commission recently sitting at Berlin, and appointed to prepare a code of signals to lesson the danger of collisions at sea, has done so in such a manner as to win the approval of nearly all concerned in the discussion.

It is reported that some of the Provincial Chambers of Russia have petitioned for constitutional rights, and they assert that at present they are powerless to contend with the dangers which arise from the spread of nihilism.

It is designed in Brazil to suppress all the Monastic institutions, and to devote the proceeds to the extinction of the national debt. The annual budget shows a very heavy deficit, and additional taxation is necessary in that empire.

The number of emigrants of Mt. Hecla in Iceland are stated to be only twenty-three within the period of 800 years up to the date of 1765. At that time a violent one took place which covered the surface of the surrounding earth, for a circuit of 150 miles, with a layer of sand four inches deep.

At a meeting of the ministers of the various Nonconformist Churches in Rochester and Chatham it has been unanimously resolved that none of the ministers should officiate at a funeral on Sunday except when by medical authority immediate interment is declared necessary on sanitary grounds. It was also decided that in no circumstances should the ministers officiate at weddings on Sunday.

The son of King Theodore, of Abyssinia, who was taken to England after the fall of Magdala, is being educated for the British Army. He is a slender and dusky youth, and haughty and shrewd as becomes a descendant of the Queen of Sheba. He likes his English life, admitting that a spring mattress and an ulcer in London are preferable to a mat and bare legs and a blanket in Abyssinia.

In view of the probability of the success of the electric light as a method of illumination, the article of copper is likely to obtain an advance in price. It will surprise many people to learn that last year the exports of copper from Newfoundland to Great Britain amounted to 50,000 tons, and that in the year the whole copper product of the British realm was only \$1,000 tons. The Newfoundland one is the largest, and the next largest is that being the place where most of the copper ore is taken for the same purpose. This, of course, is in consequence of the numerous coal deposits of Wales, which are available for melting up purposes. The principal copper mines of Newfoundland are Port Bays, Tilt Cove, Little Bay and Green Bay. The two last, although the most easily worked, are likely to supply all the copper in production.

## A Heroic Lighthouse Keeper.

The Acadians have a tradition that God enjoined perpetual silence and desolation on Labrador and Anticosti when he gave them to Cain for a heritage. However that may be, it is certain that while other wilds of the earth yield to man's conquest these vast waters remain even void and empty. The Indians called the Island Naticette—the country of wailing—and under the modern corruption of Anticosti it has added to its terrible renown. Its whole history, from the day it was discovered by Jacques Cartier in 1534 to the present, is a record of human suffering. Here and there, however, there is a tale of heroism worthy of a nobler scene. In August, 1863, the family of Edward Pope, keeper of the Ellis Bay lighthouse, was struck down with typhoid fever, and to add to his misfortunes the revolving apparatus of his light broke. The Government steamer had gone, and Pope had no means of communicating with the marine department at Quebec or elsewhere. The light revolved, or flashed, as the technical phrase is, every minute and a half; and if it flashed no more it would probably be mistaken by passing vessels in that region of fog for the stationary light at the west point of the island, and thus lead to dire loss of life. Pope found out that with a little exertion he could turn it and make it flash, and at once determined to fill the place of the automatic gear. Accordingly the humble hero sat in the turret, with his watch by his side, turning the light regularly at the allotted time every night, from 9 p.m. until 7 a.m., from the middle of August until the first of December, and from the first of April until the end of June, when the Government steamer came to his relief with a new apparatus. All through the first season Pope's daughter and grandchild were ill unto death, with no body save him to nurse them. He waited on them tenderly during the day, but as night fell on the iron-bound coast he hastened to his vigil in the turret, doing his duty to the Canadian Government and to humanity with unfailing devotion. In the second season his daughter, who had lived through the fever, took turns with him in the light-room. This man may have saved a thousand lives. He died in 1872, and his deed has never until this day been chronicled, for the heroes of Anticosti, as of the roll of her victims, the world knows nothing.

—N.Y. World.

## MISCELLANEOUS.

A naval station of some magnitude is to be constructed on the Danube by Russia.

The Turks are preparing to occupy Adrianople as soon as the definitive treaty is signed.

Trove well known noblemen in England lost by the failure of the West of England Bank no less than \$300,000.

The Weardale, England, Iron and Coal Company discharged 1,500 men on Saturday, because of the depression in trade.

It is alleged that the Emperor William and Bismarck desire to invite the sovereigns of Europe to Berlin to consider the dangers of socialism and the need of common action against it.

The great library at Birmingham was burned on Saturday. The loss is very great, and has involved the loss of the most Shakespearean collection in existence, exceeding even that in the British Museum.

A commission recently sitting at Berlin, and appointed to prepare a code of signals to lesson the danger of collisions at sea, has done so in such a manner as to win the approval of nearly all concerned in the discussion.

It is reported that some of the Provincial Chambers of Russia have petitioned for constitutional rights, and they assert that at present they are powerless to contend with the dangers which arise from the spread of nihilism.

