizes there, embarking any warlike stores or more coal and provisions than sufficient for immediate want, or remaining longer than twenty-four hours, except in case of stress of weather, damage, or necessity of obtaining provisions.

It is officially announced at the War Office that the Government has made preparations to send fifty thousand men out to Egypt. Of this force twenty-five thousand will go from England, and twenty-five thousand from India. A commissariat and medical staff are also ready to leave.

Mr. Gladstone has given notice of a resolution setting forth that Turkey has lost all claim to the support of England, and will also move the adoption of an Address to the Queen in favor of concert of action on the part of the European Powers to secure from Turkey a guarantee for local liberties in the Turkish provinces, and to guard against intrigues for the possession of Turkish territory.

A Post telegram from Beirut announces that the Russians are building a bridge over the Danube there.

The first serious engagement of the war commenced on Sunday morning, when the main body of the Russians, advancing along the Armenian frontier from the direction of Batoum, engaged the Turks before Kars. The opposing forces in this quarter are commencing the Turks by Mukhtar Pasha and the Russians by the Grand Duke Michael, a brother of the Czar.

The Ottoman forces on the Danube have been reinforced by the arrival of forty battalions and 60,000 Cossacks from Sofia, in western Bulgaria.

A Constantinople telegram makes the following announcement:—"During the night, entry into our harbors from the Bosphorus and Dardanelles is absolutely prohibited. All lights will be extinguished except two at the entrance of the Bosphorus and two in the Dardanelles, and these may also be put out."

In the north the Russians are continuing their march at a leisurely pace, their advanced guard having now reached Buzov, on the railway between Bucharest and Galatz. The total force in Rumania is now estimated at sixty thousand. Preparations are being made to cross the Danube at Iasi, where a pontoon bridge will be constructed, torpedoes having been sunk in the river on either side of the point selected. Russia has, however, declined the navigation of the Danube re-opened, subject to certain local restrictions. It is now probable that Servia will escape the horrors of war, as, at Austria's instance, Russia has promised to respect the neutrality of that principality, the result of which will be that the Turks will abandon the idea of occupying Gladova. All the disposable Rumanian troops have again moved in the direction of Kalafat.

In the west the first engagement since the termination of the armistice occurred on Monday, when the Herzegovinians attacked the Turkish vanguard near Nevesinje, a town fifteen miles due east of Mostar.

Among other items of general news it is stated that the Bey of Tunis has offered the Sultan a force of 18,000 infantry and 5,000 cavalry, provided the Porte will share the cost of transportation and equipment. Outrages on Jews are reported from Giurgovo, and fresh persecutions of Christians from the villages opposite Iouda and Galatz. An English steamer while entering the harbour of Kertch, neglected to observe the necessary precautions, and was completely destroyed by a torpedo.

A despatch from a Russian source announces that the Russian troops have taken the fortress of Bayazid, in Armenia. An official Russian despatch announces the Turkish garrison, numbering 1,700, abandoned Bayazid on Monday and withdrew to the Alinda Heights, leaving a large quantity of ammunition. The Russians occupied the town.

A Vienna despatch gives the following account of the battle of Kars:—"The centre of the Russian army, 40,000 strong, under Mikhoff, attacked Mukhtar, five miles from Kars, on April 29th. The Turks fought desperately, and the Russians, supported by a powerful artillery, succeeded in dislodging them from their position. Mukhtar called out all his reserves, and attempted on April 30th to recover lost ground with 60,000 men, but was defeated and driven back under the guns of Kars. The Russian losses were considerable and those of the Turks enormous."

THE KEY TO INDIA.—The Khan of Kheilat, a province of Beloochistan, on condition of an annual subsidy of \$10,000, and a promise of protection against all enemies, has ceded to Great Britain the right to occupy with troops the principal towns of his territory, and construct forts, railroads, and telegraph lines in it. Kheilat has scarcely two million inhabitants, but its situation is very important strategically, inasmuch as it offers the best route by which an army can invade India.

The Picon Spring Assizes opened on Tuesday, before Mr. Justice Gwynne, who was presented with the traditional pair of white kids, the criminal calendar presenting a blank. The civil docket contains nine cases, principally on notes.

The difficulty about the Governorship of Louisiana appears to be at last settled. The Packard government has given way, and the members of his Legislature have given in their adherence to Nicholls, who is recognized as the Governor.

The State geologist of Wisconsin has just reported that the copper-bearing rocks of Lake Superior extend almost uninterceptedly across the State. In the Nemadji River, masses of native copper have been found, and the prospect that the country will become a rich copper region is very encouraging.

The funeral of the victims of the recent fire in Montreal took place on Tuesday, and was attended by large crowds of citizens and of representatives of neighboring municipalities. The Masons, Oddfellows, and Orangemen also turned out in force. Livingston, one of the injured firemen, died early on Tuesday morning.

