Macdonald, which will be found in an other column, and the discussion of which has resulted so disastrously to himself and many of his followers, is of the wildest possible character. The constitutional question involved in the action of M. de St. Just is not referred to in any way whatever, and all that is affirmed by it is that the action of the Lieutenant-Governor was unwise in the circumstances. Now, this is a matter of opinion. Whether the netion of M. de St. Just was wise or unwise it is beyond the province of Sir John A Macdonald or any member of the House of Commons to say. It is a question which entirely belongs to the people of Quebec. and they have now the matter in hand and in a few days will declare their opinion at the polls as to the wisdom or unwisdom of the course pursued by their Lieutenant-Governor. Upon this point the Globe very sensibly remarks, "The Joly Ministry by assuming the fullest responsibility for the alismissal of their predecessors have taken that responsibility off the shoulders of the Lieutenant-Governor. In accordance with the maxim that the king can do no wrong, the people must visit upon the heads of the present Ministers whatever retribution they feel disposed to indulge in. They have a choice of Administrations, a choice of policies, a choice of men. They have, moreover, the most perfect freedom in exercising that choice. Were the motion John A. Macdonald to pass, that freedom would be interfered with in the most unwise and uncalled for manner, and on al bringing on such a discussion in the House pected to preach, and every evening next ily were aroused and the melancholy tidis an endeavor to influence the elections week, except Saturday, he will lecture on ings announced.
