REVIEW

Durham, December 11, 1879.

-It is stated in the Official Gazette that application will be made to Parliament for about the middle of its course, uninterrupt-

ings in the city of Toronto is being discuss- sections, and the lack of school facilities Machine, made at the Durham Foundry. head. Both young man and boy are ings at present in use are, as the Globe When to these we add the ceaseless the machine. If any one can beat this we better of them in the future. puts it, "too limited in capacity, extremely strife and contention, bickerings and ill-will would like to hear of it. unhealthy, totally unprovided with fire which arise out of school matters, and so proof chambers, and so dilapidated as to be seriously disturb the harmony and good in serious danger of tumbling suddenly" will which should prevail among the people down. If these things are so, -and we have there is enough said to show, that some no reason to doubt the correctness of our change in the present system is required Contemporary's statements, and consider- It may be reasonably doubted whether any ing the valuable Liberary now in the system would meet every contingency. But had his leg broken by being eaught on a Judge Macpherson. belonging to the various department which | conclusively proves that it is infinitely suif destroyed by fire would entail great loss perior to that of school sections, and much ected the better.

-Professor Proctor, a well-known and distinguished Astronomer, has been recently lecturing in New York and Montreal on Astronomy, and the other day took as the of Egypt which is supposed, and on good authority, to have been built during the reign of Cheops about 2123 B. C. or according to Prof. Proctor 3370 B. C. This inmense structure which has a base of 763t. square, rises to the height of St. Paul's Cathedral Lundon, and is supposed to have required 100,000 men for fifty years in the building of it. Various opinions have been held as to the use of these structures, as that they were erected for astronomical purposes, for granaries for resisting the encroachments of the sands of the deserts or for the sepulchres of the Kings of Egypt, ally received as the correct one. However the Astrologers to make more perfect o'sservations of the stars, whic's these a scient scientists professed to be able to govern. and thereby, learn something definite of their future fortunes. Prof. Smyth, of of Township Boards vs. School Sections. Aberdeen and others, suppose that the Great Pyramid of Cheops contains certain secret signs from which he differs that in 1882 something serious will happen in re ference to the destiny of the human race perhaps the end of the world. But Prof. Proctor has on sympathy with this theory.

MUNICIPAL MATTERS.

TOWNSHIP BOARDS.

The Public School system of Ontario is admitted to combine e.ficiency and economy in a higher degree than that of any other Teacher Wanted, School Section No. 7, country. However, experience has shown, that the system as generally in force is capable of improvement, and that it contains defects which very much hinder the ificulty of collecting subscriptions of this progress of Education. One of these is the system of School Sections. No one who has given any attention to the working of he Schools in Rural Sections can fail to be mpressed with the very little real progress made, in the cause of Education ; and that this is chiefly due to the constant change Priceville, of teachers. There are many Boards of Glenely. Trustees who in their school arrangements Holstein have a single eye to the interests of the pupils; but while this is the case, there are too many who are influenced by narrow prejudices and a still narrower idea of economy in their dealings with teachers When a teacher has shown himself to be inefficient, most surely the sooner he is dis charged the better for himself and for the School : but when a teacher does his world faithfully and well, he should receive iberal remuneration for his services, an be retained in his position so long as the School is found to prosper under his charge. To remove such a teacher for the matter
