All his imitators, small and great, have done the same. They profess to derive their commission from God, and claim in place of human learning, the direct teaching of the Spirit, and point to the witness of the Spirit in the conversion of souls under their preaching. This evidence is not to be disparaged when gennine, but the question is, when is it genuine? It is questionable means are resorted to for get ting converts, and when gotten they are found to be like the barren fig tree. clerical friend said that out of about one hundred converts 'rushed' into three or four churches by such means, he did not know of one who had not fallen away or been thrown off by the churches which received them, and another says that the harvest of about a hundred converts reaped by his church, added neither spiritual, intellectual nor financial strength." This is a very severe indictment brought by Mr. Gray, himself a lay evangelist, against the class to which he belongs. But the question is what is to be done with all this zeal-no doubt genuine and well-intentioned on the part of some-which developes itself from forenoon at St. James' Cathedral, and the evening the Marquis attended St. Andrew's Church. > A farmer named Desjardins, residing in the township of Clarence, drove, one day supply of mineral water. After getting it. he left for home. Not turning up at the time expected, his family naturally became very anxious about him, and reported the matter to the neighbors, who turned out en masse Saturday in search of him. His dead body, as well as that of his horses, was found at the bottom of a steep embankment. It is supposed that Desjardins fell sleep, and, the horses getting out of the course, were precipitated with the driver a distance of several hundred feet. Death must have been instantaneous, his face being badly mutilated. He leaves a wife and nine small children, who relied on him for support. An inquest was held, and a verdict returned in accordance with the
