

Ontario Legislature.

**THE HOUSE PROCEEDED.**  
 Toronto, March 11.  
 At three o'clock His Honor the Lieutenant-Governor proceeded to the Parliament House, and after the bills passed were read he gave his assent to the same. The most important of these bills are:—  
 An Act to incorporate the City of Guelph.  
 An Act to incorporate the Town of Mount Forest.  
 An Act to extend the limits of the town of Walkerton.  
 An Act to incorporate the Grey and Walkerton Railway Company.  
 An Act respecting the Walkerton School Lands.  
 An Act respecting the Georgian Bay and Wellington Railway Company.  
 An Act to amend the Act respecting the fees of counsel and other officers in the administration of justice.  
 An Act respecting Public, Separate, and High Schools.  
 An Act to make further provision respecting Election to the Legislative Assembly.  
 An Act for the protection of Plum and Cherry Trees.  
 An Act to authorize investments in Municipal Debentures issued in aid of stone or timber drainage.  
 An Act for the further investment of public money in municipal drainage debentures.  
 An Act to amend the Assessment Act.  
 An Act to make further provisions respecting Voters' Lists.  
 An Act to provide for the inspection of Insurance Companies.  
 An Act respecting Grand Juries.  
 An Act respecting the Stratford and Huron Railway Company.  
 An Act to incorporate the Ontario Veterinary Association.  
 An Act respecting the Northern and Western Boundaries of Ontario.  
 An Act to amend the Railway Act of Ontario.  
 An Act to amend the Agriculture and Arts Act.  
 An Act to amend the Municipal Law.  
 An Act for the administration of justice in the northern and western parts of Ontario.  
 An Act to make certain provisions respecting the practice of the Courts.  
 An Act for the further investment of public money in Municipal drainage debentures.  
 An Act to extend the Act respecting the Heir, Devise, and Assignee Commission.  
 The Lieutenant-Governor was then pleased to deliver the following Speech:—  
**Gentlemen of the Legislative Assembly:**  
 In relieving you from further attendance upon your legislative duties I have to thank you for your assiduous attention to the public business, and for the useful and practical results of your labors.  
 The large number of private Bills which have received your consideration have entailed upon you work of a very arduous character, and demanding the closest and most painstaking attention.  
 I am happy to observe that, besides formally confirming the award of the Arbitrators appointed to determine the Northern and Western Boundaries of the Province of Ontario, you have also provided for the Administration of Justice in the extensive territory over which the jurisdiction of my Government is now deemed to extend.  
 The measures which you have passed providing for the regulation of the Refractory for Women, and establishing an Industrial Refractory for Girls, will, I trust, under the Divine blessing, be the means of accomplishing much good, and of preserving many from a career of crime and misery.  
 The further aid which you have decided on granting for drainage purposes, and your amendments of the Drainage Acts, will give an additional encouragement to this important branch of local improvements.  
 The measure authorizing my Government to appoint an Inspector of Fire Insurance Companies, while it will not create any new charge upon the public treasury, will give increased confidence to insurers, and prove beneficial to the institutions thus subjected to supervision.  
 The Act to enable Gas Companies to adopt the new discoveries of science for the supply of artificial light, and the Act to facilitate the incorporation of Steam Heating Companies, are in accordance with the progressive demands of the times, and may in an economic sense prove most valuable to the public.  
 I have been happy to give my assent to measures for the further improvement of the School Law, for the amendment of the Election Laws in the light of the most recent experience of their operation, and for simplifying and improving the laws relating to Juries, and to numerous other reforms.  
 I thank you for the supplies which you have voted for the service of the year. They will be applied with the most careful regard to economy consistent with the public requirements.  
 In bringing to a close this last session of your parliamentary term, I pray that an all-wise Providence may so direct the minds of the people as to cause them to send as their representatives in our next Legislative Assembly men as patriotically and honestly disposed to advance the best interests of their country as those who have hitherto filled that responsible and important position.  
 The tradespeople who have attended to the house-fittings at Eldon Hall have confessed to the learning of some useful improvements from the Princess in the way of hanging pictures and other details. Her Royal Highness' plan of hanging picture-frames is to have two nails instead of one, making it square over the picture, and instead of using cord or ribbon she used wire. Silvered wire is the best for the purpose.

MISCELLANEOUS.