The project of a railroad across the great African desert has received a new impulse from the celebrated traveller, Dr. Rolihfs. He advocates a route between Tripoli, on the Mediterranean, and Kuka, on Lake Tched. The line will cross 1200 miles of desert, but Dr. Rolihfs thinks that it will find sufficient water supply.

Four hundred Spanish Protestants met on Holy Thursday in a little chapel in Cadix for prayer and praise. Suddenly two policemen, armed with swords and revolvers, passed up the aisle, ascended the pulpit, and directed the preacher to disperse the congregation. The preacher's meditation on the sacred events of the day was broken off, and the congregation went home without receiving the benediction.

The Bishop of Cadix had entered a complaint that the minister's voice was distinctly heard in the street, and the Alcalde of the city had taken steps to curtail the service. The British Consul at once protested against this act of religious intolerance, and the incident will call forth a volume of diplomatic correspondence.

The effect upon the trade of Canada of the Russo-Turkish war will not be very perceptible until next Fall, owing to the small amount of bread-stuffs and provisions in the country. In fact, a large portion of the flour used in this section of the Dominion is now being brought from the Western States, and in advancing the price of this article and of provisions as well, it is quite probable that for the time being the war will have, if any, a contrary effect to that generally anticipated. As a rapid advance in grain and provision has taken place in the great markets of Europe and America since the announcement of the outbreak of the war, and as this is likely to be more than maintained, Canada must be benefited ultimately, but not much change can be expected until she has commenced to offer. Our commercial marine will also be more actually employed, although in case England should be drawn into the struggle our vessels might suffer at first from deprivations by privateers.

NO RISK.
Thomas' Electric Oil! Worth Ten Times its Weight in Gold. Do you know anything of it? If not, it is time you did. Pain cannot stay where it is used. It is the cheapest medicine ever made. One dose cures common SORE THROAT. One bottle has cured Bronchitis. Fifty cents' worth has cured an OLD STANDING COUGH. One or two bottles cures head cases of PILES and KIDNEY TROUBLE. Six to eight applications cure ANY CASE of RHEUMATISM, NEURALGIA, OR SPRAINED LIMBS. One bottle has cured LAME BACK of eight years' standing. Daniel Plank, of Brookfield, Trego County, Mo., says: "I went thirty miles for a bottle of your Electric Oil, and a WONDERFUL CURE of a CHOKED LIME, by six applications." Another who had Asthma for years, says: "I have half of a 50 cent bottle left, and \$100 would not buy it if I could get no more."

Rufus Robinson, of Nunda, N. Y., writes: "One small bottle of your Electric Oil restored the voice where the person had not spoken above a whisper in FIVE YEARS." Rev. J. Mallory, of Wyoming, N. Y., writes: "Your ELECTRIC OIL cured me of Bronchitis in one week."

It is composed of SIX of the BEST OILS THAT ARE KNOWN. It is as good for internal as external use, and is believed to be immeasurably superior to anything ever made. Will save you much suffering and many dollars of expense.

Beware of Imitations.—Ask for Dr. Thomas' Electric Oil. See that the signature of S. N. Thomas is on the wrapper and the names of Northrop & Lyman are blown in the bottle, and take no others. Sold by all medicine dealers. Price, 25c. NORTHROP & LYMAN, Toronto, Ont., Proprietors for the Dominion.

NOTE.—Electric Oil—Selected and Electric Oil—Melanchton, April 9th, 1877. *11

The Great Shoshonoe Remedy and Pills.

The success that these medicines have met with since their introduction to the public some years ago, proves plainly to the most skeptical that they are medicines that perform what they are advertised to do. The virtues of these medicines have been well tested, and have withstood their trial in a most satisfactory manner. For diseases of the Blood, Liver, Lungs, &c., they are unsurpassed. We have testimonials of miraculous cures of these diseases, and of many others. If any one is afflicted, let him try a bottle of the Remedy and a box of Pills. No injurious effects will follow their use to the most delicate person, as they are purely vegetable; there being no mineral matter in them. The cost is small, while the advantages derived from their use will doubly repay you for your expense and trouble. The medicines are widely known throughout the Dominion, and are for sale by the principal medicine dealers. Try them, and be convinced that these medicines are no humbug. No one who has tried the Shoshonoe Pills has ever pronounced an unfavorable opinion of them, no family where they have been used will be without them. Full information may be had on all particulars touching the use, and the experience of those who have used them, by securing the Treatise or Circular from any druggist in the Dominion. Free. Price of the Remedy in pint bottles \$1; Pills 25 cents a box.

BIRTHS.
McCONNELL.—At Dundalk, on the 30th ult., the wife of Mr. Charles McConnell, of a daughter.
