-It is very gratifying to observe the progress made by our Conservative friends The prohibitory clauses of the new Act are in the appreciation of the power of the people. -The regulations which have recently Leen made regarding the Quebec Crisis seem fully to justify the dismissal of the DeB ucherville Cabinet by the Lieutenant-Governor, and as to its expediency there is as little doubt. In an official document from M. St. Just to Lord Dufferin, he says casions had appended his signature to public decuments regarding which he had never been consulted, that several millions had been voted to aid railways when the affairs of the Province were on the verge of bankruptcy and that the only plea given by the Premier for such extraordinary legislation was that otherwise there was no means of his Government obtaining a and to be wholly removed and taken away in quantum. The special meetings story of the Pacific Railway Scandal revived on a small scale. All Tory politicians, it therefore appears, are ready at any time to purchase political support even at the sacrifice of the honour and credit of their country.