It is designed in Brazil to suppress all the Monastic institutions, and to devote the proceeds to the extinction of the national debt. The annual budget shows a very heavy deficit, and additional taxation is necessary in that empire.

who was taken to England after the fall of Magdala, is being educated for the British Army. He is a slender and dusky youth, and haughty and shrewd as becomes a descendant of the Queen of Sheba. He likes his English life, admitting that a spring mattress and an ulcer in London are preferable to a mat and bare legs and a blanket in Abyssinia.

In view of the probability of the success of the electric light as a method of illumination, the article of copper is likely to obtain an advance in price. It will surprise many people to learn that last year the exports of copper from Newfoundland to Great Britain amounted to 50,000 tons, and that in the year the whole copper product of the British realm was only \$1,000 tons.

The Newfoundland one is the largest, and the next largest is that being the place where most of the copper ore is taken for the same purpose.

This, of course, is in consequence of the numerous coal deposits of Wales, which are available for melting up purposes.

The principal copper mines of Newfoundland are Port Bays, Tilt Cove, Little Bay and Green Bay. The two last, although the most easily worked, are likely to supply all the copper in production.

ATTACKS ON RULERS.—Thirty attempts on the lives of Royal personages and rulers during the last thirty years:—The Duke of Medina, attacked in 1848; the Prince of Prussia (now the Emperor William), at Minden, in June 1848; the late King of Prussia, in 1852; Queen Victoria (by an ex-lieutenant) in 1852; an infernal machine discovered at Marseilles on Napoleon III's visit in 1852; the Austrian Emperor slightly wounded by the Hungarian, Libenay, in 1853; attack on King Victor Emmanuel in 1853; also on Napoleon III, opposite the Opera Comique; the Grand Duke of Parma mortally stabbed in 1854; Napoleon III, fired at by Pianori in the Champs de Elysees in 1855; a policeman seized Fuentes when about to fire at Queen Isabella in 1856; Milan, a soldier, stabbed King Ferdinand of Naples in 1856; three Italians from London convicted of conspiracy against Napoleon III in 1857; Orsini Plot against Napoleon III, in 1858; King of Prussia twice fired at, but not hit, by the student Becker at Baden, in 1861; Queen of Greece shot at by the student, Bruson, in 1862; three Italians from London arrested for conspiring against Napoleon III in 1862; President Lincoln assassinated in 1865; the Czar attacked at St. Petersburg in 1866, and at Paris in 1867; Prince Michael of Servi assassinated in 1868; King Alfonso of Spain attacked in 1871; President of Peru assassinated in 1872; President of Bolivia in 1873; President of Ecuador in 1875; President of Paraguay in 1877; two attempts on the life of the German Emperor, one on Humboldt, King of Italy, and one on Alfonso, King of Spain, in 1878.

EFFECTS OF PERFUME ON HEALTH.—We learn that an Italian professor has recently made some very agreeable medicinal researches resulting in the discovery that vegetable perfumes exercise a positively healthy influence on the atmosphere, converting its oxygen into ozone, and thus increasing its oxidizing influence. The essences found to develop the largest quantity of ozone are those of cherry, laurel, clover, lavender, mint, juniper, lemon, fennel, and bergamot; those that give it in smaller quantity are anise, nutmeg, and thyme. The flowers of the narcissus, hyacinth, muguet, heliotrope, and lily of the valley develop ozone in closed vessels. Flowers destitute of perfume do not develop it, and those which have but slight perfume develop it in small quantities. Reasoning from these facts, the professor recommends the cultivation of flowers in marshy districts, and in all places infested with animal emanations, on account of the powerful oxidizing influence of ozone.—Medical Press and Circular.

BIRTHS.

GARANS.—In Marcelline on the 7th inst., the wife of the Rev. D. McLean, R.A., Mr. John Garans of Egerton, to Mrs. Jane McMaster, of Osprey.

GRAN.—In Elora, on the 20th inst., Mr. Jas. Gran, of Elora, to Mrs. Anna, his daughter, of Wm. Eliot, photographer, of Elora.

MCCOLL.—Flood at Friesville, on the 11th inst., by Miss Margaret Flood, born of the Township of Friesville.

DEATHS.

HANSON.—In Marcelline on the 7th inst., by the Rev. D. McLean, R.A., Mr. John Hanson of Egerton, to Mrs. Jane McMaster, of Osprey.

GRAN.—Elora, on the 20th inst., the wife of Mr. E. R. T., to Mrs. Anna, his daughter, of Wm. Eliot, photographer, of Elora.

MARRIED.

GARANS.—In Marcelline on the 11th inst., by the Rev. D. McLean, R.A., Mr. John Garans of Egerton, to Mrs. Jane McMaster, of Osprey.

GRAN.—In Elora, on the 20th inst., Mr. Jas. Gran, of Elora, to Mrs. Anna, his daughter, of Wm. Eliot, photographer, of Elora.

MCCOLL.—Flood at Friesville, on the 11th inst., by Miss Margaret Flood, born of the Township of Friesville.

DEATHS.

HANSON.—On the 2nd inst., at the residence of Mr. Hanson, Marcelline, Mrs. Elizabeth Parker, widow of the late F. Parker, aged 70 years.

MCCOLL.—In Marcelline, on the 6th inst., Mr. W. McColl, aged 33 years.

DURHAM MARKETS.
