## Durham, September 18, 1879.

-The American Association of Engineers met at Moutreal on Tuesday last. A numher of distinguished scientists are expected to be present, and the session, which will last for a few days will no doubt be very interesting and instructive.

The show of live stock especially is non-elective set of persons to exercise any expected to be particularly good, and equal centrol over the public purse would be disto anything before made at Guelph.

-Further news from the East confirmthe worst fears entertained as to the fate of the British Embassy at Cabul. Reinforcements have been forwarded from India, as quickly as possible, but the organization of the troops and the transport service seems to be in an inextricable state of confusion. To complicate the matter still worse, good reason is held for believing that the revolt of the Afghan troops has been aided and abetted by the agents of Russia.

-A spirit of lawlessness seems to have got hold of the people of Quebec. Rowdyi m is rampant, and the civic authorities seem to be unable or unwilling to put down. The Blake Act has been put in force, but the mob have got the idea that the Chief Magistrate winks at their procoedings, and so far a reign of terror prevails. The example of Messrs. Chapleau and De Boucherville in Parliament will encourage the rowdies outside.
