of the House of Assembly at Toronto it is such as those already mentioned, are value- Bentinck and not in Glenelg, as stated last stated that on Monday of last week, no less less, or nearly so, when used alone, but week. than six messengers were off duty and on that the best results are obtained when the sick list. We have no information as these are applied to the soil in conjunction to the state of health of the M. P. P.s. but with good barn-yard manure-a mixture reasoning from the lesser to the greater, of manure and gypsum producing the they must have suffered seriously in health largest yield of grain and straw, but the during the past six weeks. The inhalation addition of nitrate of soda appearing to have of foul gasses may account for the curious some peculiar effect in filling the heads propensities manifested by the leader of of grain, or every part of each head, more the opposition and his followers.

-Our readers will be glad to know that arrangements are in progress by which it is expected that the Georgian Bay and Wellington Railway will be completed and put into running order within a few months. On this subject the Mount Forest Examiner says :- During the latter part of last week, at Montreal, terms of an exceedingly liberal character were agreed to between Mr. Hickson, the General Manager of the Grand Trunk Railway, and representatives of the Georgian Bay and Wellington, for the completion and running of the latter by the end of July next. The proposal includes the supplying and laying of the iron from Palmerston to Durham. via Mount Forest, by the Grand Trunk Company-connection benig effected with the Grand Trunk system at Stratford by means of the Stratford and Huron Railway at Palmerston.

It will be reinterests of the people, present or future. friends are conserved.

-The Halifax Chamber of Commerce is crying out against the N. P. One member, a high Tory, objects to the duties on dry goods, and very truly says, that no industry should receive protection to the extent of 70 per cent., such as woollens and cottons were receiving at the present time. Another holds that the duties on oil and corn too great, and that that upon coal was too little, while all were agreed that the Government had deceived the people of Nova Scotia as to the steps to be taken to make Halifax a winter port. It is satisfactory thus to observe that bitter experience is gradually enlightening the people on the absurdities and follies of the National Policy. The Nova Scotian, o all sections of the people, should have opposed the N. P., for while it might benefit the few large coal men, it was sure to press heavily upon every other inhabitant of the Province. But they swallowed the no trum, holus bolus, in spite of the mos convincing arguments, and now they are reaping the reward of their folly.
