A Committee invested with Presbyterial powers, was appointed to the Committee, and Mr. Mcrea was mation devoutly to be wished, that a good forthwith suspended from the office of the deal more of this spirit which has been ministry. Our local contemporary, in com- shown by many of our friends in the Conmenting on this matter, betrays his usual servative ranks would be introduced into ignorance of the genius of Church Courts, the working of party politics. and conveys a false impression of the action of the U. P. Synod on this particular case. The whole question turned upon the duration of future punishment, and not upon the mode, as flippantly insinuated by our contemporary. Upon this question of Christian churches are agreed. In every age of the Church there have been men or, perhaps, from conviction, have emprachave arrived at the truth which till then had been hidden from the world. These more illusory, but the truth has remained And it would be better for the cause truth, the peace of the Church, and the reputation of those men who are thus carried away by novelties in religious things, that when they find themselves out of harmony with the Church or any of the cardinal doctrines of the Christian Faith, they would withdraw from the communion to which they belong and form an Independent society. Still to hold their places and salaries and make use of this vantage ground in propagating heresy and sapping the founda tions of the church which they profess to uphold, is dishonest in the extreme.

THE ELECTIONS. It is with no ordinary feeling of pleasure that we have to congratulate the Sor Riding of Grey and the country at large upon the result of the recent elections. As will be found in another column, Mr Hunter, the Lil eral caniddate in this Riding, has been returned by the large majority of 643 and the Government of Mr. Mowat has been sustained by two to on of the Opposition. Such extraordinary success was not anticipated by the support ers of the Ministry and that the result the contest is so satisfactory is the best proof of the honesty and efficiency of the administration of public fairs for the last eight years in the Prosince of Ontario. There can be no ques tion now as to what the country thinks the National Policy. It is true that the working of the N. P. has nothing to do with Provincial affairs and the Liberal candi still further assure our contemporary that so dates preferred discussing the policy and measures of Mr. Mowat's Government, and and persists in casting about the seeds of standing or falling by them; but the Opposi tion persistently dragged in the Tariff question and appeared always more anxious to discuss it than any purely local questions. This was especially the case with Mr. Fahey who, at his first meeting in the Town Hall, confined himself almost exclusively to Domicion polities, and throughout the Riding never filled to make the N. P. the burden of his soug. It therefore may fairly be concluded that already the pec ple of Ontario see clearly that they were imposed upon last September by the false professions of Tory demagogues and that only the opportunity is wanted to Glenelg retrace the unfortunate step which was Normanby taken on that occasion. We regret to announce that on the appeal to the qualified electors in the section of Arthur Township interested in the by-law for \$7,000 in aid of the Georgian Bay and Wellington Railway was defeated on Mon day last by a majority of sixty-six votes. An impression apparently prevailed that the Directors had sufficient money to complete their scheme, and that the railway would be built whether the people of Arthur assisted or not. They were perfeetly content to allow the line to be constructed and to share in its benefits, but Adams, Maggie Stevenson and C. Greenley, and Davis be authorized to go on with the \$10,000 to aid the S. & H. Railway Co., be not to share in the cost of bringing it along. This is "human nature" probably, and the Directors in their appeal have supplied an opportunity to exemplify it. By the time the scheme is a year older it will become amply apparent to our neighbors that the projectors have not any too much money for the promotion of this laudable enter-
