

**FRATERNITY IN LUTHER.**—About two weeks ago Mr. W. Dawson, who is about leaving Luther, was entertained at a complimentary supper by a large number of friends, at Stoney's hotel, Little Toronto, and presented with a flattering address, accompanied by a beautiful watch, gold chain and a well-filled purse, as a small token of regard for his never failing efforts for the welfare of the township of Luther, and for the prosperity of Little Toronto whilst occupying the honorable position of chief magistrate of the township.

**A LIQUOR DETECTIVE'S EXPLOIT.**—Chas. Thomson, a grocer in Toronto, licensed to sell liquor, was fined \$20 and costs on Tuesday, last week, on two convictions for selling less than three half pints; the case is one of great hardship. It seems a wise key detective went into his store and asked for a bottle of brandy, and was told the price; he said he could not afford to pay it, and Thomson said he could sell him a bottle from the wood at a less figure. The detective said he would take the letter, and asked to have it put up in two pint bottles, which was done; he then bought some crackers and other articles, and said he had not enough to pay for the whole, and would leave one of the pint bottles and call and pay for it the next day; this he did, and then summoned Thomson for, on two occasions, selling liquor in less quantities than allowed by law.

**THE ARMY AT PLEVNA.**—The army of the allies before Plevna consists of 106 battalions of infantry, 67 squadrons of cavalry and 356 guns including the siege guns, the whole of which have not yet been placed into position. The Russians have completed sixteen redoubts, and are working on five others. It is stated that their field works cannot be finished before November. General Gourko occupies a position between the rivers Vid and Iskra, but he is compelled to detach many of his troops in order to repel the constant attacks of the Turks from the West. The Roumanians form the right wing of the investing army, and the Guards the left wing, while the corps of General Krudener and General Zatoff constitute the centre. In respect to the recent repulse of the Roumanians from the Grivitza redoubt, the Russian staff severely blame Prince Charles for undertaking the attack without having previously consulted the Russian staff.

**DECORATED BY THE CAESAR.**—The Emperor himself is the sole fountain of military honor and watches all personally, and his personal bearing enhances the reward in every case. A generous word, a friendly look, the well chosen expression of praise to suit the individual, go home to the heart of the recipient as much as the highly cherished reward itself. Two hundred officers of all ranks breakfast and dine daily at his table. From the youngest to the oldest every eye is fixed on him. Before the meal in the assembled circle, as the Caeser appears, it is seen one day that an aide-de-camp behind him carries a cushion with crosses and, perhaps, half a dozen sword knots of honor—the ribbon of St. George, Orange and black—to be worn attached to the sword hilt. Instantly the expectation is at its height. The Caeser voice calls the chosen name, and all make room for the envied man to pass, he comes blushing and flushed, and receives the prize, bends low to kiss the Imperial hand, and retires bowing at every step, a made man for life, the admiral and courted of all beholders. Then he has to go through the usual embracing and kissing on both cheeks from his friends. I have seen old officers so overcome with this mark of distinction, that they went about for ten minutes after like children weeping, with the prized decoration in their hands, showing it round half dazed.—*London Times.*

**EUROPE GROWING COLDER.**—A Swedish paper publishes an interesting article under the heading "Why is the Climate of Europe Growing Colder?" The article states that in the Bay of Komernok, near Komo, in Greenland, fossil and very characteristic remains of Palm and other trees have been discovered lately, which tend to show that in these parts formerly a rich vegetation must have existed. But the ice period of the Geologists arrived, and as a consequence of the decreasing temperature which moved in a southerly direction, as can be proved by Geological data—that is, the discovery of fossil plants of certain species—seems to be going on in our day also. During the last few years the ice has increased far toward the south; just between Greenland and the Arctic Sea colossal masses of ice have accumulated. On European coast navigators now frequently find ice in latitudes where it never existed during the summer months, and the cold reigning upon the Scandinavian peninsula this summer results from the masses of ice which are floating in the region where the Gulf Stream bends towards our coasts. There is a repetition of the observation made in the cold summer of 1865. The unaccounted vicinity of these masses of ice has rendered the climate of Iceland so cold that corn no longer ripens there, and the Icelanders, in fear of a coming famine and icy climate, begin to found a new home in North America.

Earl Shaftesbury presided recently at the inauguration of the new institution of the Young Men's Christian Association at Liverpool. His Lordship highly commended such associations for their elevating influence educationally and morally. He said that Young Men's Christian Associations were commenced in 1844, and that they now numbered in England and Scotland alone 700; and in the whole world, including three in China, three in Syria, and one in Japan, no less than 2,048 with one million and a half members. In 1859 the total numbers of lunatics in England and Wales was 26,752, out of a population of 19,682,701, or one out of every 594; and on the 1st of January, 1877, they had increased to 66,636, out of a population of 24,547,309, or one out of every 369. The large majority of these lunatics are paupers.

Charley Ross's father has expended \$60,000 in his searches, and made about 300 fruitless journeys. He is now poor, his business having gone to naught through neglect, and he is now engaged as a traveling salesman.

