

New Temple at Moscow.

(From the Parisian, Dec. 18.) The Khram Spasitel'ya, or Temple of our Saviour, at Moscow, is rapidly approaching completion. The building was begun so far back as 1833, and was designed in commemoration of the French expulsion from Moscow. Nearly 4,000 labourers, for a month, were employed in digging out the ground for the foundations, and considerable energy was displayed in building the base; but, after a while, operations languished, and the work has gone on, by fits and starts, until it has now reached a stage when the architect can promise its completion next August, in readiness for the twenty-fifth anniversary of the Emperor's coronation. The height of the structure is 288 feet, and the style of architecture is the Russo-Byzantine, the building being in the form of a Greek cross surrounded by five cupolas, one at each corner, and a large one, or dome, in the centre. The roof and the framework of the cupolas weigh 1,800 tons, and the gilding on the latter has already consumed more than half a ton of gold-leaf. Above the centre cupola is a massive bronze cross, which can be seen from every part of Moscow. The bronze frames of the windows, each nine yards high, weigh nearly three tons, and the hinges of the bronze doors have to support five and one-quarter tons of metal. Inside, the walls are gorgeously decorated in the usual style of Russian churches, and contain a number of jasper pillars, each of which cost upward of £2,000. The total cost of this wonderful building is estimated to exceed 20,000,000 rubles, or £2,500,000. But this is not all. Recently the architect reported that a block of houses in proximity to the temple was detrimental to one of the aspects, and, as a mere matter of course, the Synod voted £200,000 to demolish the buildings, and to construct in their place a terrace. It must not be forgotten that this is the second great cathedral which Russia has raised during the last sixty years, the famous one of St. Isaac's, in St. Petersburg, having been begun in 1819, and consecrated in 1828, after an expenditure of 36,000,000 rubles, or £4,500,000. A third cathedral, not quite so large, is also rising at Nijni Novgorod, and will involve an outlay of £2,000,000 before completion.

Too PARTICULAR.—A party who lives near a post office not far from Guelph, wanted to remit some twelve dollars to a party in a northern county. Thinking that by depositing the letter in Guelph post office it would reach its destination sooner than if posted at his own office, he accordingly handed the letter to a railroad navvies who was just on his way to Guelph and instructed him to put it in the office here and register it. The navvy was only to help to oblige the party. The sender was somewhat surprised, a few days after, by receiving a letter from the party to whom the letter had been sent, stating that the letter had been received but it contained no money. The post office authorities were consulted, and an investigation revealed the fact that the original envelope had been destroyed and another substituted, showing conclusively that the navvy had abstracted the money, procured another envelope and enclosed only the letter. The sender would like to find the navvy. Moral, patronize your own post office.—Guelph Mercury.

MISCELLANEOUS.

Last year was a prosperous one for Colorado. The output of ore in the State is valued at nearly \$12,000,000.

Five of the passengers and six of the crew of the lost steamer Borussia were brought to Baltimore by an Italian barque on Saturday morning, having been picked up in an open boat 250 miles off the Azores.

The British public are slow to believe in the success of Edison's electric light discoveries. They have no faith in Edison, but an unbounded faith in coal gas. The timid ones who offer gas stocks meet with ready purchasers.

A highly respected young lady of Lyons, N. Y., entered her father's store on Saturday and stole him through the temple, causing instant death. Then, reloading the pistol, she shot herself fatally through the head. It is supposed that she had a fit of insanity.

Over four hundred villagers have been driven from their homes by the flood near Nancy, France. At Loban Island, Austria, eleven have been drowned by the overflow of the Danube. In Paris still more damage is reported to have been caused by the rise of the Seine.

In Nordenskiöld's Arctic voyage of 1879 it is stated that beads of a West Indian leguminous tree (Bauhinia gigalobata) were found at the entrance to Hinopen Strait that had been brought there by the sea, thus proving, if further proof were wanting, that there is a current extending from the Tropics to the Arctic Circle.

Little Franky's mother was very pious, but she was an invalid; and so his amitie, who was also pious, looked after his religious instruction, and let no occasion pass to enforce some precept. One day Franky suddenly said:—"Oh, dear! I wish I had wings!" This angelic inspiration was regarded with great joy by the two sisters, and they eagerly asked why he wished for wings. "Oh," said Franky, "I'd fly up into the air and take Aunt Susan with me, and when I couldn't go any higher I'd let her drop."

A curious case of the liability of a father for his son's debts arose lately in the Edinburgh Small Debts Court. A tobaccoist sued a man for \$5.50, being the amount incurred by his son for "tobacco, pipes, lights, ginger beer, &c." during a period of three weeks. The parent appeared and denied liability, on the ground that the articles specified in the account were not necessary for the maintenance of his son, who was sixteen years of age, and lived apart from him. The Court held that the goods supplied were not necessary, and therefore absolved the father, and gave decree against the son.

The township of Nottawa is about entering an action against the H. & N. W., to compel the Company to keep station-masters at Nottawa and Glen Huron.

Temperance.

