-A book which pretends to be the His tory of Canada under the administration of Lord Dufferin by George Stewart, jr has just been published by Rose, Belford Co. From a review of this volume which appeared in the Globe it would seem that the author is a decided partizan, and that in his account of the Pacific Railway scandal he attempts to whitewash the chief actors in that affair, and suppresse certain documents which show the corrupt nature of the bargain between Sir G. Car-

And the reason is not far to seek. gaols and similar establishments, the mos perfect cleanliness is enforced; the ver tilation is perfect; the drainage is care fully looked after; and, last but not least. a Spartan simplicity of diet is maintaine -coffee, tea, intoxicating drinks and smok ing are entirely excluded, and the actual cost of food for each prisoner is only eight cents a day. In too many private dwellings, especially in the centres of population, all these conditions are completely reversed, with sickness and shortened lives as the result. But it is not only physically but morally that people would be improv ed by the adoption of the Spartan mode o life which works such wonders within th walls of our prisons. There is no question but that the eccentricities and moral obliquities, which so sadly characterize the society of the present day, are very largely, if not chiefly due to the derangements of function and organ induced by vicious or improper habits of living. Sana mens in sano corpori-That a healthy mind can only exist in a healthy body-is a very old adage, but the true force of which is scarcely yet begun to be realized. This is altogether outside of the enobling effect which a simple mode of life has in the formation of the moral character of the individual.

TWO POLITICAL ADVENTURERS

There is an interesting article in the curthe Caricature History of the Earl of Beapages of the London Charivari. Punch has always shown himself to be possessed of a remarkably correct and keen insight long before the public, until Mr. Punch had fixed his eye upon him, and saw through the gaudy and outside trappings Lord Beaconsfield has been, par excellence the political adventurer of British politics, as Sir John A. Macdonald has been, of the political life of Canada.