The Imperial office of statistics in Berlin has just published the latest census table of the population in the German empire. At the end of 1875 it was 42,797,360. The greatest increase was in Prussia proper; Alsace-Lorraine lost three per thousand.

A helpless old man named Ballantine, living near Stratone, was burned to death on the 1st inst., caused by a spark from the pipe which the old man was smoking falling on some portion of his clothing, and he being unable to move or help himself in any way, was forced to sit there and see himself almost burned up. His daughter was out at the time, and when she returned in about three-quarters of an hour, the old man was still sitting in the chair, but almost every stitch of clothing was burned off his body, his flesh being literally roasted almost from his head to his feet.

Manitoulin Island is looking up; the *Collingwood Bulletin* says:—"The root and vegetable crops exceed the most sanguine expectations. Mr. Meddough dug 82 bush, early rose potatoes from a piece of ground 28 by 38 yards; he also took 75 bush, of another sort from a piece 18 by 45 yards, some of the potatoes weighing three lbs. Mr. Alray, of this village, tells me he had a patch of potatoes which turned out 480 bush, to the acre, and some of them weighed as much as 3 lbs. 14 oz. Thos. Meddough from one seed raised nine citrons whose weight aggregated 147 lbs; tomatoes weighing 2½ lbs each; some heads of cabbage measuring 17 inches in diameter; some ears of corn 15 inches long. The vegetables were all raised in the open air, and from ground which had had no manure of any sort whatever. Settlers continue to arrive in large numbers and are crowding into every part of the island."

A party of young men were telling what they would do were they shipwrecked far out upon the sea, and left buffeting with the waves, without a plank to sustain them. Every one gave his opinion, excepting Paddy Murphy, who, after being asked for his, replied: "Bad cess to ye for a cowardly set of spalpeens! Ye'd be afther savin' yerselves, an' not tryin' to save another. Why, it's Paddy Murphy that would come to shore an' save himself, an' thin come back an' try to save another!"

**Mitchell's Balladonna Improved India Rubber Porous Plaster.**

There never has been a time when the healing of so many different diseases has been caused by outward application as the present. It is a useful fact that over half of the entire population of the globe resort to the use of ordinary plasters.

The principal ingredients used in making these Plasters are Gum Olibanum—or better known as the Frankincense of the Bible—Babbar, and Burgandy Pitch; which, when scientifically compounded, is full of electricity, and when combined with the pure medicinal gums, is found to be one of the greatest healing mediums ever brought before the human race.

They are acknowledged by all who have used them to act quicker than any other Plasters they ever before tried, and that one of these Plasters will do more real service than a hundred of the ordinary kind. All other Plasters are slow of action, and require to be worn continually to effect a cure; but with these it is entirely different; the instant one is applied the patient will feel its effect.

They possess all the soothing, warming, supporting and strengthening qualities of all other Plasters. Many who have been relieved of RHEUMATISM, FIBROIDISM, and various other pains in the KIDNEYS, BREAST or STOMACH, and believe it is solely done by the electrical qualities which the Porous Plasters contain, and which is imparted to the system, thus restoring them to a healthy condition.

They are very soft and pliable, still very adhesive; and a sure cure for WEAK BACKS, PAINS IN THE SIDE AND BREAST; and are invaluable to those who have a COLIC of long standing, and often prevents CONSUMPTION. Some even tell us they believe they were entirely cured by the use of them of a long-continued Consumption.

Prepared by GEORGE E. MITCHELL, Lowell, Mass. Sold by all Druggists.

**PETTIT'S EYE-SALVE.**

An Infallible Remedy for all Diseases of the Eye (acute or chronic), Granulation of the Lids, Ulceration of the Lacrymal Glands, Film, and Weakness of the Vision from any cause.

THE AMERICAN EYE-SALVE is presented to the public with the assurance of its efficiency as a curative of most diseases of the eye, acute or chronic inflammation, whether induced by serofulous origin or otherwise, weakness or defect of vision, diminished tone of the optic nerve, or a diseased state of the tissues constituting that organ. Also, for all persons whose vocation requires an incessant action of the eyes, the Salve will act as a charm in restoring a uniform healthy action, where weakness, pain, and misery may have long threatened their termination. It is the most simple, safe, and effectual remedy ever discovered.

The materials of which it is made are pure, perfect, and costly, compounded with elaborate care and exactness, safe in its application, being used externally, and, of course, avoiding the pain and danger which necessarily attend the introduction of caustic minerals and eye-washes. IRISOPHORS and OLEO-CRISOPHORS, of serofulous origin, or resulting from whatever cause, yield to the AMERICAN EYE-SALVE. It is used SUCCESSFULLY FOR PILES. Its soothing effect is immediate, and a permanent cure requires but a few applications. The proprietors of "Dr. J. PETTIT'S AMERICAN EYE-SALVE," while making new and improved machinery for making a more perfect box for the Eye-Salve, have changed the Trade Mark on the cover so as to correspond with the Cut on the Wrapper, Circulars, Advertisements, &c. We call attention to this, as it might otherwise be regarded as counterfeiting.