PROHIBITION IN MANITOBA.—An important temperance project is about to be carried out in Manitoba. Last year a branch of the Dominion Temperance Alliance was formed in the province, and a good deal of agitation has been carried on in Winnipeg and throughout the counties. The most promising field was found to be the County of Marquette, which comprises about one-half of the area of the whole province, and includes over one-third of the entire population. The country has been mostly taken up during the last few years by farmers from Ontario and the older provinces, who are regarded as the most intelligent portion of the population of the province. It has been determined to submit the Scott Temperance Act in this country, and those who have had the best opportunities for judging of the feelings of the people believe it will carry by a large majority. The act could be carried in both the Counties of Selkirk and Lisgar, and the majority of the people are anxious for prohibition, but they believe that it would be of no use, as Winnipeg is practically the market town of the two counties, and most of the liquor used is bought there. As Winnipeg is a separate corporation and derives a considerable part of its revenue from this trade it would be impossible to carry the Act in the city. A large settlement exists in the North-West Territory just at the borders of Manitoba, which it has been proposed to annex to Manitoba, but the people refuse, as at present they have absolute prohibition and they do not wish to surrender it. It is proposed to have the Act so amended that it can be carried by the Province as a whole, including Winnipeg.—Montreal Witness.

A COUNTY WITHOUT A DRUMMER.—The inhabitants of Edwards county, Ill., do not support any temperance lectures, or spend their time in talking about temperance. They decided twenty-five years ago that no liquor should be sold in the county, and since that day they have sent but one person to the penitentiary, and he committed a crime while drunk with whiskey procured in an adjoining county; they support but two paupers and their jail is empty most of the time. Their taxes are 23 per cent. lower than the adjoining counties, and their terms of court occupy three days in the year, while their tax rolls show that they return more property than any other county in the State of equal population. This is a case where the minority cannot complain of any invasion of private right, for the people are unanimously opposed to license under any circumstances. Families seek the locality as a good place to bring up their children. When confronted with the statistics of this model county, even old toppers admit there is something in it; but it evidently is not whiskey.—The Christian.

WHISKEY DRINKING.—The distillers would not have made and bottled 71,892,621 gallons of whiskey and other such fiery potables during the last fiscal year, if they had not an intelligent confidence in their ability to find customers at paying prices. It is a relief to know that 15,000,000 gallons or so are sent across the seas to fire the brains and gnaw the stomachs of the effete despots and their subjects; but even with this deduction, there was on hand the enormous quantity of 56,893,000 gallons (in round numbers) of whiskey and its congeners for home consumption. Even if all Americans took their liquor straight—which they don't—and if the average price of a drink was ten cents—which we are not informed is not the fact—the gurgling of the last swallow of this colossal potato down the free and equal American throat will represent an expenditure of between \$341,000,000 and \$455,000,000 according to the size of the average bar drink. And the distilleries are still at work.—N. Y. Sun.

ALCOHOL IN HOSPITALS.—Dr. Webster, who has banished alcohol from St. George's Infirmary, London, with a saving of more than £500 a year, says: "So far no bad results have been manifested; on the contrary, several good ones are apparent." It is clear from such experiments that all the money expended for beer and spirits in the hospitals and work-houses in the country is simply wasted. Paupers and patients would be better without it.

Mrs. W. Smith, of Brussels, took some stramonium in mistake for pennyroyal. The poison took immediate effect, and for many hours her life was despaired of. Finally an antidote was successfully administered.

The Montreal Gazette understands that it is not the intention of the Government to remove the Geological Museum from Montreal. There are a large number of duplicates, out of which a very fair Museum could be established in the city of Ottawa.

Information has been received of a horrible murder which occurred at Maniwaki, about one hundred miles north of Ottawa on the Gatineau. It appears that a man named Brisbois quarrelled with his partner and literally chopped him to pieces with an axe. The murderer has escaped.

The hungry dream of feasts, the thirst of water, the drooping of drowning, the sick of health, and if suffering from disease of the kidneys, etc., use Victoria Buchu and Uva Ursi. If taken in time, this great medicine will prevent Bright's disease of the kidneys, diabetes, etc., and is a positive specific in all diseases of the urinary system. For sale by all dealers.—108

Five years ago Hugh Copel, of Dundas county, went to Manitoba with \$400 in his pocket. He now owns over 400 acres of fine land near Emerson. He had 150 acres under crop last year, and harvested over 3,000 bushels of grain, besides roots and vegetables and a fair bank account.

A POSITIVE FACT.—Nervousness is the cause of feebleness, or the lack of stability of the nervous system, as distinguished from the rest of the body. It is pre-eminently a disease, and more widely spread through the Northern and Eastern part of the United States and the Dominion of Canada than in any other part of the world. We will not stop to say why this is the case, but we do emphatically say the Victoria Compound Syrup of Hypophosphites will be found an invaluable medicine for all parties afflicted with Nervousness, Dyspepsia, Consumption, the feeble Nutrition, General debility, or weakness of the whole system. One of its first effects is an increase of the nervous or vital energy, followed by a feeling of unusual comfort and strength. For sale by all dealers.—108
