BARN BURNED.—About twelve o'clock last Monday night two barns on the farm of Andrew Miller, Newmarket, were destroyed by fire. It seems to have started in a sack of straw near one of the barns and spreading enveloped all in destruction, together with the contents, including about two hundred bushels of grain of various kinds and some farm implements. The loss is estimated at about \$700, insured in the Ottawa Agricultural for \$500 and the Hamilton Mutual for \$200. The origin of the fire is unknown. About six o'clock on Tuesday morning the barn of Mrs. James Pugh, Owen Sound Road, Egremont, was destroyed by fire, with most of its contents including the greater part of the crop of the past season. The barn was a good frame building, and the fire is supposed to have started from a spark from the dwell-house chimney. We have not heard the cause of the fire, but we believe it is insured in the Waterloo Mutual for \$100. Mount Forest Examiner.

FATAL ACCIDENT.—A young man named Cameron Macdonald, employed on the farm of Alex. Robertson, boundary farm of Howick and Grey, met with an accident on Monday last week, the effect of which proved fatal. While engaged logging, a handspike by some means very forcibly thrown at him, striking him in the abdomen. After suffering intense pain he died on the following Wednesday morning. TERRIBLE ACCIDENT.—A boy named Gibson living in Toronto, was literally pinned to death the other day. He was driving a horse and cart, when the horse was frightened and ran off. Young Gibson got off the cart and endeavored to pacify the beast by leading it. In passing the Great Western Station it became unmanageable, and overcame the poor boy, ran him against a corner window, forcing the shaft into his breast, just immediately below the throat, inflicting a frightful jagged wound six inches in length and three inches in width, and literally pinning him to the window frame. The savage brute still rushed on and split the ledge of the window completely in two, at the same time tearing off poor Gibson's thumb. As soon as the animal turned round the unfortunate boy fell to the ground stone dead. He having passed away instantly.

The maidens of the famous Seneca tribe of Indians who once roamed over the hills of the upper Allegheny river (now the famous oil regions of Pennsylvania), were noted among all the neighboring tribes for their beauty and beauty of their features, which were of remarkable length and exquisite fineness of texture, and in color black that the simile of the raven's wing was hardly a just comparison; an elegant background that brought out the olive brown complexion of the maidens, and formed an exquisite and charming picture of savage female loveliness delightful to behold. Why their hair was of such rare beauty and of such extreme length was a deep, puzzling mystery to the maidens of all the neighboring tribes, and was a source of continual jealousies on their part. It has long remained a mystery, and would no doubt have died away altogether with the rest of the Indian tribes had not the discovery of petroleum oil furnished the clue, and mankind now possesses the great secret which had remained sealed within the Sacred Rock of oil, until released by the hand of scientific industry, it gushes forth in treasures of petroleum to the world. But the knowledge was practically useless to the prematurely bald and gray, as no one in civilized society could tolerate the use of refined petroleum as a dressing for the hair. But the skill of one of our chemists has overcome the difficulty, and by a process known only to himself, he has, after very elaborate and costly experiments, succeeded in decolorizing petroleum, which renders it susceptible of being handled as daintily as the famous *de Cologne*. The experiments with the hair, and the change is so gradual that the most intimate friends can scarcely detect its progress. In a word, it is the most wonderful discovery of the age, and well calculated to meet the premature bald and gray rejoice. The name *Caroline* has been given to the article, and is put up in a neat and attractive manner, and sold by all dealers in drug and medicines. Price One Dollar a bottle.

The maidens of the famous Seneca tribe of Indians who once roamed over the hills of the upper Allegheny river (now the famous oil regions of Pennsylvania), were noted among all the neighboring tribes for their beauty and beauty of their features, which were of remarkable length and exquisite fineness of texture, and in color black that the simile of the raven's wing was hardly a just comparison; an elegant background that brought out the olive brown complexion of the maidens, and formed an exquisite and charming picture of savage female loveliness delightful to behold. Why their hair was of such rare beauty and of such extreme length was a deep, puzzling mystery to the maidens of all the neighboring tribes, and was a source of continual jealousies on their part. It has long remained a mystery, and would no doubt have died away altogether with the rest of the Indian tribes had not the discovery of petroleum oil furnished the clue, and mankind now possesses the great secret which had remained sealed within the Sacred Rock of oil, until released by the hand of scientific industry, it gushes forth in treasures of petroleum to the world. But the knowledge was practically useless to the prematurely bald and gray, as no one in civilized society could tolerate the use of refined petroleum as a dressing for the hair. But the skill of one of our chemists has overcome the difficulty, and by a process known only to himself, he has, after very elaborate and costly experiments, succeeded in decolorizing petroleum, which renders it susceptible of being handled as daintily as the famous *de Cologne*. The experiments with the hair, and the change is so gradual that the most intimate friends can scarcely detect its progress. In a word, it is the most wonderful discovery of the age, and well calculated to meet the premature bald and gray rejoice. The name *Caroline* has been given to the article, and is put up in a neat and attractive manner, and sold by all dealers in drug and medicines. Price One Dollar a bottle.