It is said that Mr. James Black of Pesh- urch has killed sixty five foxes during the past three years.  
 Education begins the gentleman, but reading, good society, and reflection must finish him.  
 Do the best you can where you are, and when that is done you will see an opening for something better.  
 The farmer should sow his Peas, keep his U warm, his Hs, kill off the Js, remember what he Cs, take care of the Vs, pay all his Os, teach his boys not to Ts, and take his Es.  
 Fms.—Fond Mother: "Ah, Harry, if you tell lies you'll go to the bottomless pit, where there is fire and brimstone." Harry: (who has medicinal remembrances): "Ma, will there be any treacle there?" (The mother's answer is not transmitted to posterity.)  
 A colored preacher in a Western township gave out the following notice last Sunday: "Brothers and sisters, next Sunday, the Lord willing, there will be baptizing in this place, the candidates being four adults and three adolescents.  
 Diogenes was a good Temperance man. When blamed for throwing a goblet of wine on the ground and wasting so much liquor, he answered: "Had I drunk it there would have been a double waste. I as well as the wine would have been lost."  
 A world-we teacher in Toledo recently replied to an examination question, "Do you think the world is round or flat?" by saying, "Well some people think one way, some another. 'I'll teach round or flat, just as the parents wish."  
 He was a city clerk, and he was trying to amuse himself by questioning a little girl in a big bonnet. "What do they set hens for?" he asked. "To hatch chickens," she promptly replied. "What do they set milk for?" he pursued. "To hatch calves," said she—and she said it in a way that caused the clerk to close the conversation.  
 Ellen Burritt died at Hartford, Ct., on Thursday night, aged 59. He was born in New Cambridge, the son of a shoemaker, and himself for many years a working blacksmith. By industry and perseverance he educated himself, becoming a remarkable linguist. As an eloquent lecturer he early obtained celebrity, his favorite themes being temperance, the amelioration of the working classes, and the establishment of a brotherhood of universal peace. Besides his "Sparks from the Anvil" and "Olive Leaves," which are well known, he contributed to the periodical literature of both England and the United States.  
**IMMIGRATION.**—In the report of the minister of Agriculture we find that the total number of immigrants who came to Canada for the present year—40,122, against 45,285 the preceding year. The immigrants came as follows: By the St. Lawrence, 10,295; by Suspension Bridge and inland ports, including Manitoba, 15,814; Maritime Province points, including Portland, Me., 2,488; entered at Custom Houses with settlers goods, 7,435, of the whole number of 40,532; the total number who settled in Canada was 29,807. The value in money and property brought by the immigrants in 1878 was \$1,501,563, besides tools, implements, &c.  
**WHO SHOULD GO TO MANITOBA.**—A correspondent of the *Globe* writing from Winnipeg gives the following piece of very excellent advice. Everyone intending to remove there should lay it well to heart, and act accordingly. After strictly cautioning farmers against removing there unless they have, at the very least, \$500 after writing, he continues:—"My other object in writing is to emphatically warn that class who have little or no money, and expect to get wages as soon as they land here, that they will be most grievously mistaken. There are ten men for every situation in this city. Bookkeepers, salesmen, and all such are particularly plentiful, and can be seen on every corner in Winnipeg with nothing to do, and no hope of anything of the kind, and all the while either paying high rates for board, or running in debt to their landlords for it. To such I would say, Stay where you are, even if you have nothing to do, as the cost of living here is twice that of Ontario. The average of unemployed salesmen and bookkeepers in this city is greater in proportion to the number of vacancies than in any other town or city in Ontario.  
 A letter is the very worst form of gambling that has ever been invented, and causes more misery and demoralization than any other kind of chance diversion. The proposer, founder, banker, or whatever he may be called, of a lottery, collects a certain sum from the ticket holders. Out of this he devotes a portion to prizes; so that each ticket must, by the rules of ordinary arithmetic, cost more than the chance which it represents is worth. A lottery with 1,100 tickets of \$5 each, and prizes of \$5,000, would give a profit of \$500 to its originators. A man who pays \$5 for a ticket does not see that he pays a tenth more than his chance is worth. If he were to take all the tickets in his own name he would pay \$5,500 and win \$5,000. We know very well that many persons will say in answer to our argument that if a man wins a prize he has secured a profitable return for his money; or in other words, that the loss is comparatively small, and the prize, if it be won, is great. For all that, no man can afford to pay even one tenth more for an article than it is worth. Besides the "proportions of ink" are precisely as great in favor of each one of the many other ticket holders as of his self. It makes no difference how many tickets one buys, or how often he has failed heretofore to win a prize. If one tosses a penny fairly and it comes up heads three times running the chances for the fourth time are still precisely what they were at first—that is, exactly equal. Gamblers always deny this, but no mathematician will. Gambling at best is a disease, and if it cannot be wondrously extirpated, the area of its ravages cannot be limited. When this disease takes the aspect of a lottery, it affects men, women and children, and the pestilence should be stamped out as though it were the Russian plague.—*N. Y. Times.*

**W**ITH the close of its present volume. The Toronto Globe completes the thirty-fifth year of its publication, and its publishers feel that they can look back with satisfaction and pride on the past. The paper has been published for thirty-five years, and during that time it has been a constant witness to the progress of the country. It has seen the growth of the Dominion from a few scattered settlements to a vast and populous Empire. It has seen the development of the West, the opening of the Northwest, and the establishment of a new and fertile province. It has seen the rise of the Dominion to the position of a great and powerful nation. It has seen the progress of civilization, the growth of commerce, and the advancement of the arts and sciences. It has seen the triumph of freedom, the overthrow of tyranny, and the establishment of a just and equitable government.
